Sample AE6312-01: Metals Analysis: Due to the sample matrix, sample required dilution. Detection limits were adjusted accordingly.

Sample AE6316-01: Mercury Analysis:
Sample contained extremely high levels of mercury. Sample label states "Hg Spike". Please note that sample matrix and levels of analyte, do NOT reflect sample matrix or analyte levels in most other submitted samples. These samples were processed using significantly different dilutions, and methodology from typical samples in this job.

This method is most suited for trace level mercury determination. Please view sample results with discretion.
