Hi Tricia,

The spreadsheet you attached (EPA-R06-OAR-2015-0189-0181) contains our calculations of the RPGs we proposed. And yes, it does appear that column J is supposed to be SO2 (instead of NOx) and column K is supposed to be NOx (instead of SO2)- Michael, please correct me if I am wrong.

We did end up revising our RPGs in the final FIP in response to comments we received stating that the RPGs are supposed to reflect emission reductions that will take place by 2018, and not anything beyond. The spreadsheet I attached (EPA-R06-OAR-2015-0189-0208) contains calculations for the RPGs in the final FIP.

Thanks,

Dayana Medina

Dayana,
Is this the spreadsheet you were referring to that was used to calculate RPGs? If so, is Column J supposed to be SO2 and Column K supposed to be NOx on the Option 1 and Option 2 tabs?

Thanks,
