| ORD | NRMRL | Boczek, Laura | 23002 | Acting Branch Chief (AWBERC | 1 | Maintenance of bacterial cultures which if lost would seriously jeopardize on-going research. Action required to protect federal research property. |
| ORD | NRMRL | Gilliland, Alice | 26425 | Deputy Director for Managem | 1 | assist in orderly shutdown of lab activities/ensure protection of federal equipment and research property |
| ORD | NRMRL | Mullin, Cynthia Sonich | 31238 | Director | 1 | oversee orderly shutdown of lab activities/ensure protection of federal equipment and research property |
| ORD | NRMRL | Musson, Stephen E. | 20009 | Chief, Laboratory Support and | 1 | Must come in at least weekly to meet EPA regulatory requirements for hazardous waste management,and to meet NRC license requirements at certain times depending on the shutdown. Lead ORD H&S person for all of Cincinnati, on call to respond as necessary in event of fire, accidents, other legal requirements to ensure protection of human life and federal property. |
| ORD | NRMRL | Nietch, Christopher T | 31383 | Scientist, WSD (Experimental | 1 | Maintenance of fish cultures at Experimental Stream Facility. PART TIME AS NEEDED |
| ORD | NRMRL | Revetta, Randy | 2333867 | Microbiologist, WSD (AWBERC | 1 | Randy Revetta needs access to the T&E facility to maintain the biological experiments being conducted there. The water in the pipe loops feeding the storage tank experiments must not be allowed to drain off in the event of a pump failure. |
| ORD | NHSRC | Sayles, Gregory | 13405 | Director and NICT ORD Rep | 1 | ORD Rep to National Incident Coordination Team (NICT) and lead for REACHBACK capabilities during emergencies |
| ORD | OARS | Steenbock, John | 33009 | Director | 1 | oversee any urgent needs during the shutdown related to HR/Budget/Extramural/Travel for ORD |
| ORD | NRMRL | Tolaymat, Thabet | 8957 | Environmental Engineer, LMN | 1 | Continue bioreactor lysimeter and mine drainage sulfate reduction columns operation, Center Hill location. Both are biological systems, capable of generating gases which need to be monitored and managed. Action required to protect federal research property |
| ORD | NRMRL | Weber, Josh | 26492 | Facilities Manager (Cincinnati) | 1 | assist in orderly shutdown of lab activities/ensure protection of federal equipment and research property |
| ORD | NRMRL | Williams, Daniel J. | 12138 | Technician, WSD (AWBERC) | 1 | Maintenance of ongoing studies that require monitoring which if lost would jeopardize years worth of data and study findings. Action required to protect federal research property. |
| ORD | NHEERL | Bollman, Mike | 8015 | Biologist (Greenhouse) | 1 | Feeding, watering, and protection of greenhouse plant subjects. Without daily care, plants will die. Level of effort is approximately 2 hours per day. |

| | | | | | | |
|---|---|---|---|---|---|---|
| ORD | NHEERL | Johnson, Mark | 30730 | Ecologist (Refrigerator and Fre | 1 | EP-D-16-021 Task 0005 on CSS contract. Long-term experiment requires daily (sometimes multiple times a day) monitoring. Disruption could lead to loss of 3-4 years of research. Check experiments and equipment and freezer failure in controlled access laboratory to prevent contamination (1 hour every other day to ensure no loss of samples due to equipment failure; requires knowledge of system). |
| ORD | NHEERL | Knight, Primo E. | 21654 | Facility Operations Specialist | 1 | ensure essential building functions for protection and maintenance of building. No security during day at WED. (2 hour per day to check three buildings at two locations) |
| ORD | NHEERL | Rugh, Bill | 8868 | Biologist (Refrigerator and Fre | 1 | Enriched stable isotope facility requiring restricted access to prevent contamination. Scientific freezer failure emergency contact. Ensure RadNet radioactivity monitor operates and samples sent for analysis. (1 hour every other day) |
| ORD | NHEERL | Haselman, Jonathan Thomas | 2332585 | Biologist | 1 | Minimum maintenance of frogs being used in various laboratories (feed, dose, maintain, etc.); will require up to 4 hours per day, 7 days per week to protect the life of the organisms. |
| ORD | NHEERL | Hockett, James R. | 8244 | Biologist | 1 | Minimum maintenance of fish and invertebrates being used in various laboratories (feed, dose, maintain, etc.); will require up to 4 hours per day, 7 days per week to protect the life of the organisms. Expectthis is needed through December 18. |
| ORD | NHEERL | Kahl, Mike | 9126 | Biologist | 1 | Minimum maintenance of fish and invertebrates being used in various laboratories (feed, dose, maintain, etc.); will require up to 4 hours per day, 7 days per week to protect the life of the organisms. |
| ORD | NHEERL | Lahren, Tylor | 8964 | Chemist | 1 | Minimum maintenance of fish and invertebrates being used in various laboratories (feed, dose, maintain, etc.); will require up to 4 hours per day, 7 days per week to protect the life of the organisms. |
| ORD | NHEERL | Miller, Samuel E. | 19280 | Aquatic Biologist | 1 | Protection of property. Ensure essential systems on the vessel Lake Explorer II are functioning properly for the safety and protection of the vessel. Will require 2.5 hours every other day to check the condition of mooring lines, make sure shore power is being fed properly to the vessel, check for and guard against freeze up and flooding, transfer fuel to day tank once per week (necessary to run boiler for heat); respond as necessary to any remote alarms coming from sensors and monitors on the vessel. |
| ORD | NHEERL | Warhol, Stephanie | 9033 | Program Ananlyst (Alt. with M | 1 | Ensure essential building functions for protection and maintenance of building; will work half days or every other day (to be determined) to ensure the safety and protection of the buildings, property, and equipment against loss or damage from preventable cause including utility/mechanical system failure, freeze-up, fire, theft, trespass, and vandalism. |
| ORD | NHEERL | Whiteman, Frank | 9008 | Biologist | 1 | Minimum maintenance of fish and invertebrates being used in various laboratories (feed, dose, maintain, etc.); will require up to 4 hours per day, 7 days per week to protect the life of the organisms. |
| ORD | OSIM | Blancato, Jerry N. | 8934 | Director/SIO | 1 | respond to Agency emergency functions that might arise during shutdown; work with Agency CIO to assure all ORD owned and managed systems are secure and functioning as needed; oversee orderly shutdown of office activities/ensure protection of federal equipment and research property |
| ORD | NCCT | Deisenroth, Chad | 23851 | Principal Investigator | 1 | Laboratory experiment running for the past 3 weeks and will wrap up on the 25th. It would be a big loss of time and resources to not complete it. |
| ORD | NHEERL | Dye, Janice | 24795 | Biologist | 1 | Protection of Federal Property |

| | | | | | | |
|---|---|---|---|---|---|---|
| ORD | NHEERL | Freudenrich, Theresa | 14228 | Biologist | 1 | Maintain the viability of cells necessary for ongoing cell/culture research (feed, dose, maintain, etc.). |
| ORD | NHEERL | Gilbert, Mary | 30518 | Research Biologist | 1 | To breed and monitor impregnating of animals already on study. Will require animal care to take smears each morning for the duration of the shutdown and me to read and then breed animals based on estrous phase, and return next day to monitor if mating was successful. 3 hours each day... |
| ORD | NHEERL | Gleta Carswell | 5360 | Biologist | 1 | Protect unique samples in the freezer and cell storage containers on the main campus in RTP.These samples can not be replaced. It is anticipated that her time will be 2-4 hours in the event of a freezer failure, and 1 hour every two weeks for maintaining liquid nitrogen levels for cell preservation. |
| ORD | NHEERL | Graff, Jaimie | 2333769 | Lead Program Analyst (Anima | 1 | For protection of federal property |
| ORD | NCCT | Harrill, Joshua | 2051 | Principal Investigator | 1 | Laboratory cultures growing for an experiment that cannot be left unattended or the whole experiment will be voided |
| ORD | NHEERL | Hedge, Joan | 2058 | Biologist | 1 | Maintenance of the zebrafish colony. Estimated time is 2 hours per day, 7 days per week, for animal husbandry work. This requires feeding fish in the B bldg. lab, and checking fish health in the A bldg facility (includes adjusting water flow and pH and anything else that may need attention to maintain health of fish). |
| ORD | NHEERL | Herbin-Davis, Karen | 9052 | Biologist | 1 | For protection of federal property |
| ORD | NHEERL | Hill, Donna | 29900 | Biologist | 1 | Manage lab in DTB that does in vivo toxicology studies with algal toxins. Study requires weekly animal weighing and making dosing solutions |
| ORD | NHEERL | Johnstone, Andrew | 2333268 | Biologist | 1 | Daily maintenance of existing cell lines. |
| ORD | NHEERL | Krantz, Quentin T. | | Biologist | 1 | Inhalation facilities engineering in RTP to maintain, monitor and protect inhalation laboratory equipment and animals. |
| ORD | NHEERL | Lambright, Christy | | Biologist | 1 | Manage Cell storage containers and dose animals for various studies. It is anticipated she will be here 4-6 hours a day as needed for dosing animals. |
| ORD | NHEERL | Lehmann, David | | Biologist | 1 | The bumble bee colonies require maintenance every other day (i.e. feeding and cage cleaning). Since serious allergic reactions can occur following bee stings, David is the only person authorized by Agency management to maintain these colonies. |
| ORD | NERL | Lewandowski,Michael | | Research Physical Scientist, Ex | 1 | Shutdown of senistive lab equipment to protect federal property (AQB) |
| ORD | NHEERL | McDaniel, Katherine | | Biologist | 1 | scientific freezer failure emergency contact - protection of property; Up to 6 hours per day to care/feed/dose/maintain/terminate major animal study and up to 8 hours/day for up to 6 termination days for sacrifice of animals and harvesting and preserving samples |
| ORD | NHEERL | McDonald, Tony A. | | Research Physical Scientist | 1 | Protect unique samples in the freezer and cell storage containers on the main campus in RTP and respond to scientific freezer failures. It is estimated that 2-3 hours will be necessary to remove samples to alternate freezers in the event of a failure. Daily monitoring of freezers is needed as multiple alarm failures occur. Receive and process frozen samples from contractor. Anticipated processing time 3-4 hr per shipment Maintain liquid nitrogen levels for cell preservation. Up to 6-8 hr/day for up to 7 days to process and ship samples from experiments using unique, very costly and and irreplaceable water concentrates |
| ORD | NHEERL | Miller, Collette | | Biologist | 1 | monitoring of pregnant animals |

| | | | | | | |
|---|---|---|---|---|---|---|
| ORD | NHEERL | Moore, Tanya M. | | Biologist | 1 | Protection of property. Protect unique samples in the freezer and cell storage containers on the main campus in RTP.These samples can not be replaced. It is anticipated that her time will be 2-4 hours in the event of a freezer failure, and 1 hour every two weeks for maintaining liquid nitrogen levels for cell preservation. |
| ORD | NHEERL | Nichols, Harriette | | | 1 | Maintain the viability of cells necessary for ongoing cell/culture research (feed, dose, maintain, etc.). |
| ORD | IOAA | Orme-Zavaleta, Jennifer | | Principal Deputy Assistant Ad | 1 | oversee ORD shutdown operations; provide guidance to those engaged in shutdown |
| ORD | NHEERL | Padilla, Stephanie J. | | Research Toxicologist | 1 | Maintenance of the zebrafish colony. Estimated time is 2 hours per day, 7 days per week, for animal husbandry work. This requires feeding fish in the B bldg. lab, and checking fish health in the A bldg facility (includes adjusting water flow and pH and anything else that may need attention to maintain health of fish). |
| ORD | NHEERL | Richardson, Vicki | | Biologist | 1 | Maintain the viability of cells necessary for ongoing cell/culture research (feed, dose, maintain, etc.). |
| ORD | IOAA | Robbins, Christopher | | Deputy Assistant Administrat | 1 | oversee ORD shutdown operations; provide guidance to those engaged in shutdown |
| ORD | IOAA | Rodan, Bruce | | Associate Director for Science | 1 | oversee ORD shutdown operations; provide guidance to those engaged in shutdown |
| ORD | NCCT | Sams, Reeder | | Deputy Center Director | 1 | oversee orderly shutdown of center activities/ensure protection of federal equipment and research property |
| ORD | NHEERL | Sey, Yusupha M. | | Biologist | 1 | Protect unique samples in the freezer and cell storage containers on the main campus in RTP and respond to scientific freezer failures. It is estimated that 2-3 hours will be necessary to remove samples to alternate freezers in the event of a failure. Daily monitoring of freezers is needed as multiple alarm failures occur. Receive and process frozen samples from contractor. Anticipated processing time 3-4 hr per shipment Maintain liquid nitrogen levels for cell preservation. Up to 6-8 hr/day for up to 7 days to process and ship samples from experiments using unique, very costly and and irreplaceable water concentrates |
| ORD | NHEERL | Simmons, Jane E. | | Supervisory Biologist | 1 | Assist in shutdown operations; ensures compliance with applicable regs. On call when management decisions/actions are required. Freezer checking, cell preservation and completion of on-going essential experiments (2/3 hrs per days sporadically) |
| ORD | NCCT | Simmons, Steve | | Principal Investigator | 1 | Laboratory experiment running and it would be a big loss of time and resources to not complete it. |
| ORD | NHEERL | Suarez, Juan | | Biologist | 1 | On call for clinical care of research rabbits. |
| ORD | NHEERL | Tal, Tamara | | Biologist | 1 | Requires daily care of the fish and multiple time points of analysis and assessment. |
| ORD | NHEERL | Thomas, David J. | | Research Toxicologist | 1 | Estimated time is 5 hrs each day to care/feed/dose/maintain the study and to sacrifice animals and harvest tissue for up to 10 days. |
| ORD | NHEERL | Wallace, Kathleen | | Biologist | 1 | Protect unique samples in the freezer and cell storage containers on the main campus in RTP.These samples can not be replaced. It is anticipated that her time will be 2-4 hours in the event of a freezer failure, and 1 hour every two weeks for maintaining liquid nitrogen levels for cell preservation. |
| ORD | NERL | Watkins, Tim | | Acting Director, National Expc | 1 | On Call to respond to emergency activities or conditions at all NERL locations that could arise during a shutdown |

| | | | | | | |
|---|---|---|---|---|---|---|
| ORD | NHEERL | Wolf, Cynthia J. | | Biologist | 1 | Maintain cryopreservation and culture of various types of human stem cells and spheroids; ensure equipment are operating properly and continuously. Approximately 2 hours per day needed for basic maintenance." |
| ORD | OSIM | Hammel, Craig P. | | LAN Administrator | 1 | oversee any emergency directions through extramural vehicle (IAA with NIH) to contractors who maintain all ORD infrastructure; ensure orderly shutdown of IT equipment required to protect federal research property |
| ORD | NHEERL | Beddick, David | | Acting, Health and Safety Spe | 1 | on call for any safety or environmental compliance issues. |
| ORD | NHEERL | Dantin, Darrin | | Facilities Manager | 1 | ensure essential building functions for protection and maintenance of building |
| ORD | NHEERL | Hankins (McGill), Cheryl J | | Biologist | 1 | maintenance of ORD unique facility associated with coral culture and maintenance - estimate of 2 to 3 hours per day. Protection of federal property. |
| ORD | NHEERL | Harris, Peggy S. | | Biologist | 1 | maintenance of sea water deliver system as well as culture of aquatic organisms and care of aquaria - estimate of 2 to 3 hours per day. Protection of federal property. |
| ORD | NHEERL | Moso, Elizabeth | | Biologist | 1 | Ensure proper care of the aquatic animals and ongoing experiments. estimate 1-2 hours/day. Also serves as alternate to Peggy Harris to maintain culture of aquatic organisms. |
| ORD | NHEERL | Ahlgren, Russell R. | | Facility Operations Specialist a | 1 | on call to ensure essential building functions for protection and maintenance of building property and animal survival; on call as Security Manager to ensure protection of property. |
| ORD | NHEERL | Champlin, Denise M. | | Biologist (Alt. with Johnathan | 1 | Protection of federal property |
| ORD | NHEERL | Serbst, Jonathan R. | | Biologist (Alt. with Denise Ch | 1 | (alt to Denise Champlin) part time (up to 3 hrs/day) to ensure animal survival |
| ORD | NHEERL | DeWitt, Theodore | | Supervisory Research Life Scie | 1 | assist in shutdown operations; needs to conduct building check 1 hour per day ensures compliance with applicable regs |
| ORD | NCEA | Bahadori, Tina | | Center Director, NCEA (locate | 1 | assist in orderly shutdown of center activities; any other duties as needed |
| ORD | IOAA | Dunlap, David | | Deputy Assistant Administrato | 1 | oversee ORD shutdown operations; provide guidance to those engaged in shutdown |
| ORD | OPARM | Silzer, Stefan | | Office Director | 1 | oversee orderly shutdown of office activities. If necessary provide approvals to Marcia McCain for needed reprogrammings. |
| ORD | OSA | Sinks, Thomas | | Director | 1 | oversee orderly shutdown of office activities |
| OLEM | OAA | Breen, Barry | 7577 | Acting AA | 1 | Assist with OLEM's excepted activities |
| OLEM | OA | Wright, Peter | 2335745 | Special Counsel | 1 | Assist with OLEM's excepted activities |
| OLEM | OAA | Steven Cook | 2335523 | DAA | 1 | Assist with OLEM's excepted activities |
