6/16/2010

Dear Lisa,

RECEIVED
2010 JUN 22 AM 11:17
OFFICE OF THE EXECUTIVE SECRETARIAT

My name is Dave Rogotzke from Duluth, Minnesota. I have been a nearly 30yr fisherman of Bristol Bay in SW Alaska. It contains the river systems where up to 60 million wild salmon return to their rivers of origin on an annual basis.

Your greatest challenge will be to stop the PEBBLE Mine from its development at the headwaters of the Nushagak & Kvichak Rivers. Just as BP said they had fail-safe mechanisms in place if something catastrophic happened so PEBBLE promised.

Pebble proposes the largest gold/copper mine in North America. Mining & fishing don't mix. With players like Sarah Palin who looked the other way during initial applications by Pebble as Governor Pebble now has a head of steam.

There is only one great salmon fishery left in the United States — the only intact one left in the world. It's right here in Bristol Bay. We/You should make every effort in the world to preserve this great food, habitat & waters for generations to come.

Please DON'T let this disaster waiting to happen happen on your watch. There won't be any going back.

Let it be your legacy that under your watch you stopped Pebble Mine.

Sincerely,
David Rogotzke
