## Submitter Information

---

## General Comment

I am very concerned about the potential of glyphosate to cause cancer, as well as birth defects and many other health problems. For the sake of public health I think it should be much more highly regulated (used much less if at all). I am a mother as well as a health care provider, and I am concerned for the health of my future grandchildren as well as my clients. I am very concerned that much of the research has been preformed by producers of glyphosate and is biased. Thank you for your time and consideration on this matter,
Jen Moore
