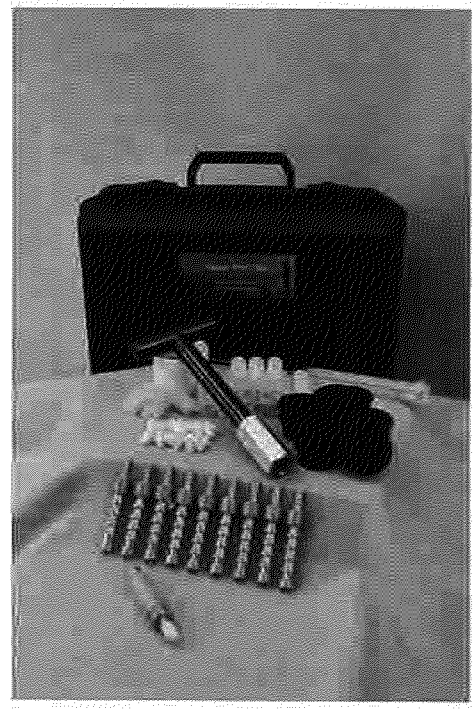
Finally! a sub-slab vapor sampling device that:

- Installs in minutes,
- Eliminates the need for grout or other adhesives, and
- Is easily retrieved for reuse.

The Vapor Pin™ eliminates the frustration associated with traditional sub-slab vapor sampling methods.

- Patented design reduces the potential for leaks;
- Available in brass or stainless steel;
- Built-in disposable seal eliminates the need for grout;
- Connects easily to sampling equipment;
- Easily installed, sampled, and retrieved for reuse;
- Reduces damage to the slab.

The ease and speed of installation, sample collection, extraction, and reuse makes the Vapor Pin™ a practical, low-cost sub-slab sampling tool for source area delineations and vapor intrusion evaluations.



Made in the USA.
