Hi – This is a placeholder for a meeting with intergov associations to discuss IRA/RFIs.

We'll have a draft agenda tomorrow, and will send a reminder with the draft agenda to the intergov associations tomorrow as well.

You OK with this as the agency statement? This has been approved by SG office.

We are reviewing the Supreme Court's decision. EPA is committed to using the full scope of its existing authorities to protect public health and significantly reduce environmental pollution, which is in alignment with the growing clean energy economy.

Hi Cynthia – I think Joe figured out how to answer this correctly – it is sort of a "have you stopped beating your wife yet?" question where you want to disagree with the implied premise in the question. I think you stimulated a really valuable conversation that reopened doors that might have been prematurely closed and at least drew us into a

conversation that helped us better understand each other's thoughts and ambitions for the program. So thank you, and no trash was even considered to have been talked....

Enjoy the holiday!

Tim

Tomas – I responded to your comments with a couple of marginal notes. Could I ask you or Kevin to take the pen for the next few hours in get this into something that approaches a final, and wraps in the suggestion I made below with respect to the OAP partnership piece? Trying to work in Sharepoint at a venue with dodgy WIFI through a couple of layers of international security screens is rather challenging. Thanks.

Thanks, Everyone, for putting together such an excellent draft. I've gone into the Sharepoint and reorganized the great material you all provided to create a format that might be more recognizable to the WH as a first draft of a Fact Sheet they could issue along the lines we discussed on Friday, albeit refracted through our more informed understanding of EPA's CAA toolbox, authorities, and mission, and of the role of our federal government partners.

OAP – I'm wondering if we could say something more specific about our Partnership Programs and technical tools, which can be an important component of the federal government's partnership with states and localities adopting and implementing clean energy and efficiency policies.

Thanks.

Importance: High

Sorry about this, but as soon as one of you gets this, could you please call me or otherwise make sure that I have the latest version of the Sharepoint? The only link in my inbox is in Kevin's original email, and while I see new-to-me comments from Tomas, I am not seeing anything that I can identify as Suzi's additions or Suzi and Nick's comments. I need to get a clean version of whatever the most up-to-date draft of this is as early this AM as possible to Dan and Janet and I need time to review it before I do that. Standing by on Outlook and at Ex. 6 Personal Privacy (PP) thanks.

PS In the document that I do have access to, I revised the bullet which Ex. 5 Deliberative Process (DP)

Thanks Joe. I've cleaned up the document (leaving only margin comments identifying a few areas that remain to be filled in or that flag new text). Please find a new Sharepoint file attached. Would greatly welcome improvements on this version. Best,

Tomás

Tomas – I responded to your comments with a couple of marginal notes. Could I ask you or Kevin to take the pen for the next few hours in get this into something that approaches a final, and wraps in the suggestion I made below with respect to the OAP partnership piece? Trying to work in Sharepoint at a venue with dodgy WIFI through a couple of layers of international security screens is rather challenging. Thanks.

Thanks, Everyone, for putting together such an excellent draft. I've gone into the Sharepoint and reorganized the great material you all provided to create a format that might be more recognizable to the WH as a first draft of a Fact Sheet they could issue along the lines we discussed on Friday, albeit refracted through our more informed understanding of EPA's CAA toolbox, authorities, and mission, and of the role of our federal government partners.

OAP – I'm wondering if we could say something Ex. 5 Deliberative Process (DP)

Ex. 5 Deliberative Process (DP)

Thanks.

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY
WASHINGTON, D.C. 20460

OFFICE OF
AIR AND RADIATION

The Honorable Harold Rogers
U.S. House of Representatives
Washington, D.C. 20515

Dear Congressman Rogers:

Thank you for your letter of June 14, 2022, to the U.S. Environmental Protection Agency (EPA) providing comments on the Agency's proposed 2015 Good Neighbor Plan rulemaking titled, "Federal Implementation Plan Addressing Regional Ozone Transport for the 2015 Ozone NAAQS" (Proposed Rule, Docket No. EPA-HQ-OAR-2021-0668). The Administrator has asked that I respond on his behalf.

We have included a copy of your letter in the rulemaking docket. EPA will evaluate and carefully consider your comments in the rule development process and will provide a complete response at the time of the final rule. In the meantime, EPA staff remain available to answer clarifying technical questions, and the Agency has provided and will continue to provide timely responses to inquiries related to the proposed rule.

In consideration of multiple requests for an extension of the comment period on the proposed action beyond the original 61-day period from the date the Proposed Rule published in the *Federal Register*, which would have ended on June 6, 2022,[1] EPA extended the comment period until June 21, 2022.[2] In granting this request, EPA was cognizant of the scope of issues on which the Agency requested comment in the preamble, and the substantial amount of technical information related to the proposed rule that the Agency made available for public inspection.

[1] 87 FR 20036 (April 6, 2022).
[2] This letter does not reflect any final determination regarding the content or timing of a final action, nor does this letter preclude EPA from later determining that an additional opportunity for public comment may be warranted. This letter does not constitute an appealable determination. *See* 42 U.S.C. § 7607(d)(8).

EPA must address good neighbor obligations pursuant to 42 U.S.C. § 7410(a)(2)(D)(i)(I) as expeditiously as practicable and in alignment with the attainment schedule for downwind areas.[3] EPA is working diligently to finalize a transport rule in advance of the 2023 ozone season and with sufficient lead time for sources to meet additional proposed compliance obligations beginning in the 2026 ozone season.[4] Therefore, EPA must balance the importance of ensuring the public has meaningful opportunity to comment with Congress' direction for expeditious action to address good neighbor obligations.[5]

EPA has provided substantive information to support the public comment process for this proposed rule, even before the proposal published in the *Federal Register* and the docket opened. For example, on January 19, 2022, we released on our website and notified a wide range of stakeholders of the availability of both the modeling results for 2023 and 2026 (including contribution data) along with many key underlying input files.[6] Further, the 2016-based meteorology and boundary conditions used in the modeling have been available through the 2016v1 platform, which was used for the Revised Cross-State Air Pollution Rule (CSAPR) Update (proposed in the Fall of 2020). The updated emissions inventory files used in the current modeling were publicly released September 21, 2021, for stakeholder feedback, and have been available on our website since that time.[7] The CAMx modeling software that we used has likewise been publicly available for over a year. CAMx version 7.10 was released by the model developer, Ramboll, in December 2020.

EPA also took steps to enhance public awareness and access to key materials associated with the proposed rule in the weeks before it published in the *Federal Register*. We conducted outreach efforts, including stakeholder notification calls and emails, associated with this proposal on March 10, 2022. On March 11, 2022, EPA posted on our website materials associated with the proposed rulemaking, including a prepublication version of the preamble and regulatory text, technical support documents, and other supporting materials,[8] allowing the public to begin reviewing these materials. To further enhance public understanding of the proposal, EPA held widely attended stakeholder informational webinars on the proposed rule on March 29, 30, and 31, 2022.

EPA is committed to implementing the good neighbor provision as expeditiously as practicable and by the applicable attainment dates for downwind areas. EPA believes that the comment period provided sufficient time for the public to provide meaningful feedback on the proposed rule while allowing the Agency to proceed with timely development of the final rule and that providing an extension to the comment period beyond the previously extended June 21, 2022, date would have delayed that development.

---

[3] *See Wisconsin v. EPA*, 938 F.3d 303, 313-20 (D.C. Cir. 2019).
[4] *See* 87 FR at 20039-40, 20100-102
[5] The original comment period met the minimum requirements of the Clean Air Act. *See* 42 U.S.C. § 7607(d)(5) and (h). EPA held a full-day public hearing on April 21, 2022.
[6] *See https://www.epa.gov/scram/photochemical-modeling-applications*.
[7] See https://www.epa.gov/air-emissions-modeling/2016v2-platform.
[8] *See https://www.epa.gov/csapr/good-neighbor-plan-2015-ozone-naaqs*.

Again, thank you for your letter. If you have further questions, please contact me or your staff may contact Karen Thundiyil in EPA's Office of Congressional and Intergovernmental Relations at *thundiyil.karen@epa.gov* or (202) 564-1142.

Sincerely,

Joseph Goffman

Hi Thierry –

Over the weekend, Joe and I texted about finding 15 minutes to discuss the IRA execution and how my role is best considered in that context. He offered that the least inconvenient time for him might be later this week, and said he'd mention it to you. Following up to see if there is a time that is possible?

Best,

Tim

Thanks, Cynthia. I am going to send this along to the AO shortly, with a cover note along the lines of the below, including recommending that we put this last on the agenda of this afternoon's meeting. Following up on the conversation you and I just had, and assuming that the Friday meeting with the Administrator concludes with some semblance of resolution as to those steps outlined in this work plan that we share with him, let's spend 15 minutes next week constructing a table of roles and assignments within OAR and as between OAR and various AO personnel. As we discussed some in the AO seem to be confused on that score. ; -). Thanks, again.

Subject: Revised Fund work plan

Joe –

Here is revised work plan responding to comments for your review and below is a possible cover email to send this. It would probably be better not to make this a big topic of discussion at our Tuesday meeting because I think we need to focus on the hiring plan and the candidate list, but in case it makes sense to forward this in advance, here it is. I did not do in red line but the only things that are semi new are highlighted.

Revised initial steps work plan GHG Fund.docx

Draft email

Dan –

Attached is a revised initial work plan for the fund, responding to the comments from the AO's office on the prior draft. Couple things to note:

-
- **Ex. 5 Deliberative Process (DP)**

Subject: Draft RFI

Hi Joe and Cynthia,
Below is the link to the draft RFI notice. Tim has reviewed and I have left some comments for him.
DRAFT-Notice and Request for Information.docx
Please let me know if you'd like to take a look today – if so, I'd ask if you can please enter any suggested edits in tracked changes.
I'm going to ask some career folks to take a look at this before sending it to Dan, and inquire about the process for this type of documents. I reviewed many notices and I am almost certain that this needs to be signed by a program director (with action memo, etc.) so we will need to confirm that the AO could handle this. I don't know.
Thanks.

Attachments: Fall 2022- questions for JGoffman at nacaa meeting.docx

Thanks, Miles. This is helpful as always. Of course I am prepared to drone on about OAR's packed agenda, but like you I expect that a conversation shaped by questions would be more productive. See you soon.

Sent from my iPhone

On Oct 18, 2022, at 11:18 AM, Miles Keogh <mkeogh@4cleanair.org> wrote:

Hi Joe,

I'm really looking forward to seeing you tomorrow, and I'm so appreciative of your making the time to talk with the state and local clean air agencies at the NACAA meeting! By way of reminder, you're on our agenda from 1:15 – 2:00 Eastern, in Salon J & K of the hotel which is up an escalator from the hotel lobby. My colleague Karen Mongoven will be keeping an eye out for you to help you get where you're going (if you plan to come for more of the meeting, let me know so I can warn her – you and any of your EPA colleagues are very welcome among us at this meeting, for as long as short as you can spare.)

Rollin Sachs, our local agency co-president and the air director from Johnson County KS, will be introducing you and moderating this with you. As you'd expect from this group of overachievers, the NACAA members wanted me to let you know in advance some of the questions we've been thinking about. This isn't a full list because we want to make it possible to have folks in the room ask their questions too, and not to overscript the conversation.

So, I wonder if as you're making opening remarks, you could leave lots of space to take these on? A policy and priorities download from you is always helpful and super informative, but this might be a good way to know what folks in the room are thinking about and care most about. Rollin will be ready to ping you with these and whatever else comes up during the short time we have together, and we'll also have time later in our agenda to dive deeper on IRA, EJ issues, and NAAQS implementation with your expert EPA colleagues.

Thanks again, Joe, I always learn so much from interacting with you, and I know this is a wonderfully valuable opportunity for the folks in the agencies too.

Wishing you well, Miles

Administrator

Mayor Acknowledges Administrator Regan's Role In Jackson Water Crisis Response.

The **Washington Post** (12/7) provides a transcript of the latest **podcast** from the Washington Post Live "This is Climate" series. During the podcast, The Post interviews Jackson, Mississippi Mayor Chokwe Lumumba, who said, "I think that I would be remiss if I didn't acknowledge the role that the EPA administrator, Administrator Regan, played in this. We have had many discussions, some just one-on-one, where we have talked, you know, in detail over what this circumstance looks like for Jackson." Lumumba added, "And we've also talked about the fact that this is bigger than Jackson. We understand that there are communities just like Jackson that are facing or will soon face similar challenges to what we are now enduring right now."

Back to top ▲

Air

Salt Lake City's Efforts To Fight Pollution Face New Challenge In Toxic Dust.

NBC News (12/7) reports, "Parts of the Great Salt Lake hardly resembled a lake at all this fall." Water levels in October "fell to the lowest levels on record, exposing much of the lakebed and creating conditions for storms of dust – laden with toxic metals – that now threaten the 2 million people living nearby." Researchers "are racing to understand this new hazard, which adds a new layer of air pollution concern for the Salt Lake City area and threatens to dismantle the progress made to improve air quality in a region where oil refineries, a power plant and a gravel mine are part of the city skyline and the surrounding mountains trap pollution."

Researchers Say Smoke From Wildfires Reduces California's Solar Energy Generation.

Bloomberg (12/7, Baker) reports researchers from the National Center for Atmospheric Research (NCAR) said in a study that smoke from California's wildfires can reduce the state's solar energy generation. Scientists "examined a period in September 2020, when smoke from some of the largest fires in California history shrouded much of the state in a sickly orange haze." Thick smoke "cut solar energy production 10% to 30% between noon and 4 p.m., the researchers found." Additionally, the forecasts "that utilities and grid managers use to plan for electricity demand were thrown off by the smoke. Actual solar production averaged 27% less than forecasts, the researchers found." In a statement, NCAR scientist Timothy Juliano said, "Given the increase in large wildfires and society's greater reliance on solar energy, even regions far downwind of fires may need to consider the potential impacts of smoke."

Back to top ▲

Climate Change

Kerry Says He Has "No Plans" To Exit Climate Envoy Post.

The **New York Times** (12/7, Friedman) reports John Kerry, President Biden's climate envoy, "was evasive when discussing his future on Wednesday, saying he had 'no plans' to step down, but he would not say if he hoped to continue to represent the country in future global climate talks." Kerry "said he intended to talk with Mr. Biden next week 'about the road ahead,'" but also "said he was making no moves for the time being." Kerry said, "I've made no plans other than to try to complete the task." The **AP** (12/7, Borenstein) also reports.

Vanguard Quits Climate Alliance In Blow To Net Zero Project.

The **Financial Times** (12/7) reports, "Vanguard is pulling out of the main financial alliance on tackling climate change at a time when Republicans in the US have stepped up their..."

Back to top ▲

Editorial/Op Ed/ Commentary/Letters

Editorial: EPA May Finally Nix Pebble Mine In Alaska.

The **Seattle Times** (12/7) writes in an editorial that the EPA "might finally drive a stake through the heart of the Pebble Mine proposed for land on Alaska's Bristol Bay. Let's hope it succeeds." They add, "We've been here before, but every time the mine appears doomed, it rises like the undead monster that it is."

Back to top ▲

Energy Issues

Illinois Comes In 16th In Annual Ranking Of States' Energy Efficiency.

The **Chicago Tribune** (12/6) reports, "Illinois came in No. 16 in an annual energy efficiency ranking, behind national leaders such as California and Massachusetts, as well as the Midwest's top performers, Minnesota and Michigan." Illinois "got credit for its ambitious climate bill, passed in 2021, according to the American Council for an Energy-Efficient Economy, the nonprofit research organization that publishes the report containing the ranking."

Permitting Reform Efforts Suffer Another Setback.

The **Houston Chronicle** (12/7, Osborne) reports, "Efforts to speed up federal permitting for large infrastructure projects like pipelines and power lines suffered another setback Tuesday evening after Democrats and Republicans declined to include West Virginia Sen. Joe Manchin's permitting legislation in their year-end defense spending bill." Democratic leaders "had been in discussions about including permitting reform in the National Defense Authorization Act, an annual spending bill that funds the U.S. military. But late Tuesday the House and Senate Armed Services Committees released text for the legislation without provision to speed up a federal permitting process that takes years to complete."

Politico (12/7, Richards) says, "The must-pass defense bill was likely Manchin's best shot at passing his proposal to fast-track energy and infrastructure projects through federal environmental reviews. Conservatives like Manchin have long complained that the permitting pipeline is clogged by slow-walking bureaucrats and activist opposition to fossil fuels."

The **Washington Post** (12/7, Joselow) says "Manchin's refusal to hold a confirmation hearing for the chairman of the Federal Energy Regulatory Commission could further undermine his own efforts to build out America's transmission infrastructure, experts say."

The Hill (12/7) also carries coverage.

Ohio State Senate Advances Bill Labelling Natural Gas "Green Energy."

The **Columbus (OH) Dispatch** (12/7, Balmert) reports the Ohio state Senate voted 22-7 Wednesday to advance natural gas-related revisions to House Bill 507, which is primarily about poultry sales, to the state House for approval. The changes would label natural gas as "green energy" and require lawmakers to consider proposal for hydraulic fracturing projects on state lands.

Investigators File Warrants, Find Casings As Probe Into North Carolina Grid Sabotage Continues.

ABC World News Tonight (12/7, 6:40 p.m. EST, story 5, 1:20, Muir) reported "a law enforcement source investigating the attack on two electrical substations in Moore County, North Carolina" has revealed that "federal search warrants have been filed, but" the source "did not say whether they were related to a person or people local to the area."

WRAL-TV Raleigh, NC (12/7, Fisher) reports investigators are "hoping surveillance video from homes and businesses will help lead them" to the persons who fired at the two substations, and "confirm they are scrubbing through the video looking for suspicious activity." The **Raleigh (NC) News & Observer** (12/7, Dean, Cataudella) reports that the FBI on Wednesday issued a "Seeking Information" poster related to the attack, and Gov. Roy Cooper (D-NC) "announced Wednesday that awards totaling $75,000 are being offered to those who provide information leading to an arrest and conviction of whoever is responsible for destroying the electric substations."

Biden Administration Proposes Fossil Fuel Ban For Federal Buildings.

Bloomberg (12/7, Natter) reports the Biden Administration "is poised to ban federal buildings from using fossil fuels, adding the government's heft to a growing electrification movement that has natural gas distributors on the defensive." New federal buildings "would be required to be fossil-fuel free by 2030 under an Energy Department proposal announced Wednesday. The plan, which also applies to federal buildings that undergo renovation, would start in 2025 by mandating buildings reduce their on-site emissions associated with energy consumption by 90% relative to 2003 levels." Energy Secretary Jennifer M. Granholm said, "Ridding pollution from our buildings and adopting clean electricity are some of the most cost-effective and future-oriented solutions we have to combat climate change." **CNBC** (12/7, Newburger) reports Granholm said, "We would be setting a gold standard for new construction across America."

The Hill (12/7) reports natural gas trade groups "took umbrage at the proposal to fully electrify all new federal buildings and eliminate the use of natural gas." In a statement, American Gas Association President and CEO Karen Harbert said, "Eliminating natural gas in federal buildings is an impractical, unscientific and expensive idea that will have no environmental benefit. In reality, the demand for electricity fueled by natural gas will only increase and the costs will be borne by every taxpayer." Harbert added, "The American Gas Association supports the goal of lower emissions and is investing every day

to continue to decarbonize our systems. AGA will thoroughly evaluate the proposal and vigorously participate in the public comment process."

California Offshore Wind Auction Ends With Five Companies Winning Leases.

Bloomberg (12/7) reports, "Renewable-power developers spent $757 million buying the rights to install floating wind turbines off the California coast, marking the second-largest US auction of its kind as companies clamor to provide clean energy to the nation's most populous state." Two days after bidding began, "five companies nabbed the Pacific leases, setting the stage for development later this decade: Equinor Wind US LLC, Invenergy California Offshore LLC, Central California Offshore LLC (a joint venture of EDP Renewables North America LLC, Engie SA and Canada Pension Plan Investment Board), RWE Offshore Wind Holdings LLC and California North Floating LLC, a unit of Copenhagen Infrastructure Partners P/S."

In an editorial, the **Los Angeles Times** (12/7) argues this is the "type of project California will increasingly have to pursue to generate enough carbon-free electricity to meet its climate and energy targets."

The Hill (12/7, Udasin) says the lease sale "constitutes a significant leap forward in efforts by President Biden to promote wind energy. Biden had set a goal of deploying 30 gigawatts of offshore wind capacity by 2030."

Additional coverage provided by **AP** (12/8, Flaccus), **Reuters** (12/7, Groom), **CNBC** (12/7, Newburger), **E&E Publishing** (12/7, Richards), **Utility Dive** (12/7), and **Energy Central** (12/7).

EIA Predicts US And Texas Will Increase Renewable Energy Generation In 2023.

The Week (12/7, Weber) reports the EIA predicted in its short-term energy outlook Tuesday that the amount of renewable energy generated in the US will rise from 14% this year to 16% in 2023 while natural gas generation will decline to 37%. The EIA added that Texas is "likely to experience the largest shift in generation mix in 2023." The agency predicted that natural gas-fired generation in the state will fall from 42% this year to 36% in 2023, while solar and wind power will rise from 30% to 37% next year.

Back to top ▲

Environmental Justice

EPA Crafting Plans To Meet Deadline "Challenge" To Award EJ Block Grants.

Inside EPA (12/7) reports, "EPA is weighing several options to overcome what will be 'a challenge' to distribute all the Inflation Reduction Act (IRA) funds from the landmark $3 billion environmental justice (EJ) block grants program that Congress is requiring the agency to spend by Sept. 30, 2026, a top

official said last week." Matthew Tejada, EPA's deputy assistant administrator for environmental justice, is quoted.

Rules/Regulations/Policy

DC Circuit Appears Receptive To Texas' Stance On EPA's "Retroactive" Ozone Finding.

Inside EPA (12/7) reports, "A three-judge panel of the U.S. Court of Appeals for the District of Columbia Circuit appeared receptive to Texas' arguments that EPA unlawfully imposed a 'retroactive' finding of ozone 'nonattainment' on El Paso, but the court may struggle to find a remedy as EPA's novel action responds to the court's own remand in an earlier case."

Back to top ▲

Toxics

EPA Considers Compliance Mechanisms For Proposed EtO Sterilizer Rule.

Inside EPA (12/7) reports EPA "is considering a number of compliance and testing mechanisms that it may incorporate into its closely watched upcoming proposed rule that would establish new standards for limiting ethylene oxide (EtO) and other air toxics releases from commercial sterilizers, a measure the agency is poised to submit for White House review."

EPA Presses States To Include PFAS Effluent Limits In NPDES Permits.

Inside EPA (12/6) reports, "EPA has issued new guidance that generally urges states to include site-specific technology-based effluent limits to address PFAS in Clean Water Act (CWA) discharge permits, while also saying the permits should contain water quality-based limits if necessary to attain state standards." The Dec. 5 memorandum "is a win for environmentalists and their Democratic supporters, who had pressed the agency to require such technology-based limits in permits after an earlier guidance the agency issued."

Industry Seeks To Limit Landmark PFAS Trial By Rejecting Causal Links.

Inside EPA (12/7) reports, "Industry defendants are urging a federal judge to dismiss compensation claims from a Florida city in landmark PFAS litigation over contamination allegedly tied to the use of firefighting foam, arguing ahead of a much-anticipated trial next year that the city has failed to demonstrate drinking water contamination can be linked to defendants' products."

Litigation Over "Forever Chemicals" Is Growing.

Reuters (12/7) reports litigation "surrounding the production and use of per- and polyfluoroalkyl substances (PFAS) is ticking upward in state and federal courts in the United States." In "this recent uptick of PFAS-related litigation, the breadth of plaintiffs at issue has grown, moving from owners of places where PFAS are manufactured, to owners of places, such as air bases, that merely use PFAS-containing materials."

Back to top ▲

Wastes and Hazardous Wastes

Ohio Coal Plant To Change Waste Storage To Comply With EPA Order.

The **Columbus (OH) Dispatch** (12/7) reports, "Facing an ultimatum from the Biden administration, the owner of Ohio's largest coal-fired power plant said last week that the facility would change the way it disposes of potentially toxic coal ash." Experts "say the new method is friendlier to the environment, but environmentalists say they worry about the coal ash that's already stored around the James M. Gavin power plant in Cheshire, a village along the Ohio River between Gallipolis and Pomeroy." The "Environmental Protection Agency decided last month to revoke the plant's permission to continue dumping the ash into an unlined pond near the facility on the banks of the Ohio River."

Back to top ▲

Water

EPA Backs Denver Lead Reduction Plan Touted As Model For Revised LCR.

Inside EPA (12/7) reports, "EPA has issued a final Safe Drinking Water Act (SDWA) variance for Denver's water utility that will allow the city to continue a novel plan to reduce lead in drinking water that environmental and municipal groups have praised as a model for alternative methods to comply with strict requirements in the agency's updated lead and copper rule (LCR)."

Oregon Port Must Spend $200M On Water Quality Controls.

The **AP** (12/7, Wu) reports a port along the Columbia River in northeast Oregon "will spend up to $200 million during the next four years to better treat and store wastewater used to irrigate farms, under a modified state permit issued last month." The "investment by the Port of Morrow comes after the state Department of Environmental Quality fined the port $2.1 million in June for repeatedly over-applying nitrogen-rich water on crops including corn and potatoes, the Capital Press reported."

EPA Says Florida Must Change Water Quality Standards To Protect Citizens' Health.

The **Florida Times-Union** (12/5) reports, "The United States Environmental Protection Agency has determined that Florida's antiquated water quality standards do not go far enough in protecting its citizens – particularly those who consume fish – from pollutants and adverse health effects." Florida's "current criteria for 40 toxic pollutants runs afoul of the Clean Water Act, does not reflect the latest science and must be changed to safeguard a state that has a vibrant seafood industry, the agency said in a letter released Thursday by the federal agency." The EPA says it is "particularly concerned that people eating fish they catch for sustenance are being disproportionately impacted."

Delaware River Basin Commission Approves New Water Rules For Natural Gas Drillers.

The **AP** (12/7, Rubinkam) reports the Delaware River Basin Commission (DRBC) voted Wednesday to approve rules that limit natural gas drillers' ability to draw water from the Delaware River and its tributaries for hydraulic fracturing operations outside the region. The new rules "also ban the disposal of drilling wastewater within a vast watershed that includes portions of Pennsylvania, New Jersey, New York and Delaware." The DBRC "took action nearly two years after it banned drilling and fracking near the Delaware River and its tributaries, saying the gas industry posed an unacceptable risk to the drinking water supply of a heavily populated area that includes Philadelphia and half of New York City." Industry officials, "who have long chafed at the drilling ban, criticized the latest regulations." Marcellus Shale Coalition President David Callahan said, "The DRBC has again trampled on constitutionally protected private property rights and ignored sound science, particularly around our industry's leadership in water recycling and reuse technology."

Back to top ▲

ESG

Bluebell Capital Partners Calls For BlackRock CEO's Resignation Over "Apparent Hypocrisy" On Sustainability.

The Hill (12/7, Elbein) reports the chief investment officers of UK-based Bluebell Capital Partners accused BlackRock CEO Larry Fink of "repeatedly failing to live up to his stated sustainability commitments." The firm is calling for Fink's resignation over his "apparent hypocrisy" related to sustainability goals. Bluebell chief investment officer Giuseppe Bivona said the firm has concerns about "the gap between what BlackRock consistently says on ESG and what they actually do." Bivon and fellow Bluebell chief investment officer Marco Taricco wrote that the combination of Blackrock's increased sustainability rhetoric with its continued funding of fossil fuels created an adverse situation for sustainable investing. Bivona added, "We see BlackRock endorsing a number of bad practices from a governance, social and environmental perspective which is not actually in tune with what they say."

Subject: Run of show: 12/13 State & Local Stakeholder Meetings

All,

Please see below for final details on today's state and local stakeholder sessions. As a reminder, Jennifer will deliver a high-level overview of OAR's IRA programs before passing it off to OCIR to facilitate a discussion of four programs: CPGR grants, monitoring, methane, and mobile sources. OAR SMEs should be prepared to take notes and briefly answer stakeholder questions.

AGENDA (SAME FOR BOTH SESSION)

- Welcome & Introductions – John Lucey, OCIR (5 min)
- Opening Remarks – Joe Goffman, OAR (5 min)
- IRA Air Programs brief overview – Jennifer Macedonia, OAR (10 min)
- States share advice / feedback by program – **OCIR facilitated** (65 min)
  - Programs in order of discussion:
    - CPR Grants
    - Monitoring
    - Methane Program
    - Clean HDV

    - Ports
- Wrap up – OCIR (5 min)

FOR STATE SESSION – 1:30-3:00 PM

OAR:

1. Joe (ok to drop after opening remarks)
2. Jennifer
3. Tomas
4. Megan (CPR Grants)
5. Tim (CPR Grants)
6. Stephanie (Methane)
7. Kristen (Monitoring)
8. Julie (OTAQ)
9. David Cash (R01)
10. John Creilson (R01)
11. Cynthia Greene (R01)
12. Anna Benkeser

FOR LOCAL SESSION – 3:30-5:00 PM

OAR:

1. Joe (ok to drop after opening remarks)
2. Jennifer
3. Tomas
4. Megan (CPR Grants)
5. Tim (CPR Grants)
6. Nicholas (Methane)
7. Kristen (Monitoring)
8. Mike (OTAQ)
9. Kim Ngo (R06)
10. Anna Benkeser

Thanks,
Anna

Subject: RE: OAQPS Weekly - PAGER: 2015 Ozone Transport FIP, Industrial Source Compliance Deadline Concerns

Good Morning,

Here is the summary of the Sierra Club meeting that Scott Mathias discussed at the OAQPS/OAR Weekly. Please let me know if you have any questions. Thank you.

Meeting with Sierra Club re: Reclassified Ozone Areas (2008 and 2015 Ozone DAADs)

In place of Joe Goffman, OAQPS and OGC staff met with representatives of Sierra Club (SC) on December 14, 2023, to hear their thoughts and concerns about nonattainment areas recently reclassified per the 2008 and 2015 ozone DAAD rulemakings. SC emphasized that there are several large EGUs without SCR located in and near ozone nonattainment areas that have significant impacts on ozone levels and EJ communities; and they urged EPA to issue guidance stating that SCR should be defined as RACT for large EGUs (>100 MW). SC expressed the view that the January 1, 2023, RACT implementation deadline for reclassified 2015 ozone Moderate areas is impossible to meet; and that it effectively gives states a "pass" on adopting meaningful RACT for EGUs in nonattainment areas. SC maintains that if EPA is essentially requiring SCR for upwind EGUs under the interstate transport rule, it would be reasonable to issue national guidance prescribing SCR as RACT for large EGUs in nonattainment areas. They also believe that such guidance would serve as a kind of backstop should the Transport Rule EGU limits be successfully challenged. SC urges EPA to closely track state SIP submissions for the 2015 ozone bump-up areas and provide comments that EPA expects SCR as RACT for large EGUs. Further, SC presumes that EPA will not issue timely findings of failure to submit for late 2008 and 2015 ozone RACT SIPs, and they assert that EPA has the independent authority to issue EGU RACT FIPs. For next steps, Sierra Club intends to submit a modeling study to EPA illustrating that individual uncontrolled EGUs have large impacts on nonattainment areas. OAQPS provided a modeling contact to confirm that the submitted data and results are presented in an appropriate form.

Subject: Run of show: 12/13 State & Local Stakeholder Meetings

All,

Please see below for final details on today's state and local stakeholder sessions. As a reminder, Jennifer will deliver a high-level overview of OAR's IRA programs before passing it off to OCIR to facilitate a discussion of four programs: CPGR grants, monitoring, methane, and mobile sources. OAR SMEs should be prepared to take notes and briefly answer stakeholder questions.

AGENDA (SAME FOR BOTH SESSION)

- Welcome & Introductions – John Lucey, OCIR (5 min)
- Opening Remarks – Joe Goffman, OAR (5 min)
- IRA Air Programs brief overview – Jennifer Macedonia, OAR (10 min)
- States share advice / feedback by program – **OCIR facilitated** (65 min)
  - Programs in order of discussion:
    - CPR Grants
    - Monitoring
    - Methane Program
    - Clean HDV
    - Ports
- Wrap up – OCIR (5 min)

FOR STATE SESSION – 1:30-3:00 PM

OAR:

1. Joe (ok to drop after opening remarks)
2. Jennifer
3. Tomas
4. Megan (CPR Grants)
5. Tim (CPR Grants)
6. Stephanie (Methane)
7. Kristen (Monitoring)
8. Julie (OTAQ)
9. David Cash (R01)
10. John Creilson (R01)
11. Cynthia Greene (R01)
12. Anna Benkeser

FOR LOCAL SESSION – 3:30-5:00 PM

OAR:

1. Joe (ok to drop after opening remarks)
2. Jennifer
3. Tomas
4. Megan (CPR Grants)

5. Tim (CPR Grants)
6. Nicholas (Methane)
7. Kristen (Monitoring)
8. Mike (OTAQ)
9. Kim Ngo (R06)
10. Anna Benkeser

Thanks,
Anna

Dear Administrator Regan:

Please see the attached letter from 21 national health, nursing and medical organizations urging President Biden to finalize the finding that the Mercury and Air Toxics Standards are appropriate and necessary without further delay. These standards are critical for protecting health and promoting environmental justice, and this final action is long overdue.

Thanks,
Paul Billings

Administrator

EPA Reveals Proposed Soot Standards.

The **AP** (1/6, Daly) reported, "The Biden administration is proposing tougher standards for a deadly air pollutant, saying that reducing soot from tailpipes, smokestacks and wildfires could prevent thousands of premature deaths a year." The EPA's proposal released Friday "would set maximum levels of 9 to 10 micrograms of fine particle pollution per cubic meter of air, down from 12 micrograms set a decade ago under the Obama administration." Advocacy groups pushing for strong standards were disappointed, "saying the EPA proposal does not go far enough to limit emissions of what is broadly called 'fine particulate matter,' the tiny bits of soot we breathe in unseen from tailpipes, wildfires, factory and power plant smokestacks and other sources." EPA Administrator Michael Regan "said the proposal to strengthen the national ambient air quality standards for fine particle pollution would help prevent serious health problems, including asthma attacks, heart attacks and premature death that disproportionately affect vulnerable populations." Speaking at a news conference, Regan said, "This administration is committed to working to ensure that all people, regardless of the color of their skin, the community they live in or the money in their pocket, have clean air to breathe, clean water to drink and the opportunity to lead a healthy life. At EPA, we are working every single day to create cleaner and healthier communities for all and have been doing so for over 50 years."

E&E Publishing (1/6, Reilly) reported Administrator Regan "hailed the agency's planned strengthening of airborne soot standards as 'a strong proposal,' though environmental and public health groups immediately clamored for it to be made stronger still and business organizations objected to any change at all." Regan told reporters at a news conference that the rule is "steeped in the latest science and protective of people's health." The rule is not final and is still awaiting comments which could change certain aspects. "Before settling on final numbers, EPA will seek public input on the possibility of slicing the daily limit to the 25 micrograms threshold, Regan said on the conference call, and will take feedback on the options of setting the annual standard as low as 8 micrograms or as high as 11." Regan said, "There's no predetermined outcome here."

CNN (1/6, Nilsen, Fritz) reported Administrator Regan "defended the proposed rule, and said was crafted after 'a lot of time looking at all of the new science' and after consultation with the experts within EPA 'as well as our stakeholders.'" Regan told reporters, "We arrived to this space based on sound science and rigorous evaluation of the data that we have at hand."

The Hill (1/6) reported that the Biden Administration estimates that the rule "could prevent as many as 4,200 premature deaths per year." Administrator Regan spoke on Thursday, telling reporters, "Fine particulate matter is both deadly and extremely costly," and that a stronger standard "could result in significant public health benefits." Administrator Regan also "said the agency found upon review that 'the 2012 standards are no longer sufficient to protect public health.'"

Also reporting were the **New York Times** (1/6, Davenport), **UPI** (1/6, Hilsman), the **Wall Street Journal** (*Request Article*) (1/6, Niiler), and the **Washington Post** (1/6, Phillips).

Mississippi DEQ Director Denies Jackson Discrimination Claims.

The **AP** (1/8) reports, "A Mississippi environmental regulator has denied claims that the state agency he leads discriminated against the capital city of Jackson in its distribution of federal funds for wastewater treatment." In a letter to the EPA, Mississippi DEQ Executive Director Christopher Wells "wrote that the NAACP has 'failed to allege a single fact to support' its argument that the agency discriminated against Jackson." Wells wrote that "Jackson received a loan for every completed application it submitted. And,

because the amount of the loan is based on the cost of the project, no loans were reduced for any reason that could be considered discriminatory." The letter comes three months after the discrimination charges were first alleged. EPA Administrator Michael Regan "has visited Jackson multiple times and has said 'longstanding discrimination' has contributed to the decline of the city's water system."

Back to top ▲

Air

California Faces Largest Burden Attaining EPA's Stricter PM NAAQS.

Inside EPA (1/6) reported in subscription-based coverage, "EPA's proposal to toughen national ambient air quality standards (NAAQS) for fine particulate matter (PM2.5) would likely pose the heaviest compliance burden on California and a few hot spots in the Mountain West, which would struggle to attain the standards, with most of the rest of the country already meeting the new limits, according to EPA's analysis."

EPA Proposes Stricter Annual PM2.5 Limit, Retains Daily Standard.

Inside EPA (1/6) reported in subscription-based coverage, EPA "is proposing to tighten its health-based annual limit for fine particulate matter (PM2.5) to a level lower than that set by the Obama administration in 2012 but is not planning to tighten its 24-hour limit, disappointing environmental and public health groups and disregarding agency science advisers who pushed for a tougher daily value."

Minneapolis Expands Air Quality Monitoring Network.

The **Minneapolis Star Tribune** (1/7) reports that 70 PurpleAir monitors were recently installed around Minneapolis as "part of a city-wide effort by Minneapolis to get a better picture of what, exactly, its residents are breathing in." Two more types of sensors will be installed through the city this year. "The new instruments are supported in part by a grant from the Environmental Protection Agency, which will detect volatile gases that can also make people sick." Minneapolis meets EPA's air standards as a city, with the measures being taken mostly to provide citizens with more tangible air quality data. "In the case of East Phillips, one neighborhood leader said he hopes the new gas-detecting monitors will help to pin down releases from the two major sites – Smith Foundry and Bituminous Roadways – that he and his neighbors say have made the air smell acrid, intermittently, for years."

Advocacy Group Asks EPA To Protect Pittsburgh Residents From High Benzene Pollution Levels.

NPR (1/6) reported, "Armed with a year's worth of monitoring data, residents and environmental groups say health hazards from benzene pollution at Pittsburgh-area U.S. Steel plants are 'beyond imminent,' and they're asking the U.S. Environmental Protection Agency to 'take immediate action' to cut pollution from the plants." The Environmental Integrity Project (EIP) sent a letter to the agency last month "which documents benzene levels spiking in the air near the plants during inversions, weather events that trap pollution near the ground, in the Mon Valley this fall." The EIP "is asking the EPA to exercise a clause of

the Clean Air Act that mandates the agency investigate sources of air pollution and devise ways to reduce them, and order polluters to monitor air pollution and publish their results."

Back to top ▲

Brownfields/Superfund/Other Cleanups + Redevelopment

IRS Receives Novel Petitions For Addition Of Substances To Superfund Tax Lists.

Inside EPA (1/6) reported in subscription-based coverage, "A chemical exporting company is petitioning the Internal Revenue Service (IRS) for the first time to add two new substances to the agency's list of taxable substances under the renewed Superfund tax on hazardous chemicals and substances, an anticipated move that opens the door for possible export credits on the substances."

Back to top ▲

Editorial/Op Ed/ Commentary/Letters

ACC Director: Flawed EPA Formaldehyde Analysis Threatens Industry And Economy.

Brandpoint Content (1/6) publishes an opinion piece by Sahar Osman-Sypher, Senior Director of the American Chemistry Council's Formaldehyde Panel. Osman-Sypher writes that maintaining access to formaldehyde "is critical for agriculture, building and construction, automobile manufacturing and healthcare sectors, as well as the nation's manufacturing capability, economic viability, health, safety and continuity of essential products and services." However, the EPA "is pursuing a rushed formaldehyde assessment and biased scientific review process that could upend economic progress and threaten public health." Osman-Sypher blames IRIS, "a program that has never been authorized by Congress," but "was initially created to support EPA's mission by identifying and characterizing human health effects that may result from exposure to chemicals." Unfortunately, "the IRIS program has a troubling history of being out of step with the best available science and methods, lacking transparency and being unresponsive to peer review and stakeholder recommendations." The 2022 draft IRIS assessment of formaldehyde "sets an exposure limit for formaldehyde that is actually below its natural background levels or levels that can be detected using the latest monitoring technology."

Opinion: Kentucky's Anti-ESG Attack Does Not "Comport With Reality."

Bloomberg Opinion (1/6) columnist Liam Denning said Kentucky State Treasurer Allison Ball "fired the year's opening salvo in the ongoing war on ESG." Ball "issued a list of 11 financial companies including

BlackRock Inc., Citigroup Inc. and a smorgasbord of Scandinavian institutions" that are allegedly engaged in "'energy company boycotts,' meaning they 'intentionally choke off the lifeblood of capital to Kentucky's signature industries.'" Denning said, "Kentucky's Republicans may feel fossil fuel-ish, but that doesn't comport with reality." More people in the state "are employed in the solar power sector (1,739) than at coal-fired plants (1,550) and many thousands more work in energy efficiency and electricity distribution, both of which" could gain from ESG-related trends. Denning added, "The anti-ESG posturing now taking place...is a cultural war dance, not a thoughtful weighing of facts and outcomes. In that sense, Kentucky choosing to cast itself as victim is a perfect addition to the meme."

Back to top ▲

Energy Issues

RFF Analysis Supports Climate, Air Benefits From EVs.

Inside EPA (1/5) reported behind a paywall, "New analysis is quantifying significant climate and air quality benefits from electric vehicles (EVs), even though several policy and market factors such as zero-emission vehicle (ZEV) sales mandates or future gasoline prices could introduce wide variations in such benefits." Inside EPA adds, "The study released by think tank Resources for the Future (RFF) also highlights modeling challenges for EPA as it weighs whether to assess for the first time the upstream power-sector emissions in its forthcoming standards for light- and heavy-duty vehicles, according..."

EPA Struggling To Quantify Environmental Impact Of Future RFS "Set" Program.

Inside EPA (1/5) reported behind a paywall, "As EPA moves to set biofuel blending volumes for the next three years under the renewable fuel standard (RFS), the agency is wrestling with how to characterize the environmental impacts of the program, as estimates of biofuels' lifecycle greenhouse gas emissions diverge widely amid disagreements over whether the program drives land-use change." The Clean Air Act "requires that different biofuels achieve GHG emissions at specific levels relative to gasoline, but environmentalists doubt the ability of certain fuels, especially conventional corn-based..."

TX Cold Snap Caused Large Releases Of Pollutants From Petrochemical Plants.

Bloomberg (1/6, Ferman) reported, "The cold snap that froze Texas late last month resulted in the release of more than 1,000 metric tons of excess pollutants into the atmosphere." It is unclear what "exactly led to the unusual emissions," but "the state's sprawling fossil-fuel and petrochemical industry is known to be vulnerable to unusually low temperatures, which can freeze natural gas lines, cause valves to seize up and disrupt power supplies." The releases included "279,320 pounds of pollutants by a large Chevron Phillips Chemical Co. plant when restarting units in preparation for the forecast freeze." Chevron Phillips Chemical "said it secured its facilities impacted by the freeze and provided accurate emissions estimates to regulators but didn't answer questions about why it happened and how the company will prevent such emissions going forward."

Authorities Investigate Source Of Oil Slick Off Coast Of Santa Barbara.

The **Los Angeles Times** (1/7, Ryan) reported, "The U.S. Coast Guard was working with state officials Saturday to determine the cause of a large oil slick in the waters off Santa Barbara County." The sheen "was spotted Friday about five nautical miles from Summerland Beach, an area with a petroleum-rich sea floor that is home to numerous abandoned gas and oil wells."

Oil And Gas Industry Praises EPA Decision To Reverse Regulations In Permian Basin.

The **Center Square** (1/8, Blankley) reports the Biden Administration "has backed down from a plan to impose what critics said were 'draconian regulations' in the Permian Basin of west Texas and southeastern New Mexico, a move lauded by the oil and gas industry" and Texas Gov. Greg Abbott (R). The Administration "on Thursday released its Fall 2022 Unified Agenda of Regulatory and Deregulatory Actions, which includes planned rule-makings and federal action." The Environmental Protection Agency "omitted its plan to impose 'discretionary redesignation' of air quality conditions in the Permian Basin."

Texas Railroad Commission Maps Orphan Well Activity.

The **Midland (TX) Reporter-Telegram** (1/7) reported the Texas Railroad Commission has put a $25 million federal grant award toward an orphan well-plugging campaign, with Texas becoming "the first state in the nation to plug a well using the funds with projects in Refugio County this past October." Now, the commission has "launched an interactive map" of current plugging activity, letting Texans "see, by county, which wells have been plugged or have work orders. In the Permian Basin, wells are found in Irion, Mitchell, Pecos and Scurry counties." To date, "the agency has plugged 128 orphaned wells with the federal funding and plans to plug a total of 800 wells by the end of the fiscal year, which will end Aug. 31." The interactive map is "part of the commission's ongoing efforts to expand transparency, spokesman Andrew Keese told the Reporter-Telegram by email."

California Plans To Spend Millions To Plug Orphan Wells.

The **Orange County (CA) Register** (1/8, Staggs) reports, "Thanks to its once expansive, 150-year-old oil and gas industry, Southern California has one of the nation's highest concentrations of so-called 'orphan wells,' or wells that companies abandoned without first plugging them up for safety." The state has identified "nearly 2,000 orphan wells in Los Angeles, Orange, San Bernardino and Riverside counties alone, while estimating that thousands more could be paved over, unrecorded, and waiting to be rediscovered." The state has spent $9.3 million over the past six years to plug 70 orphan wells, and has budgeted $100 million in the next two years "to secure perhaps 700 more."

BLM Announces Oil And Gas Lease Sale On Federal Lands In North Dakota, Montana.

The **Washington Examiner** (1/6, Beaman) reported, "The Bureau of Land Management announced plans to carry out an oil and gas lease sale on federal lands in Montana and North Dakota, expanding the list of new lease sales planned for the first half of 2023." BLM's announcement "represents another disappointment for environmental groups, which have been lobbying the administration to use its

discretion to cease new leasing to limit climate change, at the hands of Sen. Joe Manchin (D-WV), who negotiated the law that mandated the sales."

Ohio Gov. Signs Law Defining Natural Gas As "Green Energy."

The **Cleveland Plain Dealer** (1/7, Zuckerman) reported Ohio Gov. Mike DeWine (R) signed a bill Friday that redefines the term "green energy" to include natural gas. The law also expands oil and gas drilling rights within state parks.

Federal Judge To Decide Fate Of US' Largest Lithium Mine.

NPR (1/6, Siegler) reported, "The fate of the largest planned lithium mine in the United States is now in the hands of a federal judge who hopes to issue a ruling in a long-running legal battle in the next two months." Thacker Pass, where the mine would be located, is considered sacred by a group of West Coast Native American tribes who are suing to stop development of the mine. Attorneys for Lithium Neveda mining company and the U.S. government "maintained that all environmental laws were followed leading up to a decision by the Bureau of Land Management in January 2021 that gave the initial go ahead for the mine." Benchmark Mineral Intelligence Analyst Cameron Perks "said the judge's decision will be a defining moment, setting the tone for whether lithium mining takes off in the U.S. or stays overseas, making the country more vulnerable to supply chain disruptions."

EIR Study Finds Potential For Extracting 225K Tons of Lithium From Produced Water.

The **Houston Chronicle** (1/8) reports, "Permian Basin operators working to manage the water produced alongside their oil and natural gas have the possibility of turning that water into a significant revenue stream." A study by Enverus Intelligence Research "found the potential for as much as 225,000 tons of lithium carbonate" to be extracted from produced water per year. It is "an untapped industry that could be work as much as $19 billion." EIR VP Graham Bain said, "A lot (of lithium) lies within produced water and they're already dealing with produced water." Bain said the potential of Permian lithium could be realized by technology companies and producers forming partnerships, operators pursuing lithium extraction, or third parties managing the produced water.

Diesel Leak Shuts Down Part Of Colonial Pipeline.

The **AP** (1/6, Brumfield) reported a diesel fuel leak discovered Tuesday in Virginia "shut down part of the Colonial Pipeline, the nation's largest fuel pipeline, which supplies roughly half the fuel consumed on the East Coast." The leak wasn't expected to "have much impact on gas prices, according to Patrick De Haan, head of petroleum analysis for GasBuddy."

Analysts Say Louisiana's Oil-And-Gas Industry To Shrink Or Transition To Renewable Energy This Year.

The **Louisiana Illuminator** (1/6, Muller) reported, "Louisiana's oil-and-gas industry is expected to shrink slightly this year due to a combination of economic and geopolitical factors, experts who follow the sector say, though they also forecast potential growth in the new energy and industrial sectors." Oil-and-gas majors "saw record-high profits in 2022 from a surge in demand as most of the world recovered from the coronavirus pandemic and nations shifted their energy policies to address Russia's invasion of Ukraine."

Exxon earned "a record $20 billion in profit for the third quarter of 2022," while "Shell and TotalEnergies reported their profits more than doubled in the third quarter from the same period the year before."

EAB Remands CWA Permit From DOE Nuclear Site.

Inside EPA (1/6) reported in subscription-based coverage, "The Environmental Appeals Board (EAB) is remanding an EPA Clean Water Act (CWA) permit the agency issued to an Energy Department (DOE) nuclear site, requiring officials to take comment on the data it used to justify the permit while sidestepping, for now, environmentalists' charges that the agency issued the permit to skirt waste law requirements."

Science

Study: Nearly 13% Of Childhood Asthma May Be Linked To Gas-Stove Pollution.

The **Washington Post** (1/6, Joselow, Montalbano) reported, "Gas-burning stoves in kitchens across America are responsible for roughly 12.7 percent of childhood asthma cases nationwide -- on par with the childhood asthma risks associated with exposure to secondhand smoke, according to a study." The peer-reviewed **study**, "published in the International Journal of Environmental Research and Public Health, adds fuel to a burgeoning debate over the potential threats that gas stoves pose to the planet and public health." It "comes as scientists and activists cheer the Consumer Product Safety Commission's recent decision to weigh new regulations on indoor air pollution from gas stoves, even as the natural gas industry fights to keep the signature blue flames of the appliances in American homes."

Rules/Regulations/Policy

Pending Litigation Foreshadows Battles Over Upcoming EPA Coal Ash Rules.

Inside EPA (1/5) reported behind a paywall, "Environmental and power sector groups are pursuing a series of citizen suit and other legal challenges that are already providing a venue for the groups' expected advocacy on a suite of coal combustion residuals (CCR) policies that EPA is slated to issue in 2023 as officials work to update the agency's 2015 rule." In one example, "environmentalists are suing Alabama Power over the adequacy of one of its facility's plans to cap coal ash in place, though the company is seeking..."

CEQ Issues Interim NEPA Climate Guide Missing GHG Significance Level.

Inside EPA (1/6) reported in subscription-based coverage, "The White House has released 'interim' guidance for how agencies should assess climate change effects in National Environmental Policy Act (NEPA) reviews, requiring reviews of projects' direct and indirect greenhouse gas emissions and the use the social cost of carbon (SCC) while declining to set a GHG 'significance' threshold to determine the rigor of reviews."

Back to top ▲

Toxics

EPA Finishes TSCA "Whole Chemical" Findings With TCE Revision.

Inside EPA (1/6) reported in subscription-based coverage, "EPA is poised to finalize its revised TSCA risk determination for trichlorethylene (TCE), switching the Trump administration's use-by-use findings to a broader 'whole chemical' approach, a move that marks the last in a cycle of eight such revisions the agency began earlier this year and tees up risk-management rules based on the reworked evaluations."

EPA Demos Interactive PFAS Map; DOJ Opposes Industry Data Request.

Inside EPA (1/6) reported in subscription-based coverage, EPA "will demonstrate its new tool to assist communities and regulators on where and how PFAS has been detected and is being used." The DOJ "is slated to file arguments pushing back against industry defendants in landmark litigation seeking government information that could provide insights into what federal agencies knew about PFAS risks."

Environmentalists Ask EPA To Release Data From Plastic Company Facing PFAS Litigation.

Inside EPA (1/6) reported in subscription-based coverage, "Environmentalists are calling on EPA to release details on the fluorination process at the heart of pending lawsuits that claim a plastics manufacturer allowed its containers to taint stored goods with PFAS, saying the information is vital to understanding the causes and scope of contamination linked to the materials."

EGLE Appeals Legal Rejection Of New PFAS Water Standards.

The **Detroit Free Press** (1/7) reports that the Michigan Department of Environment, Great Lakes, and Energy (EGLE) "has filed an appeal with the State Court of Appeals seeking to overturn a November ruling by a state Court of Claims judge that the agency failed to adequately consider the costs

businesses might incur as a result of new, tougher PFAS water regulations." EGLE enacted new PFAS rules in August 2020, reducing PFOS and PFOA standards from 70 parts per trillion combined to 16 parts per trillion and 8 parts per trillion respectively. 3M filed a lawsuit against EGLE last year, with Judge Brock Swartzle rejecting "a number of the company's claims, including that the new rules were not necessary and that they were arbitrary and capricious." Judge Swartzle "did, however, find that EGLE failed to adequately consider cleanup or compliance costs that a business or group might incur as a result of the new rules, a requirement under state law." Briefs will be filed in the appeals court late January.

Wastes and Hazardous Wastes

Storms Flood San Diego Shorelines With Tijuana Sewage.

The **San Diego Union-Tribune** (1/6) reports that in California, "shorelines from Imperial Beach to Coronado were again shuttered this past week as a result of sewage spilling over the border from Tijuana." The South Bay was hit particularly hard by urban pollution via flooding in the wake of major storms, "as more than 2.8 billion gallons of sewage- and chemical-tainted runoff poured through the Tijuana River and its canyon tributaries, according to federal officials." Mexican pumps "that suck water out of the river's main concrete channel were turned off as rains overwhelmed the system's capacity and debris clogged the intake." The EPA "has plans to build a more reliable diversion system north of the border but has yet to secure the funding." The San-Diego Union-Tribune adds, "The agency currently has $300 million largely slated for an expansion of the South Bay International Wastewater Treatment Plant which services Tijuana."

Water

Great Salt Lake On Track To Disappear In Five Years.

USA Today (1/7) reports, "Scholars and conservationists released a briefing this week urging emergency water-saving measures to prevent the looming collapse of Utah's Great Salt Lake." The report says that without drastic changes, "the lake as we know it is on track to disappear in five years." The lake reached its smallest point in 2021 at 941 square miles compared to its 1986-1987 peak of 2,400 square miles. Salinity is now around 19%, compared to the historical average between 10%-15%. Study Author and Brigham Young University Professor of Ecosystem Ecology Benjamin Abbott said, "We're not making a prediction that 5 years from now there will be no water. We are making the observation that the rate of decline if it continues is enough to deplete the remaining water in the lake."

DNR To Remove Rough Fish From Nobles Lake.

The **Omaha (NE) World-Herald** (1/8) reports, The Iowa DNR "will treat Nobles Lake with a low concentration of rotenone to eliminate rough fish." Nobles Lake "was inundated and infested with numerous invasive and river fish species during the floods of 2011 and 2019." Now, "the dryer than normal conditions and historic low flows in the Missouri River have nearly drained Nobles Lake, providing ideal conditions to remove rough fish."

Administrator

Regan Enthusiastic About IRA EJ Grants.

In continuing coverage, the **Washington Post** (1/11) reports EPA Administrator Michael Regan "hardly could have sounded more ardent Tuesday afternoon as he announced that the first $100 million in environmental justice grants made possible by last year's Inflation Reduction Act will soon become available." Regan said, "Too many of these communities have faced barrier after barrier trying to access the federal funding they need and deserve." Regan added "that the Biden administration is determined to help places 'that have long suffered at the hand of indifference, neglect and inaction.'" Regan also assured that the money will end up in the right places, saying, "The evaluation criteria has been specifically crafted to ensure the funding goes to low-income and disadvantaged communities."

EPA Office Of General Counsel Releases Addendum To EJ Legal Tools.

Inside EPA (1/11) reports in subscription-based coverage, "EPA's Office of General Counsel (OGC) has released a long-awaited document providing the first-ever collection of examples of environmental and other legal authorities that regulators can use to identify and address cumulative impacts in permitting, regulatory and grant-funding decisions." The addendum, released Jan. 11, "supplements the agency's high-profile 'Legal Tools To Advance Environmental Justice,' which was released last spring, and is

another key step toward including consideration of cumulative impacts on overburdened communities in decision making."

E&E Publishing (1/11, Brugger) reports, EPA Administrator Regan said, "At EPA, we're committed to protecting the health and environment of all communities, including those historically marginalized, overburdened, underserved, and living with the legacy of structural racism."

Air

White House Says Biden Does Not Support Ban On Gas Stoves.

CNN (1/11, Vazquez) reports the White House "asserted that President Joe Biden does not support a ban on gas stoves after a federal consumer safety official suggested that such a proposal was on the table." The White House's response "follows a recent Bloomberg interview with Biden-appointed US Consumer Product Safety Commissioner Richard Trumka Jr., who called the household appliance a 'hidden hazard' and said that 'any option is on the table' in relations to regulating them." A White House spokesperson said Wednesday that the government "does not support banning gas stoves – and the Consumer Product Safety Commission, which is independent, is not banning gas stoves."

Also reporting is **Fox Business** (1/11, Vaughn).

CPSC Chairman Says Agency Is Not Looking To Ban Gas Stoves. The **Washington Post** (1/11, Joselow) reports Consumer Product Safety Commission (CPSC) Chairman Alexander Hoehn-Saric walked back Trumka's comments in a statement on Wednesday but reiterated that the agency will look for ways to reduce emissions from gas stoves. Hoehn-Saric said, "Research indicates that emissions from gas stoves can be hazardous, and the CPSC is looking for ways to reduce related indoor air quality hazards. ... But to be clear, I am not looking to ban gas stoves and the CPSC has no proceeding to do so."

Also reporting are the **Wall Street Journal** (*Request Article*) (1/11, Collins, Blunt), **Fox News** (1/11, Morris), **Newsweek** (1/11, Phillips), and **WFAA-TV** Dallas (1/11, Jones, Jones).

Republican Lawmakers Introduce Bill That Would Prohibit Gas Stove Bans. **Roll Call** (1/11, Jordan) reports Reps. Bill Huizenga (R-MI) and Alex X. Mahoney (R-VA) introduced a bill Wednesday that "would prohibit any federal agency from proposing, implementing or finalizing a rule that bans or restricts gas-powered stoves or cooktops." In a statement, Huizenga said, "Americans should have the ability to choose the most affordable and most available way to cook food in their own home."

Also reporting is **Daily Wire** (1/11, Zeisloft).

House Energy Committee Chairwoman Criticizes Proposed Gas Stove Ban. **MarketWatch** (1/11, Beals) reports House Energy and Commerce Committee Chairwoman Cathy McMorris Rodgers (R-WA) criticized the proposed ban, calling it the "latest in a long line of power grabs by the radical left and Biden administration." Rodgers said, "Natural gas is critical for millions of Americans. Forcing people

to switch to expensive alternatives will only further increase costs on hardworking American families while disproportionately harming the most vulnerable in our communities."

The **Washington Times** (1/11, Touchberry) reports Rodgers said, "It is not about public safety. ... It is about telling the American people the federal government knows best and will decide what kind of car they can drive, how they can heat their house, and now how they're allowed to cook food for their families."

The **Dallas Morning News** (1/11, Alvey) reports Rodgers "told E&E News she plans to bring the issue and commission before her committee."

Also reporting is the **New York Times** (1/11, Shao, Friedman).

Republican Senators Criticize Gas Stove Ban. **CNBC** (1/11, Richards) reports Sens. Tim Scott (R-SC) and Tom Cotton (R-AR) criticized the proposed gas stove ban. In a tweet, Scott said, "You can always count on Biden to GASLIGHT the American people." Cotton said, "Democrats are coming for your kitchen appliances. Their desire to control every aspect of your life knows no bounds – including how you make breakfast. They just can't help themselves."

AGA Says It Will Advocate For Gas Industry In Gas Stove Ban Proceedings. **Yahoo! News** (1/12, Adler) reports the American Gas Association (AGA) said in an email that it will advocate for the natural gas industry in any proceedings about a ban on gas stoves. AGA CEO Karen Harbert said, "The natural gas utility industry is fully committed to consumer health and safety and reducing emissions." Harbert added, "As concerns over emissions from gas ranges are raised and debated, the natural gas industry is focused on bringing objective data-driven analysis and technical information to the discussion."

Bloomberg (1/11, Natter) reports that in a statement, the AGA said, "Regulators, like the Consumer Products Safety Commission, should rely on real data and science not unsubstantiated claims of advocates."

Fox Business (1/10, Rumpf) reports that in a press release Tuesday, the AGA said, "A December 2022 report in the International Journal of Environmental Research and Public Health linking natural gas cooking with asthma is not substantiated by sound science."

Back to top ▲

Brownfields/Superfund/Other Cleanups + Redevelopment

Operator Of Former Asbestos Mine In Montana Offers $18.5 Million Final Settlement.

The **AP** (1/10) reports, "The owner of a former vermiculite mine in northwestern Montana that spread harmful asbestos in and around the town of Libby has offered $18.5 million to settle the last of the state's claims for environmental damages, Gov. Greg Gianforte (R-MT) announced Tuesday." The mine was

operated by W.R. Grace from 1963 until 1990, with cleanup beginning in 2000. The company agreed to pay the EPA $250 million for cleanup work in a 2008 settlement.

Back to top ▲

Energy Issues

Tennessee Valley Authority Goes Ahead With Gas Plant Despite EPA Opposition.

The **AP** (1/10) reports, "The nation's largest public utility has decided to build a new natural gas plant despite concerns from the Environmental Protection Agency that its analysis of alternatives is faulty and that the project is at odds with President Biden's clean energy goals." Tennessee Valley Authority President and CEO Jeff Lyash "on Tuesday signed a decision to move forward with a 1,450-megawatt natural gas plant at the site of the utility's coal-burning Cumberland Fossil Plant, near Cumberland City, Tennessee." TVA intends "to retire the first of two coal burning units there by the end of 2026 and plans to have the gas plant up and running before then." TVA provided an environmental impact statement to the EPA in December, comparing costs and benefits of natural gas plants with solar arrays and battery storage. EPA "issued a detailed response to the analysis on Friday, writing that TVA relied on 'inaccurate underlying economic information' and 'may continue to underestimate the potential costs of the combined cycle gas plant and overstate the cost of solar and storage.'" Both TVA's economic and environmental analyses were criticized by the EPA in their letter. "Already, TVA is facing a lawsuit that claims it violated federal law by approving a gas-power plant that is under construction at its retired coal-burning Johnsonville Fossil Plant without properly assessing the environmental and climate impacts."

IRA Tax Incentives Are Boosting Carbon Capture Technology Projects.

Bloomberg (1/11) reports supporters of carbon capture "say the new tax incentives in the US Inflation Reduction Act are transformative enough that, combined with the lessons of the past 20 years, the technology is finally ready to take off." The IRA included "major revisions to the 45Q carbon capture and storage tax credit." The revisions increased the tax credit "from $45 a ton to $85 for CO2 removed from a smokestack" and increased it by "as much as $180 if the gas is taken from the air." The incentives "have set oil majors and manufacturers rushing to break ground on new projects." According to Morgan Stanley, Exxon and Chevron Corp. "should both achieve a 15% average return on the capital they invest in low-carbon initiatives."

Texas Green Hydrogen Project Hopes To Turn Water Into Vehicle Fuel.

In continuing coverage, the **Houston Chronicle** (1/11) reports an Air Products and AES Corporation project announced last month in North Texas "hopes to be the country's first large-scale producer of clean hydrogen from water." The project, which is expected to begin operations in 2027, "involves building a 900-megawatt wind farm – on par with the largest in Texas – and a 500-megawatt solar farm for a total of 1.4 gigawatts." The project "will produce 200,000 kilograms of hydrogen per day" and will be "eligible for tax credits of up to $3 per kilogram of hydrogen produced." University of Houston Energy

Transition Institute Director Joe Powell "said the project's 1.4-gigawatt power input 'would rank at the top of the range of proposed projects in the US,' though green hydrogen proposals in Europe, Australia, Africa and the Middle East range from 10 to 67 gigawatts." AES "said the Texas project was not its only green hydrogen venture, though others have not yet been disclosed."

Also reporting are the **San Antonio Express-News** (1/11, Baddour) and **Environmental Leader** (1/4).

Qcells To Invest More Than $2.5B In Georgia Solar Panel Factories.

The **AP** (1/11, Amy) reports South Korean solar panel maker Qcells "said Wednesday that it will invest more than $2.5 billion to build factories in Georgia in what it says is the largest solar investment in American history." The company "projects it will supply about 30% of total U.S. solar panel demand by 2027, including making solar panel components usually manufactured outside the United States."

Reuters (1/11) reports the announcement by Hanwha Corp's solar unit "is one of the biggest corporate manufacturing commitments since the passage of U.S. President Joe Biden's Inflation Reduction Act (IRA), which includes over $300 billion in subsidies to tackle climate change." Qcells "said it would expand its existing solar panel factory in Dalton, Georgia, and open a second facility in Cartersville." Production will start in 2024. The new facility will produce solar panel components "including silicon ingots, wafers and cells, as well as the modules themselves. Currently, most solar panels assembled in the United States use components made in Asia."

Politico (1/11, Johnson) reports the complex "may serve as the test case for whether President Biden's climate law can boost the domestic supply chain for renewable energy – and even get buy-in from GOP-led states."

The **New York Times** (1/11, Penn) reports Georgia Gov. Brian Kemp (R) said, "With a focus on innovation and technology, Georgia continues to set itself apart as the No. 1 state for business."

Also reporting are **PV Magazine** (1/11), and **PV-Tech** (1/11, Norman).

Maritime Lawyer: Jones Act Still Causes Uncertainties For US Offshore Wind.

Winston & Strawn LLP Partner Constantine (Charlie) Papavizas writes in the **Offshore Engineer** (1/11), "The Jones Act is a single sentence long, and yet somehow that reservation of U.S. domestic maritime commerce to qualified U.S.-flag vessels has spawned numerous complications with respect to offshore wind energy projects." US Customs and Border Protection (CBP) "has issued a number of rulings since early 2021 clarifying the application of the Jones Act particularly with respect to wind turbine and cable installation operations." Meanwhile, a number of rulings "have been issued addressing the extent cable burial is 'dredging,' in which case it must be undertaken by a qualified U.S.-flag vessel, or not 'dredging,' in which case a foreign vessel can accomplish the mission." However, these rulings will not "resolve the issues in the courts." Papavizas adds, "For everyone involved in the offshore wind energy industry, let us hope that at least some issues will be resolved in 2023."

Chesapeake, EQT, And Equitrans Form Coalition To Reduce Appalachian Basin Methane Emissions.

Hart Energy (1/11) reports Chesapeake Energy Corp., EQT Corp., and Equitrans Midstream Corp. announced in a press release Wednesday that they have established a coalition called the Appalachian Methane Initiative (AMI), which will focus on monitoring and reducing methane emissions in the Appalachian Basin. The coalition "intends to efficiently identify potential methane emissions from operations in the Appalachia Basin with coordinated satellite and aerial surveys on a geographic-basis instead of an operator-specific basis, the release said." AMI "plans on implementing a full-basin monitoring plan in 2024. A pilot monitoring program is being developed this year to cover major operating areas in the Appalachia Basin." EQT President and CEO Toby Rice said, "Applying a basin-wide, sector-agnostic approach to methane monitoring will not only allow accountability for methane emissions from all emitters; we believe it will eliminate any doubt...that Appalachian natural gas is the cleanest form of traditional energy in the world."

Also reporting is the **Pittsburgh Business Times** (1/11, Gough).

Labor Shortage Could Derail Biden's Clean-Energy Investments.

Reuters (1/11, Groom, Volcovici) reports that as clean energy companies try to overcome "a labor shortage that threatens to derail President Joe Biden's climate change agenda," they are "offering better wages and benefits, flying in trainers from overseas, and contemplating ideas like buying roofing and electric repair shops just to hire their workers." The Inflation Reduction Act "provides for an estimated $370 billion in solar, wind and electric vehicle subsidies, according to the White House. ... Those investments will create nearly 537,000 jobs a year for a decade, according to an analysis by BW Research commissioned by The Nature Conservancy." But amid historically low unemployment, "companies say they fear they will struggle to fill those jobs, and that plans to transition away from fossil fuels could stall out."

Environmental Justice

Fire At Illinois Chemical Plant Contained.

The **AP** (1/11, Kageyama) reports, "Officials said a large fire that sent smoke plumes towering over a northern Illinois chemical plant has been contained and no injuries have been reported." After the fire broke out Wednesday morning, local officials issued a shelter in place order for residents in La Salle's third and fourth wards, later lifted at 5 p.m. The cause of the fire is not yet known. EPA on-scene coordinator Robert Kondreck "said representatives for the U.S. Coast Guard and the Illinois Environmental Protection Agency also visited the site and believe the nearby Vermilion River did not receive runoff from the firefighting efforts."

Back to top ▲

Enforcement

OECA Plans New Climate, PFAS Enforcement Priorities.

Inside EPA (1/11) reports behind a paywall, "EPA's enforcement office is proposing new priorities for fiscal years 2024-2027 focusing on climate mitigation and addressing PFAS contamination, while also planning to drop older initiatives aimed at stopping after-market defeat devices and reducing hazardous air pollutants (HAPs) from waste facilities" Inside EPA adds, "In a notice slated for publication in the Federal Register Jan. 12, EPA's Office of Enforcement & Compliance Assurance (OECA) also asks for comment on whether to launch new initiatives aimed at addressing coal ash and lead contamination..."

Jackson Company Pleads Guilty To Illegal Dumping.

The **AP** (1/11, Goldberg) reports, "A Mississippi wastewater hauling business has pleaded guilty in federal court to illegally discharging industrial waste into the sewer system in the state's capital city, federal prosecutors said Wednesday." Partridge-Sibley Industrial services "allowed for pollutant-filled waste to be illegally discharged into the Jackson Wastewater Treatment System, which consists of three wastewater treatment facilities and a sewer system that serves Jackson and some surrounding areas." PSI agreed to pay the maximum fine of $200,000 and one-year of probation.

Back to top ▲

Science

Children Near Airports Face Higher Risks Of Lead Poisoning.

The **St. Louis Post-Dispatch** (1/11, Murez) reports, "While U.S. policymakers have attempted to lower lead exposure among children since the 1970s, new research finds that kids living near airports are still being exposed to dangerous levels of the heavy metal." By analyzing blood lead levels in children below six years old, "researchers discovered that the closer a child lived to the Reid-Hillview Airport in Santa Clara County, Calif., the more likely that child had a blood lead level that exceeded California's safety threshold." Blood lead levels were also noticeably higher for children living East, or downwind of the airport. "In this study, the probability that a blood sample would exceed the state's safety threshold was 21.4% lower for children living a mile or more from the airport than it was for children living within a half mile of the airport," and "children living downwind of the airport were about 2.2 times more likely to have a blood lead level above the threshold of concern."

Back to top ▲

Grants/Awards

Agencies Continue To Implement IRA Funds, Sparking Approach Disputes.

Inside EPA (1/4) reported in subscription-based coverage, "EPA, the Treasury Department, the Energy Department (DOE) and others are continuing to disperse the Inflation Reduction Act's (IRA) mammoth clean energy funding, reigniting various fights over the best approach to transitioning to a clean energy economy." Insides EPA adds, "The agencies' IRA implementation includes releasing dozens of guidance documents and taking other steps to deploy a collection of clean energy tax incentives and grant programs, even as they continue to implement the 2021 bipartisan infrastructure law's (BIL) energy- and climate-related provisions."

Back to top ▲

Rules/Regulations/Policy

EPA Prepares Suite Of New Rules For 2023, Including PFAS Regulations.

Inside EPA (1/4) reported in subscription-based coverage, "EPA is gearing up to issue a suite of new final and proposed rules, including under its Superfund, water, waste and toxics programs, in 2023 – measures that are already driving heated advocacy as environmentalists and industry groups battle over the reach and stringency of the upcoming regulations. Many, if not all, of the pending per- and polyfluoroalkyl substances (PFAS) regulations will be quickly challenged once finalized while the proposals will spark strong debates."

Back to top ▲

Toxics

EPA Proposes Boosting PFAS Efforts To Highest National Priority.

Inside EPA (1/11) reports in subscription-based coverage, "EPA's enforcement office is proposing to place efforts to address PFAS contamination on its list of highest national priorities when it updates its National Enforcement and Compliance Initiatives (NECI) for the fiscal years 2024-2027, including plans to target enforcement efforts on manufacturers releasing significant volumes of the chemicals."

DOJ Seeks To Withhold Internal PFAS Data From Industry Defendants.

Inside EPA (1/11) reports in subscription-based coverage, "The Justice Department (DOJ) on behalf of the government is asking a federal district court to deny a request by industry defendants in landmark

PFAS litigation for access to internal deliberations by federal agencies about the potential risks from use of the toxic chemicals in firefighting foams."

District Court Sets Hearing For Environmental Groups Suing EPA For PFAS Action.

Inside EPA (1/11) reports in subscription-based coverage, "A federal district court will hear argument Feb. 14 on whether to let North Carolina environmental groups continue TSCA litigation aimed at forcing EPA to order tests on 54 PFAS linked to water contamination in the state, teeing up a decision on whether the plaintiffs can continue pressing their claims even after the agency formally granted their petition."

Back to top ▲

Wastes and Hazardous Wastes

EPA Denies Petition To Regulate PVC Under RCRA.

Inside EPA (1/11) reports in subscription-based coverage, "EPA is tentatively denying environmentalists' petition calling on the agency to regulate discarded polyvinyl chloride (PVC) as 'hazardous waste' under the Resource Conservation and Recovery Act (RCRA), arguing that the petition does not support regulation under the waste law and EPA lacks the needed resources to do so."

Back to top ▲

Water

EPA Testing St. Charles, MO Wells For Contamination Next Week.

The **St. Louis Post-Dispatch** (1/11, Schlinkmann) reports new federal testing "for contamination near wells supplying some of St. Charles' drinking water is expected to begin Tuesday, after a dispute over insurance coverage was resolved." St. Charles Public Works Director Nick Galla "said the federal Environmental Protection Agency submitted documentation showing that its contractor will have the level of insurance coverage required by the city." While both "the city and EPA say drinking water provided by the city's water treatment plant remains safe, the city has shut three wells over the past year as a precaution after some new chemical contamination was discovered in area groundwater." The city "contends that the new contamination is tied to a nearby Ameren Missouri substation on Huster Road south of Highway 370."

Sacketts Urge Supreme Court To Reject New WOTUS Definition.

Inside EPA (1/11) reports in subscription-based coverage, "Plaintiffs in the Supreme Court case testing the limits of Clean Water Act (CWA) jurisdiction over wetlands are urging the justices not to defer to the

Biden administration's approach in its newly finalized definition of 'waters of the United States' (WOTUS), arguing in a new letter that the rule contradicts key statements by one of the CWA's architects."

OFFICE OF
AIR AND RADIATION

Ms. Jessica Hamilton
Evergreen Action
Post Office Box 21961
Seattle, Washington 98111

Via Electronic Mail: jessica@evergreenaction.com

Dear Ms. Hamilton:

Thank you for your letter of November 15, 2022, to U.S. Environmental Protection Agency (EPA) Administrator Regan urging action on rulemaking regarding the power sector. You wrote on behalf of 4,944 Americans who signed a petition asking EPA to move forward quickly. The Administrator asked that I respond on his behalf.

Public health will always be our North Star at EPA. We will never lose sight of the need to protect the most vulnerable communities that are affected by pollution from power plants. At the same time, we are committed to transparency and open dialogue about our power sector approach and to providing states, power companies and the public with well-timed information about our actions and making every effort to have coherent compliance deadlines.

EPA has made great strides toward setting and strengthening standards for air pollution from the power sector. As your petition notes, there are many actions that can affect the power sector, and we are working on many of them in parallel. Aligning these rules and schedules requires careful adherence to the law and the deliberative process. I assure you that we are moving with all deliberate speed to craft a suite of rules and regulations that will be durable and protect public health.

As we work on proposals to address greenhouse gas emissions from both new and existing power plants under Clean Air Act sections 111(b) and (d), we are meeting frequently with partners and stakeholders to hear their ideas. In 2022, we held two rounds of comprehensive discussions with power sector stakeholders, including with Evergreen Action. We also sat down with the major coalitions of regulated entities several times to discuss their ideas, reached out to the major grid managers to assess reliability issues, and participated in multiple regional stakeholder convenings focused on the future of the power sector. EPA also opened a non-rulemaking docket (Docket No. EPA-HQ-OAR-2022-0723) to collect public input on the Agency's efforts to reduce emissions of greenhouse gases from new and existing fossil fuel-fired

electric generating units. We have placed this petition in that docket and will consider it as EPA moves forward to propose rules in 2023.

We proposed to reaffirm the "appropriate and necessary" finding (A&N finding) that provides legal, scientific, and economic underpinning for the Mercury and Air Toxics Standards (MATS) and, based on comments we received on that proposal as well as other information we've requested from industry, we are considering whether more protective air toxics standards are warranted through a review of the MATS Risk and Technology Review (RTR). We expect to finalize the A&N finding and propose the RTR in 2023. We are working towards finalizing the Good Neighbor Plan for the 2015 Ozone National Ambient Air Quality Standards (NAAQS) in early 2023, which, as proposed in April of 2022, would establish new ozone season NO_X emissions budgets for fossil fuel-fired power plants in the identified states and also regulate certain other industrial sources of ozone pollution. Regarding coal ash, EPA continues to improve the current rules by working to issue the final federal permitting program, and a proposal to regulate legacy coal ash surface impoundments.

Your petition also mentions other rules to improve air quality and protect public health that are in process. On January 6, 2023, after carefully reviewing the most recent available scientific evidence and technical information, and consulting with the Agency's independent scientific advisors, EPA announced its proposed decision to revise the primary (health-based) annual PM2.5 standard from its current level of 12.0 micrograms per cubic meter ($\mu g/m^3$) to within the range of 9.0 to 10.0 $\mu g/m^3$. For the regional haze program, our work in the second implementation period is intended to build on the significant progress states have already achieved to reduce pollution that impairs visibility. Additionally, EPA has indicated that it intends to undertake notice-and-comment rulemaking to address portions of the Regional Haze Rule, including but not limited to the Reasonably Attributable Visibility Impairment provisions, the provisions regarding Federal Land Manager consultation and any other elements of the rule it may identify for additional consideration. Regarding Title V, in March 2022, EPA issued a proposal to remove the emergency affirmative defense provisions from the CAA operating permit program regulations. EPA is working on a final rulemaking and anticipates completion in early 2023. With regard to implementation of the 2010 1-hour sulfur dioxide primary NAAQS, EPA continues to review and take action on state plans to attain that standard, and take federal actions where appropriate.

Since the implementation of the Clean Air Act in 1970, we've seen key pollutants drop by nearly 80 percent while the economy has grown by more than 290 percent. However, we know that there is more work to do. We'll continue to take deliberate, concerted steps to bolster our longstanding collaboration with communities, states, tribal nations, industry, and the public to implement the Clean Air Act and foster a healthier environment.

Thank you for your continued interest and partnership in this work. I appreciate the opportunity to be of service and trust the information provided is helpful.

Sincerely,

Joseph Goffman
Principal Deputy Assistant Administrator

Talked with Nick, Rona and Jeb and I think we have a plan to walk through the presentation.

Joe – Intro
Kevin – first 5 slides (overview)

- On slide 3 will note that while we are focusing on MATS and 111, Jeb is on the line and can provide a little background on GNP if desired (we thought that would be better than Ex. 5 Deliberative Process (DP) Ex. 5 Deliberative Process (DP)

Nick – slides 6-7 on MATS
Kevin – 111 slides to round out presentation.

Subject: NEW: Evergreen + NRDC's Report, Powering Towards 100% Clean Power by 2035

Hi All,
I wanted to follow up and let you know that Evergreen and NRDC's report, *Powering Toward 100% Clean Power by 2035*, was released and covered in the *Washington Post's Climate 202* this morning. Please let us know if you have any thoughts or questions. We'll be following up with a request to meet on this topic, as well.

We also hope you can join us **tomorrow at 4 PM EST for a virtual briefing, discussion, and Q&A** hosted by Evergreen and NRDC on this new report. The event will feature climate champion Senator Tina Smith, NRDC President and CEO Manish Bapna, NRDC Climate & Clean Energy Federal Legal Director Lissa Lynch, UC-Santa Barbara Professor Dr. Leah Stokes, and Evergreen Co-Founder Sam Ricketts. You can RSVP here.

Best,
Lena Moffitt

NEW REPORT: Powering Toward 100% Clean Power by 2035

Modeling Finds Ambitious Carbon Standards Are Critical for U.S. to Achieve an 80% Clean Grid by End of this Decade and Keep Biden's Climate Targets Within Reach

Evergreen Action and NRDC (Natural Resources Defense Council) today released "*Powering Toward 100 Percent Clean Power by 2035*," a report with new modeling that details how President Biden can build on the clean energy investments in the Inflation Reduction Act (IRA) and close the remaining pollution gap to get on track to achieve his climate commitments.

New modeling in this report finds that the most effective action the administration can take to tackle power sector carbon pollution is to set ambitious carbon pollution standards for new and existing power plants under the Clean Air Act. Specifically, the modeling shows that advancing strong limits on power plant carbon pollution, along with the IRA, could cut power sector carbon emissions 77 percent below 2005 levels by the end of this decade.

To deliver the climate agenda he promised the American people, the president must make significant progress this year to clean up the power sector, the nation's largest industrial source of heat-trapping carbon pollution and the linchpin to economy-wide decarbonization. The report provides a roadmap to build on the historic climate progress made by the IRA and get on the path to achieve President Biden's targets of 100 percent clean electricity by 2035 and a 50-52 percent reduction of economy-wide emissions from 2005 levels by 2030.

In addition to strong power sector standards, NRDC's modeling shows that effective implementation of the IRA, improvements in electricity transmission and stepped-up action by states can put the U.S. on track to a safer, clean energy future.

Read the full policy report here.

"The IRA was a pivotal moment for climate action in the United States, but it is not mission accomplished for the Biden climate agenda," said **Evergreen Action Power Sector Policy Lead Charles Harper**. *"President Biden committed to the most ambitious set of climate goals in American history—including getting us to 100 percent clean power by 2035 and slashing 2005 climate pollution levels in half by 2030. Important progress has been made, but President Biden must take bold action this year in order to deliver on those commitments. By ramping up its work to transition the U.S. economy toward 100 percent clean energy, the Biden administration and state leaders can reduce toxic pollution, cut energy costs, create good jobs, and advance environmental justice. Let's get to work."*

"This new report not only shows that President Biden's climate goals for the power sector are achievable—but it is among the first to lay out how we can actually get there," said **Manish Bapna, President and CEO of NRDC (Natural Resources Defense Council)**. *"We don't need magic bullets or new technologies. We already have the tools—and now we have a roadmap. If the Biden administration, Congress, and state leaders follow it, we will build the better future we all deserve. There is no time for half measures or delay."*

Evergreen and NRDC's new policy report assesses the steps the Biden administration must take to stay within reach of 100 percent clean electricity by 2035 and address harmful pollution from fossil generation. Recommendations include:

- **Setting ambitious carbon pollution standards for new and existing power plants** under the Clean Air Act, through the Environmental Protection Agency (EPA), and **setting EPA pollution standards** that reduce traditional air and water pollutants and improve public health;
- **Expanding transmission capacity, speeding up interconnections**, and **creating market parity for clean energy** at the Federal Energy Regulatory Commission (FERC);
- **Implementing the Inflation Reduction Act effectively**, with timely federal guidance on the IRA's tax credits and grant programs and the distribution of funds in a way that maximizes carbon reductions and equitable economic opportunity; and
- **Advancing climate action at the state level**, including accelerated 100 percent clean electricity and pollution standards that align with 80 percent clean power by 2030 and heightened oversight of polluting utilities.

You can read Evergreen and NRDC's full roadmap to 100 percent clean power by 2035, here.

NEW REPORT: Powering Toward 100% Clean Power by 2035

Modeling Finds Ambitious Carbon Standards Are Critical for U.S. to Achieve an 80% Clean Grid by End of this Decade and Keep Biden's Climate Targets Within Reach

Evergreen Action and NRDC (Natural Resources Defense Council) today released "*Powering Toward 100 Percent Clean Power by 2035*," a report with new modeling that details how President Biden can build on the clean energy investments in the Inflation Reduction Act (IRA) and close the remaining pollution gap to get on track to achieve his climate commitments.

New modeling in this report finds that the most effective action the administration can take to tackle power sector carbon pollution is to set ambitious carbon pollution standards for new and existing power plants under the Clean Air Act. Specifically, the modeling shows that advancing strong limits on power plant carbon pollution, along with the IRA, could cut power sector carbon emissions 77 percent below 2005 levels by the end of this decade.

To deliver the climate agenda he promised the American people, the president must make significant progress this year to clean up the power sector, the nation's largest industrial source of heat-trapping carbon pollution and the linchpin to economy-wide decarbonization. The report provides a roadmap to build on the historic climate progress made by the IRA and get on the path to achieve President Biden's targets of 100 percent clean electricity by 2035 and a 50-52 percent reduction of economy-wide emissions from 2005 levels by 2030.

In addition to strong power sector standards, NRDC's modeling shows that effective implementation of the IRA, improvements in electricity transmission and stepped-up action by states can put the U.S. on track to a safer, clean energy future.

Read the full policy report here.

"The IRA was a pivotal moment for climate action in the United States, but it is not mission accomplished for the Biden climate agenda," said **Evergreen Action Power Sector Policy Lead Charles Harper**. *"President Biden committed to the most ambitious set of climate goals in American history—including getting us to 100 percent clean power by 2035 and slashing 2005 climate pollution levels in half by 2030. Important progress has been made, but President Biden must take bold action this year in order to deliver on those commitments. By ramping up its work to transition the U.S. economy toward 100 percent clean energy, the Biden administration and state leaders can reduce toxic pollution, cut energy costs, create good jobs, and advance environmental justice. Let's get to work."*

"This new report not only shows that President Biden's climate goals for the power sector are achievable—but it is among the first to lay out how we can actually get there," said **Manish Bapna, President and CEO of NRDC (Natural Resources Defense Council)**. *"We don't need magic bullets or new technologies. We already have the tools—and now we have a roadmap. If the Biden administration, Congress, and state leaders follow it, we will build the better future we all deserve. There is no time for half measures or delay."*

Evergreen and NRDC's new policy report assesses the steps the Biden administration must take to stay within reach of 100 percent clean electricity by 2035 and address harmful pollution from fossil generation. Recommendations include:

- **Setting ambitious carbon pollution standards for new and existing power plants** under the Clean Air Act, through the Environmental Protection Agency (EPA), and **setting EPA pollution standards** that reduce traditional air and water pollutants and improve public health;
- **Expanding transmission capacity, speeding up interconnections**, and **creating market parity for clean energy** at the Federal Energy Regulatory Commission (FERC);

- **Implementing the Inflation Reduction Act effectively**, with timely federal guidance on the IRA's tax credits and grant programs and the distribution of funds in a way that maximizes carbon reductions and equitable economic opportunity; and
- **Advancing climate action at the state level**, including accelerated 100 percent clean electricity and pollution standards that align with 80 percent clean power by 2030 and heightened oversight of polluting utilities.

LCV Applauds Restored Roadless Protections in Tongass National Forest

Washington D.C. – In response to the U.S. Department of Agriculture finalizing protections for the Tongass National Forest, the League of Conservation Voters (LCV) released the following statement from **Senior Vice President of Government Affairs Tiernan Sittenfeld:**

"We are thrilled that the Biden-Harris administration restored the Roadless Rule in the Tongass – the world's largest intact temperate rainforest. Reinstating protections for 9 million acres in Alaska's Tongass National Forest will ensure that this natural wonder, massive carbon sink, and crucial resource for many Alaskan communities remains intact and protected.

"These traditional homelands of the Tlingit, Haida, and Tsimshian peoples are home to abundant wildlife and are critical to local tribes' way of life. The logging and destructive development that the Trump administration invited would have destroyed the region's robust tourism, fishing, and recreation economies. We look forward to continuing our work with the administration to enshrine crucial protections for all Alaska communities."

LCV and Chispa Arizona Statements on Ten West Link Transmission Line Groundbreaking in Tonopah Arizona

Washington, D.C. and Phoenix, AZ – In response to Vice President Harris, Secretary Granholm, Secretary Haaland, and White House Climate Advisor Ali Zaidi breaking ground at the Ten West Link transmission line in Arizona today, the League of Conservation Voters (LCV) and Chispa Arizona issued the following statements:

"This is what clean energy independence looks like. Arizonans and Californians can now look forward to an improved energy grid fueled by more U.S.-made clean, affordable solar and wind energy in the near future," **said LCV Senior Director of Government Affairs Matthew Davis.** "Thanks to the Biden-Harris administration and champions in Congress, the Ten West groundbreaking is only the beginning of many job-creating affordable clean energy projects soon to pop up around the country as the new climate plan rolls out. These projects will save families money and build a healthier future for our children. We can't wait to see benefits for communities across the country as more of the administration's climate investments translate into real-world projects."

""Arizonans from every corner of our state deserve clean energy powering their communities," **said Vianey Olivarria, State Director for Chispa Arizona**. "Projects like Ten West can ensure our state is on the road to deliver 100% clean energy, which we have been advocating for years. Our federal leaders showed their commitment to climate action but we need Arizona's leaders to follow their lead and commit our state to 100% clean electricity so every Arizonan can breathe cleaner air and live a healthier life."

LCV Statement on Kevin McCarthy's Chaotic Election to House Speaker

Washington, D.C. – In response to the extremely slim House Republican majority finally electing Kevin McCarthy to serve as Speaker of the House during the 118th Congress, the League of Conservation Voters (LCV) issued the following statement from **Senior Vice President of Government Affairs Tiernan Sittenfeld:**

"The absurdly chaotic Speakership election process and the concessions made to the most extreme members of the MAGA Republican caucus are a clear indication that the new House majority is ill-equipped to lead. In addition, Kevin McCarthy is one of the most anti-environment, pro-polluter members of Congress, and House Republicans' election of him as Speaker further demonstrates how out of step the GOP is with the majority of voters who support climate action and affordable clean energy. In stark contrast, House Democrats are united and eager to fight for popular action on climate, environmental justice, democracy and more and to block the House Republicans' dirty pro-polluter agenda."

Below are the lifetime LCV scores of the new House Republican leadership and the lifetime LCV scores of the new House Democratic leadership.

Member	Party	District	118th Congress Leadership Role	Lifetime Score
Kevin McCarthy	R	CA-23	Speaker of the House	4%
Steve Scalise	R	LA-1	Majority Leader	4%
Tom Emmer	R	MN-6	Majority Whip	5%
Elise Stefanik	R	NY-21	Republican Conference Chair	35%

Member	Party	District	118th Congress Leadership Role	Lifetime Score
Hakeem Jeffries	D	NY-8	Democratic Leader	96%
Katherine Clark	D	MA-5	Democratic Whip	96%
Pete Aguilar	D	CA-31	Democratic Conference Chair	97%
James Clyburn	D	SC-6	Assistant Democratic Leader	86%

LCV Statement on Proposed Soot Pollution Standard

Washington, D.C. – In response to EPA proposing to slightly tighten only the annual Particulate Matter National Ambient Air Quality Standard (and not the daily standard), the League of Conservation Voters (LCV) released a statement from **Senior Director of Government Affairs and former EPA health scientist Matthew Davis:**

"This draft rule misses the mark and does not adequately slash soot pollution, protect public health, or prevent premature deaths. We urge the Biden-Harris administration to follow the best science and longstanding legal foundation and finalize an annual standard of 8 micrograms per meter cubed (ug/m3) and a 24-hour standard of 25 ug/m3 to adequately safeguard public health and deliver on environmental justice. EPA has a massive opportunity to strengthen this standard and build a future with cleaner, healthier air for our children, especially for communities of color and low wealth communities disproportionately near polluting coal power plants, industrial facilities, truck depots, and freight corridors.

"Particulate matter, or soot pollution, primarily from burning coal and diesel fuel, cuts short the lives of over a hundred thousand people in the U.S. each year, disproportionately communities of color and low wealth communities, and damages children's developing bodies in countless tragic ways. Our members and people around the country are counting on the EPA to deliver the maximum health benefits as we transition to a clean energy economy."

LCV Statement on the Two-Year Anniversary of January 6 Insurrection

Washington D.C. — Today, The League of Conservation Voters (LCV) issued the following statement from **President Gene Karpinski** on the two-year anniversary of the violent January 6, 2021 attack on the U.S. Capitol:

"Two years later, we reflect on the horrific insurrection members of Congress, their staff, and those who work to protect and maintain Capitol Hill endured on January 6, 2021. On this day, we also acknowledge the broader assaults on our democracy. MAGA Republicans' anti-democratic extremism is especially dangerous for people of color, Indigenous people, young people, and people who have disabilities – the same communities that bear the greatest burdens of environmental injustice. While voters across the nation rightfully rejected most extremist candidates who ran on 'the Big Lie' last November, many of the same election overthrowers who supported the violent January 6 insurrection continue to hold positions of power in this country jeopardizing voting rights and

undermining the rule of law. LCV is more committed than ever to fighting for racial and environmental justice, and a robust, equitable democracy for all."

Environmental Groups, Legal Experts, and Clean Water Advocates Respond to Biden Administration's Revised Definition of "Waters of the United States"

Washington, D.C. – Today, the Biden Administration has finalized the Revised Definition of the "Waters of the United States" and repealed – once and for all – former President Donald Trump's catastrophic rollback of critical clean water protections, which jeopardized the waterways that our families and communities depend on. In response, environmental groups, legal experts, and clean water advocates released the following statements:

"While a few polluters will benefit from gutting our nation's clean water rules, most businesses depend on clean water. Clean water protections are especially important for many local economies that depend on tourism to nearby lakes, rivers, and beaches and for certain industries like beverage manufacturing, shellfish, outdoor recreation, farming, and others. The Biden-Harris Administration's reversal of the Dirty Water rule is a vital step forward for science-backed protections of the "Waters of the US" and ensuring thriving American businesses and communities," said **David Levine, President and Co-founder at American Sustainable Business Network.**

"Clean water is essential for all life. But our water and rivers are at risk as never before, from pollution, loss of habitat, climate change, and other threats. Nothing short of our health and safety are at stake. We applaud the Biden Administration for reinstating commonsense safeguards for the waterways that provide vital benefits for drinking water and wildlife. This new rule is based on rigorous science and goes a long way towards ensuring clean water for our rivers and the communities that depend on them," said **Tom Kiernan, President and CEO, American Rivers.**

"We applaud the EPA for taking this critical step toward securing safeguards for all of our nation's water bodies," said **Jennifer Peters, National Water Programs Director at Clean Water Action.** "The Navigable Waters Protection Rule decimated water quality protections for most wetlands and streams, including those that feed vital drinking water sources."

"The agencies put a lot of time, effort, and thought into this rule," said **Stuart Gillespie, Senior Attorney with Earthjustice.** "They reviewed hundreds of scientific articles, worked through thousands of public comments, and developed a framework for protecting our nation's water from reckless development and industrial pollution. The rule is not perfect, but it's an important step towards restoring protections to a vast network of waterways that play a key role in supporting public health, resilient ecosystems, and economic growth."

"The EPA's new rule makes progress by restoring federal protections to at least some waterways. But securing the promise of the Clean Water Act requires us to protect all our streams and remaining wetlands from polluters. We will not rest until all of America's waterways get the protection they deserve," said **John Rumpler, Senior Clean Water Director for Environment America.**

"We welcome the Biden administration's new rule to protect our nation's clean water and define the scope of the Clean Water Act. Here in the Midwest, we depend on wetlands to filter and recharge our drinking water sources, to contain stormwater and reduce risks of flooding, and to provide critical habitat for wildlife. Strong federal wetlands protections are needed to stop the continued unnecessary loss of wetlands from development, and to keep our state and local wetlands programs honest," said **Scott Strand, Senior Attorney at the Environmental Law & Policy Center.**

"With today's announcement, the Biden administration has moved closer to fulfilling the President's campaign promise to ensure everyone has access to clean, safe water," said **Madeleine Foote, Deputy Legislative Director for the League of Conservation Voters.** "We greatly appreciate the administration ridding us of Trump's dangerous Dirty Water Rule once and for all and thank the EPA and the Army Corps for engaging in a transparent and inclusive rulemaking process. This is a good step toward advancing environmental justice for Black, Brown, Indigenous, and low-income communities that have historically borne the brunt of water pollution."

"Today we can all celebrate cleaner water for our national parks and communities. After working with our partners and hearing from park supporters across the country, these more clearly defined protections will help keep our waters safer and cleaner for drinking, swimming, boating, fishing and so much more. Our work is not done with two-thirds of national park waters impaired and many communities today still living with unsafe drinking water. The health of our parks is directly linked to the health of the waters that surround and flow through them. And protecting our waterways upstream from pollution will improve the water quality downstream for the millions of people that visit our parks and the diverse, endangered wildlife that call our parks home. From the impacts of climate change to drinking water crises and algal blooms, cleaner water works in tandem with restoration investments already underway at our parks and promotes businesses, tourism and recreational opportunities across the country. Today is a win for all of us," said **Chad Lord, Senior Director of Environmental Policy and Climate Change for the National Parks Conservation Association**.

"It's a smart move to take this off the books. Eliminating the anti-science Trump 'Dirty Water Rule' and codifying longstanding practices is a sensible, good-government action. And this comes at a time when we're seeing unprecedented attacks on federal clean water protections by polluters and their allies. While the nation still has significant work to do to fully protect important waters, it's encouraging to see the country taking a step in the right direction to protect the waters we need for everyone's health and the environment," said Jon Devine, **Director of Federal Water Policy for Natural Resources Defence Council.**

"Recent rollbacks of clean water protections left countless communities and ecosystems in danger," said **Jim Murphy, director of legal advocacy for the National Wildlife Federation.** "While there is still much work to be done to ensure all Americans have clean water, the EPA's new rule will help protect the streams, wetlands, rivers, and lakes people and wildlife depend upon from pollution and other threats. We thank EPA administrators for their efforts to safeguard the nation's waters."

"Today's rule is an important step toward restoring protections for waters critical to our communities and our health. Big polluters, like the oil and gas industry, and their pro-polluter conspirators in Congress have been too successful at trying to chip away and gut bedrock environmental and public health protections in the name of profit for the wealthy few. Enough is enough. Today's rule pumps the brakes on their ability to add to the setbacks and damage already done by the Trump Administration's move to severely restrict what waters are covered by the Clean Water Act. We still have so far to go, but today's rule is a win for the public," said **Beth Roach, Clean Water Director, Sierra Club.**

"Today, the Biden administration restored needed clean water protections so that our nation's waters are safe for fishing, swimming, and as sources of drinking water," said **Kelly Moser, senior attorney and leader of the**

Southern Environmental Law Center's Clean Water Defense Initiative. "The lakes, streams, and wetlands that this rule protects help to ensure the health of our ecosystems and communities."

LCV Statement on Electric Vehicle Tax Credits Announcement

Washington, D.C. – In response to the Treasury Department and IRS release of key details to help consumers access new electric vehicle tax credits from the Inflation Reduction Act, the League of Conservation Voters issued the following statement from **Vice President of Government Affairs Sara Chieffo:**

"This is history in the making! We are thrilled to see the Biden-Harris administration's quick work to implement the Inflation Reduction Act and kick off the new year by speeding the transition to electric vehicles and ensuring these cars and trucks are more accessible for all. Importantly, today's announcement will help more school districts purchase electric school buses, the cleanest and healthiest option for kids. More electric vehicles on the streets will mean cleaner air for our children and families and major progress toward our climate goals. We look forward to continued work with the Biden-Harris administration to ensure the landmark climate law is implemented boldly, swiftly, and equitably."

LCV & Nevada Conservation League Praise News That Biden Plans to Designate Avi Kwa Ame National Monument

Groups Call for Swift Action to Preserve Entire Proposed Monument

Washington, D.C. – In response to the announcement that President Biden will soon designate Avi Kwa Ame National Monument in Nevada, the League of Conservation Voters (LCV) and Nevada Conservation League (NCL) released the following statements:

"The lands and waters we protect help tell and teach the story of our country," **Craig Bakerjian, Nevada Conservation League Avi Kwa Ame Campaign Manager said.** "The Avi Kwa Ame National Monument will contribute to a narrative of an America that protects culturally, biologically, historically, and economically important landscapes for our communities, and especially honors the stories of Indigenous communities which have often been denied historical recognition. We thank the Biden administration for building on the promise to conserve and restore our country's lands and waters to address the climate crisis and Senators Cortez Masto and Rosen and Representatives Titus and Lee for their efforts to help protect Avi Kwa Ame in southern Nevada."

"LCV thanks President Biden, Secretary Haaland and advocates from Indigenous, conservation, outdoor recreation, and local communities for their work to protect Avi Kwa Ame and urges the Biden-Harris administration to make this national monument a reality as soon as possible," said **LCV President Gene Karpinski**. "Avi Kwa Ame is a sacred landscape to tribes in the region as well as habitat for rare and threatened wildlife and plants. A new national monument will strengthen opportunities for the state's outdoor recreation economy and local gateway communities. LCV appreciates the leadership of the Fort Mojave Indian Tribe as well as the efforts of Sens. Catherine Cortez Masto and Jacky Rosen and Reps. Dina Titus and Susie Lee, and we hope to celebrate the designation of the entire proposed monument very soon."

LCV Statement on Slim House Republican Majority

Washington, D.C. – In response to Republicans taking a slim majority in the U.S. House of Representatives, the League of Conservation Voters (LCV) issued the following statement from **SVP of Government Affairs Tiernan Sittenfeld**:

"While we are disappointed that anti-environmental Republicans will hold a slim majority in the House in the next Congress, it's clear that any attempts to weaken long-standing environmental and public health protections or recent climate progress would be at their peril. Voters overwhelmingly rejected many anti-democracy zealots and anti-climate action candidates in the pocket of Big Oil and instead turned out for far more champions who passed or supported the largest climate bill in U.S. history than any pundit or poll predicted. The extremely narrow incoming House Republican majority and their leadership team are completely out of touch with the vast majority of voters who support climate action and affordable clean energy. With strong public support and a pro-environment Senate and White House, LCV will fight like hell to keep delivering the progress on climate, justice, and jobs that voters want."

LCV Statement on House Republican Leadership Elections

Washington, D.C. – The League of Conservation Voters (LCV) issued the following statement from **SVP of Government Affairs Tiernan Sittenfeld** in response to today's House Republican leadership elections:

"Despite the majority of voters casting their ballots in support of climate action and affordable clean energy last week, out of touch House Republicans are supporting three of their most-anti environment, pro-polluter members as their top leaders. With abysmal LCV scores at or below a truly appalling 5%, it's clear that Reps. Kevin McCarthy, Steve Scalise, and Tom Emmer want to double down on the failed dirty energy policies of the past and take our country backward. When people show you who they are, believe them."

LCV Statement on President Biden's COP27 Climate Commitments

Washington, D.C. – As of President Biden speaks at the 27th Conference of the Parties of the United Nations Framework Convention on Climate Change, the League of Conservation Voters (LCV) issued the following statement from **President Gene Karpinski**:

"Thanks to President Biden and Democrats in Congress, we're thrilled that a U.S. president is finally able to join the global climate summit with a popular and historic climate law on the books and the support of the majority of the country behind him.

"The IRA is a critical part of the United States meeting our international climate goals and we're encouraged by President Biden and his administration's important new steps this week to combat the climate crisis and protect public health: a stronger proposed methane rule, updated Methane Action Plan, and a new proposed federal contractor emissions reduction rule.

"Critically, the new proposed supplemental rule to cut methane and other harmful pollutants from the oil and gas industry and the updated Methane Action Plan reflect calls from community members, especially those living on the frontlines of oil and gas operations, to strengthen the EPA's previous proposal. We especially appreciate the additional proposed provisions that would require monitoring at all well sites, address abandoned and improperly closed wells, and target super emitters. We urge the EPA to swiftly finalize the strongest possible safeguards to help tackle the climate crisis and move us closer to ensuring that every family, no matter their zip code, race, or income, can breathe clean air.

"The new proposed rule requiring major federal contractors to reduce emissions in line with the Paris Agreement and disclose climate-related financial risks marks another important climate commitment. This rule is a powerful opportunity to use the federal government's purchasing power to drive decarbonization while safeguarding taxpayer dollars and promoting climate-resilient federal supply chains."

LCV Statement on Biden-Harris Administration Announcements on Big Oil Price Gouging, New Offshore Wind Lease Areas

Washington D.C. – In response to President Biden's press conference calling out oil and gas companies for price gouging consumers and the Bureau of Ocean Energy Management (BOEM)'s announcement today of two new offshore wind energy areas in the Gulf of Mexico off the coasts of Texas and Louisiana, the League of Conservation Voters (LCV) released the following statement from **Senior Vice President of Government Affairs Tiernan Sittenfeld**:

"We're glad that President Biden didn't mince words today – it is past time for Big Oil to pay the price for war profiteering. It is abhorrent for the oil and gas industry to enjoy the greatest windfall in history, raking in outsize, immoral profits while our communities and families struggle to pay high gas prices. At the same time, we're encouraged by the Biden-Harris administration's continued expansion of affordable clean energy. The two new wind energy areas announced in the Gulf of Mexico today have the potential to provide clean energy to nearly 3 million homes while creating good-paying union jobs, lowering household energy costs, and tackling the climate crisis.

"Thanks to the Biden-Harris administration's leadership, our country is taking action to hold Big Oil accountable while building an affordable clean energy future that works for everyone."

Chispa LCV Statement on EPA's Clean School Bus Rebates Awards Announcement

Washington, D.C. - Today, the Environmental Protection Agency announced the award recipients for the inaugural Clean School Bus Program rebate. In response, Chispa LCV released the following statement from**Chispa National Senior Director Johana Vicente**:

"Chispa members and madres promotoras across the country have been fighting for a clean ride for kids since 2017. The EPA's Clean School Bus Program is an important step to ensuring that communities get the investments they need to transition to clean transportation. With over 95% of the initial funding going to electric school buses, the EPA's initial efforts are a historic investment for pollution-free communities. Air pollution affects low-income communities of color disproportionately across the country; we are excited to see this program become a reality, but we know that our work does not end here. Chispa will continue to push for stronger equity indicators like race and air pollution to be part of the EPA's prioritization criteria for future funding, and for all of these public dollars to be invested in zero-tailpipe-emission school buses that will clean up our air. As the EPA prepares to release their grant program in 2023, we look forward to working with them to make sure communities of color breathing the dirtiest air benefit the first and the most."

Angeles Sanchez, Mom and Promotora with Chispa Nevada, said:
"We're thrilled to welcome this EPA funding for Clark County School District to continue the transition to a clean ride for kids, especially for low-income Nevadans and Nevadans of color who breathe the dirtiest air and most need a relief from pollution. In community with our members and promotoras, parents and students, Chispa Nevada has led a Clean Buses for Healthy Niños campaign since 2017, fighting for electric school buses that won't pollute the air our children breathe. As the mother of a child who suffers from asthma and rides in diesel school buses, this is a victory for our communities. We look forward to working with Clark County School District to fully transition its fleet to zero-tailpipe-emission school buses. Our children deserve to breathe clean air."

DJ Portugal, Chispa Arizona Federal Climate Organizer, said:
"Chispa AZ is excited to see that more than $11 million will be invested in clean school buses in Arizona. We are grateful that a majority of the 8 school districts awarded today are considered prioritized school districts that serve low-income communities of color who have been historically disenfranchised. We understand that communities of color are on the front lines of the climate crisis and are statistically more likely to suffer from air pollution-related health conditions. We applaud school districts for taking advantage of this opportunity to work towards transitioning to zero-tailpipe-emission buses and are glad that the majority of this funding will go to electric school buses in particular. We recognize that this will not only improve the air our children breathe but subsequently will also improve their quality of life, including their academic experience, as research shows they will experience reduced health-related absences as air quality improves. Chispa AZ would also like to acknowledge that this progress would not be possible without the ongoing advocacy of Chispa AZ members who, through our Clean Buses for Healthy Niños campaign, continue to push for the electrification of school buses in their communities year after year."

Ramon Palencia, Chispa Maryland Director and Maryland LCV Deputy Director, said:
"Investing in electric school buses is an investment in clean air and most importantly, our school children. These buses have the potential to be transformational for Baltimore City Public Schools, eliminating toxic chemicals in the

air that our children and communities breathe and providing quieter rides, better health, and fewer school absences due to preventable respiratory illnesses. We are calling on school boards and elected officials across Maryland to put the health of our youth and communities first by transitioning the state's school bus fleet to clean, zero-emission electric school buses."

About the Clean School Bus Program

The EPA's Clean School Bus Program was created by the Infrastructure Investments and Jobs Act of 2021 and will distribute $5 billion over 5 years to replace polluting buses with electric school buses. The program prioritizes funding for low-income, rural, and Tribal school districts. Due to overwhelming demand, the EPA nearly doubled this year's funding from originally offering $500 million to now awarding $965 million in rebates. Over 90% of 2022 applicants requested electric school buses, and over 95% of the 2,463 new school buses funded through this rebate round will be electric. Additional grants and rebates will be made available in 2023.

School districts receiving EPA rebate awards will have until April 2023 to place their purchase orders and receive the upfront rebate funds. Winning school districts are encouraged to contact their electric utility immediately to begin planning for any infrastructure needs. School districts can also receive technical assistance through the World Resources Institute's Electric School Bus Initiative.

As a founding member of the Alliance for Electric School Buses, a national coalition of not-for-profit organizations committed to equitable electrification of the nation's school bus fleet, Chispa has been fighting for federal funding for zero-emission, electric school buses since 2019. Check out our coalition's media statement here.

Alliance for Electric School Buses Applauds Transformational Rebate Awards for EPA Clean School Bus Program

Washington, D.C. -- Today, the U.S. Environmental Protection Agency announced the recipients of the inaugural, $965 million Clean School Bus Program rebates. The Clean School Bus Program, created by the Infrastructure Investment and Jobs Act of 2021, will invest $5 billion over 5 years in clean school buses. The 2022 rebates will fund approximately 2,500 new school buses for 400 school districts across all 50 states, 30 Tribal Nations and multiple U.S. territories, with the overwhelming majority of funds going to electric school buses, given the strong demand for zero-emission bus funding. Alliance for Electric School Buses Coalition Manager Carolina Chacon issued the following statement in response to the EPA's announcement:

"The Alliance for Electric School Buses is excited to see this transformational program provide funding for hundreds of school districts across the country to purchase electric school buses. We are especially elated to see that over 90% of winners will be investing in electric school buses, the cleanest and healthiest option for children.

These new electric buses will eliminate dangerous toxins in the air our children and communities breathe and reduce climate-harming pollution. For students and drivers, this means quieter rides, better health and fewer missed days of school or work due to preventable respiratory illnesses.

As we have noted previously, there is still urgent work to do to ensure this program prioritizes and reaches the communities breathing the dirtiest air and who desperately need relief: low-income communities and Black, Indigenous and communities of color. We also urge EPA to adopt measures for subsequent funding rounds that promote the creation of high-quality, family-sustaining jobs for school bus drivers, mechanics, manufacturing workers and electricians. We will continue pushing to secure funding, equitable financing and inclusive utility investment programs for school districts looking for additional opportunities to deploy electric school buses.

Today's announcement is the result of years of advocacy by families, students and community members seeking federal funding to facilitate their local school districts investing in a clean ride for kids. Our coalition remains committed to helping school districts get electric school buses on the road. Together, we are driving the charge for pollution-free communities and healthier children."

# # #

About the Alliance for Electric School Buses: We are a diverse partnership of not-for-profit organizations committed to fully transition the U.S. school bus fleet to electric models that will clean up the air 25 million children breathe. Our coalition represents environmental, equity, community, and labor groups who work at the local, state and federal levels.

LCV & Conservation Colorado Respond to Camp Hale-Continental Divide National Monument Designation and Thompson Divide Protections

Washington, D.C. – In response to President Biden designating Camp Hale-Continental Divide National Monument and announcing plans to better protect the Thompson Divide in Colorado, the League of Conservation Voters (LCV) and Conservation Colorado released the following statements:

"This is big! We have been working for over a decade with bipartisan community supporters for the permanent protection of the Camp Hale-Continental Divide area and we're thrilled about the additional protections planned for the Thompson Divide," **said Kelly Nordini, Conservation's Colorado's CEO.** "Senators Michael Bennet and John Hickenlooper, and Congressman Joe Neguse have done Colorado proud with their leadership to protect these landscapes for generations to come. Thank you President Biden for making this your first, of hopefully many to come, monument designations that protect the places people love and boost local economies."

"President Biden designating Camp Hale-Continental Divide as the first national monument of this administration and additional protections for the Thompson Divide are big victories for Colorado and the

country," said **LCV President Gene Karpinski**. "The extensive history of the military and outdoor recreation industry, along with vital ecological resources and wildlife habitats in the region are worthy of permanent protection. LCV appreciates the tireless leadership of local advocates and officials as well as Senators Michael Bennet and John Hickenlooper, Governor Jared Polis, and Congressman Joe Neguse. We hope this is one of many new national monuments in the near future and look forward to working with the Biden-Harris administration to protect additional lands and waters across the country."

LCV Response to Senate Ratification of Kigali Amendment

Washington, D.C. – Today, in response to Senate ratification of the Kigali Amendment to the 2016 Montreal Protocol to phase out use of hydrofluorocarbons (HFCs), which are chemicals used in refrigerators, air conditioners, and insulating foams among other applications, and are potent greenhouse gases thousands of times more powerful than carbon dioxide, the League of Conservation Voters (LCV) issued the following statement from **Sara Chieffo, LCV Vice President of Government Affairs**:

"We are thrilled to see the United States join 137 countries around the world in ratifying the Kigali Amendment, which will not only help tackle climate change by phasing down polluting hydrofluorocarbons (HFCs), but also support U.S. manufacturing and create tens of thousands of jobs. Ratifying this amendment is a big deal for the climate, helping to avoid the climate-warming emissions equivalent of two years' worth of the entire world's emissions today by 2050, and up to half a degree Celsius of warming this century. We are grateful to Leader Schumer, Chairman Carper, and every senator who supported the amendment for taking this important step which helps further re-establish American leadership on climate at the global level."

LCV & VALCV Statement on Energy Independence and Security Act of 2022

Washington, D.C. – In response to Senator Manchin's release of the *Energy Independence and Security Act of 2022* the League of Conservation Voters (LCV) and Virginia LCV released the following statements:

"After seeing the publicly released bill text, we continue to oppose this permitting rollback because it would prioritize fossil fuel interests over the environment and the health of impacted communities, which are disproportionately communities of color and low wealth communities," said Matthew Davis, Senior Director of Government Affairs at League of Conservation Voters. "The NEPA process is not to blame for project delays. The billion-dollar investment in the Inflation Reduction Act to improve environmental review and deepen public engagement is an evidence-backed way to achieve better projects more quickly that does not perpetuate environmental racism. We also join our colleagues in Virginia in strong opposition to the agreement in this bill to approve the fracked methane gas Mountain Valley Pipeline that would pose unacceptable risks to communities, especially low-income, elderly communities that live along the pipeline's path, as well as Indigenous and Black communities that would be impacted by the pipeline's proposed extension, and threaten water quality."

"At a time when we need to be doing everything we can to secure a clean energy future, the Mountain Valley Pipeline would take us in the wrong direction, undermining the very tangible progress on climate action that Congress has taken in recent months," said **Michael Town, Executive Director of the Virginia League of Conservation Voters**. "The MVP is billions of dollars over budget, years behind schedule, and lacks the permits it needs to proceed because it's a flawed project and shouldn't be built. Congress shouldn't break precedent and change the rules for this pipeline or any other particular project. That's bad policy and bad for the communities in Southwest Virginia already dealing with the environmental degradation the MVP has already forced upon them."

In recent weeks, LCV also expressed opposition to the leaked deal via a joint letter with NRDC and Climate Power to the full House and Senate and a press statement from the Equitable and Just National Climate Platform.

Climate and Progressive Groups Ramp Up Campaign to Educate About the Benefits of the "Climate Law"

Campaign Spotlights Impact of Historic Climate Action in the Inflation Reduction Act

Washington, DC — Today, Climate Power announced it is ramping up its campaign to educate voters about the Inflation Reduction Act's climate benefits in partnership with League of Conservation Voters (LCV), Black Progressive Action Coalition, Somos Votantes, and the NRDC Action Fund. A new $10 million advertising program kicks-off the multi-year campaign that also includes in-state

actions and events to tout the Climate Law's historic investments to create clean energy jobs, lower costs and take on climate change.

"With the most significant climate and clean energy investments in history, the Inflation Reduction Act is the Climate Law we've been waiting for," said **Lori Lodes, Climate Power Executive Director.** **"**President Biden delivered for the American people with this law that will reduce pollution, lower energy costs and create millions of good paying jobs. Now, it's time to make sure that people understand how the law will positively impact their lives and how its success must pave the way for more action to come."

"The Inflation Reduction Act is a historic, popular law that will directly improve the lives of children and families across the U.S. – but the truth is that most people don't know what it is yet," said **Pete Maysmith, Senior Vice President of Campaigns**. "As influential advocacy organizations, we have an obligation to help educate the public about this cost-saving, job-creating, climate change-addressing law and help folks understand how they personally stand to benefit."

"Historically, communities of color have often been left out of conversations about combating climate change, the good jobs created as a means of protecting our natural resources, and decreasing energy costs," said **Adrianne Shropshire, Executive Director of Black Progressive Action Coalition**. "The provisions of the Inflation Reduction Act provide real climate investment at a time when it is greatly needed, and we look forward to creating awareness to ensure the progress is felt in the communities that would benefit the most."

"Working people, especially people of color, continue to do their part to address climate change while facing the worst of its consequences," said **Melissa Morales, Founder and President of Somos Votantes**. "The Inflation Reduction Act finally delivers real relief by ramping up clean energy while lowering costs, creating millions of good paying, quality jobs and providing working people with the opportunities they need to build a better life for their families. And now, we get to celebrate the most important climate law of our generation."

"The Inflation Reduction Act is going to make a real difference in people's lives, from lowering their energy bills to making it easier to afford an electric vehicle," said **Kevin S. Curtis, Executive Director of the NRDC Action Fund**. "It will mean new job opportunities, less pollution and more affordable prescription drugs for millions of Americans. It's important that they understand President Biden is keeping his promise to deliver a more hopeful future when it comes to the climate crisis."

The new, 12 week $10 million ad campaign will target young people and communities of color in AZ, GA, MI, NV, PA, WI, NM, NH and the Los Angeles DMA on streaming services and social media platforms to demonstrate how the Inflation Reduction Act will make a real difference in their lives. Additionally, Climate Power will host events over the next several months with leaders in key states across the country including Arizona, Nevada, Georgia, Michigan, Pennsylvania, Wisconsin, and New Hampshire.

In the campaign's first ads, set to launch this Monday, Swipe, Solve It, and The Facts highlight the historic climate investments in the Inflation Reduction act, including reducing carbon pollution by 40% by 2030, creating over a million good paying clean energy jobs, and corporations paying their fair share. Scripts of the spots are below.

Swipe

We saw our planet burning…

So we took the streets to demand change.

To demand justice.

Now our demands are being met with action

Because President Biden signed the Inflation Reduction Act.

Climate policies that will change our lives.

40% reduction in toxic carbon pollution.

1.5 million new jobs.

And corporate polluters forced to pay for their mess.

Real Impact.

Right Now.

Solve It

It's no secret what's causing the climate crisis…

But we know how to solve it.

President Biden just signed the most important law of our generation.

It reduces carbon pollution by 40% by 2030,

ramps up production of clean energy,

which creates 1.5 million good paying jobs.

Paid for by making the biggest corporations pay what they owe.

Taking on climate change.

Protecting the planet for future generations.

President Biden's making it happen.

The Facts

This is the sound of President Biden's historic move to fight climate change.

The largest climate investment ever in America's history.

It will cut toxic pollution by 40%…

Create one and a half million clean energy jobs…

Save Americans over $1,000 a year…

And save almost four thousand lives per year as a result of cleaner air.

America's future sounds better than ever.

Young people and communities of color overwhelmingly support climate action and are on the frontlines of the climate crisis. According to polling conducted by Data for Progress in partnership with Climate Power, over 70% of young people support the climate provisions in the IRA. An EPA report released last year found that Black and Hispanic populations face the most severe impacts of the climate crisis.

LCV Statement on President Biden's Celebratory White House IRA Speech

Washington, D.C. – In response to President Biden's speech today at the White House celebrating the passage of the Inflation Reduction Act, the League of Conservation Voters issued the following statement from **LCV Senior Vice President of Government Affairs Tiernan Sittenfeld:**

"As President Biden said 'We're going to take the most aggressive action ever ever ever to confront the climate crisis and increase our energy security.' Today is a celebration of every climate activist, champion in Congress, and the broad coalition that worked tirelessly to get the historic climate investments included in the Inflation Reduction Act across the finish line. We appreciate President Biden and Vice President Harris' steadfast leadership in making climate action a national priority and helping secure critical investments in clean energy that will bring our nation one step closer to its climate goals, boost jobs, reduce energy costs for everyday families, and help protect the health of frontline communities overburdened by environmental injustices. In the moments where the prospects for this bill seemed dim, climate activists and Congressional champions fought like hell for climate action.

"The Inflation Reduction Act demonstrates what is possible when our leaders come together to take historic action, and we will keep up the fight for a resilient clean energy future by advocating against more drilling, leasing, and pipelines that perpetuate environmental racism and the climate crisis."

New Ad in $10 Million Education Campaign: What's in the Inflation Reduction Act 'For You'

~Ad Will First Air During 60 Minutes This Sunday~

Washington, D.C. – Today, the League of Conservation Voters, Climate Power, and Future Forward USA Action launched a new ad, "For You," in their previously announced $10 million national campaign to educate people on the benefits of the just passed Inflation Reduction Act to their lives, especially how it lowers the costs of their energy bills and prescription drugs.

WATCH: "For You"

The explainer-style ad engages people in learning the ways that this new legislation will reduce costs: "Out of pocket costs for drugs will be capped, for seniors, insulin will be just $35, families will save $2,400 on healthcare premiums, [and] energy costs [come] down an average of $1,800 a year for families."

The new ad will run on TV nationwide, including during CBS' 60 Minutes this Sunday, as well as on digital streaming platforms.

For more information on the $10 million Inflation Reduction Act education campaign and the groups involved, refer to the August 18 press release.

"For You"
News anchor: *President Biden signed the Inflation Reduction Act into law this afternoon*
VO: *Okay, so what exactly does it mean for you?*
Out of pocket costs for drugs will be capped
For seniors, insulin will be just $35
Families will save $2,400 on healthcare premiums
Energy costs down an average of $1,800 a year for families
And it's paid for by making the biggest corporations pay what they owe
President Biden's bill doesn't fix everything
But it will save your family money

LCV and Conservation Voters of PA Statements on President Biden's Speech for the 'Continued Battle for the Soul of the Nation'

Washington, D.C. -- In response to President Biden speaking in Philadelphia this evening to discuss the 'Continued Battle for the Soul of the Nation', the League of Conservation Voters (LCV) and Conservation Voters of Pennsylvania issued the following statements:

"At a time when our democracy is under attack by extremists seeking to undermine our elections, restrict access to the ballot box and attack truth itself, it is essential that we recommit ourselves to the rule of law on which our nation is based," said **Molly Parzen, Conservation Voters of Pennsylvania Executive Director**. "Policies that conserve our environment, combat climate change and protect the health of our families are only possible in a thriving democracy when the people – not violent extremists – are in charge."

"President Biden isn't mincing words when it comes to the systematic assault on our democracy by Republicans, MAGA extremists, white nationalists, and their far-right allies," said **Doug Lindner, LCV Advocacy Director for Judiciary and Democracy.** "With voting rights under attack by Republican legislators and judges, January 6th conspirators continuing to scheme to subvert our elections, and corporations continuing to funnel millions of dollars towards rampant disinformation and proponents of the Big Lie, we greatly appreciate President Biden standing up for the fundamental right of the people to govern ourselves. We can't have a healthy environment without a healthy democracy. So now it is more important than ever to combat election sabotage, disinformation, and blatant voter suppression efforts intended to further exclude the communities who face the most devastation from the climate crisis and environmental injustice, who are time and time again communities of color."

LCV Statement from Carol M. Browner on President Biden Signing the Inflation Reduction Act Into Law

Washington, D.C. – In response to President Biden signing the Inflation Reduction Act into law, the League of Conservation Voters (LCV) issued the following statement from **Board Chair and former EPA administrator Carol M. Browner**:

"Today President Biden has again demonstrated his commitment to be the 'Climate President' — signing into law the most significant climate legislation ever. The Inflation Reduction Act is a significant step to make the country stronger and our people healthier.

"This bill will position the United States, when paired with strong action from his administration, to meet President Biden's commitment to cut climate pollution by at least 50% by 2030 through unprecedented investments in clean energy solutions that will drive down pollution and energy prices – saving families hundreds of dollars every year. It accelerates the transition to clean energy independence that we need and that our communities want with transformational investments in manufacturing, innovation, and deployment.

"And the bill represents what is possible when leaders are determined to make progress, to find solutions, and to get climate action done. From financial incentives to job creation to climate pollution reduction, there are important provisions that will take steps to protect our health and environment in every community.

"At the same time this bill failed to meet the needs of communities of color and at-risk communities who for too long have borne a disproportionate burden of fossil fuel and other pollution. LCV will fight to protect Indigenous communities and communities of color along our Gulf Coast, in Alaska, and everywhere that are threatened by oil and gas drilling and fossil fuel development, and we will continue to push Congress and the administration to do more to advance environmental justice.

"We thank President Biden, Speaker Pelosi, and Leader Schumer for sticking with this bill and finding a path forward to passing it, and we commend the entire Senate and House Democratic Caucuses for voting in support of the Inflation Reduction Act. Without climate leadership in the White House and Congress, this important legislation would not have been realized, and we look forward to continued action to address the climate crisis as well as those most impacted by pollution."

LCV Statement on House Passage of the Inflation Reduction Act

Washington, D.C. – Today, in response to House passage of the Inflation Reduction Act, the League of Conservation Voters (LCV) released the following statement from **Senior Vice President of Government Affairs Tiernan Sittenfeld**:

"It happened! Congress just passed the strongest climate legislation in our history. The significance of this monumental step toward reducing our climate pollution and building a more just and thriving clean energy future cannot be overstated. Getting here is a testament to the persistence of a massive, diverse climate coalition, including labor, environmental justice advocates, young people, and climate champions on Capitol Hill and in the administration. We commend the Biden-Harris administration for their climate leadership and cannot wait for the President to sign this bill into law.

"At the same time this bill continues to prop up the still-too-powerful fossil fuel industry and corporate special interests, at the expense of communities of color. LCV will fight to protect Indigenous communities and communities of color along our Gulf Coast, Alaska, and elsewhere who continue to be threatened by oil and gas drilling and fossil fuel development. Starting today, we'll work to ensure people understand the ways the Inflation Reduction Act benefits them, through ads, field organizing, and other advocacy efforts. And LCV will get right back to work fighting for more climate and environmental justice on all fronts, from executive action, to state and local progress, to electing more environmental champions up and down the ballot. Finally, we'll ensure that every Republican who voted against this bill is held accountable for prioritizing polluters and corporate special interests over the health and well being of their constituents."

LCV Statement on Senate Passage of the Inflation Reduction Act

Washington, D.C. – Today, in response to Senate passage of the Inflation Reduction Act, the League of Conservation Voters (LCV) released the following statement from **Senior Vice President of Government Affairs Tiernan Sittenfeld**:

"Today is a huge and historic day! This landmark legislation is the biggest thing our nation has ever done on climate change, and our work to truly secure climate justice is far from over. Getting to this point is a testament to climate champions in Congress, and the diverse coalition, including labor, environmental justice advocates, and young people, relentlessly fighting for climate action, environmental justice, and good paying jobs. We look forward to swift House passage followed by the President's bill signing so that the U.S. can speed up our transition to a healthier, more equitable, clean energy future as soon as possible. All 50 Senate Republicans who opposed this bill just sided with polluters and corporate special interests and against the health and well being of their constituents, and we won't let them forget it.

"Passing this bill will mean massive and hard-won progress toward a clean energy future for our country. It will set in motion the economy-wide transformation necessary to power our homes, cars and trucks, and buildings with cheap renewable energy while making the U.S. a leader in clean energy manufacturing and investing in communities too often left behind. This legislation also includes damaging provisions designed to benefit the still-too-powerful fossil fuel industry that could have particularly harmful impacts on Indigenous communities, people of color, and other front-line communities. Just as we are ready to build the clean energy future this historic bill supports, we are equally ready to keep fighting against more drilling, leasing, pipelines, and other dangerous measures that perpetuate environmental racism and the climate crisis."

* * *

The last year and a half saw the biggest climate campaign in LCV's history. From over 400 events with members of Congress, cabinet officials, and other federal and local leaders, to field teams knocking over 575,000 doors in key states, to engagement with more than 27,000 small businesses, to town hall advocacy, to butter and ice sculpture art activations, to hundreds of paid TV and digital ads, LCV and our state affiliates and partners left nothing on the table in the fight for a climate bill. Now, it's time to finish the job.

ICYMI: Majority Leader Schumer, Democratic Senators and Leading Climate, Health Care, and Tax Fairness Groups Urge Congress to Pass the Inflation Reduction Act of 2022

Washington, D.C. – With the Senate barreling toward this weekend's vote on the Inflation Reduction Act, fifteen Senate climate champions joined a press conference hosted by leading climate, health care, and tax fairness groups yesterday to celebrate the historic, cost-saving bill, and urge Congress to swiftly pass the legislation and get it to President Biden's desk. Majority Leader Schumer summed up their message by saying, "put simply, this legislation saves lives, reduces cost, creates jobs, reduces inflation. And the American people are totally on our side."

The Senators' and advocates' excitement about the transformative provisions in the bill was palpable. The Inflation Reduction Act will deliver important relief to communities facing rising health care costs, high daily expenses due to inflation, and suffering from climate change-fueled extreme weather events. Outside experts are clear: the Inflation Reduction Act will slash inflation, reduce the deficit, boost the GDP, create millions of jobs, and critically, will put the country on track to reduce emissions by roughly 40% by 2030, making it the strongest federal climate legislation in U.S. history.

View a recording of the event HERE.

Passage of the bill would also be a major political win for Democrats, with new polling showing large margins of support from every sector of the electorate. A new Data For Progress poll found that 73% of likely voters support the bill, including 95% of Democrats, 73% of Independents, and 52% of Republicans.

For a twitter thread with event highlights, **click HERE.**

The press conference featured Majority Leader Chuck Schumer, Senators Tammy Baldwin, Richard Blumenthal, Michael Bennet, Tom Carper, Bob Casey, Chris Coons, Amy Klobuchar, Ed Markey, Alex Padilla, Brian Schatz, Tina Smith, Debbie Stabenow, Chris Van Hollen, and Ron Wyden and was hosted by the American Federation of Teachers (AFT), Americans for Tax Fairness, Building Back Together, Climate Action Campaign, Center for American Progress, Climate Power, EDF Action, Hispanic Federation, League of Conservation Voters, National Education Association (NEA), Patients for Affordable Drugs Now, Protect Our Care, and Sierra Club. **Here's what they said:**

"For many years here in Washington, Washington politicians have promised to tackle some of the biggest challenges facing our nation, only to fall short. But with the Inflation Reduction Act, Senate Democrats are delivering on historic climate change legislation, we're delivering on lower prices on prescription drugs, we're delivering on tax fairness, and we're delivering on jobs. This is a very, very, very, very big deal." **-Majority Leader Schumer**

"Senate Democrats will take action in the coming days to fight inflation, take action on the climate emergency and energy, make healthcare more affordable for millions of Americans. Thank you to the activists and organizers who have gotten us to this moment…This bill will be the most significant action we have ever taken to fight the climate emergency and lower costs for Americans." **-Sen. Tina Smith**

"People have sometimes said to me in places where I often don't get more than 25 or 30 percent of the vote, what does climate legislation look like? Now I have an answer. This is what it looks like, it looks like a bill that's going to reduce your prices … And finally after 50 years of trickle down economics we're able to summon the courage to raise taxes on some of the wealthiest people in America and some of the largest corporations." **-Sen. Michael Bennet**

"If inflation is eating away at your family's balance sheet, relief is on the way. But the thing that moves me is bringing some relief to the sweltering heat here today, to the tornadoes and the wildfires, to the challenges and the natural disasters all over our planet. Year after year, we have tried and not delivered big results. With this bill, relief is on the way." **-Sen. Chris Coons**

"This is a great lesson in government: never give up. So many people had counted us out on this bill, but we stuck with it. Why? Because we had constituents that said 'be on our side.' And we did it. As the forest fires are burning in California, as we see record temperatures all over the U.S.—including in my home state of Minnesota—we moved, and we're going to bring greenhouse gasses down 40% by 2030." **-Sen. Amy Klobuchar**

"The Republican Party is not going to give us a single vote on this bill. Why is that? Because GOP stands for Gas and Oil Party. GOP stands for Gang of Polluters. So yes, they blocked Waxman-Markey back in 2010, and yes, I would want more in this bill. But this bill has what we need on climate change. It's going to unleash a revolution." **-Sen. Ed Markey**

"There is no doubt that this bill would be the biggest climate action we have ever taken. It will be a victory for the planet and a victory for people across the country. If we succeed, it will be because there is a young generation demanding action, and they deserve all the credit." **-Sen. Brian Schatz**

"We need to leave the planet healthier for future generations. Young activists get that: finally the U.S. Senate gets it and is going to act on it." **-Sen. Alex Padilla**

"Corporate price gouging has been taking a big chunk out of Americans' pockets for a long time… but while Mitch McConnell and the Republicans are standing with Big Pharma to protect their profits, we're standing with the American people… When they're standing with Big Oil to protect their profits, we're standing to bring down energy costs and to be able to tackle the climate crisis." **-Sen. Debbie Stabenow**

"It's better late than never because never will be doom for all of us." **-Sen. Chris Van Hollen**

"This afternoon is about people beating power… People count more than power. We're going to show that, finally, grassroots is prevailing over the powerful." **-Sen. Ron Wyden**

Subject: TOMORROW AT 2 PM ON CAPITOL HILL: Inflation Reduction Act Presser

****MEDIA ADVISORY****

For Planning Purposes Only
Contact: Mika Hyer, mhyer@lcv.org, 940-783-2230

Thursday, August 4 at 2:00 p.m. EST on Capitol Hill:
Senators Michael Bennet, Bob Casey, Amy Klobuchar, Ed Markey, Chris Murphy, Alex Padilla, Brian Schatz, Tina Smith, Debbie Stabenow, and Ron Wyden to Join Leading Climate, Health Care, and Tax Fairness Groups and Urge Congress to Pass the Inflation Reduction Act of 2022

Washington, D.C. – On **Thursday, August 4 at 2:00 p.m. EST at the Senate Swamp and** streamed live online, Senators Michael Bennet, Bob Casey, Amy Klobuchar, Ed Markey, Chris Murphy, Alex Padilla, Brian Schatz, Tina Smith, Debbie Stabenow, and Ron Wyden will hold a press conference with American Federation of Teachers (AFT), Americans for Tax Fairness, Building Back Together, Climate Action Campaign, Center for American Progress, Climate Power, EDF Action, Hispanic Federation, League of Conservation Voters, Patients for Affordable Drugs Now, Protect Our Care, and Sierra Club, to celebrate the historic, cost-saving climate and health care provisions in the Inflation Reduction Act and urge Congress to swiftly pass the bill and get it to President Biden's desk.

The Inflation Reduction Act will deliver important relief to communities facing rising health care costs, high inflation, and suffering from climate-fueled extreme weather events. Critically, the Inflation Reduction Act will be the strongest federal climate legislation in U.S. history and will put the country on track to reduce emissions by roughly 40% by 2030. Additionally, this bill is the most consequential health care legislation since the Affordable Care Act — it will lower health care premiums for millions of Americans and includes historic reforms to lower prescription drug prices including allowing Medicare to negotiate for the very first time. These critical investments are fully paid for by curbing price gouging and tax evasion and by making billion-dollar corporations pay a fairer share of taxes, while protecting families making under $400,000 a year. The Senate and House must pass the bill as soon as possible.

WHAT: 'Pass the Inflation Reduction Act' Press Conference

WHO:
- **Sen. Michael Bennet**
- **Sen. Bob Casey**
- **Sen. Amy Klobuchar**
- **Sen. Ed Markey**
- **Sen. Chris Murphy**
- **Sen. Alex Padilla**
- **Sen. Brian Schatz**
- **Sen. Tina Smith**
- **Sen. Debbie Stabenow**

LCV Statement in Response to Leader Schumer and Sen. Manchin's Agreement on Reconciliation Bill with Climate Provisions

Washington, D.C. – In response to Majority Leader Schumer and Senator Manchin's announcements of an agreement to add the 'Inflation Reduction Act of 2022,' which reportedly will reduce carbon emissions by close to 40 percent by 2030, to the reconciliation bill, the League of Conservation Voters (LCV) issued the following statement from **SVP of Government Affairs Tiernan Sittenfeld:**

"Wow! We are so excited that Majority Leader Schumer and Senator Manchin have reached a deal that includes climate investments to reduce carbon emissions by roughly 40 percent by 2030, and we are eager to see the details. As families struggle with high gas prices, inflation, and devastating climate-fueled extreme weather, this is such welcome news. This is it: the time for the Senate to pass cost-saving legislation that makes overdue investments in climate and clean energy, improves our energy security, creates good jobs, and builds a more affordable, healthy, just, and equitable future is right now."

LCV & Chispa Statements on WV v. EPA Decision: Pass Reconciliation Bill, Expand the Court

Washington D.C – Today, in response to the Supreme Court of the United States' decision to side with the interests of coal companies and dangerously narrow the Environmental Protection Agency's authority to regulate climate pollution under the Clean Air Act, the League of Conservation Voters issued the following statements:

LCV Board Chair and former EPA administrator, Carol M. Browner said:

"Today's decision is another loss for the health of our children and communities.

"It will exacerbate the plight of communities of color historically overburdened by pollution and will destabilize the future of clean energy and the economic promise it holds. It also sets a dangerous precedent by undermining the authority of all federal agencies to establish the strongest, most cost effective pollution standards to protect people and the environment from dangerous pollution and other threats. The majority ignores that today's electricity generation is significantly different from the days of Thomas Edison. We are using more renewables and polluting less. The majority ignores the science of climate change. It significantly limits EPA's responsibility to ensure clean air.

"Reforms are needed now more than ever, from rebalancing and expanding the Supreme Court to end special interest control over the courts to Congress finally taking action to tackle the climate crisis and energy security by passing the $555 billion for investments in climate, jobs, and justice that will lower costs for families and protect our health and environment. We cannot afford to wait. It's time to act on the climate crisis."

Chispa National Director of Policy and Advocacy Alejandra Ramirez-Zarate said:

"This decision sacrifices the health and livelihood of low-income people of color who are bearing the brunt of climate change and are often exposed to higher levels of air pollution, toxic hazards, and other contaminants. Environmental justice is a civil rights issue. With every breath we take, children and families of color are dying in polluted neighborhoods. Our communities will continue to fight back on this and other egregious attacks on our civil and human rights, including our right to clean air."

LCV on Overturn of *Roe v. Wade*: 'Expand the Court'

Washington D.C – Today, in response to the Supreme Court of the United States' decision in *Dobbs v. Jackson Women's Health Organization* to overturn *Roe v. Wade* and allow states to ban abortion, the League of Conservation Voters issued the following statement from **President Gene Karpinski** and **Board Chair Carol M. Browner:**

"Today is an infuriating day. For the first time in our history, the Supreme Court has taken a fundamental right away from the people. Eight in 10 people in this country support the legal right to abortion and this decision is an outrageous overreach by an extremist majority on a Supreme Court captured by far-right special interests. The decision to overturn nearly 50 years of precedent will deny access to essential healthcare for millions of people, especially those who already carry the greatest burdens from attacks on democracy and environmental, economic, and health injustices, including communities of color, communities with low-wealth, and rural communities.

"Make no mistake, today's decision is the result of a concerted decades-long right-wing effort to capture our courts and roll back the rights of women, girls, and all people who can become pregnant. We can't wait to correct this captured Court – Congress must act immediately to rebalance the scales for a more just, honorable, and equitable judiciary, and expand the number of justices who serve on our nation's highest Court."

LCV Statement on President Biden's Actions to Accelerate Clean Energy Manufacturing and Production

Washington, D.C. – In response to President Biden's announcement that he will use the Defense Production Act to accelerate domestic clean energy manufacturing and production, and pause potential tariffs on solar imports from Cambodia, Malaysia, Thailand, and Vietnam, the League of Conservation Voters (LCV) issued the following statement from **Senior Director of Government Affairs Matthew Davis:**

"This is exactly the kind of bold executive action voters are demanding from their climate president – thank you President Biden. Today's move will immediately turbocharge clean energy manufacturing and production in the United States, create good-paying jobs, and accelerate our transition to the healthier, more equitable, and more affordable clean energy future our children and families deserve. Already, announced expansions in solar manufacturing since the start of the Biden-Harris administration will triple U.S. capacity to crank out the solar panels we need to rapidly achieve true energy independence. We've been calling on the administration to swiftly alleviate uncertainty for the solar industry caused by a Department of Commerce trade inquiry and are pleased with today's announcement.

"It's critically important that success begets success, and we urge the Senate to quicklypass the $555 billion investments in climate, jobs and justice in order to lower energy costs for families, improve air quality, and achieve long term clean energy independence."

New Ads Call for An End to ConocoPhillips' Dirty And Dangerous Willow Project in Western Arctic

Washington, D.C. – Today, the League of Conservation Voters (LCV) announced the launch of new digital ads in Washington, DC calling for an end to the ConocoPhillips Willow Project in the Western Arctic with its massive oil profits and the massive amounts of climate pollution the project would emit. The Department of Interior is expected to decide the fate of the Willow Project in the coming months and LCV is pushing hard to hold ConocoPhillips accountable and put an end to this disastrous project.

"The Willow Project would lock us into decades more of dirty, dangerous, and costly fossil fuels at a time when the transition to clean energy could not be more important for our communities and our economy," said **LCV Conservation Program Director Alex Taurel**. "This fragile area of Alaska is already warming three times faster than the rest of the world due to climate change – we cannot allow ConocoPhillips to destroy this pristine region and harm communities while they rake in massive profits at our expense. DOI must put an end to this harmful project and protect the Western Arctic and the path for the climate progress and public lands protections we desperately need."

LCV and its members have sent in comments urging DOI not to approve this massive drilling project in the Western Arctic, which would emit the carbon equivalent of nearly one-third of America's coal plants annually.

LCV Statement on House GOP Energy and Climate Agenda

Washington, D.C. - Today, in response to the reports that the GOP will release an Energy and Climate Agenda, the League of Conservation Voters (LCV) released the following statement from **LCV Senior Vice President of Government Affairs Tiernan Sittenfeld**:

"This would be laughable as a climate agenda in 2022 except there is absolutely nothing funny about the climate crisis or Congressional Republicans' obstruction of desperately needed solutions in the name of lining the pockets of their corporate allies and big oil polluters who fund their campaigns. Unfortunately, they are simply turning a blind eye to the science, communities harmed by fossil fuel pollution, and the will of voters by doubling down on the failed energy policies of the past. There is no more time to waste. Congressional Republicans must prioritize people over polluter profits and support commonsense clean energy investments to address the climate crisis and environmental injustice, create good-paying union jobs, and save people money on their energy bills."

LCV Statement Announcing Push to Expand the Supreme Court

Washington, D.C. – Today, for the first time in its history, the League of Conservation Voters (LCV) announced its support for expanding the United States Supreme Court to include four additional seats. Adding seats to the Supreme Court would allow President Biden to rebalance the court and appoint justices who will work for the people, not deep-pocketed polluters and their allies. Our nation's highest court has been packed by far-right interests waging an unprecedented judicial assault on our environment, our democracy, our equality, and our reproductive rights. Without a deliberate rebalancing, the Supreme Court — with its justices who serve for life — is positioned to continue imposing an extremist agenda for a generation to come.

Within weeks, the Supreme Court's far-right majority is likely to severely curtail the EPA's authority to fight climate change, overturn the long-settled precedent of *Roe v. Wade*, and undermine core doctrines allowing regulatory agencies like the EPA to do the jobs Congress created them for. This Court has repeatedly upheld voter suppression and gerrymandering while striking down common-sense limits on money in politics. Over the next year, it will consider cases that could narrow the EPA's authority under the Clean Water Act and limit the ability of universities to overcome structural racism. The far-right majority has twisted the Court's once-exceptional shadow docket into a routine tool of unaccountable judicial power over public policy, and has failed to address serious ethical lapses by its own members.

"This is the most partisan and corrupted Supreme Court in living memory — we cannot wait decades to correct it. Protections for our environment, our reproductive rights, our equality, and our democracy are only as strong as the judges who uphold them, and the majority on this captured Court have shown time and again they will promote their own extreme ideological agenda over the rights of people in this country. We have to stand up for our rights to breathe clean air and drink clean water, have our votes counted, make our own health decisions and more," said **Doug Lindner, Advocacy Director for Judiciary & Democracy.** "Now is the time for Congress to rebalance the scales for a just, honorable, and equitable Supreme Court that will hold big polluting corporations accountable instead of doing their bidding; enforce voting rights instead of attacking them; and protect the health and safety of our communities, including the air we breathe and the water we drink. Communities historically excluded in our country already carry the greatest burdens from the climate crisis, from pollution, from attacks on democracy, and from racist systemic inequality. We will fight for our communities by fighting for a Supreme Court that works for the people."

Our rights to clean air and clean water, to equal justice and equal votes, to decide for ourselves whether to have children and whom to marry, depend on healthy institutions led by ethical public servants committed to democracy and the rule of law. Senate Republicans led by Mitch McConnell and Charles Grassley undermined centuries of tradition when they refused to consider Merrick Garland's nomination and allowed Donald Trump, who lost the popular vote in 2016, to appoint a series of justices who have pushed the Court to an ideological extreme after misleading the U.S. Senate and the public on their positions on settled case law like *Roe vs. Wade*. Our Constitution gives Congress the power to set the number of Justices on the Supreme Court, as it did in laws

signed by George Washington, Thomas Jefferson, Abraham Lincoln, and others. The time has come to do so again.

Chispa LCV Statement on EPA's Clean School Bus Program Announcement

Washington, D.C. - Today, in response to the Environmental Protection Agency's opening of its historic, billion-dollar Clean School Bus Program to help school districts replace polluting buses with zero-emission, electric school buses, Chispa National, Chispa state partners, and the League of Conservation Voters (LCV) released the following statements:

"Chispa's members have been fighting for a clean ride for kids for years. EPA's initial efforts are a historic investment in electric school buses and we are excited to welcome school districts to begin applying for funding now. As communities of color are disproportionately impacted by air pollution, we will continue to push for race and air pollution level indicators to be part of the criteria to ensure that low-income communities of color who most need cleaner air quality get the benefits first. We look forward to working with the EPA in real-time to center equity, prioritize electric school buses, and ensure that this initial round of transformational funding will reach the communities this program is intended to help," said Johana Vicente, Senior National Director of Chispa National.

"Communities of color and people living in poverty are disproportionately breathing this dirty air and consequently suffering from health impacts. Phoenix is one of the most polluted cities in the country, ranked 8th for annual particle pollution and 11th for 24-hour 'short-term' particle pollution, according to the American Lung Association's 2022 State of the Air report. Additionally, Phoenix is ranked 5th most polluted by ozone. Our children, especially in communities of color, need urgent investments to electrify our school bus fleets and close these disparities. While we maintain that race is an important indicator in outcomes for historically excluded communities, we look forward to working with the EPA to

ensure school districts serving predominantly children of color across Arizona are prioritized for funding," said David Portugal, Federal Organizer for Chispa Arizona.

"We welcome the opportunity provided by the EPA for our most vulnerable communities impacted by these oppressive systems to apply for funding to replace polluting school buses. Twice a day, more than 60,000 diesel-fueled buses transport Florida's 2.7 million public school students in the Sunshine State. We will closely follow the implementation of this program and ensure that our communities are prioritized, served, and protected. We continue to push for an equitable transition of the nation's school bus fleet and for climate justice through pollution-free solutions for propane and other fossil fuels harming our families," said Maria Revelles, Program Director for Chispa Florida.

"We applaud the Biden-Harris administration's efforts to advance clean electric school buses. Parents want their kids to have healthy air to breathe, and unfortunately, for many parents in communities of color living near roadways or polluting industries, that fundamental goal is out of reach. Zero-tailpipe-emission electric school buses can make parents' goal of clean air for their kids much more attainable. We commend the tireless leadership of our Chispa colleagues to advocate for clean rides for children, and will continue to work together to push Congress and the administration to free up more federal funding for electric school buses and direct funds to those school districts whose families have historically faced the worst air quality and need the most support to transition to zero-tailpipe-emission school buses," said Darien Davis, Government Affairs Climate and Clean Energy Advocate for LCV.

The Biden-Harris administration will host an event at Meridian High School in Falls Church today to announce the program where representatives from Chispa and LCV will attend. See the announcement HERE.

School districts can apply now to receive a rebate -- delivered to the manufacturer or dealer before the district pays -- that will cover the full cost or price differential of a new electric school bus, with a limit of 25 new school buses per district. From $13,000 to $20,000 in additional funding will also be awarded for school districts to purchase electric school bus charging stations. To be entered into the Clean School Bus Program rebate lottery, school districts must have active System for Award Management (sam.gov) and login.gov accounts for their entities and fill out a one-page online application found on the EPA website.

###

About the Clean School Bus Program:

The Clean School Bus Program was established by the Bipartisan Infrastructure Law passed by Congress and signed into law by President Biden in 2021. As a member of the Alliance for Electric School Buses, a national coalition of not-for-profit organizations committed to an equitable electrification of the nation's school bus fleet, Chispa has advocated for zero-emission, electric school buses since 2017.

About Chispa:

Chispa is a program of the League of Conservation Voters that builds the power of Latinx communities to fight for climate justice and our democracy. Visit us at https://chispalcv.org for more information.

LCV Applauds House Passage of Consumer Fuel Price Gouging Prevention Act

Washington, D.C. – In response to the passage of the Consumer Fuel Price Gouging Prevention Act through the U.S. House of Representatives, the League of Conservation Voters (LCV) issued the following statement from **Tiernan Sittenfeld, SVP of Government Affairs**:

"It's past time to hold Big Oil accountable for exploiting hardworking people to pad their own pockets – all while polluting our air and exacerbating the climate crisis. We commend Representatives Porter and Schrier for their leadership and every House Democrat who voted yes and stood up for their constituents who are paying the price for Big Oil's abhorrent gouging at the gas pump during an international crisis. The Senate must follow suit and take swift action to hold polluters accountable, lower energy costs for families, and achieve long term clean energy independence by passing this bill and the House-passed $555 billion investments in climate, jobs and justice."

* * *

Earlier this week, LCV led a group letter from 15 environmental organizations to the U.S. House of Representatives urging members to support H.R. 7688, the Consumer Fuel Price Gouging Prevention Act. And LCV's recent poll found that 87% of voters favor a crackdown on price gouging by oil companies, including 63% who strongly favor it.

LCV Statement on DOI 5-Year Plan for Offshore Drilling

Washington, D.C. – Today, in response to the news that the Department of Interior will release the next draft of the 5-year offshore drilling plan, the League of Conservation Voters (LCV) released the following statement from **Conservation Program Director Alex Taurel**:

"We applaud Secretary Haaland and the Interior Department for recently canceling offshore drilling lease sales and for taking a deliberative and thoughtful approach to the forthcoming five year offshore drilling plan. Since leasing decisions won't produce oil for years or decades, they have no impact on today's gas prices. But new leases will keep us dependent on oil years or decades from now when our transition to cleaner energy sources must be far along so we meet our obligation to solve climate change and deliver pollution reductions to communities fighting for environmental justice. Offshore drilling is a dirty and dangerous business that threatens coastal communities, economies and marine life, which is why implementing solutions now to allow for a future powered by clean energy must be the way forward. We look forward to the release of the next draft of DOI's 5-year plan for offshore drilling and are counting on this administration to finalize a plan that schedules no new lease sales."

Subject: Environmental Groups Letter & Press Supporting Schrier-Porter Fuel Price Gouging Bill

https://www.washingtonpost.com/politics/2022/05/17/suspect-buffalo-rampage-cited-ecofascism-justify-actions/

Exclusive: Environmental groups call on House to pass fuel price-gouging bill

Fifteen environmental groups are calling on the House to pass the **Consumer Fuel Price Gouging Prevention Act**, which would empower **President Biden** to issue an emergency declaration barring "excessive" or "exploitative" gasoline and home energy prices, according to a letter shared exclusively with The Climate 202.

"This legislation takes important action to protect families struggling with high gas and home heating fuel prices while Big Oil rakes in sky-high profits," the groups wrote in the letter sent to House offices on Tuesday morning. "The oil and gas industry is profiteering off [Russian President **Vladimir**] **Putin**'s brutal and unprovoked invasion of Ukraine."

The national average for regular gas hit another record of $4.48 a gallon on Monday, according to **AAA**. The groups signing the letter included the **League of Conservation Voters**, **Natural Resources Defense Council**, **Earthjustice**, and **Climate Power**.

While **Speaker Nancy Pelosi** (D-Calif.) has said the House will vote on the legislation this week, Democrats on the **House Rules Committee** were forced to pull the measure from consideration on Monday due to a lack of votes in the full chamber.
The committee could try again as soon as Tuesday, although the bill is unlikely to garner much Republican support. GOP leaders on Monday sent a whip notice to members urging them to vote against the measure, calling it an "attempt to distract and shift blame" to energy companies.

LCV Statement on CEQ's Appointment of Dr. Jalonne L. White-Newsome

Washington, D.C. – In response to the White House Council on Environmental Quality's (CEQ) announcement that Dr. Jalonne L. White-Newsome will be the new Senior Director of Environmental Justice at CEQ, the League of Conservation Voters (LCV) issued the following statement from **Senior Vice President of Government Affairs Tiernan Sittenfeld**:

"The Biden-Harris administration's commitment to advancing environmental justice is more important than ever and we are thrilled that Dr. Jalonne L. White-Newsome will take on this historic role at CEQ to help deliver a more just and equitable future for all. Dr. White-Newsome brings deep experience across academia, philanthropy, and community advocacy. Her impressive impact earned her Michigan Conservation Voters' Advocate of the Year in 2017 when they said her work, 'should serve as a blueprint for equitable policymaking going forward.' We look forward to working with Dr. White-Newsome to ensure the successful implementation of the Justice40 Initiative and the Climate and Economic Justice Screening Tool, advance a full suite of improvements to the National Environmental Policy Act, and enact a whole of government approach to safeguarding communities of color and advancing environmental and climate justice."

Tri-Caucus Members Led on Climate, Environmental Justice, and Democracy Legislation in 2021 Paving the Way for Continued Progress

Washington, D.C. -- As members of Congress return from recess, the League of Conservation Voters (LCV) released a new report examining the environmental records of members of the Congressional Asian Pacific American Caucus (CAPAC), Congressional Black Caucus (CBC), and the Congressional Hispanic Caucus (CHC), collectively referred to as the Tri-Caucus.

Using data from LCV's 2021 *National Environmental Scorecard*, the report details how all of the Tri-Caucus leadership scored 100% and every member received top marks of 90% or higher on the *Scorecard*. Many Tri-Caucus members have also led the introduction and passage of pro-environment amendments and legislation and have helped lay the groundwork for even more action to come on climate and voting rights. Legislation passed and introduced by Tri-Caucus members cover a wide range of critical issues including clean transportation and electric school buses, clean water, outdoor recreation, high quality union jobs, immigration, and voting rights.

"Black, Indigenous, and Brown members of Congress have championed important pro-environment and democracy legislation rooted in justice and equity in 2021, paving the way for Congress and the Biden-Harris administration to act swiftly and boldly -- LCV applauds their leadership and vision," said **LCV Government Affairs Advocate Darien Davis**. "During a year where the global pandemic and attacks on our democracy have persisted, it has never been more clear that the voices and needs of communities of color and low-wealth communities must be at the center of federal policymaking. We look forward to our continued partnership with Tri-Caucus members as we work to pass and enact the transformational investments communities need in climate, clean energy, environmental justice, and good jobs."

The report highlights multiple bills introduced by Black, Indigenous, and Brown members of Congress that were included as amendments in the Invest in a New Vision for the Environment and Surface Transportation (INVEST) Act. Some of the notable amendments and bills highlighted in the report are the EV Freedom Act led by Rep. Alexandria Ocasio Cortez (NY-14), the Drinking Water and Wastewater Infrastructure Act of 2021 led by Sen. Tammy Duckworth (IL), and the Voters on the Move Registration Act led by Sen. Rev. Warnock (GA) and Rep. Nikema Williams (GA-05) as part of the For the People Act (H.R. 1).

"In 2021, we took meaningful action to reassert America's global climate leadership and make historic investments in transitioning to a clean energy economy," said **Senator Padilla**. "California has long led the way on climate action, setting ambitious vehicle emissions standards and harnessing alternative energy sources. But we know that more urgent action is needed to limit the planet's warming, prevent catastrophic climate impacts, and advance environmental justice for all. That's why I'm proud to have received a 100% on my LCV Scorecard this year and I will keep fighting for Congress to legislate with the urgency that the climate crisis demands."

"I'm honored to receive a 100% on the League of Conservation Voters' (LCV) legislative scorecard for my work to create and support sustainable, clean energy jobs here in Georgia," said **Senator Reverend Warnock**. "I've long said that the best way to grow a sustainable economy is to strengthen the sustainability of our environment. We can fight climate change and protect vulnerable communities while still keeping our economy competitive and strong. I'm going to keep working alongside LCV to defend our environment and bring even more clean energy jobs and investments back to Georgia."

"CAPAC and Tri-Caucus members are not only leading Congress's climate and environmental legislation, we are also ensuring that environmental justice is a core component of this work," said **Representative Judy Chu (CA-27)**. "We know that historically marginalized communities like Asian Americans, Native Hawaiians, and Pacific Islanders, and other communities of color face the greatest risks from climate impacts. Native Hawaiians and Pacific Islanders are more likely to live in coastal island communities that face greater risks from sea level rise and Asian Americans are more likely to live in neighborhoods with poor air quality and high levels of pollution. And I am so proud that CAPAC's 76 House and Senate members averaged a score of 99.66% on the 2021 environmental scorecard."

Read the full report here.

The 2021 *National Environmental Scorecard* was released last month and can be found here.

LCV Statement on Leaked Supreme Court Opinion Overturning *Roe v. Wade*

Washington, D.C. – In response to the leaked draft opinion indicating that a majority of Supreme Court justices are planning to overturn *Roe v. Wade* and allow states to ban abortion, the League of Conservation Voters issued the following statement from **President Gene Karpinski** and **Board Chair Carol M. Browner** –

"This draft opinion is an outrageous overreach by a captured Supreme Court and by Justices who, at their confirmation hearings, denied under oath that they were planning to overturn *Roe v. Wade*. Neither the constitution nor the people support this egregious abuse of power by a bare majority on our highest court.

"Overturning *Roe* would devastate communities, especially communities of color, low-income communities, and rural communities who already face significant barriers to accessing care and are the same groups most

harmed by pollution, climate change and restrictions on voting rights. Access to abortion care is central to building the just and equitable democracy we seek. As of today, the right to safe abortion care remains the law of the land, and we stand with our allies leading the movement for reproductive freedom and justice and look forward to joining them on the steps of the Supreme Court and across the country tonight. At the same time, LCV and our affiliated entities will keep fighting like hell this year to elect pro-environment, pro-choice candidates who will codify *Roe*, confirm judges who respect our fundamental rights, and build a just and equitable clean energy future."

* * *

We encourage reporters to contact reproductive freedom groups directly for further comment on this news:

LCV: 'Now is the time to pass a transformational reconciliation bill'

Washington, D.C. – In response to reports about last night's energy meeting, the League of Conservation Voters (LCV) issued the following statement from **SVP of Government Affairs Tiernan Sittenfeld:**

"Between increasingly devastating climate-fueled extreme weather events, high gas prices, and rising inflation, now is the time for the Senate to pass a transformational climate, jobs and justice reconciliation bill that will save families money, create good paying jobs, and build a healthier, more just clean energy future. Congressional Republicans have demonstrated time and again that they are not serious about acting on climate at the scale science and justice require or ensuring billionaires pay their fair share. Their overwhelming support for Trump's 2017 tax scam and Congressional Republicans' abysmal 14% average 2021 LCV score make that abundantly clear. We truly cannot afford any more delay or distraction. The time to act on climate through the budget reconciliation process is right now."

LCV Statement on President Biden's Earth Week Actions and Remarks

Washington, D.C. – Today, in response to President Biden's Earth Day remarks in Washington and week of action leading up to Earth Day, the League of Conservation Voters (LCV) released the following statement from **President Gene Karpinski**:

"Today, President Biden made it crystal clear – his pen is ready and he is ready to get this done. As we saw this week, the Biden-Harris administration continues to prioritize growing our clean energy economy and workforce, lowering costs for families, protecting our forests, responsibly building climate-smart infrastructure, and reducing climate pollution. With rising inflation, high gas prices, and Putin's unprovoked and inhumane war, there is no doubt we are in a challenging moment. But time is running out and federal climate legislation is essential to hit our necessary and ambitious climate goals.

"As we said in our letter to the President yesterday, this is a legacy defining moment. We are depending on this administration to do everything they possibly can to work with the Senate to swiftly pass a reconciliation package that puts the U.S. on the path to real energy independence while cutting emissions in half by 2030 and building an equitable, inclusive, and just future for all. We are all in to get these transformational investments we need in climate, clean energy, justice, and jobs passed into law. Together we can and must get this done."

***

Yesterday, CEOs from the some of the nation's top environmental, environmental justice, and public health groups urged President Biden to keep his promise to urgently act on climate by finalizing a deal to pass into law the $555 billion in climate, justice, jobs, and clean energy investments that the House of Representatives approved last November. The letter can be found here.

LCV Statement on Biden's Forests Executive Order

Washington, D.C. – In response to President Biden's Executive Order on forests, LCV issued the following statement from **Conservation Program Director Alex Taurel**:

"We welcome President Biden's recognition of the critical role that old forests can play in addressing the climate and biodiversity crises and his commitment to protect these areas. Mature and old-growth forests store large amounts of carbon, provide clean drinking water for communities, and serve as essential habitat for many at-risk species. We are out of time to address the climate crisis, which is why we are counting on the Biden administration to move forward swiftly with a rule to safeguard these old forests from logging and other threats."

LCV Statement on the Historic Confirmation of Justice Ketanji Brown Jackson to Supreme Court

Washington D.C. — In response to today's Senate vote confirming Justice Ketanji Brown Jackson to the Supreme Court, making her the first Black woman and first former public defender to serve on the nation's highest court, the League of Conservation Voters (LCV) issued the following statement from **President Gene Karpinski:**

"We are thrilled to congratulate Justice Ketanji Brown Jackson on her historic confirmation to the Supreme Court! One of the most qualified nominees in American history, Justice Jackson's varied and distinguished career of public service demonstrates that she is the right person for this momentous lifetime appointment. The Supreme Court and lower courts make decisions that touch our daily lives in countless ways, and the appointment of the first Black woman and first former public defender ever to serve on our nation's highest court is a milestone in the fight for a judiciary that looks like America and protects our vital interests, including clean air, clean water, racial justice, and a democracy that works for the people, not just the polluters and other special interests. Environmental laws are only as strong as the judges who enforce them, and we trust that Justice Jackson will be a justice for the people."

LCV Statement on Senate Judiciary Committee Vote on Judge Ketanji Brown Jackson's Historic Supreme Court Nomination

Washington D.C. — In response to today's Senate Judiciary Committee vote on the Supreme Court nomination of Judge Ketanji Brown Jackson, the League of Conservation Voters (LCV) issued the following statement from **Advocacy Director for Judiciary and Democracy Doug Lindner**:

"We're thrilled Judge Ketanji Brown Jackson's historic nomination to the Supreme Court stands one step closer to well-deserved confirmation. We are also disappointed but not surprised that Republicans on the Senate Judiciary Committee are willing to force a discharge motion on a Supreme Court nominee for the first time in over a century, on the first Black woman to ever be nominated, despite acknowledging her extensive qualifications. Our communities deserve to breathe clean air, to drink clean water, to vote without undue burdens, and to have a Supreme Court Justice who will pursue justice for all, not just the polluters and special

interests. Judge Ketanji Brown Jackson's exemplary career as a judge, as Vice Chair of the U.S. Sentencing Commission, and as a federal public defender will bring critical perspective to the nation's highest court. It is long past time for the first Black woman to serve on the Supreme Court. And as the latest IPCC report released today underscores, the stakes for the future of our planet have never been higher. We know that environmental laws are only as strong as the judges who uphold them — we need all three branches of government to make them work. Judge Jackson is the right person for the job, and we look forward to the Senate swiftly confirming her as the next Supreme Court Justice."

LCV Statement on the International Panel on Climate Change Working Group III Report

Washington, D.C. – In response to the IPCC Working Group III report release today focused on mitigation, highlighting the importance of limiting warming to 1.5C and the inadequacy of current commitments to achieve this goal, the League of Conservation Voters (LCV) released the following statement from **President Gene Karpinski:**

"This latest report from the IPCC, coupled with the Working Group II report released just a few weeks ago, reinforces the urgency of transformational action to address the climate crisis at the scale that science and justice require. We are encouraged to see the IPCC state clearly that clean, renewable energy must power our future, and that we must severely curtail our dependence on fossil fuels and false solutions like unconstrained use of carbon capture technology, hydrogen, and biofuels. As the wealthiest nation in the world and one of the largest historical emitters of climate pollution, the United States has an obligation to swiftly advance our clean energy transition and support less developed countries in meeting their goals.

"First and foremost, the Senate must enact the House-passed $555 billion investments in climate, jobs, and justice, a crucial step in meeting our existing climate commitments. We must also heed the IPCC's warning that current global fossil fuel infrastructure alone will drive warming above 1.5 °C. We must live up to our climate commitments, including ending fossil fuel subsidies and canceling the development of new fossil fuel infrastructure while supporting a just transition for workers currently employed in the fossil fuel industry. Putin's horrific war on Ukraine is a reminder that reliance on fossil fuels is dirty, dangerous, and unpredictable. Moving to a clean energy economy will provide greater economic stability, lower energy costs, create jobs, and achieve true energy independence -- and it is the only solution to staving off the most detrimental effects of climate change."

LCV Statement on the Building Better School Infrastructure Plan

Washington, D.C. – In response to the announcement of the Biden-Harris administration's Action Plan for Building Better School Infrastructure which will leverage existing investments to support schools across the country as they transition to more energy efficient buildings and transportation, the League of Conservation Voters (LCV) issued the following statement from **Government Affairs Advocate Darien Davis**:

"Today's announcement marks a strong step toward better health and educational outcomes for children in our public schools, especially for communities of color that are disproportionately impacted by toxic pollution. This whole-of-government approach to school infrastructure will help ensure kids in schools breathe cleaner air while saving districts money and creating good-paying jobs. More than 25 million children ride dirty diesel-powered school buses each day, and programs like the Biden-Harris Action Plan for Building Better School Infrastructure will help schools better access the resources they need to make sure that kids have a clean ride to school. We also urge Congress to swiftly approve President Biden's FY2023 Budget and enact the House-passed $555 billion investments in climate, jobs and justice investments to make our schools even safer and healthier."

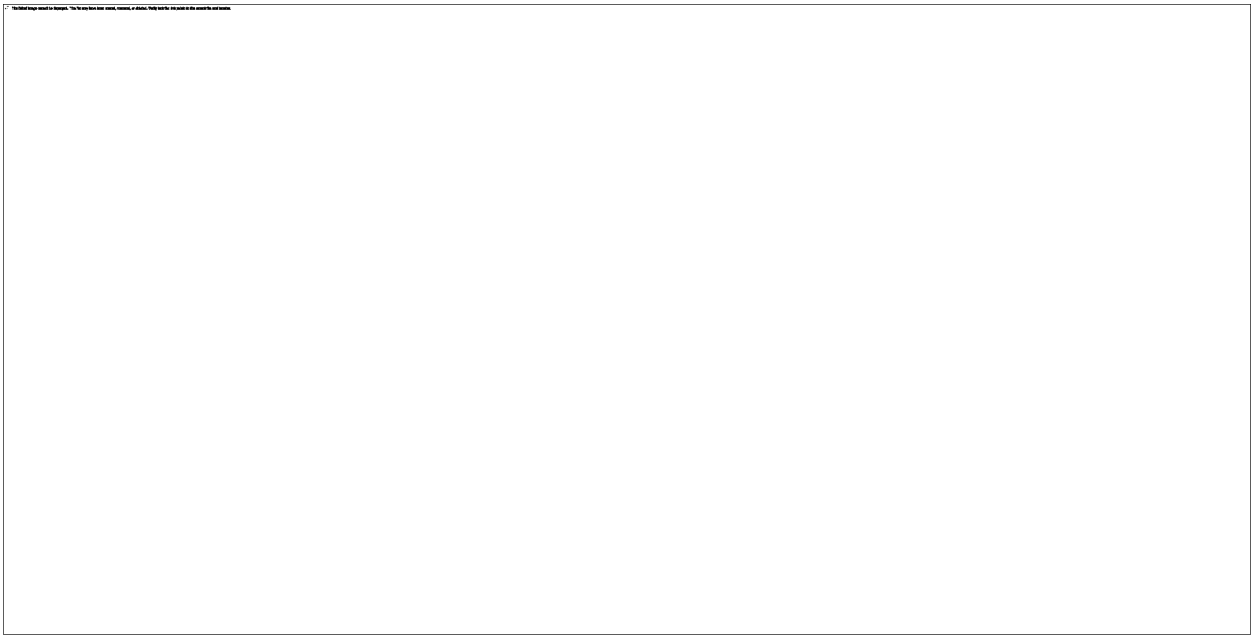
NEW ADS: Climate Groups Call out Republicans for Taking Big Oil Money and Blocking Clean Energy Plan to Lower Costs for Families

WASHINGTON, DC -- Today, Climate Power and the League of Conservation Voters (LCV) announced a series of ads calling out Republicans who take campaign contributions from Big Oil companies while voting against clean energy legislation. The ad running nationally and on D.C. cable features Kevin McCarthy and Steve Scalise who were the top two recipients of oil and gas money in the House last cycle. The district specific ads will run in four Republican-represented districts in Southern California and Florida that are on the front lines of the climate crisis.



WATCH THE AD HERE

"It is the height of hypocrisy for a member of Congress who represents a district that's been hammered by deadly climate-fueled wildfires or tropical storms to take Big Oil's money and vote against clean energy investments," said **Pete Maysmith, LCV SVP of Campaigns**. "It's time for Big Oil's allies in Congress to feel the heat for amassing campaign contributions from price gouging oil and gas executives."

"Voters are angry at politicians protecting the profits of Big Oil CEOs while they struggle to fill their gas tanks," **said Lori Lodes, Climate Power Executive Director.** "Big Oil-backed Republicans in power have spread disinformation about climate change and blocked plans to transition to a clean energy economy. We can make the U.S. truly energy independent by speeding up the production of clean renewable energy – like wind and solar – that will lower prices and reduce our dependence on oil."

The national ad setting the narrative is accompanied by spending in Congressional districts on the front lines of the climate crisis where high gas prices are top of mind for the public. These members are Mike Garcia (CA-25), Michelle Steel (CA-48), Maria Salazar (FL-27), and Carlos Gimenez (FL-26). The climate-fueled extreme weather their districts have faced, from intense wildfires and drought in Southern California to rising sea levels and devastating tropical storms in South Florida, underscores the consequences when lawmakers seek to curry favor and contributions from Big Oil.

WATCH THE AD HERE

On April 5 and 6, while the ads are up on the air nationally and in these districts, and ahead of the House Energy & Commerce Committee's hearing with oil company executives, the League of Conservation Voters will have an installation on the National Mall that calls attention to Big Oil's price-gouging.

Over 80% of oil and gas donations went to Republican congressional candidates over the past 30 years – totaling over $500 million in campaign donations for the GOP. In the last decade alone, Big Oil has spent over a billion dollars lobbying to weaken environmental protections and stop the production of clean energy. Just last year, as families were struggling because of inflation, House Republicans voted to block a clean energy plan that would have lowered families' energy costs.

In a recent survey conducted by Hart Research, 76% of voters expressed little or no confidence in politicians who rely on fossil fuel companies for campaign contributions, writing that such politicians occupy "the hottest place in gas price hell." Instead of working to meaningfully aid families struggling with higher gas prices, Big Oil and their enablers in Congress have focused on blaming nonexistent Biden policies, even though a recent Dallas Fed survey found that oil executives themselves blame the lack of production increases on a desire to reward investors, not government policy.

Scripts for the national ad and sample district ad are below.

Higher Profits (national ad)
As Vladimir Putin wages war
Oil companies are making billions
By price gouging us at the pump
And Republicans are helping them do it
They took millions from Big Oil
And blocked a clean energy plan
That will lower costs for families
They're leaving us dependent on oil
And at the mercy of foreign dictators
Congressional Republicans
In the pockets of Big Oil

Against American-made clean energy
It all means higher profits for oil companies
And higher gas prices for us

Higher Profits: Rep. Garcia (CA-25) (sample district ad)
As Vladimir Putin wages war
Oil companies are making billions
Price gouging us at the pump
And Mike Garcia is helping them do it
He took big money from Big Oil
And opposed a clean energy plan
That will lower costs for families
He's leaving us dependent on Big Oil
And at the mercy of foreign dictators
Tell Mike Garcia
Blocking American-made clean energy
Just means higher profits for oil companies
And higher gas prices for us

Tuesday, April 5 at 2:00 p.m. ET:
LCV to Install Wall of Oil Barrels on the National Mall to Call Out Big Oil for Making Record Profits While We Pay Record Gas Prices

Washington, D.C. – On Tuesday April 5 and Wednesday April 6, the League of Conservation Voters (LCV) will display an art installation that features a wall of oil barrels on the National Mall to highlight the oil industry's price gouging and hold them accountable for excessive gas prices. While the war in Ukraine continues and working families pay enormous costs for gas, big oil companies have held back supply to reward their shareholders with record profits. We need the public to know, the only true path to energy independence is a clean energy economy, so we no longer have to pay these enormous costs.

What: A wall of oil barrels stacked together that reads:
We pay record prices, big oil makes record profits
$205 Billion
Clean Energy Now
Where: The National Mall, 4th St. NW between Madison Dr. NW and Jefferson Dr. SW

When: Staff will be on site Tuesday, April 5 between 2:00 - 3:00 p.m. ET; the installation will be up all-day Tuesday, April 5 and Wednesday, April 6
Who: Representatives from LCV and Climate Power will be on site from 2-3pm Tuesday

LCV Statement on President Biden's Plan to Respond to Putin's Price Hike at the Pump

Washington, D.C. — In response to the release of President Biden's Plan to Respond to Putin's Price Hike at the Pump, the League of Conservation Voters (LCV) issued the following statement from **Tiernan Sittenfeld, SVP of Government Affairs**:

"We couldn't agree more with President Biden that Putin's war on Ukraine underscores the need to speed the transition to a clean energy future and pass cost-saving clean energy investments now. It's long past time for the Senate to pass the House-passed $555 billion package of investments and unleash clean energy manufacturing and deployment that will help provide greater economic stability, save people money on their energy bills, and improve our climate and national security. The only real solution to high, unreliable energy costs is investing in clean, renewable energy here in the U.S. so that we and the world will no longer be reliant on petro-state autocrats.

"It's vitally important that the Biden-Harris administration strictly adhere to its values and commitments laid out today to keep communities safe. This includes responsibly sourcing and producing minerals and materials that will power our clean energy future and pushing Congress to fast-track long overdue reform of the 150-year-old federal mining law."

ICYMI: Sec. Buttigieg and Mayors of Boston, Cleveland, and Phoenix on How Cities are Acting on Clean Energy and Climate Justice

Washington, D.C. – On Monday, **Cleveland Mayor Justin Bibb**, **Phoenix Mayor Kate Gallego**, **Boston Mayor Michelle Wu** and **U.S. Transportation Secretary and former Mayor of South Bend, IN, Pete Buttigieg** joined a virtual press event with LCV to discuss the need for investments to help fight climate change and to advance clean energy and environmental justice. The event was moderated by **Environmental League of Massachusetts Action Fund Executive Director Casey Bowers**. Speakers addressed the ways that investing in clean energy will insulate the nation from volatile fossil fuel prices, provide greater economic stability, lower energy costs, and protect our national and climate security.

Watch the full recording here.

U.S. Transportation Secretary Pete Buttigieg said, "Climate investments are one of the best, and infrastructure investments [in particular], are the best places to break the old false choice between environmental responsibility and job creation. This is job creation through doing the right thing environmentally. The jobs that these create are often called green-collar jobs, but I would point out that they are very plainly blue-collar jobs … this is part of what it means to fortify pathways into the middle class."

Cleveland Mayor Justin Bibb said, "Every decision we make in the city of Cleveland must be grounded in the lived experience of people … so [we are working to] make Cleveland truly one of the first cities in North America to adopt a 15-minute city framework. Regardless of whether you are in a wealthy neighborhood in our city or in a low-income neighborhood, everyone deserves good quality grocery stores, good quality public transit, good quality parks. Climate change and the impacts of climate change is really about race and equity and social justice."

Phoenix Mayor Kate Gallego said, "We have made responding to heat a whole-of-government approach here. We have the first-in-the-nation permanent office in city government called the Office of Heat Response and Mitigation … [and] we have a major strategy to plant more trees, particularly in low-income communities. We're trying to have an eye towards impacting those who have been most harmed by policies in the past as we develop our climate plans for the future."

Speaking on her efforts to expand free public transportation in Boston, Mayor Michelle Wu said, "We not only prove that it makes such a fundamental difference in residents' lives, but the impacts are intersectional and multiplicative as well. Cities have the chance right now to be really clear about translating the urgency to the experience of people's day to day lives when it comes to climate. For a long time, climate was often discussed as a very high level, inches-of-sea-[level rise], and things that are far into the future, but as we've all said, it is here now, it is urgent, it is connected to every part of people's lives."

Environmental League of Massachusetts Action Fund Executive Director Casey Bowers said, "In our decades of advocacy, we have seen time and again that cities are on the front lines of environmental issues -- and often the birthplaces of innovation and progress. As Americans grapple with the impacts of climate change, mayors across the country are rising to meet the challenge. We are at an inflection point where federal funding could and should empower cities to lead. We're honored to have some of those key leaders here with us today, each of whom is taking a whole-of-government approach to fighting climate change in their city."

LCV Statement on President Biden's FY23 Budget

Washington, D.C. — In response to the release of President Biden's FY23 spending plan today, the League of Conservation Voters (LCV) issued the following statement from **Senior Director of Government Affairs Matthew Davis**:

"We are grateful that President Biden's budget proposal ensures that agencies have the funding they need to protect our health, climate, air, water, lands, and wildlife. Among other highlights, this budget includes large increases in funding for environmental justice programs, job creation, advancement of economic opportunity and equity in transitioning energy communities and clean energy manufacturing, and our international contribution to fighting the climate crisis. The President's budget also helps ensure corporations and the wealthiest pay their fair share to fund critical federal government services.

"These are especially essential investments at a time when oil and gas companies are profiteering off of the crisis in Ukraine by gouging American consumers at the pump and calling for new leases to drill on public lands while disregarding the leases they already own. It is imperative that government spending fights climate change and centers justice for communities who have been subjected to environmental racism for decades. We thank the Biden-Harris administration for this forward-looking budget and urge Congress to work quickly to pass it."

Environmental & Climate Community Calls for Immediate Confirmation of Ketanji Brown Jackson to Supreme Court

(Washington, DC) – Following the Senate hearings on the nomination of Judge Ketanji Brown Jackson to the United States Supreme Court, 15 environmental and climate advocacy groups jointly called for the Senate to confirm Judge Jackson to this post without delay. —

Below is a joint statement from: League of Conservation Voters, Earthjustice, Sierra Club, Climate Hawks Vote, Greenpeace USA, National Wildlife Federation, Nuclear Information and Resource Service, Clean Water Action, Natural Resources Defense Council (NRDC), Waterway Advocates, Defenders of Wildlife, Alaska Wilderness League, Ocean Defense Initiative, Union of Concerned Scientists, WE ACT for Environmental Justice

"As these hearings demonstrated, Judge Ketanji Brown Jackson is extraordinarily well-qualified to serve on the United States Supreme Court, and the Senate must move swiftly to confirm her.

"Right now, crucial progress on clean air, clean water, climate action, environmental justice, and the right to vote is at stake, and our environmental laws are only as strong as the judges who uphold them. This is why the courts, and especially the Supreme Court, are critical to the environmental and climate community. In Judge Jackson's long and impressive career of public service, she has consistently demonstrated integrity, thoughtfulness, and a deep knowledge of the law and the impacts of the judiciary's rulings on every part of society. That is why the Senate has already confirmed her to three different positions with bipartisan support. Her record shows that Judge Jackson understands the government's authority and obligation to protect the public and will hold everyone, including corporate polluters and special interests, to the same high standards of the law.

"It is past time for the Supreme Court to include a Black woman for the first time in its 233-year history. This is an essential step forward as communities of color bear disproportionate burdens of toxic air and water pollution and our nation faces the enormous challenge of addressing environmental injustices from coast to coast.

"Judge Ketanji Brown Jackson clearly belongs on the Supreme Court, and the Senate should make history by swiftly confirming her with bipartisan support without delay."

###

https://lcv.org/article/lcv-statement-on-secretary-haalands-visit-to-castner-range/

LCV Statement on Secretary Haaland's Visit to Castner Range

Washington, D.C. – In response to Interior Secretary Deb Haaland's visit to the proposed Castner Range national monument, the League of Conservation Voters (LCV) issued the following statement from **President Gene Karpinski**:

"Secretary Haaland's visit to Castner Range is a big deal for locally-led conservation efforts, building on the leadership of Congresswoman Escobar and the El Paso community which has worked for half a century to protect the environmental and cultural resources that date back 10,000 years.

"Designating Castner Range as a national monument would honor its historical significance for Native Americans, veterans, and the world's largest binational community as well as create more opportunities to expand equitable access to green spaces. A national monument designation would also help ensure the community has access to clean water, protect the area's endemic rare and endangered species, and preserve fragile lands already surrounded on three sides by development. With less than eight years to fulfill the promise to protect 30 percent of our lands and waters by 2030, the Biden-Harris administration should move quickly to designate Castner Range a national monument through the powers granted under the Antiquities Act."

LCV Statement on SEC Climate Risk Disclosure Rule

Washington, D.C. - In response to the Securities and Exchange Commission's proposed rule on climate risk disclosure, the League of Conservation Voters (LCV) released the following statement from **Government Affairs Advocate David Shadburn:**

"Shareholders deserve to understand and be protected from the increasing climate-related risks of the companies they are investing in, and today's reasonable proposal from the SEC is a good step towards better transparency and standardization. We're glad to see the SEC meeting its mandate to protect investors and ensure well-functioning markets by taking climate risks seriously. Importantly, uniform climate risk disclosures will level the playing field and limit companies' ability to greenwash and make unsubstantiated emissions reduction pledges. We look forward to submitting comments in support of the strongest possible rule during the public comment period."

ICYMI: Former Assistant Secretary of Defense Sharon Burke, Admiral Dennis McGinn, Reps. Jason Crow, Jim Langevin, Tom Malinowski, and Chrissy Houlahan Discuss Urgency of Clean Energy Investments for National Security

Speakers Highlight Critical Moment For the U.S. to Line Up With Our Allies and Invest in Clean Energy: "It is today clearly a national security imperative that we break free of our dependence on these oil rich dictatorships and make America the world leader in clean energy".

Washington, D.C. – Foreign Policy for America, the League of Conservation Voters (LCV), and Climate Power hosted a press conference on **Tuesday, March 15 at 4:30 p.m. ET on the House Triangle** with **Former Assistant Secretary of Defense Sharon Burke, Former Assistant Secretary of the Navy Admiral Dennis McGinn,** and **Reps. Jason Crow (CO-06)**, **Chrissy Houlahan (PA-06) Jim Langevin (RI-02)**, and **Tom Malinowski (NJ-07)** to discuss clean energy and national security.

WATCH the full recording here.

Key quotes:

"We forget, right? Every administration looks at this situation and recognizes that it's not just a near term crisis, where we're gonna have to try to pump more to deal with it. It's a long-term crisis. And as long as we depend on oil and natural gas, we're going to keep coming back here," said **Former Assistant Secretary of Defense Sharon Burke**. "It is imperative that this time, as we take all the short term steps that we have to to save our economy and to keep the global economy running, that we not allow ourselves to forget that we must make this long term commitment to ensuring our energy security and our national security. That also means that we are ensuring the measures that will help us with climate change, and that is also not an option. [...] What we need to

do to improve our energy security and protect our national security is what we need to do to deal with climate change."

"Because of the dependence on oil and natural gas, Vladimir Putin has the ability to do things he would not be able to do were we less dependent, less addicted to oil and natural gas," **said Former Assistant Secretary of the Navy Admiral Dennis McGinn.** "Our energy security, our economic security, and our environmental security are inextricably linked, and they constitute the foundation of our overall national security and quality of life—not just in the United States, but across the world. By bringing in more types of energy that are clean, that are controllable, that can be produced here in the United States under that sun, with that wind blowing through a wind turbine, or from underground geothermal technology—there are so many ways. It isn't about giving something up, it's about getting off an addiction. And what we are gaining are jobs, new companies, new industries, economic security, as well as energy security and a much better environment."

"What we're seeing play out right now is the dangers of our dependence on foreign oil," said **Rep. Jason Crow (CO-06).** "The long term solution is we continue a rapid and aggressive transition to renewable energy and cleaner sources of fuel that are cheaper, that will create more jobs, that are better for our economy, and will unleash us from the tether of tyrants and dictators around the world."

"Until we can shake off our dependence on fossil fuels altogether, Americans will be vulnerable to the kinds of price shocks and supply chain constraints that are hurting American families today," **said Rep. Jim Langevin (RI-02).** "As long as our nation relies on the dirty fuel of the 18th and 19th century, our national security is in danger too. Now is the time to renew our commitment to clean energy, not to the fuels of the 18th and 19th century. Now is the time to renew our commitment to a green economy of the future, not the fossil fuel economy of the past."

"Climate change is accelerating. Energy independence is necessary, and both are matters of national security," said **Rep. Chrissy Houlahan.** "At this worrisome time in terms of our own security and that of other democracies around the world, we have to be working aggressively towards energy independence… We must also be working simultaneously and with that very same sense of urgency and passion to make sure that our energy independence and the end solution set reflects that the reality is that our planet's own changing climate itself is an existential threat to our long-term national security and to our very existence, [and] we must support climate provisions that have been proposed and that have been passed recently in the House."

"So long as we are dependent on oil, So long as we are dependent on fossil fuels, we will be at the mercy of dictators like Putin, like MBS in Saudi Arabia, Iran, Venezuela, no matter how much we may drill in the United States, we will be at the mercy of these oil rich dictatorships around the world," said **Rep. Tom Malinowski (NJ-07).** "It is today clearly a national security imperative that we break free of our dependence on thes oil rich dictatorships and make America the world leader in clean energy."

"The turmoil that we are seeing in global energy markets and the pain that Americans are feeling at the pump today are a direct consequence of our continuing reliance – our dependence – on fossil fuels. We can't go on like this. Today's discussion was an important reminder that the way to lower energy costs and enhance our security is by accelerating the clean energy transition," said **Andrew Albertson, Foreign Policy for America.** "Don't let people lie to you; energy markets are global. Pumping more oil out of the ground here can only do so much. What we need are new clean energy resources that end the black mail of dictators and create new technologies, new industries, new jobs of the future here in the United States."

"We stand with the people of Ukraine, and it is abhorrent that oil and gas CEOs are taking advantage of this humanitarian crisis to increase prices and to line their pockets while families across the country feel the pain at the pump from Putin's price hike," said **LCV Vice President of Government Affairs Tiernan Sittenfeld.** "The good news is that Congress already has a solution teed up that will make us less reliant on volatile fossil fuel

prices in the future and will address the climate crisis right now. The Senate must meet this moment by passing the $555 billion in climate, clean energy, and environmental justice investments that already passed the House.

Smog Pollution Plan Caps off Blockbuster Week at EPA

Washington, D.C. – In response to the EPA proposing a Federal Implementation Plan (FIP) that would require smog pollution reductions at power plants and industrial facilities across 26 states, the League of Conservation Voters (LCV) issued the following statement from **LCV Senior Director of Government Affairs Matthew Davis**:

"With this strong proposal to cut smog pollution, EPA Administrator Regan is wrapping up a blockbuster week of actions that will deliver cleaner air to millions of people across the country. The Biden-Harris administration's impressive proposal requires minimal effort from most facilities, yet would deliver over $15 billion in total public health benefits, and prevent over 1,000 premature deaths and hundreds of thousands of asthma attacks per year. This commonsense rule underscores the EPA's important role as a federal backstop when states do not fulfill their responsibilities to protect communities from fossil fuel-burning power and industrial facilities. The huge health benefits of this rule are a critical reminder that we must rapidly transition away from damaging, life-shortening fossil fuels to a clean renewable energy future."

Statement from Carol M. Browner on EPA Restoring State Clean Cars Authority

Washington, D.C. — In response to The Biden-Harris EPA's decision to reverse part of Trump's anti-environmental cars policy and restore states' authority to adopt stronger than federal clean vehicle standards, the League of Conservation Voters (LCV) issued the following statement from **Former EPA Administrator and League of Conservation Voters Board Chair Carol M. Browner:**

"The Biden-Harris EPA's decision to restore states' ability to strengthen clean car standards is especially welcome news as international conflict drives up the price of oil and gasoline. We're thrilled that Administrator Regan and the Biden-Harris EPA listened to the public and will restore the ability of states to set stronger emissions standards than the federal ones. Comprehensive clean car standards make it possible for states -- and in turn, the whole country -- to drive down vehicle pollution which unfairly burdens vulnerable communities in high traffic congestion areas, end U.S. reliance on dangerous, dirty and unreliable fossil fuels, and build a more just and equitable clean energy future.

"This rule, along with the finalized cleaner cars rule for model years 2023 to 2026, will help to advance the manufacture and sale of electric vehicles across the country and bring more good-paying jobs to U.S. workers. Continued rulemaking in the transportation sector is essential to meeting the climate test and cutting climate pollution in half by 2030."

# # #

LCV released a progress report of President Biden and Vice President Harris' first year in office on January 19 that details the steps taken and additional progress still outstanding for clean cars..

LCV Statement on Passage of Government Funding Bill

Washington, D.C. – In response to House and Senate passage of the government funding bill Thursday, the League of Conservation Voters (LCV) issued the following statement from **Senior Director of Government Affairs Matthew Davis:**

"This bill will begin to get the country back on track after more than four years of anti-environmental, bare bones funding levels set by the Trump administration and a decade of draconian spending caps. Passing the omnibus is certainly an improvement over a detrimental year-long continuing resolution. This increased funding is a good start and will help agencies better protect people and the planet – but it is critical for a future budget to adequately fund federal agencies to protect access to clean air, clean water, public lands, and implement President Biden's all-of-government approach to combating the climate crisis and environmental injustice. In addition to providing adequate funding, the Fiscal Year 2023 budget must also finally remove harmful measures that impede agencies' missions to protect public health and the environment, including bad provisions prohibiting the listing of the greater sage-grouse as an endangered species and forcing EPA to disregard science and treat biomass as a carbon-neutral fuel source.

https://www.lcv.org/article/what-they-are-saying-president-biden-members-of-congress-governors-know-clean-energy-is-key-to-energy-security-and-energy-independence/

WHAT THEY ARE SAYING: President Biden, Members of Congress, Governors Know Clean Energy is Key to Energy Security and Energy Independence

As oil and gas companies reap record profits while families shoulder the cost of high gas prices, President Biden, prominent Democrats in Congress, and Democratic Governors are aligned: Transformative investments in clean energy are key to U.S. energy security and true energy independence.

Families in need of relief from higher costs are being lied to by corporate polluters and their allies – we can't drill our way out of high gas prices. The only real solution to high, unreliable energy costs is investing in clean, renewable energy and shifting to electric vehicles.

Here are highlights of what we're hearing from key elected officials:

President Joe Biden
"Loosening environmental regulations or pulling back clean energy investments ... will not lower energy prices for families. But transforming our economy to run on electric vehicles powered by clean energy with tax credits to help American families winterize their homes and use less energy, that will — that will help." [Announcement of U.S. ban on Russian oil imports, 3/08/22]

White House Press Secretary Jen Psaki
"The only way to protect the United States over the long term is to become energy independent. That's why the president has been so focused on investing in clean energy technologies so that we can rely on that, and not President Putin, to set the price of gas." [Twitter video, 3/09/22]

Sen. Michael Bennet (CO)
"Every barrel of oil we import from Russia enriches Putin's corrupt and totalitarian state and enables his lawless aggression in Ukraine. It's past time for Congress to secure our energy independence and supercharge our transition to clean energy." [Twitter, 03/04/22]

Sen. Chris Murphy (CT)
"When you talk about domestic oil production, there's no guarantee that that stays in the United States [...] If you really care about keeping American-made energy in the United States, you should be investing in renewables." [Twitter, 03/09/22]

Sen. Brian Schatz (HI)
"We shouldn't be importing oil from petro-fascist regimes. America has plenty of its own energy that it is currently exporting that we can use. But the long term strategy to stop petro-fascism is to make enough clean energy so that what these thugs sell is not so profitable." [Twitter, 03/04/22]

Sen. Elizabeth Warren (MA)
"Russia's whole economy depends on oil and gas exports. So the more the world relies on fossil fuels, the more power we put in the hands of Putin. We need more clean energy for the sake of our planet and for the sake of democracy and freedom around the globe." [Twitter, 03/05/22]

Sen. Ed Markey (MA)

"This moment is a clarion call for the urgent need to transition to domestic clean energy so that we are never again complicit in fossil-fueled conflict. We can begin by passing $555 billion climate and clean energy provisions to supercharge the solar, wind, offshore wind, electric vehicle, battery revolution that will be union-made in America and free us once and for all from the shackles of fossil fuels." [Twitter, 03/08/22]

Sen. Tina Smith (MN)
"The way to stop countries like Russia controlling fossil fuel prices isn't just to drill for more fossil fuels. The real, long term solution is to switch to clean energy sources so we never have to be at the mercy of other countries to get our energy." [Twitter, 3/09/22]

Sen. Martin Heinrich (NM)
"In addition to banning imports of Russian oil, we also need to end the world's dangerous long-term reliance on oil. For the sake of America's national security, and for the sake of a healthy planet, we need to make urgent investments to scale up our manufacturing of fossil fuel-free technologies like heat pumps and electric vehicles and replace our current consumption of oil and fossil gas with clean and carbon pollution-free energy sources." [Statement, 03/08/22]

Sen. Bernie Sanders (VT)
"... in the longer term, we must invest in a global green energy transition away from fossil fuels, not only to combat climate change, but to deny authoritarian petrostates the revenues they require to survive." [Press Statement, 2/22/22]

Rep. Raúl Grijalva (AZ-07)
"Doubling down on fossil fuels is a false solution that only perpetuates the problems that got us here in the first place." [The Hill, 03/04/22]

Rep. Jared Huffman (CA-02)
"We will not subsidize Putin's war, and that includes importing Russian gas & oil. This is the right move by @POTUS. Now it's time to quickly transition to clean energy so we can end dependence on fossil fuels, stop funding tyrants, and protect the planet." [Twitter, 03/08/22]

Rep. Ro Khanna (CA-17)
"Glad @POTUS is heeding our call to ban Russian oil imports. Now we need a renewable energy moonshot to lower costs for working families and break our dependence on fossil fuels once and for all." [Twitter, 03/08/22]

Rep. Sean Casten (IL-06)
"What we're seeing right now makes clear that our transition to a clean energy economy isn't just necessary to protect Americans against climate devastation...National security demands investments in clean energy. American energy independence demands investments in clean energy. Insulating Americans against energy price inflation demands investments in clean energy." [Twitter, 03/07/22]

Rep. Tom Malinowski (NJ-07)
"One reason we're paying $4 a gallon for gas is that a Saudi prince is angry that we criticized him for for murdering a Washington Post journalist. If the alternative to relying on a Russian tyrant's oil is a Saudi tyrant's oil, maybe we should be less reliant on oil?" [Twitter, 3/07/22]

Rep. Teresa Leger Fernández (NM-03)
"We will not let the tyrant Putin profit from this war. I stand with @POTUS and Congress to ban the import of Russian oil and gas. This is another reason why we must continue to invest in alternative energy sources, including wind, solar, and other clean energy sources." [Twitter, 03/08/22]

California Governor Gavin Newsom
"California leads on climate policy - and others have followed. We need to be fighting polluters, not bolstering them. We can be free from the grasp of petro-dictators once and for all." [Twitter, 03/08/22]

Washington Governor Jay Inslee
"We have to recognize we can't drill our way out of confrontation with authoritarian states. National security and economic security requires us to aggressively pursue clean energy alternatives." [Twitter, 03/08/22]

LCV on Russian Oil Ban: 'We Can't Drill Our Way Out of High Gas Prices'

Washington, D.C. – In response to President Biden's announcement of a U.S. ban on Russian oil imports, the League of Conservation Voters (LCV) issued the following statement from **President Gene Karpinski**:

"The need to ban Russian oil in response to Putin's unlawful attack on Ukraine is a sobering reminder of why we must end our addiction to fossil fuels. As families suffer from rising gas prices as a result of this conflict, oil and gas CEOs will continue to exploit the situation to enrich themselves. The truth is we can't drill our way out of high gas prices. The only real solution to high, unreliable energy costs is investing in clean, renewable energy and technologies. Now is the time for transformative investments in clean energy, jobs, and justice. The Senate must move swiftly to pass the comprehensive climate solutions that the House has already passed. Moving to a clean energy economy will provide greater economic stability, lower energy costs, and protect our national and climate security."

Biden-Harris Clean Vehicle & Transit Announcements are Welcome News As Oil Prices Rise

Washington, D.C. – In response to the Biden-Harris administration's announcement of continued actions to deliver clean transit, school buses, trucks, and clean air to communities, the League of Conservation Voters (LCV) issued the following statement from **Senior Director of Government Affairs Matthew Davis:**

"As international conflict drives up the price of oil, announcements and proposals like these that help end U.S. reliance on dangerous, dirty and unreliable fossil fuels are welcome news. The Biden-Harris administration's continued actions to deliver clean transit, school buses and trucks are great news for children, families, workers, and the planet, but they must move even more swiftly. We look forward to the EPA strengthening their proposals for the final rule to deliver health-improving pollution reductions and electric trucks and buses faster. We eagerly await the further investments in electric trucks and school buses from President Biden's infrastructure law and are counting on the Senate to enact the House-passed $555 billion investments in climate, clean energy and environmental justice into law."

In response to specific announcements today, **Matthew Davis** offered the following thoughts:

- **Proposal to reduce diesel truck pollution:** "The EPA must push truck makers to move even more quickly to slash health-harming pollution by nearly 90 percent, in line with California's standard in model year 2027, particularly to help low wealth communities and communities of color unfairly and disproportionately exposed to high levels of toxic truck pollution. EPA should also opt for stronger revisions to greenhouse gas standards that will transition more quickly to zero-emissions buses and short-range trucks. It's high time for truck engine makers to stop the blockade against stronger standards and invest, as most automakers have, in the zero emission technology of the future."

- **Proposal to shift rapidly to emissions-free electric transit and school buses, and expand transit service:** "These first steps are critical for accelerating the production and deployment of these clean, quiet electric buses, which can support good manufacturing jobs here in the U.S. We're glad to see the administration supporting funding for the maintenance, operation, and electrification of transit agencies across the country."

- **Distribution of funds from the Infrastructure Investment and Jobs Act and regular Appropriations for clean, electric buses:** "For the 25 million students, and their parents and bus drivers, breathing diesel pollution on the way to and from school, the funding could not come quickly enough."

LCV Statement on President Biden's State of the Union Address

Washington, D.C. – In response to President Biden's first State of the Union Address, the League of Conservation Voters (LCV) issued the following statement from **President Gene Karpinski**:

"As we heard from President Biden tonight, we can strengthen the state of our union by making transformative investments in clean energy, climate, justice and jobs at home in the United States. We couldn't agree more with the President that Congress needs to meet the moment on climate by enacting the House-passed $555 billion investments in climate, clean energy and environmental justice into law. These investments will save families $500 a year on energy bills, provide greater economic stability, and protect our national and climate security. We must break our dependence on dirty, dangerous and unreliable fossil fuels.

"Equally important is President Biden's commitment to rallying the nation and world to protect democracy. We condemn Vladimir Putin's unlawful, unprovoked assault on Ukrainians trying to live in peace as a sovereign nation with a democratically elected government. Whether abroad or here at home, we cannot have a just, equitable society without a functioning democracy. LCV is fully committed to building a stronger democracy in the United States that can serve as a model for the world."

LCV Statement on Nomination of Judge Ketanji Brown Jackson to Supreme Court

Washington D.C. — In anticipation of President Biden's historic nomination of Judge Ketanji Brown Jackson to the Supreme Court, the League of Conservation Voters (LCV) issued the following statement from **President Gene Karpinski**:

"The historic nomination of Judge Ketanji Brown Jackson to the nation's highest Court is a milestone in the fight for racial justice and equity. We applaud President Biden for fulfilling his campaign promise to nominate the first Black woman to the Supreme Court, showing that elections have consequences, and for selecting a fair-minded jurist who will uphold the promise of equal justice under law. This next Justice will impact our climate, environment, and voting rights for decades to come. We are confident that Judge Jackson will add a critical perspective and unique voice on the Court, and that her distinguished service on the D.C. Circuit and D.C. District Courts, as well as the U.S. Sentencing Commission, makes her exceptionally well-qualified. We look forward to the Senate swiftly confirming Jackson while simultaneously addressing massive challenges and transformational opportunities for our environment, democracy, and lower courts."

LCV Statement on Russian Invasion of Ukraine

Washington, D.C. – In response to the Russian invasion of Ukraine and resulting economic fallout, the League of Conservation Voters issued the following statement from **President Gene Karpinski**:

"We stand with the people of Ukraine. We condemn Russia's unprovoked assault on Ukrainians trying to live in peace as a sovereign nation with a democratically elected government. This act of war flies in the face of building a more just, equitable and safe future for all people. In addition to the catastrophic human cost, the economic ramifications of Russia's invasion of Ukraine are a stark reminder that it's time to double down on clean, renewable, domestic energy — not only to address the climate crisis, but also to end our reliance on volatile interests and polluting fossil fuels. Moving to a clean energy economy will provide greater economic stability, lower energy costs, and protect our national and climate security."

LCV and Great Lakes state partners celebrate new federal restoration funding

EPA will invest $1billion to clean up and restore the most environmentally degraded sites in the Great Lakes

The Great Lakes - In response to President Biden's visit to the shores of Lake Erie to announce the EPA's investment of $1 Billion from the Bipartisan Infrastructure Law to significantly accelerate cleanup and restore the Great Lakes, the League of Conservation Voters and our partners, Wisconsin Conservation Voters, Illinois Environmental Council, Michigan League of Conservation Voters, Ohio Environmental Council Action Fund, and New York League of Conservation Voters, released the following statements:

Kerry Schumann, Executive Director of Wisconsin Conservation Voters -

"The Great Lakes, though massive, are not immune to threats. From industrial pollution to invasive species, the world's largest source of freshwater is vulnerable despite its great size. The climate crisis only exacerbates these threats. As a Great Lakes state, Wisconsin has a keen interest in keeping the region and its water resources clean and healthy. This unprecedented $1 billion investment under the Great Lakes Restoration Initiative and the Biden Administration's Infrastructure and Jobs Act is a significant step for protecting the Great Lakes and the people who depend on their health."

Brian Gill, Federal Policy Director of Illinois Environmental Council -

"The Biden administration is prioritizing the restoration and protection of the Great Lakes. The millions of Illinosans who rely on the Great Lakes for drinking water, food, recreation and tourism will benefit from this unprecedented investment."

Bentley Johnson, Federal Government Affairs of Director for Michigan League of Conservation Voters -

"Our Great Lakes are part of our way of life here in Michigan, and this funding will help protect these valuable resources for years to come. The Great Lakes Restoration Initiative is a critical tool to preserve our Great Lakes, and the additional $1 billion from the bipartisan Infrastructure Investment and Jobs Act will help clean up pollution in watersheds around our Great Lakes that are the source of drinking water for millions of people."

Trish Demeter, Director of the Ohio Environmental Council Action Fund -

"We applaud President Biden and his administration for their historic investment to restore healthy waterways throughout the Great Lakes, including important strides to delist Ohio's remaining areas of concern by 2030. We have a lot of work left to do to fully restore and protect Lake Erie. Today's funding announcement will accelerate important clean up efforts, while also supporting critical efforts to reduce agricultural runoff, restore vital habitat, protect millions of Ohioans' drinking water, and equitably invest in underserved communities."

Julie Tighe, President of New York League of Conservation Voters -

"These investments in the Great Lakes, from protecting a vital source of drinking water for tens of millions, to cleanup projects that will restore natural habitats and revitalize native species, are significant and critical across the country. Initiatives like this are bipartisan, popular, and more important now than ever here in New York to not only make once-in-a-generation progress, but doing so the right way to supercharge the green economy with good-paying jobs."

Madeleine Foote, Deputy Legislative Director for League of Conservation Voters -

"It is no coincidence that many of the most severely environmentally degraded sites in the Great Lakes are located in low income communities and communities of color. By targeting these historic investments in those communities, the administration is making significant progress on its Justice40 Initiative and helping to ensure every community has access to the clean water they need to thrive. However, while we applaud the administration's actions today, the climate crisis threatens the future of the Great Lakes — Congress must quickly pass the Build Back Better agenda to ensure they can continue to serve as sources of drinking water, recreation, and a way of life for generations to come."

The Great Lakes are the largest system of fresh surface water on earth and supply drinking water for tens of millions of Americans. 1.3 million people work in jobs supported by the waterways and the area serves as one of the largest recreation areas in the country. The Environmental Protection Agency's clean up effort projects to complete restoration in 22 of the region's 25 "areas of concern" by 2030.

LCV Statement on Industrial Decarbonization Announcement

Washington, D.C. – In response to the industrial decarbonization announcement made by the White House today outlining a number of new federal actions to catalyze clean manufacturing and procurement and promote responsible deployment of new clean energy technologies, the League of Conservation Voters (LCV) released the following statement from **Government Affairs Advocate Sara Fontes:**

"We are happy to see the Biden-Harris administration getting to work on implementing the crucial federal sustainability executive order announced in December as well as key provisions of the Infrastructure, Investment, and Jobs Act (IIJA). Today's announcement marks important progress toward decarbonizing our industrial sector, which comprises nearly a third of domestic greenhouse gas emissions, and reducing its toxic water and air pollution, which disproportionately harm low-income and communities of color. It further cements President Biden's whole of government approach to combating the climate crisis and commitment to leveraging the purchasing power of the federal government to do so. We applaud the administration's efforts to ensure that deployment of new technologies – particularly carbon capture and sequestration and clean hydrogen – is focused on industrial applications and done in an equitable way that does not further impact communities who are overburdened by pollution and the most harmed by climate change, and supports good, union jobs.

"Continued implementation of these ambitious Buy Clean and industrial decarbonization plans will require additional investments, and it is essential that Congress move quickly on federal appropriations bills and pass the climate and environmental justice provisions of the Build Back Better agenda as soon as possible."

ICYMI: Reps. DelBene, Gottheimer, Hayes, Porter, and Spanberger Call for Swift Senate Action on Most Comprehensive Build Back Better Legislation that Centers Climate and Can Pass

House Democrats Representing Districts Across The Country On The Frontlines Of The Climate Crisis Make A Unified Call For Senate Passage Of The Build Back Better Act's Climate Provisions: "The Cost Of Inaction Is Too High."

Washington, D.C. – As Congress returns to D.C., Climate Power and the League of Conservation Voters (LCV) hosted a virtual press briefing on **Monday, January 31 at 12:00 p.m. ET** with **New Democrat Coalition Chair Suzan DelBene (WA-01), Problem Solvers Caucus Co-Chair Josh Gottheimer (NJ-05), Rep. Jahana Hayes (CT-05), Congressional Progressive Caucus Deputy Chair Katie Porter (CA-45)**, and **Rep. Abigail Spanberger (VA-07)** to make a unified call for the Senate to quickly finalize the most comprehensive version of the Build Back Better agenda that centers climate action and can pass.

WATCH the full recording here.

"Weather and climate related disasters cost taxpayers 145 billion dollars in 2021 alone," said **Congressional Progressive Caucus Deputy Rep. Katie Porter (CA-45).** "It's fiscally irresponsible not to take action to mitigate these natural disasters, to prevent them, and to fight against the climate crisis. We simply cannot afford to keep stalling on climate action. The price if we do not act today is just going to keep going up."

New Democrat Coalition Chair Suzan DelBene (WA-01) said: "Since the beginning, New Dems have made big, bold climate action one of our priorities for the Build Back Better Act. We pushed for and secured policies in this package that would create American jobs, cut energy costs for families, build a more resilient future, and significantly reduce greenhouse gas emissions to move us towards our goal of reaching net-zero emissions by 2050 at the latest [...] But our work isn't done. In order to deliver on climate, we must agree on a bill that can get 218 votes in the house and 50 votes in the Senate. New Dems believe there is a path forward by building on the existing areas of agreement and focusing on doing a few things well for longer. There is broad consensus among Democrats on these climate priorities and we'll do everything in our power to prioritize that BBB Act prioritizes climate and is signed into law. The time to act is now and failure is not an option."

The representatives emphasized broad, bipartisan support for Build Back Better. As Representative **Jahana Hayes (CT-05)** said, "This is no longer just a conversation for climate activists; I think that every group and every decision we make as members of congress has to take into account… the long term impact that we will have on our environment and our communities. This is no longer a single issue conversation- the climate impact of legislation has to be incorporated into everything that we do."

"Over the last few years we've seen firsthand how extreme weather fueled by the climate change we are all experiencing has not only disrupted lives in our communities but exacerbated long term challenges facing our air, soil, and water," said **Rep. Abigail Spanberger (VA-07).** "We need to deliver on climate smart practices that build on the tremendous work of our farmers who are already working to build a healthier climate. We need to invest in a cleaner grid and transportation system to be sure our rural businesses and communities are not left behind as we work to rebuild our economy in the wake of the pandemic."

Problem Solvers Caucus Co-Chair Josh Gottheimer (NJ-05) said "Fighting for clean air and water on our planet that our kids and grandkids can live in is something that has been a focus of mine since before I came to

Congress and is something that is actually critical now and we can't afford to wait. There is no time to delay. For Jersey. For our planet. We must take action to tackle climate change now to make sure our best days will always be ahead of us in the greatest country in the world."

Representing the League of Conservation Voters, **Senior Vice President of Government Affairs Tiernan Sittenfeld** said, "We simply cannot afford the staggering cost of inaction on climate. It has never been more urgent or more important for congress to address this code red for humanity…it's time for the senate to finalize and pass the best and most comprehensive version of Build Back Better that centers climate and can get fifty votes."

Ahead of this press call, members from key districts – including some of the speakers on today's call – signed onto a letter led by Rep. Mike Levin (CA-49) to President Biden calling for him "to move swiftly to finalize the most comprehensive legislation that can pass the Senate and get this historic progress to [his] desk for [his] signature in the coming weeks." Read the full letter here.

LCV Statement on Mercury and Air Toxic Standards

Washington, D.C. – In response to the affirmation of the Appropriate and Necessary Finding for the Mercury and Air Toxics Standards for power plants issued by the EPA today, the League of Conservation Voters (LCV) released the following statement from **Senior Director of Government Affairs Matthew Davis**:

"We applaud the Biden-Harris administration for taking action to reaffirm the solid scientific, policy, and legal foundation for protecting children's health – especially children in low income and communities of color who are disproportionately impacted by toxic pollution – from mercury and other toxic pollutants from coal-fired power plants. Undoing the illegal and dangerous work of the Trump administration is critical to protecting the health of all communities and tackling climate change, and we encourage the Biden-Harris administration to more swiftly push beyond existing standards to better protect public health and the environment from the ravages of fossil fuel pollution, including on these mercury and air toxics standards for power plants and oil and gas methane standards, among others."

LCV Statement on Gulf Lease 257

Washington, D.C. – In response to the news that the DC Circuit vacated Gulf Lease 257, cancelling all leases in the sale and requiring the Department of Interior to re-do their environmental analysis, the League of

Conservation Voters (LCV) released the following statement from **Senior Government Affairs Advocate Ben Alexandro:**

"The toxic oil and gas industry has polluted Gulf Coast communities and waters for far too long. This decision puts us one step closer to aligning the management of our public lands and waters with our climate and environmental justice goals. We applaud our friends at Earthjustice, Healthy Gulf, Center for Biological Diversity, Sierra Club, and Friends of the Earth for bringing this case to the court and we look forward to continued efforts to move away from our reliance on fossil fuels once and for all. The health of our communities and the local economy is at stake."

***

Read the full press release from the litigants **here**. LCV signed several letters ahead of the sale, including one urging the Biden administration to cancel the lease sale in the Gulf of Mexico, and another calling for an overhaul to the federal fossil fuels program and an end to all new leasing for fossil fuels both onshore and offshore.

LCV Statement on Anniversary of President Biden's Historic Executive Order on Climate

Washington, D.C. – Today, in response to the one year anniversary of President Biden's historic executive actions on climate and environmental justice, the League of Conservation Voters (LCV) released the following statement from **Senior Vice President of Government Affairs Tiernan Sittenfeld:**

"One year ago today, President Biden took executive action to renew U.S. climate leadership, cut carbon emissions in half by 2030, advance environmental justice, and protect sacred places. With these actions in their first week, the Biden-Harris administration made crystal clear it was putting the U.S. back on track to tackle the climate crisis and protect the health of our communities from its devastating impacts. During its first year this

administration has consistently taken a whole of government approach that puts climate action, clean energy, and environmental justice at the heart of their domestic and foreign policy agenda.

"Now, in order to fulfill the promise of cutting climate pollution in half by 2030, the administration must get the job done in the coming weeks on the most comprehensive version of the Build Back Better Act that centers climate and can pass the Senate while continuing to build on their executive actions. The climate provisions in the Build Back Better Act are overwhelmingly popular and enacting them will mean lower prices, good-paying jobs, and a healthier, more equitable clean energy future for all."

***

Last week LCV released a progress report on the administration's first year which highlights these executive actions and more. Read the full report, which includes an evaluation of the progress made on each of the top priorities LCV laid out ahead of this administration's first day in office, here. LCV was also a part of a statement put out today by the Equitable and Just National Climate Platform in recognition of these historic actions last year. Read the statement HERE.

PRESS CALL: Monday, January 31, at 12:00 p.m. ET
Reps. DelBene, Porter and Spanberger to Call for Swift Senate Action on Most Comprehensive Build Back Better Legislation that Centers Climate and Can Pass

Washington, D.C. – As Congress returns to D.C., Climate Power and the League of Conservation Voters (LCV) will host a virtual press briefing on **Monday, January 31 at 12:00 p.m. ET** with **New Democrat Coalition Chair Suzan DelBene (WA-01), Congressional Progressive Caucus Deputy Chair Katie Porter (CA-45)**, and **Rep. Abigail Spanberger (VA-07)** to make a unified call for the Senate to quickly finalize the most comprehensive version of the Build Back Better agenda that centers climate action and can pass.

Who:

- **New Democrat Coalition Chair Suzan DelBene (WA-01)**
- **Congressional Progressive Caucus Deputy Chair Katie Porter (CA-45)**
- **Rep. Abigail Spanberger (VA-07)**
- **Tiernan Sittenfeld, LCV**

When: Monday, January 31 at 12:00 p.m. ET

Where: This event will be held remotely via Zoom. Interested reporters can register here.

LCV Statement on Supreme Court Stephen Justice Breyer's Announcement to Retire

Washington, D.C. – In response to the announcement from U.S. Supreme Court Justice Stephen Breyer that he intends to retire at the end of the Court's current term, the League of Conservation Voters (LCV) issued the following statement from **President Gene Karpinski**:

"LCV commends Justice Breyer for his many years of service on the Supreme Court, where he has been a critical defender of our environment, voting rights, and civil rights. The Senate must confirm a worthy successor committed to environmental justice and protecting our democracy by the time Justice Breyer transitions to his well-earned retirement at the end of the Court's term. The stakes for the air we breathe, the water we drink, the climate crisis, and our precarious democracy are higher than ever. We applaud President Biden's commitment during his campaign to nominate the first Black woman to the nation's highest court, and look forward to engaging in an inclusive process to fill this critical vacancy. Concurrently, as our nation is faced with both massive challenges and transformational opportunities, it's time to quickly finalize the most comprehensive version of the Build Back Better agenda that centers climate action and can pass the Senate."

LCV Statement on Biden-Harris Administrations Boundary Water Announcement

Washington, D.C. — In response to today's announcement from the Department of Interior that the Biden-Harris administration will continue steps to protect the Boundary Waters Canoe Area Wilderness and surrounding watershed in northeast Minnesota, LCV released the following statement from **Senior Government Affairs Advocate Ben Alexandro:**

"We are thrilled to see the Biden-Harris administration take these critical steps towards protecting the Boundary Waters. Mining companies should not be allowed to pollute America's most visited wilderness area and put at risk the vital outdoor recreation jobs, clean water, and wildlife habitat it provides for the communities of northeast Minnesota – and we are glad to see the Trump-era opinion that allowed the renewal of these leases to be revoked. We applaud Secretary Deb Haaland for her leadership and look forward to next steps from the Department of Interior and the rest of the administration to ensure that this watershed will never face the risk of toxic mining."

LCV Responds to President Biden's Comments on Climate and Build Back Better

Washington, D.C. – In response to President Biden's comments at his press conference today expressing confidence about the climate provisions in the Build Back Better Act, the League of Conservation Voters (LCV) issued the following statement from **SVP of Government Affairs Tiernan Sittenfeld**:

"As we continue to push for Senate passage of Build Back Better, the deadly, devastating and staggering costs of inaction on the climate crisis make clear that we're out of time to act on it. We're encouraged by President Biden's confidence in enacting the climate provisions in the Build Back Better Act into law. We fervently hope and expect the Senate to take swift action on the most comprehensive version of the bill that can pass in the coming weeks. Doing so will result in millions of good-paying jobs, a healthier, more equitable and just clean energy future for all, and lower energy bills and other monthly expenses for people across the country. It's time to meet the climate test of cutting climate pollution in half by 2030, the goal set by President Biden and that science and environmental and racial justice require. Let's get it done."

Major Groups to Congress:
Endorsements Only Considered for Supporters of Voting Rights and Democracy

Washington, D.C. -- In an unprecedented joint decision, a collection of major election and advocacy organizations sent a letter to the full U.S. Senate today saying they will only consider endorsements for those who take all necessary measures to pass the key voting rights and pro-democracy measures currently being debated in the Senate. The list of groups includes **Black Voters Matter Fund, Collective PAC, End Citizens United // Let America Vote, Latino Victory Fund and the League of Conservation Voters.** The letter comes at a time of dire threats to our democracy and votes expected in the coming days.

The letter reads, in part: "At this existential moment for our democracy, our organizations have made the decision to only consider endorsements for senators in their next election who take all necessary measures to pass the key voting rights and pro-democracy reform provisions currently included in the Freedom to Vote Act and John R. Lewis Voting Rights Advancement Act, including reforming Senate Rules if necessary. Vocally supporting the right to vote without being fully committed to passing critical legislation into law will be insufficient to receive the endorsement of our organizations. While each of our organizations takes several different factors into consideration when endorsing candidates, commitment to passing these voting rights bills will be a threshold factor."

Read the full letter here and below.

Black Voters Matter Fund • Collective PAC
End Citizens United // Let America Vote
Latino Victory Fund • League of Conservation Voters

January 13, 2022

Dear Senator:

We, the undersigned organizations, represent a diverse set of issues critically important to our country, but all of our collective priorities rely on a functioning democracy and the guarantee of free and fair elections. We are writing jointly today because we believe the very fate and future of our Republic hangs in the balance. The freedom to vote and to have your vote counted, as well as our democratic system of elections, is under attack. The Senate must do whatever it takes to update its procedures to pass the vitally important federal legislation it is currently considering to protect against these attacks.

Over the last year, our democracy has been pushed to the brink. There have been widespread attacks on the freedom to vote; threats to nonpartisan election workers; extreme racial and partisan gerrymandering; and dark money groups continue to spread the Big Lie. We just commemorated the one-year anniversary of the insurrection at our Capitol. January 6th made clear just how fragile our democracy is and how close we are to losing it if Congress does not act now. We cannot wait until it is too late.

At this existential moment for our democracy, **our organizations have made the decision to only consider endorsements for senators in their next election who take all necessary measures to pass the key voting rights and pro-democracy reform provisions currently included in the Freedom to Vote Act and John R. Lewis Voting Rights Advancement Act, including reforming Senate Rules if necessary.** Vocally supporting the right to vote without being fully committed to passing critical legislation into law will be insufficient to receive the endorsement of our organizations. While each of our organizations takes several different factors into consideration when endorsing candidates, commitment to passing these voting rights bills will be a threshold factor.

Whether or not our country makes it through this dark period in our democracy depends on whether Congress passes the Freedom to Vote Act and John R. Lewis Voting Rights Advancement Act in the coming days. Later this month, we will be celebrating the life of Martin Luther King Jr. – there is not a more fitting way to honor the legacy of a man who devoted his life to working toward a more perfect union than to pass these bills. Inaction is not an option. We strongly urge you to do whatever it takes to pass these bills into law.

Signed,

Tiffany Muller
President, End Citizens United / Let America Vote

Gene Karpinski
President, League of Conservation Voters

Nathalie Rayes
President & CEO, Latino Victory Fund

Cliff Albright & LaTosha Brown

LCV Statement on Biden-Harris Administration's Clean Energy Announcements

Washington, D.C. - The League of Conservation Voters (LCV) issued the following statement from **Government Affairs Advocate for Climate Change and Clean Energy David Shadburn** on today's clean energy announcements including the historic offshore wind lease sale off the coast of New York and New Jersey:

"Today's announcements build on the Biden-Harris administration's commitment to tackling the climate crisis and creating good clean energy jobs. We are thrilled that the administration finalized plans to hold the largest offshore wind lease sale in U.S. history, all while centering environmental justice, providing good-paying union jobs with a project labor agreement, and looking comprehensively at the supply chain to ensure that the economic benefits of clean energy development are felt across the country. Today's actions also outline plans for upgrading and expanding critical transmission infrastructure, piloting a clean energy program to underserved rural communities, and more, all key components to meeting President Biden's commitments to install 25 gigawatts of renewable power by 2025 and 30 gigawatts of offshore wind power by 2030.

"These announcements also highlight how the Build Back Better Act is critical to meeting the clean energy deployment and emissions reduction targets that science and justice demand. The bill's clean energy tax credits and significant investments in transmission will supercharge the clean energy industry, create good-paying jobs, and put us on the path to slashing greenhouse gas emissions in half by 2030. The Senate must pass the Build Back Better Act without delay."

***

The New York League of Conservation Voters released the following statement from President Julie Tighe:

"From the Build Back Better Act to advancing clean energy projects, President Biden's administration is clearly prioritizing climate action. Today's announcement by BOEM of new lease areas for auction in the New York bight will accomplish critical goals in tandem: generate enough clean energy to power more than two million homes, cut our reliance on fossil fuels, and create good-paying union jobs. Offshore wind will continue to play a crucial role as we strive to fight climate change, reduce greenhouse gas emissions, and green our grid, and we thank BOEM Administrator Amanda Lefton for her leadership on offshore wind development."

LCV Statement on CPI Report

Washington, D.C. – In response to the release of the Consumer Price Index report on inflation, the League of Conservation Voters (LCV) released the following statement from **Senior Director of Government Affairs Matthew Davis**:

"There's no question families are squeezed right now by high prices and that is precisely why we need to pass the Build Back Better Act which experts agree will lower costs from energy, health care, childcare and more. Fossil fuels are a huge driver of cost increases - they are volatile and costly - to our health, to our pocketbooks and to our climate - and are vulnerable to climate-fueled extreme weather. The Build Back Better Act will help combat inflation, lower energy costs and protect working families–including by saving the average family $500 a year on their energy bills while reducing air pollution and lowering carbon emissions.

"Just as importantly, the costs of inaction are catastrophic. As NOAA reported earlier this week, there were 20 climate-fueled weather disaster events in the U.S. last year with losses exceeding $1 billion each for a total of $145 billion. We are paying a high price for pollution and climate change, and, if we fail to act, these catastrophic costs will only continue to rise. The most important action we can take right now to address these costs is to pass the overwhelmingly popular Build Back Better Act immediately."

Leading Environmental Groups Release Top 10 Takeaways from 2021 Climate Polling

Washington, D.C. – As we settle into the new year and climate-fueled disasters continue to endanger communities across the country, leading environmental groups – EDF Action, the League of Conservation Voters (LCV), NRDC (Natural Resources Defense Council), Sierra Club, and Climate Action Campaign – teamed up with Environmental Polling Consortium (EPC) director David Gold to release a memo summarizing the critical environmental and climate polling data from 2021. These results mirror the polling trends Climate Power shared in a memo yesterday. In short: voters have heightened concern about climate change and want to see Congress take action.

READ EPC MEMO: 10 Takeaways from 2021 Polling

Key Findings:

1. **Climate change top of mind:** 70% of people living in America said they are at least "somewhat" worried about climate change, and roughly one-third are reportedly " very worried," the highest figures that the Yale Program on Climate Change Communication and George Mason University Center for Climate Change Communication have found in their tracking surveys.
2. **Climate linked with extreme weather:** The latest survey conducted by Yale and George Mason in September 2021 also found that 70% of Americans believe that climate change is affecting weather in the United States, another record-high figure. And between March and September, the percentage of people saying that climate was affecting weather increased from 61% to 70%.
3. **Extreme heat, wildfires, and droughts most recognized as climate-driven:** Yale and George Mason's September survey shows that Americans are most likely to believe that climate change is having at least "some" effect on hot weather events such as extreme heat (68%), wildfires (67%), and droughts (66%).
4. **Republican voters' attitudes toward clean energy highly malleable:** The Pew Research Center found a dramatic change in self-identified Republicans' attitudes about environmental issues between May 2020 and April 2021 - coinciding with the transition of power from Trump's presidential administration to Biden's. For example, 65% of Republican voters in early 2020 believed that the country should prioritize renewables over fossil fuels, dropping to 47% in April 2021. Yale and George Mason similarly saw that Republican voters'' attitudes about clean energy shifted negatively between 2020 and early 2021, before rebounding in their September 2021 survey.
5. **Significant numbers of Republican voters disagree with how their party leaders are handling climate and environmental issues:** A December survey for POLITICO and Morning Consult found that self-identified Republican voters nearly universally said they trusted Republicans in Congress over Democrats in Congress on issues such as the economy (88%), national security (88%), and immigration (88%). However, far fewer Republican voters said they trusted Republicans in Congress over Democrats in Congress on the environment (64%) and climate change (59%); these were the only issues that had double-digit percentages of Republicans trust Democrats over their own party.
6. **Climate change a top-tier priority for Democratic voters:** The December POLITICO and Morning Consult survey also showed more Democrats said that passing a bill to address climate change should be a "top priority" for Congress (56%) than any other priority aside from stimulating the economy to recover from the coronavirus pandemic (65%) and passing a healthcare reform bill (57%). The Economist and YouGov recorded a similar trend in their mid-December survey where more self-identified Democrats named climate change and the environment as their single most important issue (26%) after health care (27%).
7. **The Build Back Better plan is popular, and resilient:** Polls have consistently shown that the majority of voters support the Build Back Better Act when told about the provisions in the bill. Monmouth University conducted four polls since April 2021 and found consistent support between 61 and 64%. Similarly, Invest In America and Data for Progress found three-fifths support across four surveys since November 2021.
8. **Americans support climate action in Build Back Better, and want more:** An October poll by the Sierra Club and Data for Progress showed majority support for a range of climate and clean energy provisions - including particularly high support for investments to make homes, buildings, and schools more energy-efficient (77%), investments to expand and strengthen the electric grid with more access to wind and solar power (71%), and rebates for rooftop solar (70%). An October poll by Climate Power and Data for Progress further found that 65%

or more of voters nationwide said it was important to include each of eight Build Back Better provisions tested that related to climate and the environment.

9. **Scientists still trusted messengers on climate change:** A survey conducted by the Pew Research Center in April 2020, for example, found that the overwhelming majority of Americans (87%) trust scientists to act in the public's best interests. Additionally, the Potential Energy Coalition conducted a persuasion experiment and found that scientists were highly effective messengers on climate change.
10. **The public wants to hold corporate polluters accountable for their damage:** Polling by Data for Progress found that 77% of voters believe fossil fuel companies have "a lot" or "some" responsibility to address climate change. And the Pew Research Center found that 69% of voters believe that large corporations are doing "too little" to help reduce climate effects.

"Over the past year, we've seen unprecedented levels of public concern around climate and environmental issues," said **Environmental Polling Consortium Director David Gold**. "This is a new reality that public officials and corporate America both need to wake up to. Americans are feeling the devastating effects of climate change in their everyday lives, and the old approaches of ignoring the problem or delaying action clearly don't cut it anymore with the public."

"As we begin a new year, we have to learn from the deadly and devastating climate-fueled extreme weather of 2021: the fires that have raged out west, the dangerous heat and record high-temperatures, and the deadly floods and storms," said **LCV Senior National Campaigns Director Megan Jacobs.** "An overwhelming majority of communities across the country saw and experienced these impacts in 2021, so it should come as no surprise that an overwhelming majority of voters want to see action on climate, and they want to see it now."

"The polling is clear: we've seen a big shift from 10 years ago with voters ranking climate and environment as a top priority. Voters are concerned about climate change and pollution and want to see bold action on clean energy and environmental protections. Elected officials need to act now and deliver real results to voters," said **Jack Pratt, EDF Action's Senior Political Director**.

"In poll after poll last year, Americans voiced concern about the very tangible and costly impacts of climate change they are seeing in their communities. These key polling takeaways demonstrate just how out of step many political and corporate leaders are with the general public on critical environmental and climate issues. Not only does science point to the need for urgent and bold climate action; Americans across the country – and across the partisan spectrum – demand it," said **Grace McRae, Sierra Club's Polling and Research Director**.

"Americans from coast to coast are increasingly alarmed about the climate crisis," said **Jonathan Sack, Midwest Campaign Director with NRDC (Natural Resources Defense Council)**. "The polling is clear that voters want leaders to take action to solve the greatest challenge of our time, not continue to kick the can down the road to future generations. None of us can afford the cost of inaction on climate."

LCV Statement on Voting Rights Event with President Biden and Vice President Harris in Georgia

Washington, D.C. – The League of Conservation Voters (LCV) issued the following statement from **President Gene Karpinski** on today's remarks from President Biden and Vice President Harris in Atlanta:

"We couldn't agree more with President Biden and Vice President Harris that the Senate must immediately pass the Freedom to Vote Act, John Lewis Voting Rights Advancement Act, Protecting Our Democracy Act, and Washington, DC Admission Act. The fundamental right to vote — the cornerstone of our democracy — is too important to let the filibuster stand in the way. If Republican senators continue to obstruct legislation to protect voting rights, Democratic senators must change the Senate's rules in order to ensure every voter's voice is heard. Our democracy cannot wait any longer."

###

LCV also issued a memo on the fight for voting rights, laying out the need for urgent action on democracy and overwhelming support for voting rights legislation.

https://lcv.org/article/memo-why-lcvs-fight-for-voting-rights-and-democracy-reforms-is-stronger-than-ever/

DATE: January 11, 2022

RE: Why LCV's fight for voting rights and democracy reforms is stronger than ever

As Senator Amy Klobuchar said last week on the one-year anniversary of the violent January 6 attack on the U.S. Capitol and our democracy, "The voting rights legislation that we are working on right now couldn't be more important, because what was not accomplished with bear spray and bayonets has now been passed on to others to pass bills...to undermine our democracy." She's right. It is past time for the Senate to pass the Freedom to Vote Act, the John Lewis Voting Rights Advancement Act, the Protecting Our Democracy Act, and the Washington, D.C. Admission Act by any procedural means necessary.

LCV has been in the fight for voting rights and democracy reforms for years because we cannot have a healthy environment without a healthy democracy. The majority of people in this country overwhelmingly support protecting our democracy *and* want to see action on climate.

But with big polluter interests flooding money into our elections, gerrymandering weakening the power of our communities, and partisan politicians suppressing access to the ballot box, the voices of those directly experiencing the health effects of pollution in their communities and the dangers of extreme weather are being silenced. Just in the last year, we have witnessed increasingly dangerous efforts to chip away at the foundation of our democracy, from anti-voter bills already signed into law in 19 states to partisan takeovers of local election boards and administrators. These threats to our democracy are particularly harmful to people of color, indigenous people, young people, and those who have a disability – the same communities that bear the burden of environmental harms that threaten our air, water, and climate.

The good news for all of our communities is that – like climate action – passing democracy reforms is both good policy and good politics. Between the key bills we are fighting for, the Freedom to Vote Act, the John Lewis Voting Rights Advancement Act, the Protecting Our Democracy Act, and the Washington, D.C. Admission Act, we can expand voter access, increase transparency and fairness in our campaign finance system, root out corruption, secure our voting systems, and make Washington work for the people – including the disenfranchised residents of Washington, D.C.

And, as has been found in poll after poll, a strong majority of voters agree that our democracy is in crisis and support strong reforms:

A January 2022 NPR/ipsos poll found that 64% of Americans agree that American democracy is in crisis and at risk of failing. Even more, 70%, feel the same about America itself.

A January 2022 Morning Consult poll found that a strong majority of top business leaders (85%) believe capitalism in the U.S. depends upon a well-functioning democracy. Many of those surveyed (72%) believe American democracy is being threatened right now.

A late fall 2021 Navigator poll found that at least three in five Americans across partisanship, race, and ethnicity say we need to make major changes in how our government works.

The same 2021 Navigator poll found that a majority (52%) of Americans support the Freedom to Vote Act, including 73% of Democrats.

A November 2021 Lake Research Partners poll found that a majority (57%) of Arizona voters believe that passing voting rights is more important than preserving the filibuster.

For all of these reasons, LCV's commitment to getting these voting rights and democracy bills through Congress is stronger than ever.

Since the start of the 117th Congress, LCV has weighed in on House passage of the For the People Act, D.C. Statehood, the John Lewis Voting Rights Advancement Act, and the Protecting Our Democracy Act, announced that we will consider including votes on these in the 2021 *National Environmental Scorecard,* and we've called out Senate Republicans for obstructing the will of the people and blocking passage in the Senate. LCV is constantly working in coalition with environmental groups, democracy advocates, and other progressive partners on letters, events, and other tactics to generate the momentum needed to get these democracy reforms over the finish line, including being a lead convener of the January 6 Candlelight Vigil on the National Mall.

As LCV and over 150 influential groups stated in our January 6, 2022 letter to Senate Majority Leader Schumer, "We implore our leaders in Congress to rise to the moment and honor their duty by urgently passing this slate of crucial democracy and voting rights legislation."

LCV Statement on the One Year Anniversary of January 6 Insurrection

Washington, D.C. – The League of Conservation Voters (LCV) issued the following statement from **President Gene Karpinski** on the one year anniversary of the violent January 6, 2021 insurrection on the U.S. Capitol:

"Our hearts are with those who were working on the Capitol grounds a year ago today, including members of Congress, their staff, and those who work tirelessly to protect and maintain our Capitol. As I said last year in the wake of the horrifying violent attack on the Capitol, 'the will of the people must be respected.' LCV's focus on protecting our democracy has only grown in the last year. It is past time for the Senate to pass the Freedom to Vote Act, the John Lewis Voting Rights Advancement Act, the Protecting Our Democracy Act, and D.C. Statehood by any procedural means necessary.

"The violent insurrection and all threats to our democracy are particularly harmful to people of color, indigenous people, young people, and those who have a disability – the same communities that bear the burden of environmental harms that threaten our air, water, and climate. On this solemn day, LCV's commitment to ensuring racial, environmental, and electoral justice for all is stronger than ever."

# # #

LCV also joined a coalition statement with other environmental groups marking the anniversary and is a lead host of today's Candlelight Vigil for Democracy at 4:30 p.m. ET on the National Mall.

At the Start of Pivotal Month, Congressional Climate Champions Call For Passage of the Build Back Better Act's Climate Provisions: "We Have A Collective Determination To Get This Done."

Washington, D.C. – As Congress returns from the holiday, Climate Power and the League of Conservation Voters (LCV) held a press briefing with Sens. Brian Schatz (HI), Martin Heinrich (NM), Tina Smith (MN), John Hickenlooper (CO), Chair of the Select Committee on the Climate Crisis Kathy Castor (FL-14), and Rep. Donald McEachin (VA-4) to explore why the Senate must take transformative climate action as soon as possible via the Build Back Better Act.

WATCH the full recording here.

The Senators and representatives said that driving their sense of urgency were the climate-driven wildfires and the increasing loss of life that has occurred in their states, and the damage these disasters impose to public infrastructure and access to opportunity among those affected.

Just last week, the Marshall Fire engulfed Boulder, Colorado, and surrounding areas, forcing over 30,000 residents to evacuate and destroying nearly 1,000 homes and businesses. This tragedy came two weeks after Dozens of tornadoes swept across the Midwest—including the longest path of any tornado in American history. They left 93 dead, over 1,000 homes destroyed, hundreds of thousands without power, and dozens of people unaccounted for.

As **Sen. John Hickenlooper** said, "Thousands of people have been displaced. When someone's house burns, they don't just lose their house. They lose their records and pictures—things that were mementos of a life well-lived. It goes far beyond just that moment. It is ridiculous that we still are willing to avoid the scientific reality and subject communities across this country to the same agony caused by the Marshall Fire in Colorado."

Because of the redlining practices endorsed by federal home lending institutions in the 1930s, many Black and Brown neighborhoods continue to be prone to flooding and environmental risks. The Build Back Better Act seeks to repair this injustice by investing in those communities so that they are not hit harder when natural disasters strike. **Rep. Donald McEachin (VA-4)** spoke about the importance of historic climate action to reversing these historical inequities: "Make no mistake about it my friends: we are at an inflection point. The decisions we make or fail to make will have long-term

impacts, the raging fires in Colorado. Vulnerable populations are disproportionately impacted by climate change. The House has done its job—now we need the Senate to resume negotiations."

Chair of the Select Committee on the Climate Crisis Kathy Castor (FL-14), said "This is, unfortunately, a new normal. We cannot become complacent. People across the nation are demanding that Congress act. They are more awake to the catastrophic impacts of the climate crisis than ever before. We should not be discouraged—we have made progress, more than 200 recommendations have been turned into law, and another 377 passed by the House. And the House Select Committee has created a tracker for clean energy and climate change recommendations and legislation. The Senate now holds all the cards in the negotiation to get these proposals signed into law."

"Regulatory action is not a substitute for congressional action," **Sen. Tina Smith** said. "Climate change is posing a catastrophic threat to our communities—it is happening right now. Minnesotans understand the links between these extreme weather events and the carbon pollution we continue to pump into the air. Minnesotans also understand there is a huge opportunity in taking the lead here."

"We're going to get this done, come hell or high water. Because, right now, we have both hell and high water," said **Sen. Schatz**. "The planet is not going to pause its warming process while we sort out our politics out. The planet continues its warming process while we argue and fuss and fight, and that's why we have to have a collective determination to get this done."

Sen. Heinrich said "We are seeing the cost of inaction. I see it in my home state, in a Rio Grande that is under stress like I've never seen before. I see dying Cottonwoods even when there's water because of the heat stress. I see winter temperatures that are just not what we're used to. And then you see the extreme fire behavior as we saw in Colorado. And we can't accept this. This cannot be the status quo that we're going to pass on to our kids and grandkids. They deserve better. And the start of how we win this fight is to pass Build Back Better.

LCV Senior Vice President of Government Affairs Tiernan Sittenfeld said, "The costs of inaction on climate are catastrophic. They are staggering. And they are beyond tragic. It's never been more urgent or more important for Congress to address this Code Red for Humanity. Fortunately, the House has already passed the Build Back Better Act to do just that. Now the Senate must pass the Build Back Better Act to meet the test of cutting climate pollution in half by 2030, the goal set by President Biden and that science and environmental and racial justice require."

Experts say that the Build Back Better Act would put the U.S. on a path to meeting President Biden's target of cutting carbon pollution in half by 2030, lowering energy costs for consumers, and creating millions of good-paying jobs in clean energy industries of the future.

LCV Statement on DOE Office of Clean Energy Demonstrations

Washington, D.C. – In response to the U.S. Department of Energy's establishment of the Office of Clean Energy Demonstrations, the League of Conservation Voters (LCV) issued the following statement from **Senior Director of Government Affairs Matthew Davis:**

"We applaud President Biden, Secretary Granholm, and the entire Biden-Harris administration for establishing an office focused on clean energy innovation and driving down air and climate pollution to reach science-based goals of 100% clean electricity by 2035 and net zero climate pollution economy-wide by 2050. The establishment of this office is an important piece of the administration's whole-of-government approach to climate action and it must be paired with the strong legislative action in the Build Back Better Act to stave off the worst of the climate crisis. It's imperative for Congress to swiftly pass the Build Back Better Act to deliver clean energy, jobs and justice for all of our communities."

LCV Statement on EPA's Finalized Clean Cars Rule

Washington, D.C. -- In response to the Environmental Protection Agency's finalized SAFE 2 replacement rule, the League of Conservation Voters (LCV) issued the following statement from **LCV Board Chair and former EPA administrator, Carol M. Browner:**

"We applaud the Biden-Harris Administration for listening to the public and swiftly delivering strong clean car standards that put us on the path to cut U.S. climate pollution in half by 2030. The rule goes a long way toward protecting communities, especially communities of color and low-income communities, from toxic traffic pollution and will deliver cost savings to families no matter what the price of gas is. It is imperative that Congress swiftly passes the Build Back Better Act and its historic investments in clean energy to inspire additional innovation from manufacturers, create good-paying union jobs, and advance electric vehicle adoption across the country.

"This is just the beginning – the administration must build on this comprehensive rulemaking by proposing longer term clean car standards that get us to 60% electric vehicles by 2030 and 100% electric vehicles by 2035 – achievable goals that will clean our air and fight climate change. The stakes have never been higher and the opportunity has never been greater."

LCV Statement on 'America The Beautiful' Progress Report

Washington, D.C. -- In response to the progress report on the Biden-Harris administration's *America the Beautiful* initiative, the League of Conservation Voters (LCV) issued the following statement from **Conservation Program Director Alex Taurel**:

"The Biden-Harris administration established a strong foundation in its first year by setting our country's first-ever national conservation goal. We honor the work they have done to restore protections for lands and waters put at risk under the previous administration and their moves to protect several new, sensitive landscapes. We also applaud the local leaders, Tribal Nations, farmers and ranchers, hunters and anglers, and advocacy groups who have worked hard to develop locally-driven conservation initiatives to meet the challenge of protecting 30% of our lands and waters by 2030. Now, as we approach the second year of President Biden's first term, it's critical that he seize this opportunity to build an inclusive and resilient conservation legacy by championing locally-led initiatives to protect places with incredible cultural, historic and ecological resources before it is too late. To that end, we hope the president will use his power to designate new national monuments in response to the communities in southern Nevada campaigning to protect Avi Kwa Ame and those around El Paso seeking to protect Castner Range."

LCV Statement on New Lead Pipe and Paint Action Plan

Washington, D.C. – In response to the Biden-Harris administration's announcement of the Lead Pipe and Paint Action Plan, the League of Conservation Voters (LCV) released the following statement from **Deputy Legislative Director Madeleine Foote**:

"We applaud the Biden-Harris administration on the launch of their Lead Pipe and Paint Action Plan and commitment to reducing lead exposure within a decade. Too many families across the country have to worry if the water from their tap or the paint on their walls is poisoning their children. This whole-of-government approach, and especially the centering of low-wealth communities and communities of color who have been disproportionately burdened by lead pollution, is a huge step forward in protecting our health and reducing environmental injustice while creating good union jobs. With this new plan, the investments in lead pipe replacement from the Infrastructure Investment and Jobs Act, and the additional funding Congress will soon pass in the Build Back Better Act, we will make historic progress in removing toxic lead from our lives once and for all."

LCV Statement on Biden-Harris Electric Vehicle Charging Action Plan

Washington, D.C. -- In response to today's announcement of the Electric Vehicle Charging Action Plan released by the Biden-Harris administration and this morning's event at a Maryland electrical vehicle facility with Vice President Kamala Harris, Secretary of Energy Jennifer Granholm, and White House National Climate Advisor Gina McCarthy, the League of Conservation Voters (LCV) issued the following statement from **Senior Vice President of Government of Affairs Tiernan Sittenfeld:**

"We applaud the Biden-Harris administration's launch of the Electric Vehicle Charging Action Plan to advance the movement for climate, jobs, and justice. We also thank Vice President Kamala Harris for her powerful words today envisioning a clean vehicle future, and for her longtime leadership to make that vision a reality. Specifically, this effort will help to create good-paying jobs at every step of the process, including the workers needed to manufacture, install, and maintain electric vehicle supply equipment. Once executed, the Biden-Harris administration's comprehensive plan will increase access to electric vehicle charging stations across the country. Expanding accessibility to electric vehicle charging stations and jobs is just the beginning to building back better. The time for the Senate to pass the Build Back Better Act with investments that make it easier for working families to purchase and manufacture electric vehicles is right now."

***

Maryland LCV Statement on Build Back Better Electric Vehicle Strategy

Maryland LCV Executive Director Kim Coble today participated in an event with Vice President Kamala Harris, Sec. of Energy Jennifer Granholm, and others focused on the Biden Administration's electric vehicle charging strategy. In response, Maryland LCV issued the following statement from **Maryland LCV Executive Director Kim Coble:**

"The Biden Administration's Build Back Better plan will include more than $60 million for Maryland for electric vehicle charging stations. The future is electric, but we need to make these technologies accessible to everyone. Build Back Better will do that.

"At Maryland LCV, we are particularly committed to advancing the transition to electric school buses to protect the health of our children and to reduce greenhouse gas emission. Electric school buses mean cleaner air and healthier children and communities. We can all get behind that."

LCV Statement on Federal Sustainability Executive Order and Plan

Washington, D.C. -- In response to the executive order and sustainability plan released from the White House today outlining a number of federal government commitments designed to catalyze America's clean energy industry, create good-paying jobs, and advance environmental justice and equity through federal sustainability, the League of Conservation Voters released the following statement from **Government Affairs Advocate Sara Fontes:**

"We commend the Biden administration for leveraging the power of the federal government to spur the clean energy economy, grow clean manufacturing jobs here in the United States, protect public health by transitioning away from toxic PFAS chemicals, and advance environmental justice and equity. Today's executive order and plan begin to deliver on the administration's commitment to revitalize the federal government's sustainability efforts. Whether it be the announcement of a new Buy Clean program coupled with emissions and climate-risk disclosure requirements, acquiring only clean light duty vehicles by 2027 and all vehicles by 2035 for the federal fleet, a 50% reduction in building emissions by 2032 and 100% by 2045, preferencing sustainable products without toxic PFAS chemicals, or the purchase of 100% clean electricity by 2030, this plan is an important part of the administration's whole-of-government approach to combating the climate crisis.

"It is imperative that Congress passes the Build Back Better Act this year and federal appropriations bills before the continuing resolution expires in February, to ensure that the federal government has the additional funding necessary to deliver on this ambitious plan."

LCV, Climate Power Hit $50 Million in Paid Media with Additional Senate-Focused Ads, Part of the Push for Historic Climate Investments

Washington, D.C. – Today, the League of Conservation Voters and Climate Power announced an additional round of national and Senate-focused ads, achieving a milestone of $50 million invested in paid media to tackle climate change and transition to a clean energy economy. And this is before factoring in spending from other climate organizations this year. The ads -- ranging from TV, to digital, to print, to billboards -- highlight the once in a generation opportunities these climate investments will provide families and workers, thank individual members of Congress for their leadership, and urge Congress to finish the job as soon as possible and pass the Build Back Better Act. The climate provisions in this overwhelmingly popular bill will save families $500 per

year on energy costs, create good-paying union jobs, invest in environmental justice initiatives, and put our nation on track to meet the Climate Test and cut climate pollution in half by 2030.

"Win Win" and "Once in a Lifetime" are the national ads that aired nationally on MSNBC and other stations in Washington DC this week, along with YouTube and Facebook. They feature President Biden in his own words speaking to how climate action will create opportunities for everyone in America, and that we can't miss this moment.

WATCH NATIONAL ADS: "Win Win" and "Once in a Lifetime"

WATCH SAMPLE STATE AD: "For Families" *(Sen. Cortez Masto - running on TV in Nevada)*

Versions of "For Families" will air in the following markets:

- Arizona statewide (Sen. Kelly)
- Georgia statewide (Sen. Warnock)
- Nevada statewide (Sen. Cortez Masto)
- New Hampshire statewide (Sen. Hassan)

"This is our chance to deliver real savings for families, create good-paying clean energy jobs, and invest directly in communities of color who have borne the brunt of fossil fuel and other toxic pollution. That is why we are working so hard and have made this unprecedented investment to ensure Congress passes the Build Back Better Act and it's why members and voters have responded so well to this campaign," said **Pete Maysmith, LCV Senior Vice President of Campaigns**. "We are seeing the impacts right now of the climate crisis on communities all across the country who are counting on Congress and President Biden to get this done. Now is the time for the Senate to finish the job, pass the Build Back Better Act quickly and send it to President Biden's desk."

"People across the country are getting hit with the costs of rising energy prices and climate change. They are ready for Congress to act," said **Lori Lodes, Climate Power Executive Director.** "The House listened to voters and passed the Build Back Better Act to lower costs for families, create millions of clean energy jobs and take on the climate crisis. Now the Senate must meet the moment and pass the climate test by swiftly passing this bill."

This effort has included an accountability campaign, which called attention to the House members who voted against the Build Back Better Act despite the fact that their constituents would benefit from this historic investment in jobs, justice, and climate action.

Ad scripts below.

"Win Win"
When I think about climate change, the word I think of is jobs
These investments are a win win win for this country
Creating jobs, cutting energy costs, protecting our climate
So let's not waste any more time
Let's get to work

"Once in a Lifetime"
I know that climate change is a challenge that is going to define our American future
I know meeting the challenge will be a once in a lifetime opportunity to jolt new life into our economy

So let's not waste any more time
Let's get to work

"For Families"
Don't believe the false attacks against Senator Cortez Masto
She's fighting to create good paying clean energy jobs
That will grow our economy and take on climate change
With the Build Back Better Act
It's a clean energy plan
That will create thousands of good jobs for Nevada workers
Cut energy costs for families by $500 a year
While tackling climate change for future generations
It's a win win for Nevada workers and families
Thank you Senator
For fighting to build back better

ICYMI: Sens. Stabenow, Tester, Senate Moderates Call for the Senate to Meet the Climate Moment and Pass the Build Back Better Act

Senate Agriculture Committee Chair Stabenow and Sens. Tester, Cortez Masto, Bennet, Kaine, Carper, Casey, and Coons said the urgency of addressing the climate crisis grows every day and called on the Senate to pass Build Back Better as soon as possible to meet the moment.

See the full video here.

Washington, DC—Today, Senate Agriculture Committee Chair Debbie Stabenow and a group of seven moderate Senate Democrats joined Climate Power and the League of Conservation Voters (LCV) to call on the Senate to pass the Build Back Better Act without delay.

The Senators spoke of climate driven-wildfires and sea-level rise affecting their states, and to the opportunities in manufacturing, conservation, and agriculture that transitioning to clean energy offers our economy. As Sen. Tim Kaine said, "**We're each telling our own state's story, but there is a common problem and a common solution - and that's climate action now."**

On the heels of its passage through the House, the Build Back Better Act remains overwhelmingly popular with the public. Studies show that it will save families $500 per year in energy costs, and its investments in clean energy will deliver on the president's promise of good-paying jobs and justice for historically disadvantaged

communities who face the brunt of pollution and extreme weather. Now all that stands between the American people and these life-changing benefits is for the Senate to send the Build Back Better Act to the President's desk, which they must do as soon as possible.

"The Senate can and must pass the Build Back Better Act," said **LCV Senior Vice President of Government Affairs Tiernan Sittenfeld**. "Doing so is critical to saving people money on their energy bills and other monthly expenses, investing in the frontline and communities of color that have suffered the most from toxic pollution, and creating and sustaining millions of good-paying union jobs in the clean energy economy."

"Climate change is an issue for which the sense of urgency is growing every single day, every single minute," **said Sen. Debbie Stabenow.** "We've seen what happens when we have a global supply chain breakdown. If we aren't making the batteries and semiconductors here, we don't have the good-paying jobs, and frankly, we can't make the vehicles here. So the clean energy manufacturing efforts in Build Back Better are also incredibly important. We as Democrats are committed to doing that in partnership with President Joe Biden."

"This year was our 44th harvest, and I can tell you unequivocally, this was the worst harvest we've ever had," **said Sen. Jon Tester.** "Everybody west of the Mississippi was affected by a drought this year that was catastrophic—that cost taxpayers billions and billions of dollars of catastrophic assistance. We need to get this done. If we don't do something about climate change and start today with real solutions, there's going to be a lot of hungry people in this world."

"Why is this important? Because it creates jobs," **said Sen. Cortez Masto.** "It will prepare us not only for the 21st century but to compete in this country, by bringing the jobs and the supply chain here. That is so important for the United States moving forward. The Bipartisan Infrastructure Bill and the Build Back Better Act are going to lead us into these opportunities that are so good for our families."

"We in Colorado spent much of last summer indoors because there were so many health warnings about wildfire smoke," **said Sen. Michael Bennet.** "We cannot accept this as a permanent state of affairs in our state. This is not some distant future issue that we're dealing with. This is something that we have to deal with today, and it's hurting our economy and hurting our health today, and that's why we have to act urgently."

"1.7 million people live in Hampton Roads, Virginia, which is the second most vulnerable city to sea-level rise in the eastern United States. Sea level rise isn't a tomorrow issue in Hampton Roads," **said Sen. Tim Kaine.** "This is not a tomorrow issue, it's a today issue with impact on our quality of life and our military readiness in the center of naval power. Congress now has to do our part, and our part is passing the Build Back Better Act."

Sen. Tom Carper said "Passing the Build Back Better Act can't come soon enough, because we know that the climate crisis is not just something that's off in the future, it's right here in our faces and we need to do something about it now. The good news is we can do something about it and create millions of jobs at a time we have millions of people who would like to have a great job."

"We are going to pass Build Back Better this month," **said Sen. Bob Casey.** "And one of the reasons for urgency is to finally at long last make the investment in combatting climate change that we've been talking about for so long. Finally, we're at the point we can say we're acting to conserve God's creation."

"I recently returned from heading a delegation at COP26, and one of the most important things we heard from around the world is that the US needs to show commitment, capacity, engagement on climate," **said Sen. Chris Coons.** "One of the most important things we can do in the coming days is to pass the BBB legislation."

Wednesday, December 1, at 12 p.m. ET on Capitol Hill:
Sens. Bennet, Carper, Casey, Coons, Kaine, Stabenow, and Tester Hold Press Conference on Importance of Passing Build Back Better Act in December to Meet the Moment on Climate

Washington, D.C. -- Sen. Michael Bennet, Sen. Tom Carper, Sen. Bob Casey, Sen. Chris Coons, Sen. Tim Kaine, Sen. Debbie Stabenow, and Sen. Jon Tester will join LCV and Climate Power on **Wednesday, December 1, at noon E.T. at the Senate Swamp on Capitol Hill** for a press conference on the urgent need for the Senate to pass the transformative Build Back Better Act.

The overwhelmingly popular Build Back Better Act is Congress' opportunity to save people $500 a year on their energy bills, create good-paying union jobs, invest directly in communities of color too often left behind, and build a healthy, more equitable clean energy future for all, while putting our nation on track to meet the Climate Test and cut climate pollution in half by 2030. Making the Infrastructure Investments and Jobs Act law was step one, now the Senate must finish the job and pass the Build Back Better Act without delay.

WHO:

- Sen. Michael Bennet
- Sen. Tom Carper
- Sen. Bob Casey
- Sen. Chris Coons
- Sen. Tim Kaine
- Sen. Debbie Stabenow
- Sen. Jon Tester
- Tiernan Sittenfeld, LCV

WHEN: Wednesday, December 1, at 12:00 p.m. ET

WHERE: Senate Swamp, outside the Senate side of the Capitol's East Front

RSVP: This is an open press event. **Media interested in covering this event can RSVP to** press@lcv.org

The event will also be livestreamed here.

LCV Statement on Interior's Federal Oil and Gas Report

Washington, DC: In response to the release of the Interior Department's report on the Federal Oil and Gas Leasing Program, the League of Conservation Voters (LCV) released the following statement from Conservation Program Director **Alex Taurel**:

"This report confirms what we have long known: the federal oil and gas program is profoundly broken and rigged in favor of oil industry CEOs. It shortchanges taxpayers, communities, outdoor enthusiasts, and wildlife. We appreciate the Interior Department highlighting these long-standing and well-documented problems with the leasing program which needs wholesale reform without delay. Toward that end, the Senate should retain the common sense reforms to the oil and gas program included in the House's recently-passed Build Back Better Act. It is also clear this program must be

aligned with our climate goals, and we look forward to working with the Biden administration to accelerate the transition of our public lands and waters into assets in the climate fight.

LCV Statement on Historic Office of Management and Budget Nominations

Washington, D.C. -- In response to the historic nominations of Shalanda Young to be the first Black woman as Director, and Nani Coloretti to be one of the highest government officials identifying as Asian American, Native Hawaiian, or Pacific Islander as Deputy Director, of the Office of Management and Budget (OMB), the League of Conservation Voters (LCV) released the following statement from **Senior Director of Government Affairs Matthew Davis:**

"LCV congratulates Shalanda Young and Nani Coloretti on their historic nominations to serve as Director and Deputy Director of OMB, respectively. They each bring decades of government experience and leadership that will serve the Biden-Harris administration and the public exceptionally well. Together they will be a powerful force for effectively advancing federal budgets and improvements in the regulatory review process that could improve the lives of all people. We look forward to Shalanda Young and Nani Coloretti being confirmed quickly and their continued leadership ensuring that government budgets improve all communities' air, land, and water, advance environmental justice, safeguard our democracy, and create good family-sustaining jobs."

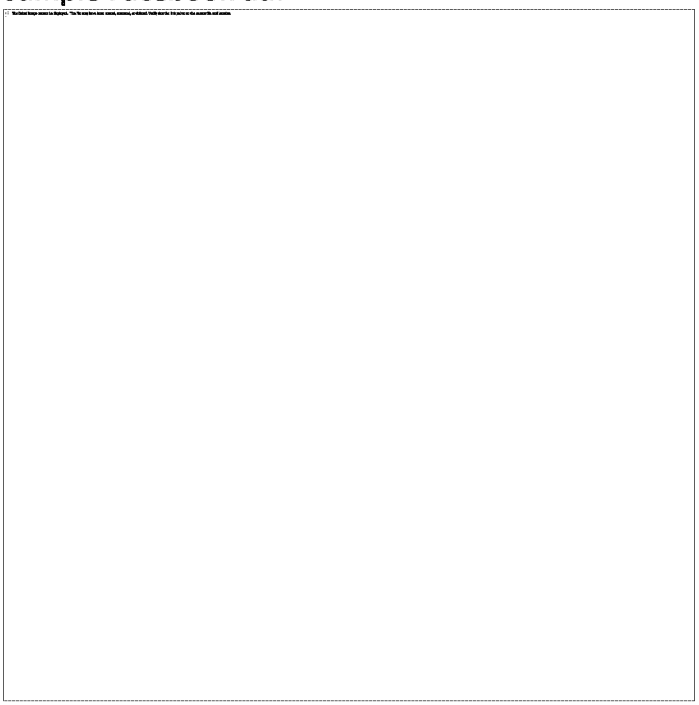
LCV, Climate Power Hold Members Accountable for Opposing Climate Action

Washington, D.C. --Today, the League of Conservation Voters and Climate Power announced an additional round of digital ads holding members of Congress accountable for voting against the Build Back Better Act. Voting no directly impacts the states and constituents these members represent who are on the frontlines of the climate crisis. It is also a vote against lowering energy costs and against creating more good jobs in the clean energy sector. The climate provisions of the Build Back Better Act are both good policy and good politics and Congress must keep fighting to get it across the finish line.

Sample Facebook ad:



"The decision from these members of Congress to vote against our nation's best chance to tackle the climate crisis while saving people money on their energy bills and other monthly expenses, investing in the frontline and communities of color that have suffered the most from toxic pollution, and creating and sustaining millions of good-paying union jobs in the clean energy economy is unconscionable," said **LCV SVP of Campaigns Pete Maysmith.** "Voters have never been more clear -- especially in these states where devastating climate impacts are felt on a regular basis and getting worse -- they want action on climate and they want it now."

"Voters won't soon forget the willingness of these members of Congress to vote against their communities and against climate action," **said Lori Lodes, Climate Power Executive Director.** "They said no to a Build Back Better Act that creates good paying clean energy jobs, cuts pollution fueling climate disasters, lowers energy costs for working families, and begins to bring justice to communities on the frontlines of climate change. People everywhere are feeling the steep impact of the climate crisis, and are demanding their elected officials make bold action to address it a priority."

Districts where the Facebook ads are running include:

- CA-25 (Rep. Mike Garcia)
- CA-21 (Rep. David Valadao)
- CA-39 (Rep. Young Kim)
- CA-48 (Rep. Michelle Steel)
- FL-26 (Rep. Carlos Giménez)
- FL-27 (Rep. Maria Salazar)
- MD-01 (Rep. Andy Harris)
- ME-02 (Rep. Jared Golden)
- SC-01 (Rep. Nancy Mace)

These ads come on top of the first accountability campaign the groups ran in August and September calling attention to members in Florida and California who oppose the Build Back Better Act despite being on the frontlines of the climate crisis.

Subject: BBB Kudos!

Woohoo and huge kudos from LCV! As you can see from the attached pic, we were excited to be outside the Capitol to thank members after the vote. LCV release on House passage and LCV-Climate Power release on thank you ads are both below. Big kudos on the Tongass as well, which we are also applauding and amplifying. On to the Senate for climate, jobs, and justice, and let's get this done ASAP!
Best,
Tiernan

LCV Statement on House Passage of the Build Back Better Act

Washington, D.C. -- In response to the passage of H.R. 5376, the Build Back Better Act of 2021, through the U.S. House of Representatives, the League of Conservation Voters (LCV) issued the following statement from **President Gene Karpinski:**

"Following the enactment of the Infrastructure Investment and Jobs Act, House passage of the Build Back Better Act caps off a historic and transformational week for climate, jobs and justice. Under Speaker Pelosi's tireless leadership, the House just passed the strongest climate bill in U.S. history to put our country on the path to cut climate pollution in half by 2030, the goal set by President Biden and that science and justice require. The Build Back Better Act meets our climate goals while saving people money on their energy bills and other monthly expenses, investing in the frontline and communities of color that have suffered the most from toxic pollution, and creating and sustaining millions of good-paying union jobs in the clean energy economy.

"Getting to this point is a testament to the diverse coalition, including labor, environmental justice advocates, and young people, relentlessly organizing and advocating for a more sustainable, just, and equitable future. LCV is all in to ensure the Senate quickly seizes this historic opportunity to make life better for people and the planet by passing the Build Back Better Act and sending it to President Biden's desk."

LCV, Climate Power Launch Ads Thanking House Climate Champions in Key Districts for Supporting Build Back Better Act

LCV organizers to greet members at airports across the country as they travel home for Thanksgiving

Washington, D.C. --Today, the League of Conservation Voters and Climate Power announced an additional paid media investment of half a million dollars in key House districts, thanking members for their support of the Build Back Better Act. The TV and digital ads, which will run in more than 20 key congressional districts across the country, come after the House voted to pass the Build Back Back Better Act. And as members in these districts travel back home for the Thanksgiving holiday, LCV organizers and volunteers will greet them at airports and honk and wave events to thank them in person.

WATCH Sample TV ad: "Delivering" (VA-07 -- Rep. Spanberger)

"House passage of the strongest climate bill in U.S. history to put our nation on the path to cut climate pollution in half by 2030 while saving people money and investing in frontline communities and communities of color that have suffered the most from climate pollution is certainly something to be thankful for," said **LCV SVP of Campaigns Pete Maysmith**. "We thank those members who have supported this bill. This was a huge step forward but the job is not done. Now we look to the Senate to quickly pass this transformational legislation and send it to President Biden's desk to build back better for the people and the planet."

"This is the country's climate moment," **said Climate Power Executive Director Lori Lodes.** "An overwhelming number of Democrats delivered for Americans by voting to lower energy prices, create more good-paying jobs, support disadvantaged communities and take on the economic devastation of climate change. The Build Back Better Act is a win-win-win -- for our economy, American families and future generations. We are making sure that voters understand just why the Build Back Better Act will benefit them and how important it is that their Democratic representative stepped up to make history."

Districts where the TV ads are running include:

- AZ-01 (Rep. O'Halleran)

ICYMI: Speaker Pelosi, Majority Leader Schumer, Sens. Markey and Smith, Chair Jeffries, Reps. Bonamici, Escobar, Gottheimer, Levin, Neguse, and Horsford Join LCV and Climate Power to Talk Importance of Passing Build Back Better Act

In case you missed it, the League of Conservation Voters (LCV) and Climate Power held a press conference today on Capitol Hill with House Speaker Nancy Pelosi, Senate Majority Leader Chuck Schumer, Senator Ed Markey (MA), Senator Tina Smith (MN), Chair of the House Democratic Caucus Hakeem Jeffries (NY-08), Congresswoman Suzanne Bonamici (OR-01), Congresswoman Veronica Escobar (TX-16), Congressman Josh Gottheimer (NJ-05), Congressman Mike Levin (CA-49), Congressman Joe Neguse (CO-02), Congressman Steven Horsford (NV-04), and LCV's Tiernan Sittenfeld.

WATCH the full recording here.

Ahead of a House vote on the Build Back Better Act, the speakers highlighted the urgent need to pass this historic investment in climate, clean energy, justice, and jobs that will lower costs and build a healthier future. The Build Back Better Act remains popular among the public and studies have shown it will save American families $500 per month on energy costs and deliver $9 billion a year in savings for utilities and their customers. Now is the time to get this bill through Congress and on to President Biden's desk.

LCV's Tiernan Sittenfeld said passing the Build Back Better Act, "could not be more important to saving consumers money on their energy bills and other monthly expenses, to investing in the frontline communities and communities of color that have suffered the most from toxic pollution, and creating and sustaining millions of good-paying, union jobs in the clean-energy economy."

House Speaker Nancy Pelosi said, "This bill makes it happen for us in terms of preserving the planet, and doing so by lowering costs for families, by cutting pollution in half by 2030, by creating good-paying, union jobs, and doing so with equity, with fairness to build back better."

Senate Majority Leader Chuck Schumer said, "In the days, weeks, and months ahead, the American people will see the benefit of this bill in their daily lives." He also noted that just, "addressing our emissions reduction is not sufficient, we need to ensure that at least 40% of the benefits are flowing to disadvantaged communities and that people living in communities dependent on fossil fuels are given the support they need so no one is left behind during the transition."

Senator Ed Markey (MA) said, "We're at a turning point: will we finish this historic job? It is imperative that the House of Representatives pass this Build Back Better package because the Senate needs to receive that package and pass it before Christmas. I'm dreaming of a green Christmas. I'm dreaming of the American people and the rest of the world knowing that the United States has stepped up."

Senator Tina Smith (MN) said, "The leaders in the House behind me can do this, they will do this. And then, it is up to President Biden and the Senate to finish this job. There will be more work to do, more work ahead, but I have great confidence that we can take strong climate action to move our economy toward a clean energy future that is going to make us more competitive, that is going to put us on the forefront of a clean energy revolution that will improve our health, that will strengthen our economy."

Chair of the House Democratic Caucus Hakeem Jeffries (NY-08) said, "Investing in dealing with the climate crisis means investing the creation of millions of good-paying jobs, it means investing in dealing with the crisis in a decisive manner that meets the moment, it means lowering energy costs for everyday Americans, and it means meeting the promises that President Biden indicated he would undertake to deal with the climate crisis that we confront. We're going to get climate action done, we're going to get the Build Back Better Act done, we're going to do it together."

Congresswoman Suzanne Bonamici (OR-01) said, "Addressing the climate crisis means jobs. Lots of jobs, good jobs. And the Build Back Better Act recognizes this and makes bold, bold investments in cutting emissions, but

also in growing a workforce. So together with the infrastructure bill that President Biden signed just the other day, the Build Back Better Act will create more than 200 million jobs over each of the next five years. That's really significant, and really meaningful."

Congresswoman Veronica Escobar (TX-16) said, "The choice could not be more clear. It is a choice between urgent action or anything less than that, which would be the equivalent of inaction. We have already witnessed where we're headed with inaction: in El Paso Texas we are seeing increasing triple digit temperatures, longer, hotter summers in a community that has long been economically disadvantaged."

Congressman Josh Gottheimer (NJ-05) said, "With the Build Back Better Act, we have the opportunity to deliver another critical part of the puzzle in our fight against climate change. This historic bill will include key incentives for our families to move over to electric vehicles, wind and solar power, and for utilities to upgrade their power grids and transition to clean energy sources. And it will create jobs: jobs, jobs, and more jobs. It will do all this while cutting taxes for hardworking New Jersey families. For New Jersey, for our planet, we must take action, we must tackle climate change and take the steps to protect our children and our grandchildren."

Congressman Mike Levin (CA-49) said, "When we make bold investments in climate, we're not just protecting our planet. We're lifting up millions of families with the jobs of the future. So we must pass the Build Back Better Act and its historic investments in climate action. Anything less would be a moral failure for our children and our grandchildren."

Congressman Joe Neguse (CO-02) said, "Those of you who have visited Colorado know that this time of year, we're usually skiing and snowboarding. But climate change has completely altered the calculus for the Rocky Mountain West. And the reality is, these wildfires will be here to stay. These are the stakes. This is why we are pursuing the bold climate action that we are poised to enact in just a few short days here in Washington D.C. The stakes really could not be higher [...] And it is life or death for my constituency."

Congressman Steven Horsford (NV-04) said, "With the investments from the Infrastructure Investment and Jobs Act and the Build Back Better Act, we are not only mitigating and investing in jobs for clean energy, but we're also addressing issues like the drought, like wildfires, while creating great jobs, reducing energy costs, and addressing environmental injustice, which has plagued our society for generations. This is the time to act."

November 17, 2021

U.S. House of Representatives

Washington, DC 20515

RE: Support H.R. 5376, the Build Back Better Act of 2021

Dear Representative,

The League of Conservation Voters (LCV) believes that everyone has a right to clean air, clean water, public lands, and a safe climate protected by a just and equitable democracy. Each year, LCV publishes the *National Environmental Scorecard*, which details the voting records of members of Congress on environmental legislation. The *Scorecard* is distributed to LCV members, the general public, and the media.

LCV urges you to vote YES on H.R. 5376, the Build Back Better Act, the most significant climate legislation in American history. The bill passes the climate test and puts the United States on the path to cutting our climate

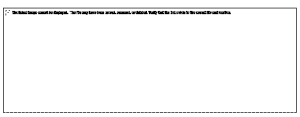
pollution in half by 2030, while investing directly into communities of color too often left behind and most harmed by toxic pollution and creating good-paying union jobs. Given the significance and urgency of passing the Build Back Better Act, we would like to reiterate that for only the second time in our history the League of Conservation Voters' connected political committee, LCV Action Fund **will only consider endorsements for members of Congress in the 2022 election cycle or their next election who support the Build Back Better Act**, as first communicated in our September 7 letter.

This transformational legislation invests $555 billion in climate, jobs, and justice. At the center of these investments is a robust ten-year set of tax incentives totaling $320 billion for clean energy and manufacturing, transmission, electric vehicles, innovative technologies, and energy efficiency that will save households hundreds of dollars annually, are tied to strong labor provisions and support domestic manufacturing. The bill prioritizes environmental justice through investments such as environmental and climate justice block grants, funding for reducing toxic air and water pollution, electrifying ports, trucks, buses and transit, and a Greenhouse Gas Reduction Fund that delivers 40% of investments to disadvantaged communities, all of which help meet President Biden's Justice40 initiative. It also bans new oil and gas leasing off the East coast, West coast, and eastern Gulf of Mexico, funds replacement of lead pipes and clean water infrastructure, reduces methane pollution from the oil and gas industry, restores protections to the Arctic Refuge, invests in resiliency with climate-smart agriculture and coastal restoration, and so much more.

While the Infrastructure Investment and Jobs Act (IIJA) that was signed into law on Monday contains important investments, only through passage of both bills will we be able to reduce emissions at the pace science requires and begin addressing the deadly and devastating impacts of the climate crisis we are already facing, while working to dismantle long-standing environmental, racial, and economic injustices.

We urge you in the strongest possible terms to support H.R. 5376, the Build Back Better Act. While our normal procedure is to send a letter to the full House of Representatives when a floor vote is imminent and note a given vote will be considered for inclusion in the *National Environmental Scorecard*, in this instance we want to restate unequivocally that **we will score this historic vote in the 2021 *Scorecard***. If you need more information, please reach out to a member of our Government Relations team.

Sincerely,



Gene Karpinski

President

MEDIA ADVISORY

For Planning Purposes Only
Contact: press@lcv.org

Wednesday, November 17, at 10 a.m. ET on Capitol Hill: House Speaker Nancy Pelosi, Sen. Tina Smith, Chair Hakeem Jeffries, Rep. Suzanne Bonamici, Rep. Veronica Escobar, Rep. Josh Gottheimer, Rep. Mike Levin, Rep. Joe Neguse to Hold Press Conference on Importance of Passing Build Back Better Act to Meet the Moment on Climate

Washington, D.C. – House Speaker Nancy Pelosi, Sen. Tina Smith, Chair Hakeem Jeffries, Rep. Suzanne Bonamici, Rep. Veronica Escobar, Rep. Josh Gottheimer, Rep. Mike Levin, and Rep. Joe Neguse will join LCV and Climate Power on **Wednesday, November 17, at 10:00 a.m. at the House Triangle** on Capitol Hill for a press conference on the importance of passing the Build Back Better Act and its $555 billion in climate investments.

Now that the Infrastructure Investment and Jobs Act is law, it's time for Congress to finish the job, pass the Build Back Better Act, and quickly get it to the President's desk. The overwhelmingly popular Build Back Better Act is Congress' opportunity to put our nation on track to cut climate pollution in half by 2030, save people $500 a year on their energy bills, create good-paying union jobs, and build a healthy, more equitable clean energy future.

WHO:

- House Speaker Nancy Pelosi
- Sen. Tina Smith (MN)
- Chairman of the House Democratic Caucus Hakeem Jeffries (NY-08)
- Rep. Suzanne Bonamici (OR-01)
- Rep. Veronica Escobar (TX-16)
- Rep. Josh Gottheimer (NJ-05)
- Rep. Mike Levin (CA-49)
- Rep. Joe Neguse (CO-02)
- Tiernan Sittenfeld, LCV

WHEN: Wednesday, November 17, at 10:00 a.m. ET

WHERE: House Triangle, outside the House side of the Capitol's East Front

RSVP: This is an open press event. **Media interested in covering this event can RSVP to press@lcv.org**

LCV Statement On Biden Administration's Oil and Gas Lease Sale for Gulf of Mexico

Washington, D.C. — In anticipation of the Biden administration's Bureau of Ocean Energy Management (BOEM) holding an oil and gas lease sale in the Gulf of Mexico tomorrow, the League of Conservation Voters (LCV) released the following statement from **Senior Government Affairs Advocate Ben Alexandro:**

"It is disappointing that the Biden administration is moving forward with a major oil and gas lease sale in the Gulf of Mexico. This region has experienced the lasting impacts of offshore drilling spills on their communities, the environment, and the local economy for years. The decisions the administration makes now can prevent future offshore drilling disasters and align the management of our public lands and waters with our climate goals. It is time for a course correction."

LCV signed several letters ahead of the sale, including one urging the Biden administration to cancel the lease sale in the Gulf of Mexico, and another calling for an overhaul to the federal fossil fuels program and an end to all new leasing for fossil fuels both onshore and offshore.

LCV Statement on President's Signing of Infrastructure Investment and Jobs Act

Washington, D.C. -- In anticipation of President Biden signing the Infrastructure Investment and Jobs Act today, the League of Conservation Voters (LCV) issued the following statement from **Senior Vice President of Government Affairs Tiernan Sittenfeld:**

"We applaud the Biden-Harris administration and the bipartisan group of members of Congress for enacting the Infrastructure Investment and Jobs Act into law and ensuring badly needed investments in electric vehicle charging stations and electric school buses, replacement of harmful lead service lines, clean technology research and development, grid modernization, and more. This is an important step forward, and now Congress must finish the job by passing the Build Back Better Act and getting it to President Biden's desk in the coming weeks. Congress can and must pass the Build Back Better Act to meet the climate test of cutting climate pollution in half by 2030, the goal set by President Biden and that science and environmental and racial justice require. Doing so is critical to creating and sustaining millions of good-paying union jobs in the clean energy economy and investing in the frontline and communities of color that have suffered the most from toxic pollution, and it will save people money on their energy bills and other monthly expenses. The time to build on today's progress and Build Back Better once and for all is right now."

LCV Statement on Biden Administration's Steps to Protect Chaco Canyon Landscape

Washington, D.C. -- In response to the Biden administration's announcement that it is initiating a process to consider barring new federal oil and gas leasing for 20 years within a 10-mile radius around Chaco Culture National Historical Park as well as undertaking a broader assessment of the Greater Chaco cultural landscape to ensure that public land management better reflects the sacred sites, stories, and cultural resources in the region, the League of Conservation Voters (LCV) released the following statement from **Conservation Program Director Alex Taurel**:

"It's wonderful to see the Biden administration announce these steps toward protecting the sacred landscape of Chaco Canyon. We are thrilled that the Biden administration is heeding the calls of Indigenous communities that have been fighting for hundreds of years to protect their ancestral lands from further desecration, and we hope this process results in long-term protections for the Chaco Canyon area. Embracing this and other examples of tribally-led conservation efforts can help the United States fight climate change and advance equity at a time when we must act boldly on both fronts."

ICYMI: Chair Castor, Rep. Neguse, Rep. Casten, LCV and Climate Power Hold Virtual Press Conference on 'Finishing the Job' and Passing the Build Back Better Act

In case you missed it, the League of Conservation Voters (LCV) and Climate Power held a virtual 'Finish the Job' press conference today with House Select Committee on the Climate Crisis Chair Kathy Castor (FL-14), Congressman Joe Neguse (CO-02), Congressman Sean Casten (IL-06), Center for American Progress chair and founder and Climate Power co-founder John Podesta, and LCV's Tiernan Sittenfeld.

WATCH the full recording here.

Chair Castor, Rep. Neguse and Rep. Casten just returned from COP26 where they reiterated the United States' commitment to combating the climate crisis alongside Speaker Pelosi. Ahead of Congress' return to Washington, D.C. next week, the speakers highlighted the urgent need to pass the Build Back Better Act and invest in climate, clean energy, justice, and jobs at the scale that science and justice demand. Their message was clear: Congress must finish the job and show the world we are leading on climate by passing the Build Back Better Act next week.

LCV's Tiernan Sittenfeld made clear, "We can and we must seize this once-in-a-generation opportunity for climate, jobs, and justice. And when we do, when the Build Back Better Act becomes law, in the years ahead we'll save $500 a year on energy bills, send our kids off to school in clean electric school buses, drive affordable electric cars, breathe clean, healthy air, suffer less from health problems caused by polluted air and water, and stave off even more devastating, costly extreme weather and other catastrophic impacts of the climate crisis."

Center for American Progress Chair and Climate Power co-founder John Podesta said, "The stakes couldn't be higher for our planet. We have the opportunity to get this right, we need to deliver the promise of a habitable world, our voters and our future are demanding it and we are demanding it. We need to finish the job."

Chair of the House Select Committee on the Climate Crisis Kathy Castor (FL-14) said, "We are committed to doing the hard work necessary to Build Back Better. That's why we have worked for many months, actually several years, to hammer out those pathways for a clean energy future. It's one where consumers and families will save money on their electric bills, it will create millions of jobs across America. This next step on Build Back Better that we intend to pass next week is absolutely vital. It is the hallmark of us being able to deliver on President Biden's pledge to cut pollution by 50% by 2030."

Congressman Joe Neguse (CO-02) said, "The time to do something is right now and the solution is a clear one: It is passing the Build Back Better Act, which we certainly intend to do in the coming days in the House, and we trust in our colleagues in the Senate will recognize the urgency of the moment and do the same. When we are able to get that across the finish line, we will have secured over a trillion dollars in climate investments, a transformational investment in our country's history, and one that ultimately, I believe, will meet the moment as we do our part to save our planet."

Congressman Sean Casten (IL-06) said, "The way that we say not only is the United States focused on what is scientifically necessary but we actually deserve to be in a position of leadership. Because we are going to show not by our words but by our feet that we are committed to this. The way that we do that is by passing the Build Back Better Act. And we will then be at a point where we can look ourselves in the eye, much as the rest of the world is looking themselves in the eye after COP, and say that we in the US have now made the single biggest commitment to tackling climate change in our history."

New Ads Call on Reps. Case, Murphy, Rice, Schrader to 'Finish the Job' and Pass Build Back Better Act the Week of November 15

LCV, Climate Power and NRDC Action Fund also continue to run TV ads in key House districts to thank members for fighting for climate action

Washington, D.C. -- Today, the League of Conservation Voters (LCV) and Climate Power launched new digital ads calling on Reps. Ed Case (HI-01), Stephanie Murphy (FL-07), Kathleen Rice (NY-04), and Kurt Schrader (OR-05) to deliver on their pledge to pass the Build Back Better Act with historic and transformative investments in climate, jobs, and justice by the week of November 15.

SAMPLE DIGITAL AD:

"Passing the Infrastructure Investment and Jobs Act was only step one -- now it's time for Congress to finish the job, pass the Build Back Better Act, and put the U.S. on track to cut our climate pollution in half by 2030," said **Pete Maysmith, LCV SVP of Campaigns**. "This overwhelmingly popular bill is Congress' opportunity to save their constituents $500 a year on their energy bills, create good-paying union jobs, and build a healthy, more equitable clean energy future, all while slowing the devastating impacts of the climate crisis."

"A vote against the Build Back Better Act will be a vote against climate action, job opportunities, environmental justice, and the future of our nation," said **Lori Lodes, Climate Power Executive Director.** "Every week we delay is another week where communities are suffering from extreme droughts, devastating wildfires and unprecedented storms. Communities of color on the frontlines are still plagued by toxic pollution and waiting for something to be done. Congress needs to finish the job by passing the Build Back Better Act the week of November 15 to deliver for the American people."

In addition to the new digital ads, LCV, Climate Power and the NRDC Action Fund are continuing to run the "Delivering" TV ad in 10 key House districts. The ad thanks the members for fighting for good paying jobs, lower utilities, and climate action for their constituents and urges them to pass the Build Back Better Act and get this done.

"This is it. The Build Back Better Act is a chance to secure a brighter future for generations to come, and an opportunity like this won't come around again anytime soon. Now is the moment to act, to show leadership and to do the right thing for our children and grandchildren," said **Kevin S. Curtis, executive director of the NRDC Action Fund.**

WATCH SAMPLE TV AD: "Delivering" (GA-07 -- Rep. Carolyn Bordeaux)

Districts where the "Delivering" TV ad is running:

- AZ-01 (Rep. O'Halleran)
- GA-07 (Rep. Bourdeaux)
- IA-03 (Rep. Axne)
- KS-03 (Rep. Davids)
- MI-08 (Rep. Slotkin)
- NH-01 (Rep. Pappas)
- NJ-11 (Rep. Sherrill)
- NV-03 (Rep. Lee)
- VA-02 (Rep. Luria)
- VA-07 (Rep. Spanberger)

This year alone, LCV and Climate Power have invested more than $45 million million in national, state, and district level paid media campaigns to help ensure the Build Back Better Act becomes law.

LCV Statement on Passage of Infrastructure Investment and Jobs Act and Advancement of Build Back Better Act Rule

Washington, D.C. -- In response to the passage of the Infrastructure Investment and Jobs Act and advancement of the Build Back Better Act rule, the League of Conservation Voters (LCV) released the following statement from **LCV Senior Vice President of Government Affairs Tiernan Sittenfeld**:

"While today was not the historic day we hoped it would be, the House made important progress by passing the Infrastructure Investment and Jobs Act in tandem with the rule to advance the Build Back Better Act. We are now one step closer to passing the transformational climate and justice bill we need, the Build Back Better Act, and we expect all Democrats to support its passage.

While concerns remain with provisions in the bipartisan infrastructure bill, we are encouraged by funding for clean energy research, development, and demonstration, grid modernization, and resiliency, as well as funding for water infrastructure, lead pipe replacement, electric vehicle charging infrastructure and EV school buses.

Now it's time to finish the job, pass the Build Back Better Act and quickly get it to the President's desk. We are out of time to tackle the climate crisis -- Congress must seize this historic opportunity to make the investments needed to put the U.S. on track to cut climate pollution in half by 2030, create good jobs, and advance justice."

Subject: FW: LCV Scorecard Letter and Fact Sheet: Vote YES on H.R. 5376, the Build Back Better Act of 2021

BIG day for climate, jobs, and justice! We blasted this to the House last night. Kudos to you all for getting to this point and let's do it!

Best,

Tiernan

Click To View Documents: LCV Supports BBBA Letter 11-1-21.pdf (203KB); LCV Build Back Better Priorities Fact Sheet.pdf (958KB);

Good evening,

In advance of the expected House vote on the Build Back Better Act, I wanted to be sure to resend our letter from Monday urging Congressman Carl to **vote YES on H.R. 5376, the Build Back Better Act of 2021**, the most significant climate legislation in American history. We also urge support for the rule that will guide the debate leading to passage of the Build Back Better Act.

I am also attaching to this email a revised fact sheet outlining the major policy wins for climate, jobs, and justice in the legislation.

As a reminder, for only the second time in our history the League of Conservation Voters' connected political committee, LCV Action Fund **will only consider endorsements for members of Congress in the 2022 election cycle or their next election who support the Build Back Better Act.** While our normal procedure is to send a letter to the full House of Representatives when a floor vote is imminent and note a given vote will be considered for inclusion in the *National Environmental Scorecard*, in this instance we want to state unequivocally that **we will score this historic vote in the 2021 *Scorecard.***

Please do not hestiate to reach out if you have any questions. Thank you,
Sara

Sara Chieffo
VP, Government Affairs
League of Conservation Voters

November 1, 2021

U.S. House of Representatives
Washington, DC 20515

RE: Support H.R. 5376, the Build Back Better Act of 2021

Dear Representative,

The League of Conservation Voters (LCV) believes that everyone has a right to clean air, clean water, public lands, and a safe climate protected by a just and equitable democracy. Each year, LCV publishes the *National Environmental Scorecard,* which details the voting records of members of Congress on environmental legislation. The *Scorecard* is distributed to LCV members, concerned voters nationwide, and the media.

LCV urges you to vote YES on H.R. 5376, the Build Back Better Act, the most significant climate legislation in American history. As our nation and the world are already experiencing the deadly and devastating impacts of the climate crisis, and as we reckon with longstanding environmental and racial injustice and economic inequality, it's never been more important or more urgent for Congress to make transformational progress. The Build Back Better Act passes the climate test and puts the United States on the path to cutting our climate pollution in half by 2030 while investing directly into communities of color too often left behind and creating good-paying union jobs. As a result, following on our September 7 letter, for only the second time in our history the League of Conservation Voters' connected political committee, LCV Action Fund **will only consider endorsements for members of Congress in the 2022 election cycle or their next election who support the Build Back Better Act.**

This transformational legislation invests $555 billion in climate, jobs, and justice. At the center of these investments is a robust ten-year set of tax incentives totaling $320 billion for clean energy and manufacturing, transmission, electric vehicles, innovative technologies, and energy efficiency that will save households hundreds of dollars annually, are tied to strong labor provisions and support domestic manufacturing. The bill prioritizes environmental justice through investments such as environmental and climate justice block grants, funding for reducing toxic air and water pollution, electrifying ports, trucks, buses and transit, and a Greenhouse Gas Reduction Fund that delivers 40% of investments to disadvantaged communities, all of which help meet President Biden's Justice40 initiative. It also bans new oil and gas leasing off the East coast, West coast, and eastern Gulf of Mexico, funds replacement of lead pipes and clean water infrastructure, reduces methane pollution from the oil and gas industry, restores protections to the Arctic Refuge, invests in resiliency with climate-smart agriculture and coastal restoration, and so much more.

While we have some serious concerns about some provisions in the Infrastructure Investment and Jobs Act (H.R.3684), the legislation includes important funding for clean energy research, development, and demonstration, grid modernization, and resiliency, as well as funding for lead pipe replacements, electric vehicle charging infrastructure and EV school buses. **It is clear that the Build Back Better Act and the Infrastructure Investment and Jobs Act must move forward together; we therefore urge all members of Congress to vote for both bills.**

We urge you in the strongest possible terms to support H.R. 5376, the Build Back Better Act. While our normal procedure is to send a letter to the full House of Representatives when a floor vote is imminent and note a given vote will be considered for inclusion in the *National Environmental Scorecard*, in this instance we want to state unequivocally that **we will score this historic vote in the 2021 *Scorecard.*** If you need more information, please reach out to a member of our Government Relations team.

Sincerely,

Gene Karpinski
President

Hello Jennifer and Betsy--

I wanted to pass this along -- Miles just texted me this note, and I thought it worth sharing. I hope you feel appreciated going into the weekend....

Best,

Tim

**

Tim, I wanted to pass along that I'm happy about how the 25M "clean air act grants" is coming out. It's an impossible pie to slice and this is going to absolutely work. If folks ask me to whine (it's money, so, someone always wants to whine) I'll resist doing that. Please informally pass this to Jennifer or whoever needs to hear encouragement. You guys never get that.

Joe,

I hope by now you're not wondering whether my regular invitations for you to come speak with NACAA are just a routine, or a habit like someone who can't stop impulsively following around the Grateful Dead in an old bus. Trust me, it's with a long list of exciting new opportunities to work together that I'm writing to invite you to join the country's community of state and local clean air agencies at the NACAA Spring 2023 National Member Meeting on May 9-10, 2023, as our key speaker. I'm still developing our agenda so I'd like to propose a 45 minute window between 11 am and 3 pm (say, 1:15 to 2:00 pm Mountain) n May 9, but we can be flexible. We are meeting in person in Denver, Colorado, but it's also going to be a hybrid meeting so if that doesn't work you could participate via zoom. A full invitation letter is attached.

(Delaney, Isabel, I took the liberty of attaching the external event form as well, and I'm happy as always to get y'all anything else that would make this easy for you, just let me know.)

Joe, we really value these conversations so much, and I wonder if you and your team could please see whether your participation might be possible? Our EPA friends are also very welcome to come and participate in as much of our meeting as they wish, and it's free to register. I know how busy you are and I value your time tremendously, as do the NACAA members. There's been a flurry of activity from OAR recently and we know there's a lot more ahead, and we recognize and appreciate that. Thanks in advance for considering this invitation, and I hope we'll see you in Denver!

Wishing you well, Miles

Will do.

Before rescheduling need to know 1) if you would like to meet at 1p or later in the day as was suggested during RT (and use the 1p as reading time)? And 2) whether the team would like to reschedule with OAQPS for tomorrow or Wednesday.

Thank you.

Attachments:best_practices_for_stakeholder_engagement_prior_to_or_after_issuing_competitive_notices_of_funding_opportunities.pdf

If the meeting is unrelated to a future Notice of Funding Opportunity (NOFO), ground rules can be established in advance indicating there will be no discussion of any future NOFOs.

Excerpt from the memo below:
Engaging in one-on-one or small group meetings (in-person or virtual) with potential applicants for EPA funding or their representatives regarding the development of a grant program or an anticipated NOFO is not consistent with the Competition Policy. Such a practice may provide an advantage to one applicant or a group of applicants over another or the appearance of providing such an advantage. This is the case either prior to the issuance of the anticipated NOFO or during the NOFO's open period. There may be situations in which there is a legitimate reason for meeting with a potential applicant when the subject matter of the meeting is unrelated to the NOFO (e.g., to discuss a general environmental matter such as climate change or the results of a previously awarded EPA grant). In these cases, ground rules must be established prior to the meeting to preserve the integrity of the competition process under the NOFO. For example, EPA staff should emphasize in a pre-meeting email that there will be no discussion at all regarding the NOFO at the meeting.

Hi everyone,

As background, the meeting scheduled with Curtis Wynn (CEO of SECO Energy) for March 15 at 1 pm is a follow up to a meeting between him, Administrator Regan, and Joe Goffman.

Mr. Wynn would like to discuss the concept paper document he shared in January (attached).

Please let me know if you have any questions or would like to add anyone to the invite.

Thanks
Dan

Subject: Materials/topics for Virtual meeting with Curtis Wynn (CEO SECO Energy) - scheduled March 15 at 1 pm
Attachments: Lake Sumter State College - Grid Edge Project Concept.pdf

Hi everyone,

As background, the meeting scheduled with Curtis Wynn (CEO of SECO Energy) for March 15 at 1 pm is a follow up to a meeting between him, Administrator Regan, and Joe Goffman.

Mr. Wynn would like to discuss the concept paper document he shared in January (attached).

Please let me know if you have any questions or would like to add anyone to the invite.

Thanks
Dan

If the meeting is unrelated to a future Notice of Funding Opportunity (NOFO), ground rules can be established in advance indicating there will be no discussion of any future NOFOs.

Excerpt from the memo below:
Engaging in one-on-one or small group meetings (in-person or virtual) with potential applicants for EPA funding or their representatives regarding the development of a grant program or an anticipated NOFO is not consistent with the Competition Policy. Such a practice may provide an advantage to one applicant or a group of applicants over another or the appearance of providing such an advantage. This is the case either prior to the issuance of the anticipated NOFO or during the NOFO's open period. There may be situations in which there is a legitimate reason for meeting with a potential applicant when the subject matter of the meeting is unrelated to the NOFO (e.g., to discuss a general environmental matter such as climate change or the results of a previously awarded EPA grant). In these cases, ground rules must be established prior to the meeting to preserve the integrity of the competition process under the NOFO. For example, EPA staff should emphasize in a pre-meeting email that there will be no discussion at all regarding the NOFO at the meeting.

Hello all,

My name is Kate Corcoran, and I am part of the EPA Clean Air Markets Division team that has been reviewing comments received on the Good Neighbor Plan Proposal (https://www.epa.gov/csapr/good-neighbor-plan-2015-ozone-naaqs). We appreciated ERCOT's comment on the proposal, and look forward to engaging with you to learn more about questions and concerns identified in the comment submission regarding ensuring electric reliability under the proposed rule.

Thank you to ERCOT for making the time for this meeting. Please feel free to forward this meeting invite to your ERCOT colleagues as needed.

Many thanks,
Kate

Good Afternoon,

The MATS team had to make minor edits to some numbers on slide 9 of this presentation. We apologize for any confusion this may cause. Here is the updated slide deck. We look forward to the meeting at 1:30pm.

Hi all,

Please see attached for the deck we will be using during this session. We are doing a few things differently for this session – please see below for an updated run of show with changes highlighted. Grace will be sharing slides, as I will have to step out briefly. Jennifer will share consolidated talking points shortly.

- Welcome and Introductions (2 minutes): Avivah Jakob (OPEEE)
- Opening Remarks (3 minutes): Joseph Goffman (OAR)
- IRA Presentation (10 – 15 minutes): Jennifer Macedonia (OAR)
- Q&A (1 hour): Jennifer Macedonia (OAR) → **NO POLL**
  - Mobile Sources (~15 min)
  - Monitoring & Schools (~15 min)
  - CPR Grants (~15 min)
  - Open floor (~15 min)
- Wrap-up (5 minutes): Jennifer Macedonia (OAR)

When: Thursday, December 1, 2022 3:00 PM-4:30 PM (UTC-05:00) Eastern Time (US & Canada).
Where: Ex. 6 Personal Privacy (PP)

Meeting: This is a virtual roundtable conversation with EPA around the Office of Air and Radiation's provisions in the Inflation Reduction Act.
Date/ Time: Thursday, Dec. 1, 3:00-4:30pm EST
Zoom Link: Ex. 6 Personal Privacy (PP)
Overview: We are excited to hear your perspectives, priorities, and feedback as we embark on this critical priority. A Request for Information (RFI) was published that includes non-regulatory dockets to provide answers to questions OAR has authored for stakeholders to respond to. The list of discussion questions and dockets can be found HERE.

IRA Provisions Covered:

- Clean Heavy-Duty Vehicles [60101]
- Grants to Reduce Air Pollution at Ports [60102]
- Diesel Emissions Reduction [60104]
- Funding to Address Air Pollution – Fenceline Monitoring [60105(a)]
- Funding to Address Air Pollution – Multipollutant Monitoring [60105(b)]
- Funding to Address Air Pollution – Air Quality Sensors [60105(c)]
- Funding to Address Air Pollution – Emissions from Wood Heaters [60105(d)]
- Funding to Address Air Pollution – Methane Monitoring [60105(e)]
- Funding to Address Air Pollution – Clean Air Act Grants [60105(f)]
- Funding to Address Air Pollution – Mobile Source Grants [60105(g)]
- Funding to Address Air Pollution at Schools [60106]
- Low Emissions Electricity Program [60107]

- Funding for Section 211(O) of the Clean Air Act - RFS [60108]
- Funding for Implementation of American Innovation and Manufacturing Act [60109]
- GHG Corporate Reporting [60111]
- Methane Emissions Reduction Program [60113]
- Climate Pollution Reduction Grants [60114]

(THIS LISTENING SESSION WILL NOT INCLUDE A DISCUSSION OF THE GREEN HOUSE GAS REDUCION FUND.)

Hi all,

Please see attached for the deck we will be using during this session. We are doing a few things differently for this session – please see below for an updated run of show with changes highlighted. Grace will be sharing slides, as I will have to step out briefly. Jennifer will share consolidated talking points shortly.

- Welcome and Introductions (2 minutes): Avivah Jakob (OPEEE)
- Opening Remarks (3 minutes): Joseph Goffman (OAR)
- IRA Presentation (10 – 15 minutes): Jennifer Macedonia (OAR)
- Q&A (1 hour): Jennifer Macedonia (OAR) → **NO POLL**
  - Mobile Sources (~15 min)
  - Monitoring & Schools (~15 min)
  - CPR Grants (~15 min)
  - Open floor (~15 min)
- Wrap-up (5 minutes): Jennifer Macedonia (OAR)

I wanted to share my appreciation of the OPEEE team - Avivah, Vanessa, Grace, and Loni - who have been wonderful partners in the IRA stakeholder engagement process thus far and worked to organize, invite, and run the OAR IRA listening sessions; as well as Anna Benkeser who has been instrumental in developing the talking points, slides, and helping behind the scenes.

Thank you!
Jennifer

Hi Vicki. I asked that you be included in this briefing for Joe tomorrow/Thurs, 3pm, on next steps on remand in the West Virginia case, in case your schedule allows participation. Ex. 5 Deliberative Process (DP) Ex. 5 Deliberative Process (DP) As to this briefing, neither Jeff nor I expect to be there, as he is at LULAC conference and I have previously arranged personal travel. OGC's political deputies remain recused. OGC's Matt Marks is available if you'd like to discuss further. Jim Ex. 6 Personal Privacy (PP) cell

Subject: IRA retreat Aug. 17

All – looking forward to our retreat next week on IRA. Date is Wednesday Aug 17 from 1 to 4. A draft agenda for that meeting is attached. So you can plan ahead, note that we plan to start with 3-4 minute presentations from the office designated as lead for each OAR topic (see attached for the list of topics and lead offices). For a couple topics two offices are listed - those offices can agree who will do what for this meeting. Our goal for the retreat is to get a shared overview perspective of the provisions that will be implemented by OAR and discuss the big opportunities as a leadership team, followed by discussion of process and next steps – see agenda for more details.

In advance of the retreat, we are asking the leads to update by Friday the factsheets on the sharepoint site that OAP set up (thank you!), and for all people attending the retreat to read/skim those factsheets in advance of the retreat.

We would like to include the people each office needs while keeping the meeting to manageable size for real discussion. So we propose office directors plus 2, or plus 1 if that is enough.

Thanks. And please call if you have any suggestions for how to use our time most effectively.

To: Kabanda, Thierry <Kabanda.Thierry@epa.gov>
Subject: FW: EPA/FERC re power efforts

Hi Thierry –

Could I see if the time slots below work for Tomas, and maybe Joe (?), for a call with Commissioner Allison Clements of FERC?

From: Profeta, Timothy
Sent: Monday, August 22, 2022 2:06 PM
To: Birnbaum, Rona <Birnbaum.Rona@epa.gov>; Carbonell, Tomas <Carbonell.Tomas@epa.gov>; Culligan, Kevin <Culligan.Kevin@epa.gov>
Subject: FW: EPA/FERC re power efforts

Could we assess whether any of these dates work for the 4 of us, and then we could add? To limit your consideration, I can do the Wed block and the Th 1030-11. I would like to grab Wednesday so we could bleed past 30 minutes if possible.

Tim

From: Alexander De Taboada <Alexander.DeTaboada@ferc.gov>
Sent: Monday, August 22, 2022 1:46 PM
To: Profeta, Timothy <Profeta.Timothy@epa.gov>
Subject: RE: EPA/FERC re power efforts

Not a problem, Tim, we appreciate you trying so hard to make today work!

A few windows later this week:

- **Tuesday (8/23)** 10:30 – 11am ET
- **Wednesday (8/24)** 10 – 11am ET
- **Thursday (8/25)** 9:30 – 10am, 10:30 – 11am ET

If none of these work on your end, I'll have to touch base with the Commissioner tomorrow morning to see where else we might be able to create space. Feel free to suggest alternates that work for you as well, of course.

Hi Tim,

Following up on this to see if we have a new time for next week yet.

As discussed below, 8:30 – 9:30am and 2 – 4pm ET Monday (8/22) are both available. We also have a good amount of flexibility throughout the rest of the week, if there's a more ideal window for those on your end.

Let me know,
Alex

Subject: RE: Discussion/debrief of SCOTUS decision - WV vs EPA

Hey Dan,

Welcome to EPA and glad you got to listen in yesterday.

Ex. 5 Deliberative Process (DP)

This is my non-lawyer explanation and thought process on it but hope it helps. What you are posing about lower courts certainly could happen, but I would doubt it would

Nick

Subject: RE: Discussion/debrief of SCOTUS decision - WV vs EPA

Hi Nicholas,

I just hired in as an Economist in the HEID/AEG and I listened in today on the chat about the recent SCOTUS ruling. I'm, still getting up to speed with sections 111 and 112 of the CAA so please forgive me if I'm asking a naïve question.

Ex. 5 Deliberative Process (DP)

Anyway, thanks for taking the time today. I enjoyed hearing a legal perspective, if only an informal one.

Best,
Dan

Subject: RE: APPA Power Sector Stakeholder Discussion

Hello everyone,
Ahead of our meeting with APPA today, the power sector team would like to share notes from our previous listening session with APPA from Feb/March 2022. Thanks!

APPA

- Concerned about the economic impact of EPA on low-income customers.
  - Includes concern for communities with environmental justice concerns
- Low energy prices key to ensuring continued job growth.
- Reliability and affordability
  - Glidepath for legacy fossil generators and guardrails during transition.
  - Avoid stranded assets.
  - Need to maintain fossil while multi-day storage, hydrogen, and dispatchable nuclear becomes more available and affordable.
  - Support for CCUS
  - Flexibility to reliance on engines, gas
  - Last 10% of technology advances are the most costly.
- Clear timelines for regulations.
  - Full accounting of all rules - not just EPA rules but those of other agencies too (Army Corps, DOE, DOI, FERC, NERC, etc)
- Durable EPA regulations that can survive legal challenges
  - Look to states for what works
  - Avoid perverse incentives and disincentives (ex. CEPP penalties for overachieving)
  - Allow reliance on nuclear and hydro as clean emitting sources
  - Permitting concerns
- One size does not fit all
  - Recognize regional differences in infrastructure and resource mix.
  - Credit for early adopters and leaders
  - Compliance flexibilities

Folks,

We look forward to "meeting" with you by Zoom on Friday (10/21) at 10:00 Pacific/11:00 Mountain/12:00 Central/1:00 Eastern. We have a really terrific group of state leaders for this strategy discussion around deploying federal resources.

Attached is an agenda for our call together, as well as a 1-page sketch of a framework for deploying federal funds we put together with the hope that it will be useful for our conversation. Rolf Nordstrom of the Great Plains Institute will facilitate.

You should have the invitation with the Zoom information, but just in case I am posting that information again below.

Best,

Franz

Hi Franz –

Thank you for the invitation, and we look forward to joining you tomorrow. As we discussed, we only would be able to provide background on the Climate Pollution Reduction Grants provision from public information that we would share with any other potential grant competitors. As a result, I understand that we won't speak to the provision at that point in the agenda – we will benefit greatly from listening, however, so thank you. And we look forward to working more with you as the efforts mature.

Best regards,

Tim

Hi folks,
We're looking forward to our discussion today. If it makes sense to you all, we can start with a brief OAR update, then hear updates around the table (R6, R9, R1 and Robin), and then open it up for thoughts from the group on issues we need to be attentive to in the rulemaking or questions we need to raise in the preamble, suggestions for additional engagement, etc.
Thanks!
