Hi Bob:

I've spent a little time thinking about well locations, but I'd like to finish some rough cross-sections before I firm up anything. I'll share those with you when I'm done if you'd like, and we can talk afterwards.

As for your last point, let me know if the materials provided by REI yesterday afternoon are adequate, or if you were expecting something else/more.

We are committed to service excellence.

Visit our survey at http://dnr.wi.gov/customersurvey to evaluate how I did.

Subject: Tower Standard

Hi Chris,

Have you started to think about well numbers and locations for the Tower site? Once you do, can we talk about them? Kristen has some specific locations and depths in mind to help with the lake bed investigation this summer.

Also, I am very close to recommending approval of a task order for VI sampling and soil borings. The work would occur later this month. I understand from Kristen that the motel is closed until May, so it's the perfect time to do the indoor air sampling. In the task order, I ask our contractor to recommend locations for the soil borings based on any need to further define the highly contaminated soil and smear zones in anticipation of the tribe doing removal activity in the summer.

I will share the draft plan when it's delivered.

Lastly, can you remind Dave Larsen that we are still waiting for the well log forms and the location information? I need to transmit those to my contractor.

Thank you.

Regards,

Bob
