Dear Ms. Beck and Mr. Pruitt,

My name is Mila demier I traveled from Key West, Florida last night to be here today.

I am here in DC with a nearly 200,000 signatures petition to ask the EPA not to approved this pilot project but more important is to extended the public comment for another 30 days Not only for the Florida Keys but for the people in Harris county who has not idea about this pilot test.Also, because this is experimental test the laws allow a Public meeting on the Monroe county and Harris County public meeting to inform the public. Something that EPA have to have in consideration right now the laboratory in Florida is a a public office buiilding not adequate for Pesticides and neither inspected. This is not any other permit this is the one in one Kind and the last public publication in Harris County, Tx was in October 2017. The public has not idea over there , We in the keys have not idea of the location of the test, there is a lot of information that we need to gather, and answer before this will take place and extending the period of public comment will be really helpful. We are in the Florida Keys are not been releasing the sites of the test, claiming that they have not such information

At the end of the day I will release a press release and updated the petitioner on the position of the EPA.

Another good reason is I have over 8000 signatures with the in the last 24 Hours and right now member of the public are signing ever 3 seconds, and obviously is a sign that more time is need to allowed public to really learn about the pilot test. Please take a look yourself via this link and see how many people are signing by a second. I still thinking that people have rights. You Mr. Pruit probably know more that anyone else when you sue the EPA several times. I believe in justice and in a fairly do process.

Please take a look on the link to the petition and See yourself and your management how fast this is growing. https://www.change.org/p/tell-the-epa-no-to-gmo-mosquitoes We the people need more time for public comments.

Please get back to me today.

Thank you so much

Mila demier
