Subject: Texas SO2 DRR source designations
Location: R6-ConfRm-GulfofMexico-11O02/R6---11th-Floor

Start: 1/17/2018 4:00:00 PM
End: 1/17/2018 5:00:00 PM
Show Time As: Busy

Conference Line/Code / Ex. 6

Discussion on designations and options for areas in Texas with DRR sources that have recently or will be shutting down.

Status Update: Monticello (Titus county - NA) shutdown January 4th and Sandow (Milam County – designated unclassifiable) shutdown on January 11th. Big Brown (Freestone and Anderson County-NA) is scheduled to shutdown on February 12. The area around Martin Lake is designated non-attainment as well.

Petition Update: We received a new petition from TCEQ dated 12/11/17 to provide new information for the areas around Big Brown and Monticello designated non-attainment. In the petition, TCEQ notes the shutdowns, the resources that would be needed for a redesignation request and maintenance SIP if EPA does not redesignate these areas now (attainment demonstration SIPs are due July 12, 2018), maintenance obligations, and that monitors have been deployed at Big Brown and Martin Lake. They also reiterate their positions on our reliance on modeling vs. monitor data and relying on Sierra Club modeling.
