UNITED STATES DISTRICT COURT
DISTRICT OF NEW JERSEY

LOWER PASSAIC RIVER STUDY AREA COOPERATING PARTIES GROUP, *Plaintiff,* v. U.S. ENVIRONMENTAL PROTECTION AGENCY, *Defendant.*	HON. JOSE L. LINARES *Civil Action No.* 15-CV-7828 (JLL)(JAD) **NOTICE OF MOTION**

To: Justin D. Smith, Esq.
Shook Hardy & Bacon LLP
2555 Grand Boulevard
Kansas City, MO 64108

PLEASE TAKE NOTICE, that on July 18, 2016, at 10:00 AM, or as soon thereafter as counsel may be heard, PAUL J. FISHMAN, United States Attorney for the District of New Jersey (KRISTIN L. VASSALLO, Assistant United States Attorney, appearing), as attorney for defendant, the U.S. Environmental Protection Agency ("EPA"), will apply to this court, pursuant to Fed. R. Civ. P. 56, for an order granting summary judgment to the EPA and dismissing the complaint.

In support of this motion, the EPA respectfully refers the Court to the memorandum of law in support of the motion for summary judgment and supporting declaration (with attached

exhibits), and requests that this motion be decided on the papers submitted, without oral argument, pursuant to Rule 78 of the Federal Rules of Civil Procedure.

Dated: Newark, New Jersey
May 13, 2016

PAUL J. FISHMAN
United States Attorney

By: __/s/ Kristin Vassallo_____
KRISTIN L. VASSALLO
Assistant United States Attorney

CERTIFICATE OF SERVICE

I, Kristin L. Vassallo, Assistant United States Attorney for the District of New Jersey, hereby certify that on May 13, 2016, the foregoing Notice of Motion, Local Rule 56.1 Statement, Proposed Order, Memorandum of Law, and Declaration of Walter Mugdan (with exhibits) were emailed to opposing counsel at JXSMITH@shb.com. In addition, a hard copy will be sent by first-class mail to:

Justin D. Smith, Esq.
Shook Hardy & Bacon LLP

UNITED STATES DISTRICT COURT
DISTRICT OF NEW JERSEY

LOWER PASSAIC RIVER STUDY AREA COOPERATING PARTIES GROUP, *Plaintiff,* v. U.S. ENVIRONMENTAL PROTECTION AGENCY, *Defendant.*	HON. JOSE L. LINARES *Civil Action No.* 15-CV-7828 (JLL)(JAD) [PROPOSED] ORDER

This matter having been opened to the Court by Paul Fishman, United States Attorney for the District of New Jersey, attorney for defendant the U.S. Environmental Protection Agency, for an order granting summary judgment to defendant pursuant to Federal Rule of Civil Procedure 56, and the Court having considered the matter,

it is on this day of , 2016,

Ordered that defendant's motion is granted, and plaintiff's complaint is dismissed, with prejudice, in all respects.

_____
THE HONORABLE JOSE L. LINARES, U.S.D.J.
UNITED STATES DISTRICT COURT

UNITED STATES DISTRICT COURT
DISTRICT OF NEW JERSEY

LOWER PASSAIC RIVER STUDY AREA COOPERATING PARTIES GROUP,	)	
Plaintiff,	)	
v.	)	Case No. 15-CV-7828 (JLL)(JAD)
UNITED STATES ENVIRONMENTAL PROTECTION AGENCY,	)	
Defendant.	)	

DECLARATION OF WALTER MUGDAN

I, Walter Mugdan, under penalty of perjury, affirm and declare that the following statements are true and correct to the best of my knowledge and belief and are based on my own personal knowledge or on information contained in the records of the United States Environmental Protection Agency (EPA) or on information supplied to me by EPA employees under my supervision and employees in other EPA offices.

1. I am the Director of the Emergency and Remedial Response Division (ERRD), EPA, Region 2 (Region 2). I have held this position since October 2008. From 2002 to 2008, I was the Director of the Region 2 Division of Environmental Planning and Protection. From 1995 to 2002, I was the Region 2 Regional Counsel, and from 1985 to 1995, I was the Deputy Regional Counsel. Previous to that, I was a Branch Chief and a staff attorney within the Office of Regional Counsel and its predecessor, the Enforcement Division. During 1998, I served a detail as Director of the Region 2 Division of Enforcement and Compliance Assurance.

2. In the course of my duties I supervise ERRD staff. ERRD is the division within EPA

Region 2 that is responsible for the development, implementation and coordination of regional activities under the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) and the Superfund Amendments and Reauthorization Act. I also supervise ERRD's responses to requests submitted pursuant to the Freedom of Information Act (FOIA) seeking information related to ERRD's responsibilities.

3. The purpose of this declaration is to provide information describing EPA's search for responsive information, and EPA's decision to withhold certain documents and redact portions of other documents, in response to four FOIA requests submitted by Robert La Gravenis on behalf of the Lower Passaic River Cooperating Parties Group (CPG) on April 21, 2014, April 28, 2014, May 14, 2014 and June 17, 2014, respectively. The FOIA requests all relate to the Diamond Alkali Superfund Site, and specifically, to the remedy selection process for the lower 8.3 miles of the Lower Passaic River (for ease of reference, this declaration will refer to this stretch of the river as the "Lower 8.3 Miles").

I. The Lower Passaic River / Diamond Alkali Site

4. The Passaic River is 80 miles long. With headwaters in southern Morris County, it passes through rural, suburban and urban areas, draining a watershed of 935 square miles, to empty into Newark Bay. The Lower Passaic River is the 17-mile tidal stretch of the river, from Dundee Dam to Newark Bay. Three major tributaries (Saddle River, Third River and Second River) bring water into the Lower Passaic River's main stem, which is used for recreation and navigation, among other uses. For ease of reference, this declaration may refer to the Lower Passaic River as the "17 Miles".

5. Starting in the 1800s, the Passaic River was one of the major centers of the American industrial revolution. By the beginning of the 20th Century, a number of industrial operations,

such as manufactured gas plants, paper manufacturing facilities, petroleum refineries, shipping, tanneries, creosote wood preservers, metal recyclers and manufacturers of materials such as rubber, rope, textiles, paints and dyes, pharmaceuticals and chemicals, had located along the river's banks as cities like Newark grew. Industrial operations and municipalities used the river for wastewater disposal. This history of industrial development surrounding the Lower Passaic River resulted in the conditions that can be observed today, including contaminated sediments and surface water, and degraded habitat. *See* Lower Passaic River Restoration Project Fact Sheet at *http://passaic.sharepointspace.com/Public%20Documents/fact.pdf.*

6. In 2002, EPA formed a partnership with the U.S. Army Corps of Engineers-New York District (the Corps-NY), the New Jersey Department of Transportation (NJDOT), the New Jersey Department of Environmental Protection (NJDEP), the National Oceanic and Atmospheric Administration (NOAA) and U.S. Fish and Wildlife Service (USFWS) to conduct a joint study that would bring each agency's authorities to bear on the complex environmental problems of the Lower Passaic River. The goal of the Lower Passaic River Restoration Project is to remediate contaminated sediments, improve water quality, restore degraded shorelines, restore and create new habitats and enhance human use along the Lower Passaic River and in several tributaries from Dundee Dam near Garfield, to Newark Bay. One aspect of the Lower Passaic River Restoration Project is EPA's effort to address contaminated sediments under CERCLA.

7. The Lower Passaic River is being investigated and addressed as by EPA part of the Diamond Alkali Superfund Site. In the early 1980s, investigations by EPA and NJDEP found soil contaminated with dioxin at the former Diamond Alkali manufacturing facility located at 80 Lister Avenue, in Newark, NJ, next to the Passaic River. Cleanup work was initiated and, in 1984, EPA added the Diamond Alkali site to the National Priorities List, identifying the site as

one with the most significant risk to human health and the environment. EPA and NJDEP also identified contaminants, such as metals, persistent organic chemicals, pesticides and dioxin, in the sediments of a six mile stretch of the Lower Passaic River adjacent to the former manufacturing facility. In 1994, under EPA oversight, Occidental Chemical Corporation began a remedial investigation of this six mile stretch. The investigation found elevated concentrations of contaminants that originated from the former Diamond Alkali manufacturing facility, as well as other contaminants not clearly linked to the former facility's operations.

8. As documented in the Record of Decision for the Lower 8.3 Miles, the six mile study, and studies by the Corps-NY and other agencies, showed that contaminated sediments and other sources of hazardous chemicals were potentially present along the 17 Miles. Therefore, EPA decided to expand the study of the Passaic River to include the entire 17 Miles, from Dundee Dam to Newark Bay.

9. EPA started work on the remedial investigation/feasibility study (RI/FS) for the 17 Miles using federal funds. In 2004, EPA signed an administrative settlement agreement under Section 122(h) of CERCLA with a number of potentially responsible parties (PRPs), which provided funding for EPA to perform the 17 Miles RI/FS. The settlement agreement was amended in 2005 and 2007, adding more parties. In 2007, the settling parties entered into a new administrative settlement agreement and order on consent (the "2007 AOC") with EPA, taking over the performance of the 17 Miles RI/FS from EPA.

10. While the 17 Miles RI/FS was underway, in 2006, the EPA concluded that, since the Lower 8.3 Miles contain the bulk of the contaminated sediment, addressing this portion of the river first would better support the overall protection of human health and the environment than would awaiting the outcome of the 17 Miles RI/FS to make a decision for the entire Lower

Passaic River. Therefore, EPA undertook a targeted investigation, or Focused Feasibility Study (FFS) of the Lower 8.3 Miles. As described in Paragraphs 21 to 28 below, EPA has now selected a cleanup for the sediments of the Lower 8.3 Miles and will pursue those parties responsible for the contamination to perform or pay for both the cleanup, and to recover EPA's unreimbursed past costs incurred in studying and selecting a remedy for the Lower 8.3 Miles.

II. Superfund Background and Process

11. CERCLA, commonly known as the Superfund law, was enacted by Congress on December 11, 1980. Among other things, this law provides broad Federal authority to clean up uncontrolled or abandoned hazardous waste sites as well as accidents, spills, and other emergency releases of pollutants and contaminants into the environment. Under CERCLA, EPA is authorized to seek out those parties responsible for current or past releases and assure their cooperation in the cleanup. EPA may enter into settlement agreements and consent decrees with PRPs requiring them to perform work under CERCLA without compromising the agency's right to recover for any work or costs not specifically addressed by the agreements, including future work needed to effectuate cleanup of the contaminated site.

12. CERCLA investigations and cleanups follow, to the extent practicable, the National Oil and Hazardous Substances Pollution Contingency Plan (more commonly known as the National Contingency Plan or "NCP"), promulgated pursuant to Section 105 of CERCLA, 42 U.S.C. § 9605, codified at 40 C.F.R. Part 300, et seq., including all amendments thereto. The NCP provides the guidelines and procedures to respond to releases and threatened releases of hazardous substances, pollutants, or contaminants.

13. In addition to EPA's authority to undertake response actions, under CERCLA Section 104, PRPs, which are people or entities potentially responsible for a release of hazardous

substances into the environment, may conduct certain response actions in accordance with CERCLA Section 122, if EPA determines that the action will be done properly and promptly.

14. CERCLA authorizes two kinds of response actions: 1) actions taken to address releases or threatened releases requiring prompt response (short-term removals), and 2) actions that permanently and significantly reduce the risks associated with releases or threatened releases of hazardous substances that are serious, but not so urgent as to require an immediate response (long-term remedial response actions). Long-term remedial response actions can be conducted only at sites listed on EPA's National Priorities List (NPL), which identifies the sites with the most significant risk to human health and the environment. The Diamond Alkali Site, which includes the Lower Passaic River and Newark Bay, is one such site and as noted above, is listed on the NPL.

15. At the time a site is listed on the NPL, EPA (or the state, acting as lead agency) begins an RI/FS. An RI/FS can be performed for the site as a whole, or for a particular portion of the site called an operable unit. The investigation and cleanup of a site can be divided into a number of operable units, depending on the complexity of the problems associated with the site.

16. During an RI/FS, the lead agency (federal or state) either gathers or oversees the gathering of information by another entity such as a PRP, to support an informed decision regarding which remedy (if any) is most appropriate for a given site or an operable unit within a site. In general, the objectives of the remedial investigation (RI) portion of the RI/FS are to determine the nature and extent of the contamination at the site or operable unit and assess risks to human health and the environment from this contamination. The RI may also include tests to evaluate the potential performance and cost of the treatment technologies being considered for addressing the risks.

17. In characterizing the site or operable unit, the lead agency or PRP identifies the source of contamination, potential routes of migration, and current and potential human and environmental receptors. A baseline risk assessment conducted during the RI estimates what risks the site or operable unit poses now and would pose in the future if no cleanup action were taken. Thus, the RI provides the scientific and legal basis for taking action under CERCLA and identifies contaminants and the exposure pathways that need to be addressed by the remedial action.

18. The feasibility study (FS) portion of the RI/FS involves the identification and detailed evaluation of potential remedial alternatives. The alternatives are evaluated against the NCP evaluation criteria, and compared with each other to gauge their relative performance. Each alternative that makes it to this stage of the analysis, with the exception of the required "No Action" alternative, should be protective of human health and the environment and compliant with Applicable or Relevant and Appropriate Requirements (unless a waiver is justified), both threshold requirements under CERCLA. EPA guidance also provides for a focused FS (or FFS) for an interim action that is more limited in scope than a site-wide remedy and only addresses areas/media that also will be addressed by a final site/operable unit Record of Decision.

19. When the FS stage is complete, the lead agency identifies the Preferred Alternative for a site or operable unit and presents it to the public in a Proposed Plan. The Proposed Plan briefly summarizes the alternatives studied in the detailed analysis phase of the RI/FS, highlighting the key factors that led to identifying the Preferred Alternative. The Proposed Plan, as well as the RI/FS and the other information that forms the basis for the lead agency's response selection, is made available for public comment in the Administrative Record file. The opportunity for a public meeting must also be provided at this stage.

20. Following receipt of public comments and any final comments from the support agency, the lead agency selects and documents the remedy selection decision in a Record of Decision. The Record of Decision documents the remedial action plan for a site or operable unit and serves the following three basic functions: 1) it certifies that the remedy selection process was carried out in accordance with CERCLA and, to the extent practicable, with the NCP; 2) it describes the technical parameters of the remedy, specifying the methods selected to protect human health and the environment including treatment, engineering, and institutional control components, as well as cleanup levels; and 3) it provides the public with a consolidated summary of information about the site and the chosen remedy, including the rationale behind the selection.

21. As described above, while the RI/FS for 17 Miles was underway, beginning in 2006 EPA undertook a targeted investigation, or FFS, of the Lower 8.3 Miles. The RI and FFS Reports for the Lower 8.3 Miles, and EPA's Proposed Plan for remediation of this portion of the Diamond Alkali Superfund Site were released to the public for comment on April 11, 2014 via the web site www.ourPassaic.org, a website hosted by EPA for the Lower Passaic River. These documents were also made available to the public in the Administrative Record file maintained at the Newark Public Library, 5 Washington Street, Newark, New Jersey, the Elizabeth Public Library, 11 South Broad Street, Elizabeth, New Jersey, and in the EPA Region 2 Records Center at 290 Broadway, New York City. A notice of availability of the Administrative Record was published in the Star Ledger and Luso Americano on April 25, 2014. EPA also developed fact sheets summarizing the Proposed Plan in Spanish and Portuguese to support its outreach to those communities. In addition, select documents from the Administrative Record were made accessible online at:

http://www.ourPassaic.org

http://www.epa.gov/region02/superfund/npl/diamondalkali

22. The public comment period for the Lower 8.3 Miles Proposed Plan and supporting documents was originally scheduled by EPA to extend from April 21, 2014 through June 20, 2014. EPA received requests to extend the public comment period, including from the CPG, to allow additional time for consideration of and comment on the Proposed Plan. In response to these requests, EPA extended the public comment period to July 21, 2014, then to August 20, 2014, at which time the comment period closed.

23. By the close of the comment period, EPA had received hundreds of comments, including comments from individuals, organizations, and elected officials. The CPG submitted 91 pages of detailed comments, accompanied by: eight appendices and 15 attachments comprising technical, legal and policy reports and analyses prepared for the CPG; 298 technical references; 87 items of correspondence; 45 documents referenced in Attachment A; 33 quality assurance plans; and 41 reports. In addition, William Hyatt of K&L Gates, LLP, on behalf of the CPG, submitted letters to EPA on May 27, 2014, June 30, 2014 and August 7, 2014 commenting on various aspects of the RI/FFS and EPA's Proposed Plan, which were included as comments to the Proposed Plan. Finally, individual members of the CPG submitted their own comment letters. In all, the CPG's comments comprised thousands of pages of material.

24. Also during the public comment period, EPA held three public meetings to present the findings of the RI, the FFS and EPA's Proposed Plan. At these meetings, all of which were attended by representatives and members of the CPG, EPA personnel answered questions concerning the remedial alternatives developed as part of the FFS. Although not part of the formal public comment process, EPA also participated in a number of public forums, and

attended several community meetings, to present information and answer questions about the RI/FFS and Proposed Plan. Representatives of the CPG also attended several of these meetings.

25. Throughout the public comment period, EPA sent numerous news advisories by e-mail, listserv and regional social media accounts announcing the release of the Proposed Plan, reminding the public about EPA's public meetings and the public forums organized by other entities, announcing the extension of the comment period, and reminding the public about the end of the comment period. Representatives and members of the CPG are included in the Region's listserv and e-mail groups.

26. Subsequent to the close of the comment period, as required by the NCP, EPA prepared a detailed response to comments, including those submitted by the CPG. The CPG submitted four late comment letters after the close of the comment period, dated April 17, July 14, September 29 and December 29, 2015. Consistent with the NCP and EPA guidance, Region 2 reviewed the late comments to evaluate whether they substantially supported the need to significantly alter EPA's selected remedy, and found they did not. Therefore, the letters were included in the administrative record file as "Late Comments," but were not addressed in the detailed response to comments.

27. On March 3, 2016, EPA signed the Record of Decision selecting the remedy for the sediments of the Lower 8.3 Miles. Responses to comments received by EPA at public meetings and in writing during the public comment period are included in the Responsiveness Summary, which is an Appendix to the Record of Decision. The Administrative Record for the Record of Decision, which contains approximately 580 documents (in addition to the documents submitted as public comments), is publically available online at: https://semspub.epa.gov/src/collection/02/AR63167.

28. On March 31, 2016, after the issuance of the Record of Decision for the Lower 8.3 Miles of the Lower Passaic River part of the Diamond Alkali Superfund Site, EPA issued a notice letter to PRPs for the Lower Passaic River, advising of the actions that EPA will take to implement the remedy for the Lower 8.3 Miles. As described in the notice letter, the first action is to request the voluntary performance of the remedial design by one particular PRP (though other PRPs may contribute to the funding). After execution of an agreement to perform the remedial design, EPA plans to begin negotiating a remedial action consent decree, under which a number of PRPs will implement and/or pay for the remedy for the Lower 8.3 Miles, and reimburse EPA's costs incurred for the Lower Passaic River. If EPA is unable to reach agreement on either (or both) the remedial design, or the remedial action, EPA will evaluate its enforcement options, including issuance of one or more unilateral orders and/or litigation in federal court. Members of the CPG, which consists of parties that EPA has identified as potentially responsible for releases of hazardous substances to the Lower Passaic River, will be among the PRPs that EPA will approach to implement and/or pay for the remedy for the Lower 8.3 Miles.

29. The CPG continues to perform the 17 Miles RI/FS. When that work has been completed according to EPA's requirements, with the participation of NJDEP as support agency, EPA will prepare and issue a Proposed Plan for the full 17 Miles. After a public comment period, EPA will select a remedy for that portion of the Diamond Alkali Superfund Site, as well.

III. Relevant Parties and Actions Taken for Lower Passaic River

30. ***The Lower Passaic River Study Area Cooperating Parties Group (CPG).*** The CPG is a group of PRPs identified for the Diamond Alkali Superfund Site (numbering over 70 in 2007, but currently at approximately 55). In 2004, EPA entered into an administrative settlement

agreement pursuant to Section 122(h) of CERCLA with the companies that at the time, to EPA's knowledge, comprised the CPG. Pursuant to this agreement, the CPG was required to provide funds for EPA to perform an RI/FS for the 17 Miles. The agreement was amended twice to add more parties to the CPG. EPA also understands that a number of former CPG members are no longer participating in the CPG.

31. ***Partner Agencies***. The Partner Agencies are a group of federal and state agencies studying the Lower Passaic River contemporaneously with EPA. The agencies include U.S. Army Corps of Engineers, New York District; New Jersey Department of Environmental Protection (NJDEP); National Oceanographic and Atmospheric Administration (NOAA); and U.S. Fish and Wildlife Service (USFWS). The New Jersey Department of Transportation (NJDOT) participated in the Partner Agencies until November 2007, when its responsibilities were transferred to NJDEP.

32. Region 2 has a close relationship with NJDEP for the investigation and cleanup of the Diamond Alkali Superfund Site, including the Lower Passaic River, because under CERCLA, a state agency such as NJDEP is designated as EPA's support agency. Section 121(f) of CERCLA provides for state involvement in the CERCLA process. The EPA must provide the state with an opportunity to comment on an RI/FS and all technical data leading to its issuance and the preferred remedial alternative identified through the RI/FS, among other issues. The NCP, implementing regulations for CERCLA, further provides for the role of the state. Under 40 CFR 300.515(f), the state has the opportunity to comment on the proposed plan for a site (or operable unit), and the EPA seeks the state's concurrence on EPA's final cleanup decision memorialized in the Record of Decision.

33. In 2005, Region 2 signed a Joint Prosecution and Confidentiality Agreement (JPCA) with the Partner Agencies covering the work to be done at the Lower Passaic Site. This JPCA provided that the parties' common interests with respect to the Passaic River Matter (defined as the contamination of the Passaic River and environs in New Jersey) include the determination, implementation and supervision of appropriate and effective environmental and natural resource damages response actions, and the preparation for and prosecution of anticipated enforcement litigation against third parties with respect to the Passaic River Matter. The JPCA further provides that for the parties to pursue and achieve their common interests concerning environmental and natural resource damages response actions and anticipated enforcement litigation with respect to the Passaic River Matter, it has been and remains imperative, and in some instances is mandated by federal law, that the State of New Jersey and federal parties exchange communications, information and documents as part of their deliberative and decision-making processes. Subsequently, and throughout development of the 17 Miles RI/FS and the Lower 8.3 Mile RI/FFS, EPA has shared technical documents in draft form with the partner agencies (primarily NJDEP, but also the Corps-NY, NOAA, USFWS and NJDOT).

34. ***U.S. Army Corps of Engineers, Kansas City District (the Corps-KC) and Contractors.*** When EPA begin the 17 Miles RI/FS, in or about 2002, EPA contracted with the Corps-KC to function as EPA's lead contractor for the 17 Miles RI/FS under Interagency Agreement #DW9694197501. In 2006, when EPA began preparing the FFS to evaluate remedial alternatives for the Lower 8.3 Miles, the Corps-KC continued to function as EPA's lead contractor for the RI/FFS under this contract. Under this contract, the Corps-KC was authorized to manage the work necessary to perform the sampling, analysis, and other technical work to develop the RI/FFS, and to support EPA's preparation of the Proposed Plan and Record of Decision. Region

2 provided funds for this Interagency Agreement, and the Corps-KC subcontracted on EPA's behalf with various contractors to perform much of the sampling, analysis, and technical work, which was provided to the Corps-KC and Region 2 for further review and approval, and incorporation into the eventual RI/FFS, Proposed Plan and Record of Decision. Region 2 provided technical, legal and policy direction to the Corps-KC and, through the Corps-KC, its contractors. Region 2 set the schedule for the technical work. Region 2 reviewed, commented on, edited and approved all contractor work products.

35. The Corps-KC hired contractors Malcolm Pirnie (later Louis Berger Group), HydroQual (later HDR/HydroQual) and Battelle to perform the technical work.

36. At Region 2's and the Corps-KC's direction, Malcolm Pirnie/Louis Berger hired technical advisors as subcontractors to review draft analyses and interim products that were subsequently combined to form elements of the Lower 8.3 Miles RI/FFS. The technical advisors ensured that the highly technical analyses were performed correctly.

37. Between 2007 and 2014, the CPG performed the sampling, modeling and analysis to complete the 17 Miles RI/FS that EPA had started, and that the CPG took over in 2007 pursuant to the 2007 AOC, as described above in Paragraph 9. To date, the CPG has submitted to EPA draft human health and ecological risk assessments, and draft RI and FS reports.

38. From 2007 to 2009, the same team of contractors working with EPA Region 2/the Corps-KC to perform the FFS for the Lower 8.3 Miles also assisted EPA Region 2 in overseeing the CPG's work on the 17 Miles RI/FS, under a new Interagency Agreement, #DW9496212501.

39. In 2009, for the 17 Miles RI/FS oversight, the Corps-KC, working with EPA Region 2, replaced Malcolm Pirnie/Louis Berger with CDM Federal Programs (CDM-Smith).

40. Using funds provided by the CPG pursuant to the 2007 AOC, Region 2 funded the

Interagency Agreement for the 17 Miles RI/FS oversight, which the Corps-KC used to hire the contractors. Region 2 also provided technical, legal and policy direction to the Corps-KC and, through the Corps-KC, its contractors. Region 2 set the schedule for the technical work. Region 2 reviewed, commented on, edited and approved all contractor work products incorporated into Region 2's oversight of the CPG 17 Miles RI/FS.

41. ***EPA Contaminated Sediment Technical Advisory Group (CSTAG)***. The CSTAG is an EPA-internal advisory group that advises EPA regional project managers on how to appropriately manage sediment sites in accordance with EPA guidance. The CSTAG's goals include encouraging national consistency in the management of sediment sites by providing a forum for exchange of technical and policy information, and providing a mechanism for monitoring and evaluating the progress at a number of the largest or most complex contaminated sediment sites.

42. ***EPA National Remedy Review Board (NRRB)***. EPA created the NRRB in January 1996 as part of a comprehensive package of reforms designed to make the Superfund program faster, fairer and more efficient. The NRRB is an EPA-internal peer review group that understands both the EPA regional and headquarters perspectives in the remedy selection process. It reviews proposed Superfund cleanup decisions for sites for which the proposed remedial actions cost more than $25 million to make sure they are consistent with Superfund law, regulations and guidance. NRRB members are EPA managers and senior technical and policy experts with significant experience in Superfund remedy selection issues.

43. Due to the size and complexity of the Lower 8.3 Miles, Region 2 presented the proposed Superfund cleanup decisions for the Lower 8.3 Miles to both the CSTAG and the NRRB. The recommendations and comments of the CSTAG and the NRRB were incorporated into the

eventual selected remedy and Record of Decision.

44. In 2008, Region 2 presented Region 2's technical approach to studying the Lower 8.3 Miles to the CSTAG.

45. On April 1, 2008, the CSTAG provided advice to Region 2 on the technical approach in the form of a comment memo. Region 2 responded to the CSTAG's comment memo on May 6, 2008. Both the CSTAG April 1, 2008 comment memo and Region 2's May 6, 2008 response are available to the public via the CSTAG web site. Based on the CSTAG's advice, Region 2 made changes to the work that the Corps-KC and its contractors were performing for Region 2, as part of EPA's development of the Lower 8.3 Miles RI/FFS.

46. Throughout the development of the Lower 8.3 Miles RI/FFS, Region 2 updated the CSTAG on how the technical work was progressing. By phone and e-mail, members of the CSTAG served in an ongoing advisory role that led to ongoing changes and adjustments to the work that the Corps-KC and its contractors were performing for Region 2.

47. Before Region 2 completed the Proposed Plan for the Lower 8.3 Miles and released it for public review, Region 2 submitted a technical memo to the NRRB for internal review. In December 2012, Region 2 made a presentation to the NRRB describing the alternative that Region 2 expected to identify as the preferred alternative, and the basis for the Region's approach. CSTAG members also attended the meeting.

48. The NRRB reviewed Region 2's description and basis for the likely preferred alternative. The NRRB, together with CSTAG, prepared a memorandum to document its evaluation and advisory recommendations, which Region 2 then referred to during its preparation of the documentation of the basis for choosing the preferred alternative. Drafts of the NRRB/CSTAG memorandum were shared with Region 2 for review. The drafts were generally provided

between January 2013 and May 2013. The NRRB/CSTAG memorandum in its final form was dated April 11, 2014, and was released to the public as part of the Administrative Record for the Lower 8.3 Miles Proposed Plan.

49. As part of the NRRB review process, Region 2 responded to NRRB/CSTAG memorandum in a written response. Region 2's response was shared in draft form with members of NRRB in January through March 2014. Both the NRRB/CSTAG April 11, 2014 memorandum and Region 2's April 11, 2014 response, in final form, were released to the public as part of the Administrative Record for the selection of the remedy for the Lower 8.3 Miles.

50. Based on the NRRB/CSTAG advice, provided in the various drafts of the memorandum, Region 2 made changes to the Lower 8.3 Miles Proposed Plan and directed the Corps-KC and its contractors to make changes to the Lower 8.3 Miles RI/FFS.

51. In addition to NRRB review, in late 2013 and early 2014, Region 2 provided drafts of the Lower 8.3 Miles Proposed Plan to EPA Office of Solid Waste and Emergency Response, Office of Superfund Remediation and Technology Innovation (OSWER-OSRTI)[1] for its review.

52. In late 2013 and early 2014, EPA OSWER-OSRTI provided comments intended to review Region 2's basis and explanation for selection of the preferred alternative; to evaluate conformance with EPA policies and guidance; and, where the Region had determined that an aspect of EPA guidance would not apply, to understand the basis for that determination.

53. Based on EPA OSWER-OSRTI comments and review, Region 2 made changes to the Lower 8.3 Miles Proposed Plan. These changes were incorporated into the final version of the

[1] The name of the Office of Solid Waste and Emergency Management ("OSWER") has now been changed to the Office of Land and Emergency Management ("OLEM").

Lower 8.3 Mile Proposed Plan, which was released to the public in April 2014. However, unlike the NRRB review, there was no final memorandum documenting EPA OSWER-OSRTI comments.

54. ***Proposed Plan Public Comment Period.*** As described above in Paragraph 21, EPA issued the Lower 8.3 Miles Proposed Plan as part of its public participation responsibilities under Section 117(a) of CERCLA and Section 300.430(f)(2) of the NCP. The nature and extent of the contamination in the Lower 8.3 Miles and the remedial alternatives summarized in the Lower 8.3 Miles Proposed Plan are described in detail in EPA's Lower 8.3 Miles RI/FFS, and numerous, detailed supporting appendices. A copy of the Lower 8.3 Miles Proposed Plan, Lower 8.3 Miles RI/FFS reports and other documents comprising the administrative record file were made available to the public in the information repositories located at the Newark and Elizabeth Public Libraries and the EPA Region 2 Superfund Records Center. Public notices about the release of the Proposed Plan were published in two local newspapers.

IV. CPG's FOIA Requests

55. Shortly after the issuance of the Proposed Plan, the CPG submitted four FOIA requests to Region 2, seeking substantial amounts of information (collectively, the "CPG FOIA Requests"). Specifically, on April 21, 2014, on behalf of the CPG, Robert La Gravenis of K&L Gates, LLP, submitted FOIA request EPA-R2-2014-005768 (the "CPG's First FOIA Request"). On April 28, 2014, on behalf of the CPG, Mr. La Gravenis submitted FOIA request EPA-R2-2014-006018 (the "CPG's Second FOIA Request"). On May 14, 2014, on behalf of the CPG, Mr. La Gravenis, submitted FOIA request EPA-R2-2014-006476 (the "CPG's Third FOIA Request"). Finally, on June 17, 2014, on behalf of the CPG, submitted FOIA request EPA-R2-2014-007546 (the

"CPG's Fourth FOIA Request"). True and correct copies of the requests are attached to this declaration as Exhibits A, B, C and D, respectively.

56. The CPG's first three FOIA Requests were interrelated, and therefore Region 2 responded to the requests in a consolidated and coordinated manner. The CPG's first three FOIA requests were also very broad and required Region 2 staff to collect and review over 66,000 documents as part of the coordinated response. Ultimately, Region 2 expended 298 hours on the CPG FOIA requests. Throughout the time that Region 2 staff worked on these requests, they remained in communication with the CPG to advise it of the schedule and progress, and ask questions as needed. When possible, Region 2 released information to the CPG on a rolling basis.

57. All four CPG FOIA Requests were assigned to Alice Yeh, Remedial Project Manager for the Lower 8.3 Miles. Alice Yeh met with Assistant Region Counsels Sarah Flanagan and Patricia Hick to plan and manage the search, collection and review of responsive information. Between April 30, 2014 and February 19, 2015, Alice Yeh, Sarah Flanagan and Patricia Hick met fourteen times to discuss the steps taken and progress made on the CPG FOIA requests.

58. Alice Yeh called Mr. La Gravenis on May 9, 2014 to seek the CPG's agreement to pay the estimated costs of responding to the CPG's First FOIA Request (EPA-R2-2014-005768) and the CPG's Second FOIA Request (EPA-R2-2014-006018), and on May 20, 2014 to seek the CPG's agreement to pay the estimated cost of responding to the CPG's Third FOIA Request (EPA-R2-2014-006476). On May 9 and 20, Alice Yeh also wrote e-mails to Mr. La Gravenis to confirm their telephone discussions. Mr. La Gravenis advised by email dated May 14, 2014 that the CPG would reserve its rights with respect to payment of the FOIA costs. Sarah Flanagan emailed Karyllan Mack of K&L Gates on May 16, 2014 to seek clarification regarding the

CPG's willingness to pay the costs of the FOIA responses, and to provide information about the status of Region 2's response to the CPG's First, Second and Third FOIA Requests. On May 16, 2014, Ms. Mack of K&L Gates responded to Sarah Flanagan's May 16, 2014 email, agreeing to pay the cost of responding to the request and withdrawing sub-request #13. A true and correct copy of these e-mails is attached as Exhibit E. Sarah Flanagan also wrote to William H. Hyatt of K&L Gates by letters dated June 19, 2014 and November 13, 2014 to inform him of the status of Region 2's response to the CPG FOIA Requests. True and correct copies of these letters are attached as Exhibits F and G, respectively.

V. CPG's First FOIA Request: EPA-R2-2014-005768

59. The CPG's First FOIA request contained 14 sub-requests for documents.

- Sub-request #1 asked for an Access or Excel file containing each normalized tissue and sediment concentration data pair (with units, basis and data qualifiers) used to generate a regression model, Biota-Sediment Accumulation Factor (BSAF) curve or Biota Accumulation Factor (BAF) curve presented in Final FFS Appendix A, Data Evaluation Report 6 (Biota Analysis). The sub-request indicated that the Access or Excel file should identify, for each biota tissue sample location, all tissue and sediment sample IDs used to generate the normalized tissue and sediment concentration data pair for that location.

- Sub-request #2 asked for a flat file dataset in Access or CSV including at least the following fields for each sample that was used to generate the normalized tissue and sediment concentration data pairs that were used to generate a regression model, BSAF curve or BAF curve presented in Final FFS Appendix A, Data Evaluation Report 6 (Biota Analysis): source; study; location; coordinates; river mile (if appropriate); species and tissue type (for each tissue sample); sample depth (for each sediment sample); sample ID; sample type (e.g., field duplicate); analyte name, including all contaminants, lipid, TOC and iron; numeric concentration for each analyte, including numeric concentrations for each sum component (e.g., for Polycyclic Aromatic Hydrocarbon (PAH) mixtures) and calculated totals; data qualifiers; Units; and basis (e.g., dry weight).

- Sub-request # 3 asked for data files, including database query output (e.g., sample ID, analytical results, and qualifiers) and ProUCL input file, for tissue samples included in current baseline Human Health Risk Assessment (HHRA) fish and crab tissue Exposure Point Calculations (EPC).

- Sub-request #4 asked for technical bases (analyses, calculations, model files and results, and any other relevant materials) for EPA's sliding scale of annual averages based on receptor exposure duration (used to estimate future concentrations).

- Sub-request #5 asked for technical back-up/documentation for EPA's analysis of 2000 US Census data for Essex and Hudson counties (used to estimate residence time).

- Sub-request #6 asked for technical back-up/documentation for EPA's re-analysis of Joanna Burger's 1999 survey of Newark Bay anglers (used to estimate fish and crab consumption rates).

- Sub-request #7 asked for any correspondence between Region 2 and NJDEP on NJDEP angler surveys that included sites on the LPR, and any data and analysis from those surveys.

- Sub-request #8 asked for any correspondence between the Region and the National Remedy Review Board (NRRB) since the group's comments were submitted in Nov. 2012 and issuance of the NRRB/Contaminated Sediments Technical Advisory Group (CSTAG) final comments on April 11, 2014.

- Sub-request #9 asked for any correspondence between Region 2 and HQ on draft versions of the Proposed Remedial Action Plan (PRAP) and Focused Feasibility Study (FFS) documents.

- Sub-request #10 asked for technical bases (analyses, calculations, modelling files and results, mapping, and any other relevant materials) used to develop the capping area footprints for Alternative 4.

- Sub-request #11 asked for technical backup/documentation for all unit or rollup cost items greater than $5,000 that cite to an "Internal Database" cited in FFS Appendix H.
- Sub-request #12 asked for The Louis Berger Group, Inc., 2007. "Staging and Processing Areas, Treatment Technologies, and Transportation Logistics Review." Lower Passaic River Contract. Prepared for the NJDEP. April 2007.

- After further consultation and communication with Region 2 on the scope of sub-request #13, the requester withdrew sub-request #13.

- Sub-request #14 asked for the data set used to develop EPCs used in the Ecological Risk assessment and shown in Table 7-6 of the FFS RI. This would include EPCs for sediment, the tissue concentrations for the 'generic fish', biota tissue for mummichog, and crab EPCs.

EPA's Search and Response

60. *Initial Response.* On April 28, 2014, Region 2 assigned the First FOIA Request to Alice Yeh. On May 9, 2014, Alice Yeh called and sent an email to Mr. La Gravenis providing him with an estimate of the costs of responding to the request, seeking an assurance of payment for the costs of responding to the request, informing him that responding to the request would exceed the statutory deadline (because of the breadth of the request), and asking him to clarify sub-request #13. *See* Ex. E.

61. After receiving the CPG's First FOIA Request, on April 30, 2014, Region 2 staff met to discuss how to interpret the 14-part FOIA request, identify relevant individuals throughout Region 2 who might have potentially responsive documents, develop instructions for conducting the search, and discuss responsive documents that could be released in the first installment. Ten of the 14 meetings described above in Paragraph 58 included discussion of the steps taken and progress made on this FOIA request.

62. *Clarifying and Narrowing the CPG's First FOIA Request.* On May 22, 2014, following the exchanges described in Paragraph 58, Alice Yeh sent a letter to Mr. La Gravenis estimating that it would take until the end of July 2014 to respond to the CPG's First FOIA Request and giving him the opportunity to modify the request so that Region 2 could process the request within a shorter timeframe. A true and correct copy of this letter is attached as Exhibit H. As described in Paragraph 74, the letter also provided the first installment of documents responsive to four sub-requests and directed Mr. La Gravenis to specific locations on the OurPassaic.org website and portions of the Lower 8.3 Miles RI/FFS with information responsive to another four sub-requests in the FOIA request.

EPA's Search for Responsive Records

63. On May 9, 2014, Alice Yeh spoke to several employees of the Louis Berger Group and Battelle asking for assistance in locating materials submitted to EPA that might be responsive to the FOIA request. In particular, Ms. Yeh requested that the Louis Berger Group assist her in identifying documents or information in EPA's possession that the Louis Berger Group had submitted to EPA that might be responsive to the sub-requests for technical data and information (sub-requests #1, 2, 3, 4, 5, 6, 10, 11, 12, and 14). These documents were located and EPA either provided them to CPG, or directed the CPG to the locations that they had been made available to the public, as described in Paragraph 76 below.

64. In addition to the documents that originated with the Louis Berger Group, Region 2 staff determined that responsive information to the CPG FOIA Requests would likely be located in EPA staff email accounts (both Lotus Notes and Outlook), or as electronic or paper documents in the possession of Region 2 staff. Therefore, on May 19, 2014, Region 2 staff met to discuss use of the agency's eDiscovery collection software to search the email accounts of specified document custodians using search terms and defined search parameters. Due to the size and complexity of sub-requests #8 and #9, Region 2 determined that EPA's Encase eDiscovery tool should be used for collection of email documents, and that the collected documents should be reviewed using the Agency's Relativity review software. Alice Yeh, Sarah Flanagan and Patricia Hick determined that Region 2 employees (both current and retired) from ERRD, Office of Regional Counsel and Office of the Regional Administrator might be custodians of e-mails responsive to sub-requests #8 and #9, and identified a date range for the search of November 21, 2012 to April 11, 2014. The custodians and search queries were entered into an Excel spreadsheet formatted to allow the Region 2 Encase coordinator, Judy Rubin, to perform the

search. The ERRD staff person identified by Alice Yeh as the potential custodian of records responsive to sub-requests #6 and #7 was contacted directly by Alice Yeh and searched her electronic and paper documents for responsive information. Information responsive to #12 was located in EPA's files by Alice Yeh.

EPA's Collection of Responsive Records

65. From approximately 2001 to early 2013, EPA, including Region 2, used Lotus Notes for Agency email. From 2013 to the present, EPA has used Microsoft Outlook email housed in the Agency's O365 cloud service. In order to collect responsive email records, Region 2 used the Encase eDiscovery search tool to search both the archival Lotus Notes email accounts and current Outlook email accounts of ERRD, Office of Regional Counsel and Office of the Regional Administrator personnel (both current and retired), as discussed above.

66. To respond to sub-request #8 of the First FOIA Request (for correspondence between Region 2 and the CSTAG/NRRB), Region 2 identified nine EPA custodians consisting of EPA Region 2 legal and technical staff, and 10 likely correspondents who were members of the NRRB and the CSTAG. Region 2 then searched for any email correspondence in the accounts of the nine Region 2 custodians which was sent to or from a member of the CSTAG/NRRB in the time frame of November 12, 2012 to April 11, 2014. No additional search terms or filters were used. To respond to sub-request #9 of the First FOIA Request (for correspondence between Region 2 and EPA HQ on the Proposed Remedial Action Plan and Focused Feasibility Study), Region 2 identified 12 EPA custodians consisting of EPA Region 2 technical and legal staff, and 32 likely correspondents consisting of EPA HQ staff, including senior managers, technical staff, and legal staff in the Office of the Administrator, the Office of Solid Waste and Emergency Management (OSWER, now the Office of Land and Emergency Management), the Office of

General Counsel, and the Office of Enforcement and Compliance Assurance. Region 2 then searched for any email correspondence in the accounts of the 12 identified custodians which was sent to or from any of the 32 identified HQ staff in the time frame of September 12, 2013 to April 11, 2014. No additional search terms or filters were used.

67. On June 18, 2014, a collection of documents within Relativity named "ED_000018 – Diamond Alkali, Passaic River Focused" was created to facilitate the review and processing of potentially responsive information to all of the CPG FOIA requests. EPA Region 2 created a sub-folder within the Relativity collection to house documents responsive to the CPG's First FOIA Request. Email documents from the Encase automated search of Lotus Notes and Outlook were loaded into the folder on June 24, 2014. After the initial creation of the folder with materials from Lotus Notes and Outlook, additional materials from paper and electronic file searches were also loaded into Relativity. In that way, Region 2 staff determined that all locations reasonably likely to have responsive information had been searched. The final folder contained 42,662 documents that were potentially responsive to the CPG's First FOIA Request.

68. Between July 24 and September 26, 2014, as processing and review was ongoing, Alice Yeh sent Mr. La Gravenis several emails revising the estimated completion date for the FOIA request. Alice Yeh's final email on September 26, 2014 revised the completion date estimate to October 3, 2014. A true and correct copy of these emails is attached as Exhibit I.

EPA's Processing of Responsive Records

69. Region 2 processed the documents responsive to the CPG's First FOIA Request electronically, using the Relativity software as a platform to perform a line-by-line review of each record and mark whether a record was to be released, partially redacted, or fully withheld. Staff also documented in the Relativity database the FOIA exemption(s) asserted for each

withheld record. Relativity assigned each record a reference number and staff then prepared an index of the documents marked to be withheld in the database to provide the CPG with EPA Region 2's final production.

70. The steps for retrieving and processing the records in this FOIA response were as follows. First, Region 2 staff reviewed potentially responsive records in the database and categorized the records as not responsive (either because the record was not responsive or duplicative), release in full, withhold in full under a FOIA exemption, or release with redaction under a FOIA exemption. This step allowed the database to: (1) track the number of records for each asserted FOIA exemption; (2) retrieve remaining unprocessed records; or (3) identify records requiring verification that exemptions were properly asserted. Second, Region 2 staff produced records to the CPG. Third, Region 2 staff generated an index of the documents marked to be withheld, as discussed above in Paragraph 70.

71. *Segregating Non-Exempt Material*. Region 2 staff also conducted a line-by-line review of each record responsive to the CPG's First FOIA Request for segregability of non-exempt material. Region 2 staff determined that where a record was withheld in full, no meaningful portion could reasonably be released. Region 2 staff performed redactions where non-exempt material could be reasonably segregated and released non-exempt portions.

72. In addition, after commencement of litigation, EPA's Office of General Counsel re-reviewed the withheld documents. On May 11, 2016, 51 documents that were previously withheld in full in response to CPG's First Request were released in full and 28 documents were released with redactions. A true and correct copy of this letter is attached as Exhibit J.

EPA's Production of Responsive Records

73. *Initial Production of Records*. Region 2 staff uploaded the first installment of responsive records to the CPG on May 22, 2014. *See* Ex. H. This installment consisted of documents responsive to sub-requests #5, #6, #7 and #12, and direction to specific locations in Lower 8.3 Miles RI/FFS files publicly available on EPA's website, ourPassaic.org, which contained information responsive to sub-requests #3, #4, #10 and #14. The first installment (10 files) was produced electronically via FOIAOnline on May 27, 2014. On June 17, 2014, and September 19, 2014, Mr. Hyatt of K& L Gates wrote to Sarah Flanagan regarding the initial production of records responsive to CPG's First FOIA Request, among other issues. True and correct copies of these letters are attached as Exhibit K and Exhibit L, respectively.

74. *Second Production*. Region 2 staff uploaded a second installment of responsive records on October 2, 2014. This installment consisted of (460 files). The second installment was produced electronically via FOIAOnline on October 3, 2014.

75. On October 29, 2014, EPA Region 2 uploaded a final letter to FOIAonline, withholding certain responsive records, and completing the response. Region 2 sent an invoice to the CPG through FOIAOnline. A true and correct copy of this letter, which is dated October 10, 2014 but was issued on October 29, 2014 due to technical issues with FOIAOnline, is attached as Exhibit M.

76. The CPG's First FOIA Request sought 13 categories of information (one of the original 14 having been withdrawn by the CPG), and Region 2 responded by releasing documents through FOIAOnline as follows:

- In response to sub-requests #1-2, seeking database files with numerous specific elements, Region 2 released one document, the file "BSAF Tissue Sediment Data." This is an Excel spreadsheet that includes some, though not all, of the elements identified in the

CPG's First FOIA Request. The data elements that were not included simply were not part of the spreadsheet as maintained by EPA.

- In response to sub-request #3, seeking data files for tissue samples included in baseline Human Health Risk Assessment (HHRA) fish and crab tissue Exposure Point Calculations (EPC), Alice Yeh stated in her May 22, 2014 letter accompanying the first release of information (*see* Ex. H) that the data files requested were posted in the Digital Library on ourPassaic.org under "Passaic River/Newark Bay Datasets" and the sample identification numbers and associated information needed to recreate the ProUCL input files were provided in Attachment 1 of Appendix D of the RI/FFS (which was and is publicly available on the website hosted by EPA for the Lower Passaic River, ourpassaic.org).

- Similarly, for sub-request #4, seeking technical bases for EPA's sliding scale of annual averages based on receptor exposure duration (used to estimate future concentrations), Alice Yeh's May 22, 2014 letter stated that the technical basis was provided in Table 5-2 and associated text in Appendix D of the RI/FFS, and that EPA had already provided the model files and results to the CPG in March 2014.

- For sub-request #5, seeking technical back-up/documentation for EPA's analysis of 2000 US Census data for Essex and Hudson counties (used to estimate residence time); Region 2 released one document, "Revised Tech Memo 1 – HH exposure".

- For sub-request #6, seeking technical back-up/documentation for EPA's re-analysis of Joanna Burger's 1999 survey of Newark Bay anglers (used to estimate fish and crab consumption rates), Region 2 released 10 documents.

- In response to the sub-request #7, seeking correspondence between Region 2 and NJDEP on NJDEP angler surveys that included sites on the LPR, and data and analysis on those surveys, Region 2 released 37 documents, and withheld 12 documents.[2]

- In response to sub-requests #8 and #9, seeking correspondence between Region 2 and NRRB since the group's comments were submitted in November 2012 and until issuance of the NRRB/CSTAG final comments on April 11, 2014, and between Region 2 and HQ on draft versions of the Proposed Plan and FFS documents, Region 2 released over 400 documents through FOIAOnline. Region 2 withheld 571 documents, citing FOIA Exemption 5.

- In response to sub-request #10, seeking technical bases used to develop the capping area footprints for Alternative 4 in the Proposed Plan, Region 2 responded via Alice Yeh's May 22, 2014 letter informing the CPG that the technical basis was provided in Appendix

[2] Region 2 identified 15 documents on its withholding log that accompanied the final production but has determined that three of the documents were released. See Coded Vaughn Index, Exhibit X.

B of the RI/FFS, and that EPA had already provided the modeling files and results to the CPG in March 2014.

- In response to sub-request #11, seeking technical backup/documentation for all unit or rollup cost items over $5,000 that cite to "Internal Database" in FFS Appendix H, Region 2 provided one document, "FFS Appendix H Cost Estimate References."

- In response to sub-request #12, seeking a document prepared by the Louis Berger Group, Inc. in 2007, "Staging and Processing Areas, Treatment Technologies, and Transportation Logistics Review" Region 2 provided the document.

- In response to sub-request #14, seeking the data set used to develop EPCs used in the Ecological Risk Assessment and shown in Table 7-6 of the FFS RI, Region 2 responded by informing the CPG in Alice Yeh's May 22, 2014 letter that the data files requested are posted in the Digital Library on ourPassaic.org, under "Passaic River/Newark Bay Datasets" and sample identification numbers and associated information needed to recreate the ProUCL input files are provided in Attachment 1 of Appendix D of the RI/FFS.

77. *Production Numbers*. EPA Region 2 identified approximately 42,662 records as potentially responsive to the CPG's First FOIA Request, of which Region 2 released 443 documents in full, released 27 documents with redactions, and withheld 586 documents in full. The remaining documents were determined to be duplicative or otherwise non-responsive to the CPG's First FOIA Request. In addition, on May 11, 2016, 51 documents that were previously withheld in full in response to CPG's First Request were released in full and 28 documents were released with redactions following OGC review. The final number of responsive documents to CPG's First FOIA Request was approximately 1,053 records, with approximately 494 released in full, approximately 55 released with redactions, and 504 withheld in full under one or more exemptions.[3] A true and accurate copy of the Coded Vaughn Index and List of Withheld Documents is attached as Exhibit X.

[3] The Coded Vaughn Index does not include the 27 documents released with redactions in the initial response. These documents were provided to CPG with the redaction on the face of the document.

VI. CPG's Second FOIA Request: EPA-R2-2014-006018

78. The CPG's Second FOIA Request did not have multiple sub-parts, but rather consisted of a very broad request for all emails, correspondence and other documents relating to: EPA's 2008 Conceptual Site Model ("CSM") and Empirical Mass Balance Model ("EMBM") developed as part of the Lower 8.3 Miles RI/FFS and any comments, revisions or changes to the CSM that were considered by EPA in the development and issuance of the Proposed Plan for the Lower 8 Miles; and EPA's June 2008 peer review of the CSM and EMBM.

EPA's Search and Response

79. On April 29, 2014, Region 2 assigned the request to Alice Yeh. On May 9, 2014, Alice Yeh called and sent an email to Mr. La Gravenis providing him with an estimate of the costs of responding to the request, seeking an assurance of payment for the costs of responding to the request, and informing him that responding to the request would exceed the statutory deadline (because of the breadth of the request) and that until the requestor agreed to pay the costs of production, production would be on hold. *See* Ex. E.

80. After receiving the CPG's Second FOIA Request, Region 2 staff met on April 30 to discuss how to interpret the FOIA request, identify relevant individuals throughout Region 2 who might have potentially responsive documents, develop instructions for conducting the search, and discuss responsive documents that could be sent in the first installment. The response to the Second FOIA Request was then incorporated into the effort to respond to the First FOIA Request, and included in the meetings discussed in Paragraph 58.

81. On May 14, 2014, Mr. La Gravenis sent an email responding to Alice Yeh's May 9, 2014 email indicating that the CPG would agree to pay the costs for responding to the request, but

would reserve its rights with respect to such costs. *See* Ex. E. On May 16, 2014, Sarah Flanagan of Region 2 sent an email to Karyllan Dodson Mack of K&L Gates requesting that K&L Gates confirm the CPG agreement to pay costs of responding to the FOIA request. Sarah Flanagan's email also summarized the status of the request. *See id.* On May 16, 2014, Ms. Mack of K&L Gates responded to Sarah Flanagan's May 16, 2014 email agreeing that the CPG would pay the cost of responding to the request. *See id.*

82. In her letter dated May 22, 2014 accompanying the first release of information, Alice Yeh estimated that it would take EPA until the end of September 2014 to complete its response to the CPG's Second FOIA Request and gave him the opportunity to modify the request so that EPA Region 2 could process the request within a shorter timeframe. A true and correct copy of this letter is attached as Exhibit N. In an email dated September 26, 2014, Alice Yeh extended her estimate of the time for response until the end of October 2014. A true and correct copy of this email chain is attached as Exhibit O.

83. By letter dated November 4, 2014, Mr. Hyatt of K&L Gates inquired whether the Region would be able to complete its response by the end of November 2014. A true and correct copy of this letter is attached as Exhibit P. By letter dated November 13, 2014, Sarah Flanagan replied, stating that it was Region 2's intention to complete its review by the end of November 2014, and informing the CPG that the request required the Region to review close to 10,000 documents. *See* Ex. G.

EPA's Search for Responsive Records

84. Region 2 staff determined that, due to the number of records likely to be responsive to this request, EPA's Encase eDiscovery tool should be used for collection of email documents, and that the collected documents should be reviewed using EPA's Relativity review software.

85. Alice Yeh, Sarah Flanagan and Patricia Hick determined that seven EPA Region 2 employees from ERRD and the Office of Regional Counsel and an EPA Headquarters employee located in Region 2's Edison office might be custodians of e-mails responsive to this FOIA request. The date range for the search was March 31, 2006 to February 10, 2014. The search terms used for all identified custodians for the Second FOIA Request were CSM, EMBM, and DER (whole word), in addition to two complex index queries, "Conceptual AND Site AND Model" and "mass AND balance." Finally, Alice Yeh's email was searched for the index query "Appendix AND (A OR C)" in addition to the search terms described above due to her involvement in the development of these appendices, which describe the CSM and EMBM. The custodians and search terms were entered into an Excel spreadsheet formatted to allow the Region 2 Encase coordinator, Judy Rubin, to perform the search. In addition, the Region 2 staff identified by Alice Yeh as potential custodians of non-email records potentially responsive to this request were contacted directly by Alice Yeh and at her request, the potential custodians searched their working files and notes for responsive documents.

EPA's Collection of Responsive Records

86. On June 18, 2014, Relativity Collection "ED_000018 – Diamond Alkali, Passaic River Focused" was created. EPA Region 2 created a folder with documents responsive to the CPG's Second FOIA Request on July 10, 2014.The final folder in Relativity contained 13,510 documents that were potentially responsive to the CPG's Second FOIA Request. An additional 220 files from Region 2 staff's search of paper and electronic files were saved to a designated drive on Region 2's computer network for review, but were not added to the Relativity workspace. In this way, Region 2 staff determined that all locations reasonably likely to have records responsive to the CPG's Second FOIA Request had been searched.

EPA's Processing of Responsive Records

87. Region 2 processed the documents responsive to the CPG's Second FOIA Request electronically, which involved the use of Relativity to enter records into a database and determine whether a record was released, partially redacted, or fully withheld. Staff also documented in the database the FOIA exemption(s) asserted for each withheld record. Relativity assigned each record a reference number and staff then prepared an index of the documents marked to be withheld in the database to provide to the FOIA requester with EPA Region 2's final production.

88. The steps for retrieving and processing the records in this FOIA response include review, categorization, and processing steps following the procedure as described in Paragraph 72 for the records collected in the Relativity workspace. In addition, the documents collected by Region 2 staff through review of their working files and notes were reviewed by Alice Yeh, Patricia Hick and Sarah Flanagan, who identified whether the documents should be released, withheld in full under a FOIA exemption, or withheld in part under a FOIA exemption. These documents were added manually to the index that was provided to the CPG.

89. *Segregating Non-Exempt Material*. Region 2 staff also conducted a line-by-line review of each record responsive to the CPG's First FOIA Request for segregability of non-exempt material. Region 2 staff determined that where a record was withheld in full, no meaningful portion could reasonably be released. Region 2 staff performed redactions where non-exempt material could be reasonably segregated and released non-exempt portions.

90. In addition, after commencement of litigation, EPA's Office of General Counsel re-reviewed the withheld documents. On May 11, 2016, 51 documents that were previously

withheld in full in response to CPG's Second Request were released in full and 63 documents were released with redactions. See Ex. J.

EPA's Production of Responsive Records

91. EPA Region 2 uploaded the first installment of records responsive to the CPG's Second FOIA Request on May 22, 2014. *See* Ex. N. The first installment was produced electronically via FOIAOnline on May 27, 2014.

92. Region 2 released interim responses through FOIAOnline on May 27, 2014 (37 files), October 20, 2014 (446 files), November 25, 2014 (205 files) and December 16, 2014 (3 files).

93. On January 7, 2015, Region 2 uploaded a final letter to FOIAonline withholding certain responsive information and completing the response. Region 2 also uploaded an invoice to FOIAOnline. A true and correct copy of this letter, which is dated January 5, 2015, is attached as Exhibit Q.

94. *Production Numbers*. EPA Region 2 identified approximately 13,800 records as potentially responsive to the CPG's Second FOIA Request, of which Region 2 released 662 documents in full and 29 documents with redactions, and withheld 1,799 files in full. The remaining documents were determined to be duplicative or otherwise non-responsive to the CPG's Second FOIA Request.[4] In addition, on May 11, 2016, 51 documents that were previously withheld in full in response to CPG's Second FOIA Request were released in full and 64 documents were released with redactions following OGC review.

95. The final number of responsive documents to CPG's Second FOIA Request was approximately 2,492 records, with approximately 713 released in full, approximately 93 released

[4] The Coded Vaughn Index does not include the 29 documents released with redactions in the initial response. These documents were provided to CPG with the redaction on the face of the document.

with redactions, and approximately 1686 withheld in full under one or more exemptions. *See* Coded Vaughn Index and List of Withheld Documents, Ex. X

VII. CPG's Third FOIA Request: EPA-R2-2014-006476

96. The CPG's Third FOIA Request sought seven categories of information (the seventh category was added on May 16, 2014, as discussed below in Paragraph 100) *See* Ex. C. and Paragraph 100.

- Sub-request #1 sought an accounting of funds spent and/or committed to be spent in developing the April 11, 2014 Proposed Plan (PP) for the Lower 8 Miles of the Lower Passaic River Study Area (LPRSA) and the reports and appendices thereto, including but not limited to the Remedial Investigation (RI) and Focused Feasibility Study (FFS).

- Sub-request #2 sought any authorization for expenditure of funds for the PP and the reports and appendices thereto.

- Sub-request #3 sought all comments to the National Remedy Review Board (NRRB) from the partner agencies (NOAA, FWS, and State of NJ) sent to EPA for transmittal to the NRRB and any EPA responses to such comments.

- Sub-request #4 sought any and all communications regarding the LPRSA between: 1) Any U.S. EPA personnel and any member of the Community Advisory Group or any other person purporting to be a representative of the community; and 2) any member of the public and Judith Enck, including any alter egos or aliases of Administrator Enck. This information would include but not be limited to all letters, email (both official accounts and personal accounts used for official business), and any notes, records, reports, summaries or memoranda taken during or prepared after communications with members of the public relating to the LPRSA.

- Sub-request #5 sought the following items related to the public hearing on the Proposed Plan, held by EPA in Newark, NJ on May 7, 2014 (Hearing): 1) video and/or other recordings taken during the Hearing; 2) a transcript of the Hearing; 3) sign-in sheets for participants at the Hearing; 4) communications between Region 2 and members of the public regarding preparations for the Hearing (to the extent not covered by request 4); and 5) any petitions available for signature during the Hearing.

- Sub-request #6 sought any documents relating to the designation of any portion of the Diamond Alkali Superfund Site as an operable unit.

- Sub-request #7 sought the sample identification numbers and chemistry for the four core samples, four grab samples and two dam catchment samples that EPA used to define upriver (above the Dundee Dam) surface sediment background conditions.

EPA's Search and Response

97. *Initial Response*. On May 19, 2014, EPA Region 2 assigned the CPG's Third FOIA Request to Alice Yeh.

98. After receiving the CPG's Third FOIA Request, Region 2 staff met on May 20, 2014 to discuss how to interpret the 7-part FOIA request, identify relevant individuals throughout Region 2 who might have potentially responsive documents, develop instructions for conducting the search, and discuss responsive documents that could be released in first installment. The response to the Third FOIA Request was then incorporated into the effort to respond to the First and Second FOIA Requests, and included in 13 of the 14 the meetings discussed in Paragraph 58.

99. On May 16, 2014, Sarah Flanagan of Region 2 sent an email to Karyllan Dodson Mack of K&L Gates noting that EPA was reviewing the level of effort that would be required for the response to the CPG's Third FOIA Request and would prepare an estimate and determine whether the fee limit included in the request would be sufficient. *See* Ex. E. On May 16, 2014, Ms. Mack of K&L Gates responded to Sarah Flanagan's May 16, 2014 e-mail advising that, on May 15, 2014, she had submitted an amendment to the CPG's Third FOIA Request that added a new sub-request #7. *See id.*

100. *Clarifying and Narrowing the Request*. On May 20, 2014, Alice Yeh spoke to Mr. La Gravenis about the request. Alice Yeh provided Mr. La Gravenis with an estimate of the cost of responding to the request and estimated that it would take until the end of September 2014 to respond to the CPG's Third FOIA Request. Alice Yeh gave Mr. La Gravenis the opportunity to

modify the request so that Region 2 could process the request within a shorter timeframe. Alice Yeh also asked Mr. La Gravenis to clarify sub-requests #4 and #5. On May 20, 2014, Alice Yeh sent Mr. La Gravenis an email documenting their conversation and asking him to agree to pay the costs of responding to the CPG's Third FOIA Request beyond the limits imposed through FOIAOnline.

101. On May 21, 2014, Mr. La Gravenis sent an email responding to Alice Yeh's May 20, 2014 email. In his email, Mr. La Gravenis confirmed that CPG would pay the cost of responding to the CPG's Third FOIA Request. He also provided information clarifying sub-request #4 and #5. On May 23, 2014, Alice Yeh asked a follow-up question regarding sub-request #5, and Mr. La Gravenis responded to this email on May 23, 2016. A true and correct copy of these emails is attached as Exhibit R.

EPA's Search for Responsive Records

102. Region 2 staff determined that, due to the number of records likely to be responsive to sub-request #4 (part 1) of the CPG's Third FOIA Request, EPA's Encase eDiscovery tool should be used for collection of email documents, and that the collected documents should be reviewed using EPA's Relativity review software.

103. Alice Yeh, Sarah Flanagan and Patricia Hick determined that 14 Region 2 employees in the Regional Administrator's Office, the Public Affairs Division, ERRD, and Office of Regional Counsel, might be custodians of e-mails responsive sub-request #4 of this FOIA request. The search terms used for all identified custodians for the Third FOIA Request, sub-request #4, were "Passaic," "Diamond," "LPRSA," and "FFS," in addition to two complex index queries, "17 w/1 mile" and "(interim OR early) w/1 action." The search was then constrained to seek emails to or from the identified custodians and 45 identified domains, which included common email

domains used by outside parties (such as gmail.com, yahoo.com, or hotmail.com) in addition to the domains of known academic, governmental, and non-governmental organizations with an interest in the Lower Passaic River and that were thought likely to have communicated with Region 2 regarding the Lower Passaic River part of the Diamond Alkali Superfund Site. Because of the broad nature of the request, the search was not constrained by dates. The custodians and search terms were entered into an Excel spreadsheet formatted to allow the Region 2 Encase coordinator, Judy Rubin, to perform the search. In addition, the Region 2 staff identified by Alice Yeh as potential custodians of non-email records responsive to this request were contacted directly by Alice Yeh and at her request, the potential custodians searched their working files and notes for responsive documents.

104. On May 21, 2014, Alice Yeh sent an email to Regional Administrator Judith Enck informing her of the CPG's Third FOIA Request, specifically sub-request #4, which sought "Any and all communications regarding the Lower Passaic River Study Area between any member of the public and Judith Enck, including any alter egos or aliases of Administrator Enck. This information would include but not be limited to all letters, email (both official accounts and personal accounts used for official business), and any notes, records, reports, summaries or memoranda taken during or prepared after communications with members of the public relating to the LPRSA." Alice Yeh informed Ms. Enck that Region 2 would use EPA's eDiscovery software to search her work e-mail account, so she would not have to do so herself. Alice Yeh specified that Ms. Enck would need to search through all of the other communication methods listed above (personal e-mails used for official business, letters, notes, memos, etc.) for information responsive to this FOIA request (up to 5/14/14).

105. On June 10, 2014, Steve Carrea, Ms. Enck's Special Assistant, sent Alice Yeh an email stating that Ms. Enck's materials responsive to the request described above had been uploaded to FOIAOnline. This was confirmed via email by Ms. Enck herself and by Wanda Calderon, the Region 2 FOIA Specialist.

106. As of May 2016, Ms. Enck has confirmed that her search included all locations reasonably likely to contain responsive information to CPG's Third Request. Ms. Enck has confirmed that she did not use her personal email account for communications regarding the Lower Passaic River Study Area with any members of the public. Ms. Enck has confirmed that she searched her paper files, including the paper files, notes, letters and memoranda referenced in Paragraph 104 above, and her personal email account.

107. On June 4, 2014, Alice Yeh sent an email to custodians in the Public Affairs Division informing them of sub-request #5 (part 4) of the CPG's Third FOIA Request and asking for responsive materials. These individuals either provided responsive materials or informed Alice Yeh that they had no responsive materials.

108. On June 17, 2014, EPA Region 2 uploaded information (78 files) responsive to the CPG's Third FOIA Request to FOIAOnline as an interim response. In her transmittal letter dated June 10, 2014 to Mr. La Gravenis, Alice Yeh estimated that it would take until the end of September 2014 to respond to the FOIA request and gave him the opportunity to modify the request through FOIAOnline so that it could be processed within a shorter period. In the letter, Alice Yeh also directed Mr. La Gravenis to a table in an appendix of the Lower 8.3-Mile RI/FFS with information responsive to the FOIA request. A true and correct copy of this letter is attached as Exhibit S.

EPA's Collection of Responsive Records

109. On June 18, 2014, Relativity Collection "ED_000018 – Diamond Alkali, Passaic River Focused" was created. EPA Region 2 created the folder with documents responsive to the CPG's Third FOIA Request on August 6, 2014. The final folder contained 10,560 potentially responsive documents. An additional 100 files from Region 2 staff's search of paper and electronic files were saved to in a designated drive on Region 2's computer network for review. In this way, Region 2 staff determined that all locations reasonably likely to have responsive information had been searched.

EPA's Processing of Responsive Records

110. The steps for retrieving and processing the records in this FOIA response included review, categorization, and processing steps following the procedure as described in Paragraph 72 for the records collected in the Relativity workspace. For the response to the Third FOIA Request, however, Region 2 staff did not identify any of the responsive records in Relativity as "withhold in full under a FOIA exemption." In addition, the documents collected by Region 2 staff through review of their working files and notes were reviewed by Alice Yeh, Patricia Hick and Sarah Flanagan, and the documents were identified for release, or release with redactions. All these documents were released, two with redactions.

111. *Segregating Non-Exempt Material*. Region 2 staff conducted a line-by-line review of each record responsive to the CPG's Third FOIA Request for segregability of non-exempt material. Region 2 staff determined that, for the single document withheld in full, no meaningful portion could reasonably be released. Region 2 staff performed redactions where non-exempt material could be reasonably segregated and released non-exempt portions.

112. In addition, after commencement of litigation, EPA's Office of General Counsel re-reviewed the withheld documents. .

EPA's Production of Responsive Records

113. EPA Region 2 uploaded the first installment on June 17, 2014 (78 files). The first production was produced electronically via FOIAOnline on June 17, 2014. *See* Ex. S.

114. On November 4, 2014, Bill Hyatt of the CPG sent a letter to Sarah Flanagan to discuss the status of the CPG's four FOIA requests. *See* Ex. P. Regarding the CPG's Third FOIA Request, the letter indicated that CPG had not received substantive emails between Judith Enck and members of the community, and asked for a completion date.

115. On November 13, 2014, Sarah Flanagan responded to Mr. Hyatt's letter. *See* Ex. G. Regarding the CPG's Third FOIA Request, Sarah Flanagan stated that Region 2 provided responsive information and informed Mr. Hyatt that whether information is substantive is beyond scope of FOIA review. Sarah Flanagan also indicated EPA's intention to complete review by the end of December 2014 and noted that EPA collected over 10,000 documents, but over 7,000 remained to review.

116. On January 26, 2015, Mr. La Gravenis sent an email to Alice Yeh asking about the status of the CPG's Third FOIA Request. On January 29, 2015, Alice Yeh sent an email to Mr. La Gravenis informing that EPA Region 2 encountered technical issues with the interim release of responsive information. Alice Yeh revised her estimated completion date to March 2015. A true and correct copy of these emails is attached as Exhibit T.

117. On March 16, 2015, Alice Yeh emailed Mr. La Gravenis revising the costs of responding to the CPG's Third FOIA Request and asking him to confirm that he would pay those costs. On

March 17, 2015, Mr. La Gravenis sent an email confirming that CPG would pay the additional cost. A true and correct copy of these emails is attached as Exhibit U.

118. On April 13, 2015, EPA Region 2 released the balance of the responsive information (3073 files) and a final letter dated March 20, 2015 to FOIAOnline. The final letter noted that Region 2 was withholding one responsive document and explained the basis for withholding. EPA Region 2 also sent an invoice through FOIAOnline. A true and correct copy of the March 20, 2015 letter is attached as Exhibit V.

119. The CPG's Third FOIA Request sought seven categories of information, and Region 2 responded by releasing documents through FOIAOnline as follows:

- For sub-request #1, seeking an accounting of funds spent and/or committed to be spent in developing the April 11, 2014 Proposed Plan for the Lower 8 Miles of the [Lower Passaic River Study Area ("LPRSA')] and the reports and appendices thereto, including but not limited to the RI/FFS, EPA concluded that it did not have a document or documents responsive to this request.

- In response to sub-request #2, seeking any authorization for expenditure of funds for the Proposed Plan and the reports and appendices thereto, EPA released 33 documents showing commitments of funds under Interagency Agreement IAG DW96941975-01, which EPA understood to be responsive to the CPG's request.

- In response to sub-request #3, seeking all comments to the NRRB from the partner agencies (NOAA, USFWS, NJDEP and USACE), sent to EPA for transmittal to the NRRB and any EPA responses to such comments, EPA released four documents and withheld one, citing FOIA exemptions 5 and 7(A).

- In response to sub-request #4, seeking any and all communications regarding the LPRSA between: 1) any U.S. EPA personnel and any member of the Community Advisory Group or any other person purporting to be a representative of the community; and 2) any member of the public and Judith Enck, including any alter egos or aliases of Administrator Enck, including letters, email (both official accounts and personal accounts used for official business), and any notes, records, reports, summaries or memoranda taken during or prepared after communications with members of the public relating to the LPRSA, EPA released 3075 documents. Of these, 120 documents were redacted to remove personal information, and two were redacted to remove non-responsive information.

- In response to sub-request #5, seeking items related to the public hearing on the PP, held by EPA in Newark, NJ on May 7, 2014 (Hearing): 1) video and/or other recordings taken during the Hearing; 2) a transcript of the Hearing; 3) sign-in sheets for participants at the Hearing; 4) communications between Region 2 and members of the public regarding preparations for the Hearing (to the extent not covered by request 4); and 5) any petitions available for signature during the Hearing, EPA released 39 documents.

- In response to sub-request #6, seeking any documents relating to the designation of any portion of the Diamond Alkali Superfund Site as an operable unit, EPA did not produce any responsive information. Operable unit numbers are used by EPA for managing investigation and remediation at complex sites in phases. Region 2 did not identify documents discussing the designation of operable unit numbers, other than in correspondence to the CPG which was already in the CPG's possession.

120. *Production Numbers.* EPA Region 2 identified approximately 10,560 records as potentially responsive to the CPG's Third FOIA Request, of which Region 2 released 3,050 documents in full in response to the CPG's Third FOIA Request, and 122 documents with redactions as described above, and withheld one document.[5] The remaining documents were determined to be duplicative or otherwise non-responsive to the CPG's First FOIA Request.

VIII. CPG's Fourth FOIA Request: EPA-R2-2014-007546

121. The CPG's Fourth FOIA Request sought all documents, including but not limited to emails, memos, reports and correspondence, that formed the technical basis for the New Jersey Department of Environmental Protection (NJDEP) Fish Advisory Levels, including but not limited to exposure assumptions, toxicity values, and target risk levels used by the NJDEP to derive the Fish Advisory Levels.

EPA's Search and Response

122. On June 24, 2014, Alice Yeh discussed the CPG's Fourth FOIA Request by phone with three Region 2 staff from the Clean Water Division, one Region 2 staff from the Office of Policy

[5] As part of the re-review of this FOIA response, the EPA determined that 21 filed that had been intended for release had not been produced due to a technical error. These documents were provided to Plaintiff on May 11, 2016. See Exh. J.

and Management who was formerly from the Clean Water Division and one Region 2 staff from ERRD. The purpose of this discussion was to determine who in Region 2, if anyone, would potentially have records responsive to the Fourth FOIA request.

123. The Clean Water Division staff person who was the New York/New Jersey Harbor Estuary Program (HEP) coordinator said that he did not have any files related to the technical basis for NJDEP's fish consumption advisories. He did remember an effort by the HEP related to the different bases that the States of New York and New Jersey had for issuing fish consumption advisories on shared water bodies, but the effort did not result in any technical analyses being done on how each state sets fish consumption advisories.

124. The Clean Water Division staff person responsible for reviewing the technical bases for state water quality standards said that he had not done any work on fish consumption advisories. He said that the Office of Policy and Management staff who was formerly from the Clean Water Division had dealt with fish consumption advisories.

125. The Office of Policy and Management staff formerly from the Clean Water Division said that she worked on New York & Mohawk Nation advisories, not New Jersey.

126. The Clean Water Division, Water Management Branch Chief said that he did not have any information responsive to the CPG's Fourth FOIA Request.

127. The ERRD risk assessor for the Diamond Alkali Superfund Site, who was the team member most knowledgeable about fish and crab consumption advisories, said that she did not do any work on NJ fish consumption advisories, but forwarded two emails from Gary Buchanan of NJDEP, one with an attachment, that were responsive and were released as described below.

128. Based on the search process described in Paragraphs 127 to 132, Alice Yeh determined that all individuals reasonably likely to have responsive information had been contacted and searches completed.

EPA's Production of Responsive Records

129. On July 14, 2014, EPA Region 2 uploaded three documents responsive to the CPG's Fourth FOIA Request, as well as Alice Yeh's final response letter to Robert La Gravenis dated July 1, 2014 to FOIAOnline. A true and correct copy of this letter is attached as Exhibit W. EPA Region 2 also sent an invoice through FOIAOnline. Region 2 did not withhold or redact any information that was responsive to the Fourth FOIA request.

IX. Coded Vaughn Index and Exemptions Applied

130. As described above, between April 28, 2014 and March 20, 2015, Region 2 collected over 66,000 electronic files, and reviewed them for responsiveness and FOIA exemptions in response to the CPG's four FOIA requests. Region 2 personnel searched their files and provided responsive information. During this time, Alice Yeh contacted Mr. La Gravenis on a number of occasions to inform him of the progress of Region 2's search and review.

131. As described above Region 2 staff conducted a line-by-line review of each record responsive to the CPG's four FOIA requests for releasability, applicable exemption, and segregability of non-exempt material. Region 2 staff determined that for documents withheld in full, no meaningful portion could reasonably be released. Region 2 staff performed redactions where non-exempt material could be reasonably segregated and released non-exempt portions.

132. When information was identified containing attorney-client communications, attorney work-product, and/or predecisional and deliberative information, Region 2 identified this information for withholding under FOIA Exemption 5, which applies to inter-agency or intra-

agency memoranda or letters which would not be available by law to a party other than an agency in litigation with the affected agency. Where thought processes are woven into document to such an extent that any attempt at segregating information would reveal agency deliberations that information is also exempt from release under FOIA Exemption 5. Region 2 also identified information for withholding under FOIA Exemption 7(A) if the information was compiled for law enforcement purposes, the production of which could reasonably be expected to interfere with enforcement proceedings. Finally, Region 2 identified information for redaction and withholding under FOIA Exemption 6 if the release of said information would constitute an unwarranted invasion of personal privacy.[6]

133. The final number of responsive documents to all four FOIA requests was approximately 6,721 records, with approximately 4,257 released in full, approximately 270 released with redactions, and approximately 2,191 withheld in full under one or more exemptions. By agreement between the parties, the withheld documents are described by category and code in the attached Coded Vaughn Index and are individually listed.[7] *See* Coded Vaughn Index and List of Withheld Documents, Ex. X.

134. As explained above, and set forth in more detail in the withholding log enclosed with final response letter for CPG's First FOIA Request, in response to sub-requests #8 and #9, seeking correspondence between Region 2 and NRRB between November 21, 2012 and April 11, 2014, and between Region 2 and HQ on draft versions of the Proposed Plan and FFS

---

[6] Individual documents may be withheld under multiple FOIA Exemptions, as described in the Coded Vaughn Index, Exhibit X.

[7] The documents withheld in Category 17, which are 122 documents released in response to the Third FOIA Request with minor redactions under Exemption 6, have not been individually listed. In addition, as noted above, the documents released with redactions in the initial responses to the First and Second FOIA Requests have not been included in the Coded Vaughn Index.

documents, Region 2 withheld approximately 504 documents under Exemption 5. This request sought internal communications among EPA offices in the time leading up to EPA's issuance of the Proposed Plan, and accordingly, responsive information includes numerous sensitive communications in which legal enforcement staff participated. In addition, a limited amount of information was withheld under Exemption 6 for protection of personal privacy. This information includes discussions of health and medical plans, leave and use of leave, as well as conference lines and conference codes.

135. As explained above, and set forth in the withholding log enclosed with final response letter for CPG's Second FOIA Request, which sought all emails, correspondence and other documents relating to EPA's 2008 CSM and EMBM, and any comments, revisions or changes to the CSM that were considered by EPA in the development and issuance of the Proposed Plan, and EPA's June 2008 peer review of the CSM and EMBM, Region 2 withheld approximately 1,686 documents under Exemption 5 and 7(A). This request sought internal communications among EPA offices and among EPA and partner agencies in the time leading up to EPA's issuance of the Proposed Plan, and accordingly, responsive information includes numerous sensitive communications in which legal enforcement staff participated, including discussion of potential law enforcement activities.

136. As explained above, in response to CPG's Third FOIA Request, Region 2 redacted portions of 122 documents on the basis of FOIA Exemption 6, and withheld one document on the basis of Exemptions 5 and 7(A).

137. As explained above, no information was withheld from CPG in response to the Fourth Request. Therefore, the Fourth Request is not included in the Coded Vaughn Index.

Codes and Categories of Information Described in the Coded Vaughn Index

138. The documents withheld in full or in part in response to CPG's First FOIA Request have been organized as follows in the attached Coded Vaughn Index (Exhibit X):

- Category 1: Consists of communications and documents exchanged between Region 2, EPA Headquarters, and the NRRB, including technical documentation undergoing attorney review. The 50 documents in this category were withheld in full or in part under FOIA Exemption 5.

- Category 2: Consists of communications and documents exchanged among EPA Region 2 Technical Staff, EPA Region 2 Legal Staff, EPA Headquarters Technical Staff and EPA Headquarters Legal Staff related to the NRRB Comment Memo and Region 2 response. The 20 documents in this category were withheld in full or in part under FOIA Exemption 5.

- Category 3: Consists of communications and documents exchanged between Region 2 attorneys and EPA Headquarters attorneys, with some non-attorney staff copied, related to the Proposed Plan. The 160 documents in this category were withheld in full or in part under FOIA Exemption 5.

- Category 4: Consists of communications and documents exchanged between Region 2 technical staff and EPA Headquarters technical staff that were subject to review by Region 2 attorneys and EPA Headquarters attorneys, related to the Proposed Plan and Focused Feasibility Study. The 176 documents in this category were withheld in full or in part under FOIA Exemptions 5 and 6

- Category 5: Consists of communications and documents exchanged among EPA Region 2 Technical Staff, EPA Region 2 Legal Staff, EPA Headquarters Technical Staff and EPA Headquarters Legal Staff related to the Proposed Plan and Focused Feasibility Study. The 63 documents in this category were withheld in full or in part under FOIA Exemption 5.

- Category 6: Consists of correspondence between Region 2 and NJDEP on NJDEP angler surveys that included sites on the Lower Passaic River, and any data and analysis from those surveys. The 12 Documents in this category were withheld in full or in part under FOIA Exemption 5.

139. The documents withheld in full or in part in response to CPG's Second FOIA Request have been organized as follows in the attached Coded Vaughn Index (Exhibit X):

- Category 7: Consists of email communications between EPA Region 2 attorneys with attorney comments on draft technical documents. The 13 documents in this category were withheld in full under FOIA Exemption 5.

- Category 8: Consists of communications and attachments circulated between EPA and Partner Agencies related to the development of the Lower Passaic River CSM and EMBM and Proposed Plan, including documents and communications shared under a Joint Prosecution and Confidentiality Agreement. The 58 documents in this category were withheld in full or in part under FOIA Exemptions 5 and 7(A).

- Category 9: Consists of communications and attachments circulated between EPA, EPA's technical contractors, and Partner Agencies related to the development of the Lower Passaic River CSM and EMBM and Proposed Plan. The 282 documents in this category were withheld in full or in part under FOIA Exemptions 5, 7(A), and 6.

- Category 10: Consists of communications and documents circulated internally among EPA Region 2 staff as part of the development of the Lower Passaic River CSM and EMBM and Proposed Plan. The 291 documents in this category were withheld in full or in part under FOIA exemptions 5 and 7(A).

- Category 11: Consists of communications and draft documents, particularly drafts of technical documents and related communications and comments, circulated between EPA Region 2 and its contractors and subcontractors as part of the development and peer review of the Lower Passaic River CSM and EMBM and Proposed Plan. The 735 documents in this category were withheld in full or in part under FOIA Exemptions 5 and 6.

- Category 12: Consists of communications and draft documents, particularly drafts of technical documents and related communications and comments, circulated between technical staff in EPA Region 2 and technical staff in EPA Headquarters. The 112 documents in this category were withheld in full or in part under FOIA Exemptions 5 and 7(A).

- Category 13: Consists of Draft technical documents circulated for legal review, incorporating attorney comments. The 62 documents in this category were withheld in full or in part under FOIA Exemption 5.

- Category 14: Consists of communications between Region 2 technical staff and Region 2 attorneys to discuss attorney comments and review of technical documents. The 71 documents in this category were withheld in full or in part under FOIA Exemption 5.

- Category 15: Consists of hardcopy notes and documents related to the development of the Lower Passaic River CSM and EMBM and Proposed Plan, including meeting notes and notes and comments on draft documents. The 142 documents in this category were withheld in full under FOIA Exemptions 5 and 7(A).

- Category 16: Consists of Handwritten Attorney Notes from Meetings and Calls. The 36 documents in this category were withheld in full under FOIA Exemption 5.

140. The 122 documents withheld in part in response to CPG's Third FOIA Request, and the one document withheld in full, have been organized as follows in the attached Coded Vaughn Index (Exhibit X):

- Category 17: Emails and communications between EPA and outside parties that are responsive to Part 4 of the Third FOIA Request. The 122 documents in this category had information redacted and partially withheld under FOIA Exemption 6.

- Category 18: Consists of one document responsive to Part 3 of the Third FOIA Request, which requested comments to the NRRB from the partner agencies and any EPA responses to such comments. This document was withheld in full under FOIA Exemptions 5 and 7(A).

EPA's Application of FOIA Exemption 5

141. *Deliberative Process Privilege.* Exemption 5 encompasses the attorney-client communications privilege, the attorney work product protection, and the deliberative process privilege. Altogether, approximately 2,142 documents were withheld in full or in part under the deliberative process privilege. This privilege "applies to inter- and intra-agency documents that are both predecisional and deliberative." Releasing this information now would inaccurately reflect the view of the agency on a number of complex technical matters. While these documents do contain facts, they are not simply factual documents. Rather, they are deliberative communications among EPA staff, between EPA and its contractors, or between EPA and its state and federal partner agencies, the release of which would have a chilling effect on EPA's ability to conduct frank internal discussions as part of a decision-making process, as well as contribute to public confusion that might result from disclosure of reasons and rationales that were not in fact ultimately the grounds for an agency's action.

142. *Attorney-Client Privilege.* Altogether, approximately 657 documents were withheld in

full or in part as attorney-client communications. The attorney-client communication privilege protects confidential communications between attorney and client for the purposes of obtaining legal advice. The documents withheld under this exemption contained confidential communications exchanged among Region 2 staff and legal counsel within the Region, and with legal counsel in EPA- HQ. In addition, the documents withheld included some exchanged between non-legal personnel, reflecting legal advice. The substance of these communications has been kept confidential. The disclosure of such communications would deprive my staff, and the agency in general, of the benefit of confidential advice from EPA attorneys. My staff and I work very closely with EPA attorneys as we develop the documents that will form the basis for remedy selection. EPA attorneys provide legal advice to program staff and managers concerning the interpretation of CERCLA and its implementing regulations and guidance. They also advise my staff and myself on recent changes to the law and the preparation of internal deliberative materials, such as the draft documents and communications regarding those draft documents. They also frequently review and comment on them to ensure that all appropriate legal issues have been considered in my staff's analyses. All of these analyses require the selection and assessment of specific facts and data and are based on the mental impressions of EPA attorneys and my staff working at these attorneys' direction. These attorneys direct my staff to consider various factors to assist in refining their analysis, given these attorneys' understanding of CERCLA, the NCP and current case law.

143. *Attorney Work Product Privilege.* Altogether, approximately 599 documents were withheld in full or in part as attorney work product. To qualify as work product, a document must have been prepared in anticipation of litigation. Litigation need not have actually commenced, so long as specific claims have been identified which make litigation probable. In

addition, numerical and technical analyses prepared by the client or representative of the client in anticipation of litigation can constitute attorney work product. Here, given the significant costs associated with the anticipated clean-up of the Lower Passaic River, EPA anticipated that some or all of the responsible parties would seek to challenge the remedy in federal court. In fact, NJDEP commenced litigation with responsible parties in 2005 related to the contamination of the Lower Passaic River and Newark Bay, which later grew to include over 300 third parties. Thus, EPA has carefully prepared its reports and record with an eye toward potential litigation, under the direction and supervision of EPA attorneys. Release of confidential information contained in such documents would allow external scrutiny of EPA's sensitive litigation preparations and deprive EPA attorneys of the ability to keep their thoughts and mental impressions from being discovered by an opponent in litigation.

EPA's Application of FOIA Exemption 7(A)

144. In addition to Exemption 5, Region 2 withheld approximately 56 documents in full or in part subject to Exemption 7(A). Exemption 7(A), found at 5 U.S.C. Section 553(a)(7)(A), applies to records or information compiled for law enforcement purposes, the production of which could reasonably be expected to interfere with enforcement proceedings. Here, the records withheld by EPA under Exemption 7(A) were compiled pursuant to the EPA's statutory authority under CERCLA, as part of the agency's efforts to enforce that statute with respect to the 17 Miles and the Lower 8.3 Miles. In addition, there is a pending law enforcement action under CERCLA due to the substantial possibility that EPA may need to undertake enforcement, including litigation, in order to bring about the cleanup of the Lower 8.3 Miles and/or the 17 Miles. The release of these documents would reasonably be expected to interfere with enforcement proceedings, because it would hinder the government's ability to control or shape

enforcement action should this be necessary in order to enforce the cleanup selected for the Lower Passaic River, and would prematurely reveal the government's evidence or strategy in an enforcement case.

145. Requiring EPA to disclose its predecisional and deliberative analyses through a FOIA request – especially when the requestor is a group that includes some of the parties that EPA has identified as potentially responsible for the Lower Passaic River part of the Diamond Alkali site, for which EPA has issued a decision document and will soon issue a second decision document, selecting remedies that it will seek to have implemented by some or all PRPs – would interfere with EPA's law enforcement investigation for several reasons. First, it will allow the CPG, other PRPs and/or other members of the public to pry into the agency's thoughts and mental impressions about the enforcement case. Second, it will give these parties unprecedented insight into the facts EPA thought were significant (or insignificant) and the judgments EPA staff applied to reach their conclusions. In such a circumstance, the CPG (and potentially other PRPs) will gain valuable internal and privileged information for use in their defense should EPA pursue an enforcement action. Third, revealing this information through FOIA will give the CPG and other PRPs the ability to peer into EPA's assessment of the strengths and weaknesses of its preliminary determinations with respect to the remedy selection process, and thus its internal assessment of its litigation risk. Public knowledge of this internal risk assessment could allow the CPG or other PRPs to attempt to evade or interfere with EPA's law enforcement function by providing undue insight into non-public information about how the agency's staff and attorneys interpret and enforce the law. In sum, the premature release of this information through FOIA would provide the CPG and other interested parties with undue insight into EPA's investigation of the Lower 8.3 Miles and the development of the enforcement case. This insight could enable

the CPG and other PRPs to devise litigation and/or enforcement avoidance strategies to counter EPA's enforcement effort and impair EPA's ability to ultimately present its case.

EPA's Application of FOIA Exemption 6

146. In addition to the exemptions described above, EPA withheld portions of 186 documents under FOIA Exemption 6 to protect personal privacy. Many of the withheld portions of records consist of personal email addresses, cell phone numbers, home phone numbers, home addresses, conference call lines and codes and similar contact information. The withheld portions of emails relate to personal contact information of EPA employees, other Federal employees, or members of the public, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy. The withheld information is within the scope of "personnel and medical files and similar files" because the information applies to and is identified with a particular individual. There is no public interest in these individuals' personal contact information, such as an email address, home phone number, or cell phone number. With respect to the personal contact information of Agency or other Federal employees, the withheld information does not shed light on the employee's performance of official duties. In each instance, the harm to the individual as a result of the disclosure clearly outweighs the public interest in such disclosure.

147. In addition to personal contact information, EPA also withheld records primarily containing personal medical information related to the health of an employee, partner, or contractor or a family member. This encompasses information that relate to the individual's use of leave that is a non-medical nature. Records withheld in part under Exemption 6 consist of emails containing personal information such as discussions of doctor's appointments, child-care, vacation, and other use of personal time or leave. The withheld portions of emails relate to private information for individuals, the public disclosure of which would constitute a clearly

unwarranted invasion of personal privacy. The withheld information is within the scope of the phrase "personal and medical files and similar files" because the information applies to and is identified with a particular individual and is medical or personal in nature. There is no public interest in these individuals' personal or medical information. There is also no public interest in the employee's child-care information, or use of personal leave time. The withheld information does not shed light on employee's performance of official duties, and in each instance, the harm to the individual as a result of disclosure clearly outweighs the public interest in such disclosure.

Pursuant to 28 U.S.C. § 1746, I declare under penalty of perjury that the foregoing is true and correct. Executed on May 13, 2016.

Re: Diamond Alkali Superfund Site

To Whom It May Concern:

I am submitting this document request pursuant to the Freedom of Information Act ("FOIA"), 5 U.S.C. § 552 et seq. This request concerns the United States Environmental Protection Agency's ("EPA") files relating to the Diamond Alkali Superfund Site (the "Site") which includes the former pesticides manufacturing plant and surrounding properties at 80 and 120 Lister Avenue in Newark, New Jersey, the Lower Passaic River Study Area and the Newark Bay Study Area. The EPA Site ID number is NJD980528996.

Specifically, I request copies the documents listed in Attachment A annexed hereto, which relate to EPA's recently Proposed Plan for the Site.

I would ask that you contact me at your earliest convenience to discuss arrangements for providing the requested documents. This firm will of course take responsibility for any necessary copying and/or shipping charges. Your prompt attention to this matter is greatly appreciated. Thank you for your anticipated cooperation.

Sincerely,

Robert Paul La Gravenis

ATTACHMENT A

Documents Requested from EPA Region 2 on 4/21/14

1. An Access or Excel file containing each normalized tissue and sediment concentration data pair (with units, basis and data qualifiers) used to generate a regression model, Biota-Sediment Accumulation Factor (BSAF) curve or Biota Accumulation Factor (BAF) curve presented in Final FFS Appendix A, Data Evaluation Report 6 (Biota Analysis).

- The Access or Excel file should identify, for each biota tissue sample location, all tissue and sediment sample IDs used to generate the normalized tissue and sediment concentration data pair for that location.

2. A flat file dataset in Access or CSV including at least the following fields for each sample that was used to generate the normalized tissue and sediment concentration data pairs that were used to generate a regression model, BSAF curve or BAF curve presented in Final FFS Appendix A, Data Evaluation Report 6 (Biota Analysis):

- Source
- Study
- Location
- Coordinates
- River mile (if appropriate)
- Species and tissue type (for each tissue sample)
- Sample depth (for each sediment sample)
- Sample ID
- Sample type (e.g., field duplicate)
- Analyte name, including all contaminants, lipid, TOC and iron
- Numeric concentration for each analyte, including numeric concentrations for each sum component (e.g., for Polycyclic Aromatic Hydrocarbon (PAH) mixtures) and calculated totals
- Data qualifiers
- Units
- Basis (e.g., dry weight)

3. Data files, including database query output (e.g., sample ID, analytical results, qualifiers) and ProUCL input file, for tissue samples included in current baseline Human Health Risk Assessment (HHRA) fish and crab tissue Exposure Point Calculations (EPC)

4. Technical bases (analyses, calculations, model files and results, and any other relevant materials) for EPA's sliding scale of annual averages based on receptor exposure duration (used to estimate future concentrations)

5. Technical back-up/documentation for EPA's analysis of 2000 US Census data for Essex and Hudson counties (used to estimate residence time)

6. Technical back-up/documentation for EPA's re-analysis of Joanna Burger's 1999 survey of Newark Bay anglers (used to estimate fish and crab consumption rates)

7. Any correspondence between Region 2 and NJDEP on NJDEP angler surveys that included sites on the LPR, and any data and analysis from those surveys

8. Any correspondence between the Region and the National Remedy Review Board (NRRB) since the group's comments were submitted in Nov. 2012 and issuance of the NRRB/Contaminated Sediments Technical Advisory Group (CSTAG)final comments on April 11, 2014

9. Any correspondence between the Region 2 and HQ on draft versions of the Proposed Remedial Action Plan(PRAP) and Focused Feasibility Study (FFS) documents

10. Technical bases (analyses, calculations, modeling files and results, mapping, and any other relevant materials) used to develop the capping area footprints for Alternative 4

11. Technical backup/documentation for all unit or rollup cost items > $5,000 that cite to "Internal Database" in FFS Appendix H

12. The Louis Berger Group, Inc., 2007. "Staging and Processing Areas, Treatment Technologies, and Transportation Logistics Review." Lower Passaic River Contract. Prepared for the NJDEP. April 2007.

13. Data and technical basis for 1) modeled background tissue concentrations, and 2) modeled future tissue concentrations, including the technical basis of EPA's sediment-tissue regression models for HHRA species evaluated in the FFS.

14. The data set used to develop EPCs used in the Ecological Risk assessment and shown in Table 7-6 of the FFS RI. This would include EPCs for sediment, the tissue concentrations for the 'generic fish', biota tissue for mummichog, and crab EPCs.

Appendix A to May 14, 2014 FOIA Request

1. An accounting of funds spent and/or committed to be spent in developing the April 11, 2014 Proposed Plan (PP) for the Lower 8 Miles of the Lower Passaic River Study Area (LPRSA) and the reports and appendices thereto, including but not limited to the Remedial Investigation (RI) and Focused Feasibility Study (FFS).

2. Any authorization for expenditure of funds for the PP and the reports and appendices thereto.

3. All comments to the National Remedy Review Board (NRRB) from the partner agencies (NOAA, FWS, State of NJ) sent to EPA for transmittal to the NRRB and any EPA responses to such comments.

4. Any and all communications regarding the LPRSA between: 1. Any U.S. EPA personnel and any member of the Community Advisory Group or any other person purporting to be a representative of the community; and 2. Any member of the public and Judith Enck, including any alter egos or aliases of Administrator Enck. This information would include but not be limited to all letters, email (both official accounts and personal accounts used for official business), and any notes, records, reports, summaries or memoranda taken during or prepared after communications with members of the public relating to the LPRSA.

5. The following items related to the public hearing on the PP, held by EPA in Newark, NJ on May 7, 2014 (Hearing): 1. video and/or other recordings taken during the Hearing; 2. a transcript of the Hearing; 3. Sign-in sheets for participants at the Hearing; 4. Communications between Region 2 and members of the public regarding preparations for the Hearing (to the extent not covered by request 4); and 5. Any petitions available for signature during the Hearing.

6. Any documents relating to the designation of any portion of the Diamond Alkali Superfund Site as an operable unit.

Amended Appendix A to May 14, 2014 FOIA Request

1. An accounting of funds spent and/or committed to be spent in developing the April 11, 2014 Proposed Plan (PP) for the Lower 8 Miles of the Lower Passaic River Study Area (LPRSA) and the reports and appendices thereto, including but not limited to the Remedial Investigation (RI) and Focused Feasibility Study (FFS).

2. Any authorization for expenditure of funds for the PP and the reports and appendices thereto.

3. All comments to the National Remedy Review Board (NRRB) from the partner agencies (NOAA, FWS, State of NJ) sent to EPA for transmittal to the NRRB and any EPA responses to such comments.

4. Any and all communications regarding the LPRSA between: 1. Any U.S. EPA personnel and any member of the Community Advisory Group or any other person purporting to be a representative of the community; and 2. Any member of the public and Judith Enck, including any alter egos or aliases of Administrator Enck. This information would include but not be limited to all letters, email (both official accounts and personal accounts used for official business), and any notes, records, reports, summaries or memoranda taken during or prepared after communications with members of the public relating to the LPRSA.

5. The following items related to the public hearing on the PP, held by EPA in Newark, NJ on May 7, 2014 (Hearing): 1. video and/or other recordings taken during the Hearing; 2. a transcript of the Hearing; 3. Sign-in sheets for participants at the Hearing; 4. Communications between Region 2 and members of the public regarding preparations for the Hearing (to the extent not covered by request 4); and 5. Any petitions available for signature during the Hearing.

6. Any documents relating to the designation of any portion of the Diamond Alkali Superfund Site as an operable unit.

7. The sample identification numbers and chemistry for the four core samples, four grab samples and two dam catchment samples that EPA uses to define upriver (above the Dundee Dam) surface sediment background conditions.

Description :

I am submitting this document request pursuant to the Freedom of Information Act ("FOIA"), 5 U.S.C. § 552 et seq. This request concerns the United States Environmental Protection Agency's ("EPA") files relating to the Diamond Alkali Superfund Site (the "Site") which includes the former pesticides manufacturing plant and surrounding properties at 80 and 120 Lister Avenue in Newark, New Jersey, the Lower Passaic River Study Area and the Newark Bay Study Area. The EPA Site ID number is NJD980528996. Specifically, EPA's Proposed Plan for the lower 8 miles of the Site provides as follows: "The NJDEP use of do not eat values of 0.0077 ng/g, 240 ng/g, and 540 ng/g to set fish consumption advisories for 2,3,7,8-tetrachlorodibenzo-p-dioxin - toxic equivalency ("TCDD-TEQ"), polychlorinated biphenyls ("PCBs") and mercury, respectively. Use of PRGs that exceed these NJDEP advisory triggers would not be protective of allow additional consumption of fish/crabs" (hereinafter referred to as "Fish Advisory Levels"). The cited language regarding Fish Advisory Levels is found in the footnotes for Table 2-10 in the FFS report, as well as the footnotes for Tables 1-8 and 1-10 of Appendix E. In particular, I request any and all documents, including but not limited to emails, memos, reports and correspondence, that form the technical basis for the New Jersey Department of Environmental Protection's ("NJDEP") Fish Advisory Levels, including but not limited to exposure assumptions, toxicity values, and target risk levels used by the NJDEP to derive the Fish Advisory Levels. I would ask that you contact me at your earliest convenience to discuss arrangements for providing the requested documents. This firm will of course take responsibility for any necessary copying and/or shipping charges. Your prompt attention to this matter is greatly appreciated. Thank you for your anticipated cooperation.

Sarah,

Yes, we will pay the costs, but reserve our rights to argue about the appropriateness of the costs we had to expend at a future point in time.

As to Question 13, I have confirmed that it is duplicative of another request and therefore can be disregarded.

As to the 5/14/14 request, yesterday we submitted an amended request, which added a new item 7 to the Appendix. Therefore, the 5/15/14 Amended FOIA includes everything in the 5/14/14 FOIA, plus one new information request.

Please let me know if you have any questions.

Thanks again,
Karyllan

Subject: FW: FOIA #EPA-R2-2014-005768 & -006018

Karyllan,

Following up on our conversation yesterday, EPA would like to confirm that KL Gates will pay the costs incurred by EPA in responding to your Freedom of Information Act (FOIA) requests. Our regulations allow us to obtain advance payment if costs are anticipated to exceed $250, unless we receive a satisfactory assurance of full payment. Rob La Gravenis' assurance, which is subject to a reservation of rights, leaves us uncertain as to whether the costs that we incur would be paid. Could you confirm that KL Gates will pay the costs?

With assurance of payment, EPA can continue our search and begin to provide information in installments. The outstanding FOIA requests are as follows:

FOIA EPA-R2-2014-005768 – submitted 4/21/14 – initial due date 5/19/14 but on hold (since 5/9/14) as we await clarification of question 13 and assurance of payment.

FOIA EPA-R2-2014-006018 – submitted 4/28/14 – initial due date 5/27/14 but on hold (since 5/9/14) as we await assurance of payment.

FOIA EPA-R2-2014-006476 - submitted 5/14/14 – due date 6/13/14. EPA is reviewing level of effort required and will prepare an estimate and determine whether the $500.00 fee limit included in this request is sufficient.

Thanks.

Subject: RE: FOIA #EPA-R2-2014-005768 & -006018

Thank you, Ms. Yeh. The CPG believes that most, if not all, of these documents should have been considered by EPA and part of its supporting analysis in preparation of the Proposed Plan and Focused Feasibility Study. Therefore, this information should be part of the administrative record for the site and interested parties should not have to pay for such information. As a result, the CPG reserves its rights with respect to such costs. Subject to this reservation, this email confirms that the CPG will pay for the costs of responding to FOIA requests # EPA-R2-2014-005768 & -006018.

I will coordinate with our team to respond to your question regarding -005768, #13.

Thanks,
Rob

Subject: FOIA #EPA-R2-2014-005768 & -006018

This is to confirm our phone conversation from this morning about your Freedom of Information Act (FOIA) requests # EPA-R2-2014-005768 & -006018.

We estimate that the cost of responding to -005768 will be approximately $5000 and the cost of responding to -006018 will be approximately $4000. These costs are primarily related to time spent by multiple staff members to search for e-mails and other documents responsive to the broad requests. I have to wait until you agree to pay costs up to the amounts estimated above before I can respond to the requests. You will receive bills for the actual amounts EPA spends in responding to the requests after we have responded. If costs exceed those estimated, I will call you again with new estimates and ask for your agreement to any new limits.

Also, I will be sending you responses to the requests in installments in the future, as we compile reasonably sized amounts of information.

Finally, as we discussed, I didn't understand what you were requesting in -005768, #13 ("Data and technical basis for 1) modeled background tissue concentrations, and 2) modeled future tissue concentrations, including the technical basis of EPA's sediment-tissue regression models for HHRA species evaluated in the FFS.") Please clarify the term "modelled background tissue concentrations" and let me know how this request differs from -005768, #1 & #2, which seem to request the same information.

Please call me with any questions at 212-637-4427 (or e-mail works).

Re: Diamond Alkali – Lower Passaic River Study Area/CPG FOIA Requests

Dear Bill:

This will respond to your letter dated June 17, 2014 referring to the four Freedom of Information Act ("FOIA") requests that the Cooperating Parties Group ("CPG") has submitted to EPA in the last two months (the most recent submitted on June 17, 2014, the date of your letter) and asking that EPA expedite its response to some portions of the requests.

Your letter expresses concern with the time required for EPA to prepare a complete response to all four FOIA requests. Putting aside the request that was submitted just two days ago, it can be observed that the first three requests, taken together, include over 20 items, some seeking specific information in very specific formats, and some seeking very broad categories of information that will require searching years' worth of electronic and paper files. Moreover, submitting three broad information requests in close succession has increased the administrative and logistical burden in responding to the requests.

Nonetheless, EPA has processed the CPG's FOIA requests in a timely manner. EPA has already provided responsive information and has informed you of our currently-anticipated schedule for providing additional information. EPA released information on May 27, 2014 in response to your first request (EPA-r2-2014-005758) and your second request (EPA-r2-2014-006018), and on June 17, 2014 in response to your third request (EPA-r2-2014-006476). In doing so, we have addressed three of the four items you identify as the CPG's priorities:

- EPA provided information responsive to the second priority identified in your June 17, 2014 letter, which is #7 in your third FOIA request. Alice Yeh's letter to Rob LaGravenis, released as part of the interim response on June 17, 2014, informed the CPG that information responsive to #7 publicly available in Table 3-3 of Data Evaluation Report Number 2 in Appendix A of the Remedial Investigation and Focused Feasibility Study ("RI/FFS").

- EPA provided information responsive to the third priority identified in your June 17, 2014 letter, which is #3 in your first FOIA request. Ms. Yeh's letter to Mr. LaGravenis, released as part of the interim response on May 27, 2014, informed the CPG that data files requested in #3 are posted in the Digital Library on OurPassaic.org, under "Passaic River/Newark Bay Datasets." EPA explained that the sample identification numbers and associated information needed to create the ProUCL input files are in Attachment 1 to Appendix D to the RI/FFS.

- EPA provided information responsive to the fourth priority identified in your letter, which is #4 in your first FOIA request. Ms. Yeh's letter to Mr. LaGravenis, released as part of the interim response on May 27, 2014, informed the CPG that the technical basis requested in #4 is provided in Table 5-2 and associated text in Appendix D to the RI/FFS. EPA provided the model files and results to the CPG in March 2014.

Your letter states that the information that EPA has provided is "of limited value." This statement is puzzling, since EPA is merely responding to the CPG requests; as noted, we have addressed three of your top four priorities, and we expect to address the fourth one shortly. EPA will continue gathering, reviewing and releasing information responsive to the CPG's FOIA requests as we have been doing.

As to whether the CPG "requires EPA's full and complete response" to all its FOIA requests in order to prepare comments on the Proposed Plan for the Lower Eight Miles, you made similar assertion in your letters to Judith Enck and Walter Mugdan, dated May 15, 2014 and May 27, 2014, respectively. However, as stated by Mr. Mugdan, the CPG's submission of multiple FOIA requests is not a basis for extending the comment period. The Proposed Plan and the documents in the administrative record file (where a number of the documents requested by the CPG are found) should inform the CPG and the public about the alternatives that EPA has evaluated, including EPA's preferred alternative.

Sincerely,

Sarah P. Flanagan

Re: Diamond Alkali – Lower Passaic River Study Area/CPG FOIA Requests

Dear Bill:

This will respond to your letter dated November 4, 2014 referring to four Freedom of Information Act ("FOIA") requests that the Cooperating Parties Group ("CPG") submitted to EPA in the April-June 2014 time frame. Your letter expresses the CPG's dissatisfaction with EPA's responses to those requests.

EPA has been working diligently to respond to the CPG's FOIA requests, along with other FOIA requests we have received related to the Lower Passaic River Study Area ("LPRSA"). A number of these, including some submitted by the CPG, have required us to review many thousands of documents. This has led to extended review periods for some requests. Moreover, EPA is responding through FOIAonline, the web-based application that EPA is now obliged to use. While FOIAonline can be a convenient mechanism for making information available, technical difficulties associated with use of this application have sometimes delayed releases of information.

Your letter notes the discrepancy between the date of the final letter issued with respect to CPG FOIA request EPA-R2-2014-005768, which constituted a partial denial, and the date that you received the letter. The discrepancy was the result of difficulties associated with the use of FOIAonline, which delayed the final release of information and the denial letter. We did not "backdate" the letter, as you state in your appeal (received November 12, 2014 in Region 2), but it is the case that the letter was not re-dated to account for the delay associated with the final release. The approach outlined in the CPG's FOIA appeal – i.e, submitting the appeal on November 7, 2014 with the intention of supplementing it by November 28, 2014, should the CPG determine that it does wish to pursue this course of action – is reasonable.

Regarding CPG FOIA request EPA-R2-2014-006018, your letter asks if EPA will be able to complete our response by the end of November, 2014. That is our intention. For your information, this request, which asks for "any and all emails, correspondence and other

documents relating to (1) EPA's 2008 Conceptual Site Model ("CSM") and Empirical Mass Balance Model ("EMBM") developed as part of the LPRSA lower 8 mile Focused Feasibility Study ("FFS") and any comments, revision or changes to the CSM that were considered by EPA in the development and issuance of the Proposed Plan for the lower 8 miles of the LPRSA; and (2) EPA's June 2008 peer review of the CSM and EMBM," required Region 2 to review close to 10,000 potentially responsive documents.

Regarding CPG FOIA request EPA-R2-2014-006476, your letter indicates that the CPG is dissatisfied with the information that EPA has released to date comprising communications between "any member of the public and Judith Enck, including any alter egos or aliases of Administrator Enck" regarding the LPRSA. You ask that EPA confirm that no "substantive email communications between Judith Enck and members of the community" exist. Region 2 has provided information responsive to this FOIA request, and we continue to review and provide responsive information. Opining whether the communications we release are substantive or not seems to go beyond the scope of our FOIA review. The CPG also asks for the date by which Region 2 will complete its response to this request. We anticipate that we will be able to complete our response by December 31, 2014. We are planning to release additional documents in the interim. For your information, this FOIA request resulted in a collection of over 10,000 documents, and at least 7,000 remain to be reviewed.

Finally, regarding CPG request EPA-R2-2014-007546, your letter states that EPA did not provide certain specific information that the CPG requested "on the basis for NJDEP's trigger levels for dioxin or mercury." Region 2 completed its response to this FOIA request, as set forth in its letter dated July 1, 2014, which the CPG reportedly received July 14, 2014. All responsive information identified in our search was released.

I hope this information is helpful.

Sincerely,

Sarah P. Flanagan

Re: Freedom of Information Act (FOIA) Request EPA-R2-2014-005768

Dear Mr. La Gravenis:

The U.S. Environmental Protection Agency (EPA) is uploading information responsive to your FOIA request EPA-R2-2014-005768 to FOIAonline, as an interim response. As we discussed on May 9, 2014, I will be sending you responses to this FOIA request in installments, as the information is compiled. I estimate that it may take until the end of July 2014 to respond to this FOIA request. Should you wish to modify the request so that it can be processed within a shorter time frame, please do so through FOIAonline. You will receive a bill for collection through FOIAonline of all of EPA's costs for responding to this FOIA at the time of the final submission.

The information uploaded with this letter is responsive to #5, #6, #7 and #12 of Attachment A to your FOIA request. Information responsive to the following requests in Attachment A are already publicly available, as described below:

- The data files requested in #3 and #14 are posted in the Digital Library on ourPassaic.org, under "Passaic River/Newark Bay Datasets". Sample identification numbers and associated information needed to recreate the ProUCL input files are provided in Attachment 1 of Appendix D of the Remedial Investigation and Focused Feasibility Study (RI/FFS).
- The technical basis requested in #4 is provided in Table 5-2 and associated text in Appendix D of the RI/FFS. Model files and results were already provided to the Cooperating Parties Group in March 2014.
- The technical basis requested in #10 is provided in Appendix B of the RI/FFS. Modeling files and results were already provided to the Cooperating Parties Group in March 2014.

Please call me with any questions at 212-637-4427.

Sincerely yours,

Alice Yeh

To: La Gravenis, Robert Paul
Subject: RE: FOIA #EPA-R2-2014-005768

This is to let you know that we have completed review of thousands of documents for responsiveness to this FOIA request and will be uploading responsive and releasable materials to FOIAOnline next week. However, due to the volume of materials to be released and withheld, we will need a few more days to complete everything. I estimate that the new completion date for this FOIA will be 10/3/2014.

To: 'La Gravenis, Robert Paul'
Subject: FOIA #EPA-R2-2014-005768

In my May 22, 2014 letter to you, I estimated that it might take until the end of July 2014 to respond to FOIA request EPA-R2-2014-005768. To date, we have released to you information responsive to all of the questions in the FOIA request, except for numbers 8, 9 and 11 (and number 13, which was withdrawn). We have also compiled the documents that might be responsive to the remaining questions and are reviewing them. Given the volume of documents under review, I am revising my completion date estimate to the end of August 2014, although we may be able to release additional documents before that time.

Please let me know if you have any questions.

Re: Lower Passaic River CPG, Case No. 15-CV-7828 (JLL)(JAD)

Dear Mr. Smith:

As part of the Agency's review of its response to your FOIA Requests EPA-R2-2014-005768 and EPA-R2-2014-006018, which are, in part, the subject of the above-captioned case, the EPA is releasing additional information to you. This information consists of internal documents that were determined to be releaseable in full or in part as part of the Agency's secondary review of withheld records. This information has been released at the Agency's discretion. The EPA is also providing 21 files that were responsive to your FOIA request EPA-R2-2014-006476 which were not previously produced due to a technical error. These documents were released in full.

Please contact Kristin Vassallo, Assistant United States Attorney, at (973) 645-2835, if you have any questions about this document production.

Sincerely,

Jennifer Hammitt

Re: Lower Passaic River Study Area

Dear Sarah:

As you know, our firm represents the Cooperating Parties Group ("CPG") with respect to the Lower Passaic River Study Area ("LPRSA"). I am writing to follow-up on four FOIA requests submitted by the CPG: [EPA-R2-2014-005758 - 04/21/14 ("First Request"); EPA-R2-2014-00618 - 04/28/14 ("Second Request"); EPA-R2-2014-006476 - 05/14/14 (amended on 05/15/14) ("Third Request"); and EPA-R2-007546 - 06/17/14 ("Fourth Request")) related to EPA's Proposed Plan for the lower eight miles of the LPRSA ("Proposed Plan"). To date, EPA has provided partial responses to the First and Second Requests. However, the information provided by EPA is of limited value and in many instances includes documents submitted by the CPG to EPA.

The EPA's response is very concerning as the information requested should be part of EPA's underlying data/analysis, and accordingly, should have been part of the publicly available administrative record so that interested stakeholders could fully understand, evaluate and reproduce EPA's results. For example, it is troubling that EPA cannot readily and immediately provide the underlying calculations and data set used to calculate biota sediment accumulation factors that are used in its Proposed Plan. The CPG requires EPA's full and complete response to all of its information requests in order to evaluate the Proposed Plan and prepare comments during the public comment period. Without waiving its right to receipt of a full and complete response from EPA, the CPG has identified the below items as priorities and requests that EPA expedite the portions of its response related to:

1. An Access or Excel file containing each normalized tissue and sediment concentration data pair (with units, basis and data qualifiers) used to generate a regression model, Biota-Sediment Accumulation Factor (BSAF) curve or Biota Accumulation Factor (BAF) curve presented in Final FFS Appendix A, Data Evaluation Report 6 (Biota Analysis). The Access or Excel file should identify, for each biota tissue sample location, all tissue and sediment sample IDs used to generate the normalized tissue and sediment concentration data pair for that location

2. Sample IDs (including coordinates) and chemistry data for the four core samples, four grab samples and two dam catchment samples used by EPA to define upriver (above the dam) surface sediment background conditions.

3. Data files, including database query output (e.g., sample ID, analytical results, qualifiers) and ProUCL input file, for tissue samples included in current baseline Human Health Risk Assessment (HHRA) fish and crab tissue Exposure Point Calculations (EPC).

4. Technical bases (analyses, calculations, model files and results, and any other relevant materials) for EPA's sliding scale of annual averages based on receptor exposure duration (used to estimate future concentrations).

Please do not hesitate to contact me if you have any questions.

Very truly yours,

William H. Hyatt, Jr.

Re: Lower Passaic River Study Area

Dear Sarah:

This will respond to your letter dated June 19, 2014 regarding the four Freedom of Information Act ("FOIA") requests submitted by the Cooperating Parties Group ("CPG") with respect to EPA's April 2014 Proposed Plan and supporting Focused Feasibility Study ("FFS"): EPA-R2-2014-005768 - 4/21/14 ("First Request"); EPA-R2-2014-00618 - 4/28/14 ("Second Request"); EPA-R2-2014-006476 - 5/14/14 (amended 5/15/14) ("Third Request"); and EPA-R2-2014-007546 - 6/17/14 ("Fourth Request"). The purpose of this letter is to review the status of each of the FOIA requests and information that remains outstanding as of today's date.

At the outset, and as a point of clarification, the CPG's concern with the "value" of the documents is due to the nature of the documents being released. Many of the documents that EPA has provided are not responsive to the requests. Furthermore, as detailed herein, EPA has failed to provide critical information related to the FFS. The following items are only meant to be examples and do not include an exhaustive list of the inadequacies in EPA's responses:

- First Request - By email dated May 22, 2014, EPA advised that it would take until the end of July 2014 to respond to this FOIA request. On June 27, 2014, EPA produced an interim release of documents. By email dated July 24, 2014, EPA revised the estimated completion date to end of August 2014. By email dated August 28, 2014, EPA revised the estimated completion date to the end of September 2014. EPA's email further indicates that information responsive to all

of the questions in the FOIA request has been released, except 8, 9, and 11 (number 13 was withdrawn as duplicative). The CPG disagrees with this conclusion. For example, EPA has not provided information responsive to questions 1 and 2, which relate to the generation of a bioaccumulation regression model, BSAF curve or BAF curve presented in the FFS and its appendices. The bioaccumulation calculations used by the Region are a critical component of the prediction of future recovery and risk estimates for consumption of fish and crabs by the public; the incomplete information provided in the Region's April 2014 FFS and Proposed Plan make it impossible for any interested stakeholder to verify the correctness of the calculations provided in these documents. Moreover, it is essential that interested parties are able to independently verify the calculations since the Region deviated from its own 2006 Modeling Work Plan for bioaccumulation modeling in the Lower Passaic River Study Area. Appendix E of the CPG's August 20, 2014 comments provides detail as to how the CPG or any other interested party are unable to adequately review and provide timely comments on the Region's bioaccumulation calculations.

- Second Request - By email dated May 27, 2014, EPA notified the CPG of an interim release of documents. The email also attached a May 22, 2014 letter advising that EPA would need until the end of September to complete this FOIA request. This request related to: (1) EPA's 2008 CSM and EMBM; and (2) the June 2008 peer review of the CSM and EMBM. While EPA has provided the 2008 CSM Peer Review, the CPG has not yet received the 2008 CSM.

- Third Request - By email dated May 20, 2014, EPA advised that it would be providing information in installments and estimated that it would take until the end of September to fully respond to the request. On June 17, 2014, EPA provided a partial response to questions 2, 3, 5 and 7. The CPG does not believe that it has received any documents responsive to question 2, which seeks information regarding EPA's authority to spend funds on the FFS. Instead, EPA has produced a series of "Commitment Notices" regarding costs to be incurred. Additionally, the information responsive to question 5 consists of only a few photographs and a sign-in sheet. No video or transcript of the hearing has been provided, even though the CPG is aware that the event was videotaped. Finally, while the information responsive to the remaining requests may be forthcoming, the CPG has not yet received any comments from the federal natural resource trustees to the NRRB, nor has it received any documentation related to designation of the Diamond Alkali Superfund Site as separate operable units.

- Fourth Request - By email dated July 14, 2014, EPA notified the CPG that EPA had fully responded to the request. However, the documents provided do not provide the requested information on the basis of NJDEP's trigger levels for dioxin or mercury. This aspect of the FOIA request has not been addressed.

CPG reiterates its belief that most, if not all, of these documents should have been considered by EPA as part of its supporting analysis in preparation of the Proposed Plan and FFS. Therefore, this information should have been part of the administrative record. Therefore, the CPG reserves all rights and defenses with respect to payment of any FOIA-related costs. Additionally, because the information should have been part of the administrative record -- but was not -- the CPG, and other members of the public, were not able to adequately comment on all aspects of the Proposed Plan and FFS.

Very truly yours,

William H. Hyatt, Jr.

Newark, New Jersey 07102-5252

Re: Freedom of Information Act (FOIA) Request EPA-R2-2014-005768

Dear Mr. La Gravenis:

This will respond to your Freedom of Information Act ("FOIA") request EPA-R2-2014-005768 seeking documents as set forth in Attachment A to your FOIA requested, modified by the subsequent withdrawal of #13 as duplicative. This completes our response.

Previously, on May 27, 2014, EPA released information responsive to #5, #6, #7 and #12 of Attachment A to your FOIA request, and directed you to information either already provided to the Cooperating Parties Group (CPG), or that was already publicly available, responsive to #3, #4, #10 and #14 of your request.

The second and final release, uploaded to FOIAonline on October 3, 2014, included information responsive to #1, #2, #6, #7, #8, #9 and #11 of Attachment A. The document entitled BSAF Tissue Sediment Data, responsive to #1 and #2, was also made available to the public on ourpassaic.org in July 2014.

EPA is withholding certain responsive information that is exempt from disclosure as set forth on the enclosed withholding log.

You may appeal this denial response to the National Freedom of Information Officer, U.S. EPA, FOIA and Privacy Branch, 1200 Pennsylvania Avenue, N.W. (2822T), Washington, D.C. 20460 (U.S. Postal Service Only), E-mail: hq.foia@epa.gov. Only items mailed through the United States Postal Service may be delivered to 1200 Pennsylvania Avenue, N.W. If you are submitting your appeal via hand delivery, courier service or overnight delivery, you must

address your correspondence to 1301 Constitution Avenue, N.W., Room 6416J, Washington, D.C. 20004.

Your appeal must be made in writing, and it must be submitted no later than 30 calendar days from the date of this letter. The Agency will not consider appeals received after the 30 calendar day limit. The appeal letter should clearly identify the determination being appealed, including the assigned FOIA request number shown above. For quickest possible handling, the appeal letter and its envelope should be marked "Freedom of Information Act Appeal." See 40 C.F.R. §2.104(j) for further information regarding appeals of adverse determinations under FOIA.

Pursuant to 40 C.F.R. § 2.107, EPA will transmit a bill for the costs incurred by EPA in searching our files, reproducing documents, and preparing our response to your FOIA request, which total $3,360. You should receive the bill through FOIAonline, along with instructions for payment.

Please contact Sarah Flanagan of my staff at 212-637-3136 if you have any questions concerning this matter.

Sincerely yours,

Eric Schaaf
Regional Counsel

Re: Freedom of Information Act (FOIA) Request EPA-R2-2014-006018

Dear Mr. La Gravenis:

The U.S. Environmental Protection Agency (EPA) is uploading information responsive to your FOIA request EPA-R2-2014-006018 to FOIAonline, as an interim response. As we discussed on May 9, 2014, I will be sending you responses to this FOIA request in installments, as the information is compiled. I estimate that it may take until the end of September 2014 to respond to this FOIA request. Should you wish to modify the request so that it can be processed within a shorter time frame, please do so through FOIAonline. You will receive a bill for collection through FOIAonline of all of EPA's costs for responding to this FOIA at the time of the final submission.

Please call me with any questions at 212-637-4427.

You will have seen that an interim response consisting of over 400 documents was uploaded to FOIAOnline on 10/20/14. Due to the volume of documents that remain to be reviewed, I am revising my completion date estimate for this FOIA request to the end of November.

Please let me know if you have any questions.

To: 'La Gravenis, Robert Paul'
Subject: FOIA #EPA-R2-2014-006018

We are reviewing almost 10,000 documents that might be responsive to this FOIA request, but given the volume of documents that remain to be reviewed, I am revising my completion date estimate to the end of October. We will be uploading a group of documents to FOIAOnline next week as an interim response.

Please let me know if you have any questions.

Re: Lower Passaic River Study Area

Dear Sarah:

I am writing in follow-up to my September 19, 2014 letter regarding four Freedom of Information Act ("FOIA") requests submitted by the Cooperating Parties Group ("CPG") with respect to EPA's April 2014 Proposed Plan and supporting Focused Feasibility Study ("FFS"): EPA-R2-2014-005768 - 4/21/14 ("First Request"); EPA-R2-2014-006018 - 4/28/14 ("Second Request"); EPA-R2-2014-006476 - 5/14/14 (amended 5/15/14) ("Third Request"); and EPA-R2-2014-007546 - 6/17/14 ("Fourth Request").

The purpose of this letter is to review the status of each of the FOIA requests and information that remains outstanding as of today's date. The following items are only meant to be examples and do not include an exhaustive list of the inadequacies in EPA's responses:

- First Request - By email dated October 3, 2014, EPA notified the CPG that additional documents were available in response to this request. By email dated October 29, 2014, EPA provided a letter dated October 10, 2013, which states that EPA has now fully responded to this request, except for certain documents that EPA claims are exempt from FOIA. The CPG is in the process of reviewing these additional materials, which contain over 400 documents, but currently does not believe that EPA has adequately and fully responded to this request. Therefore, the CPG will be filing an appeal in accordance with the October 10, 2014 letter.

- Second Request - By email dated October 20, 2014, EPA notified the CPG of an interim release of documents, which included a Mass Balance Modeling Analysis dated 2014 and other correspondence. This request related to: (1) EPA's 2008 CSM and EMBM; and (2) the June 2008 peer review of the CSM and EMBM. While EPA has provided the 2008 CSM Peer Review, the CPG has not yet received the 2008 CSM. EPA has also indicated that the completion date for this request has been extended to the end of November. Please confirm that this document will be provided by the extended due date.

K&L|GATES

- Third Request - In addition to the issues outlined in my September 19 letter, the CPG has not received any substantive email communications between Judith Enck and members of the community (on either personal or official email accounts), with the exception of scheduling related issues for a CAG meetings. Please confirm that no such emails exist. Also, please confirm the estimated completion date for this request.

- Fourth Request - By email dated July 14, 2014, EPA notified the CPG that EPA had fully responded to the request. However, the documents provided do not provide the requested information on the basis of NJDEP's trigger levels for dioxin or mercury. This aspect of the FOIA request has not been addressed. Please confirm whether or not such information is available.

CPG reiterates its belief that most, if not all, of these documents should have been considered by EPA as part of its supporting analysis in preparation of the Proposed Plan and FFS. Therefore, this information should have been part of the administrative record. Therefore, the CPG reserves all rights and defenses with respect to payment of any FOIA-related costs. Additionally, because the information should have been part of the administrative record -- but was not -- the CPG, and other members of the public, were not able to adequately comment on all aspects of the Proposed Plan and FFS.

Very truly yours,

William H. Hyatt, Jr.

Re: Freedom of Information Act (FOIA) Request EPA-R2-2014-006018

Dear Mr. La Gravenis:

This will respond to your Freedom of Information Act ("FOIA") request EPA-R2-2014-006018 seeking emails, correspondence, and other documents relating to: (1) EPA's 2008 Conceptual Site Model ("CSM") and Empirical Mass Balance Model ("EMBM") developed as part of the LPRSA lower 8 mile Focused Feasibility Study ("FFS") and any comments, revisions or changes to the CSM that were considered by EPA in the development and issuance of the Proposed Plan for the lower 8 miles of the LPRSA; and (2) EPA's June 2008 peer review of the CSM and EMBM.

EPA previously released information responsive to this request on May 27, 2014 through FOIAonline. Additional responsive information was released through FOIAonline between October 20, 2014 and December 9, 2014. This completes our response.

In addition to the information released, EPA is withholding certain responsive information that is exempt from disclosure as set forth on the enclosed withholding log. Where it was possible to segregate nonexempt information from the privileged portions of a responsive document, we have done so. However, segregation was not possible as to a number of the documents. *See, e.g., Horowitz v. Peace Corps,* 428 F.3d 271, 277 (D.C. Cir. 2005)(protecting document where decision maker's thought processes are woven into document to such an extent that any attempt at segregating information would reveal agency deliberations). Where EPA is asserting the deliberative process privilege (embodied within FOIA exemption 5, 5 U.S.C. § 552(b)(5)) as to documents on the log, that is because the documents are internal communications that are both predecisional and deliberative in nature, and release would have a chilling effect on EPA's ability to conduct frank internal discussions as part of a decision-making process, as well as

contribute to public confusion that might result from disclosure of reasons and rationales that were not in fact ultimately the grounds for an agency's action.

You may appeal this denial response to the National Freedom of Information Officer, U.S. EPA, FOIA and Privacy Branch, 1200 Pennsylvania Avenue, N.W. (2822T), Washington, D.C. 20460 (U.S. Postal Service Only), E-mail: hq.foia@epa.gov. Only items mailed through the United States Postal Service may be delivered to 1200 Pennsylvania Avenue, N.W. If you are submitting your appeal via hand delivery, courier service or overnight delivery, you must address your correspondence to 1301 Constitution Avenue, N.W., Room 6416J, Washington, D.C. 20004.

Your appeal must be made in writing, and it must be submitted no later than 30 calendar days from the date of this letter. The Agency will not consider appeals received after the 30 calendar day limit. The appeal letter should clearly identify the determination being appealed, including the assigned FOIA request number shown above. For quickest possible handling, the appeal letter and its envelope should be marked "Freedom of Information Act Appeal." See 40 C.F.R. §2.104(j) for further information regarding appeals of adverse determinations under FOIA.

Pursuant to 40 C.F.R. § 2.107, EPA will transmit a bill for the costs incurred by EPA in searching our files, reproducing documents, and preparing our response to your FOIA request. You should receive the bill through FOIAonline, along with instructions for payment.

Please contact Sarah Flanagan of my staff at 212-637-3136 if you have any questions concerning this matter.

Sincerely yours,

Eric Schaaf
Regional Counsel

Subject: FOIA Request #EPA-R2-2014-006476

This is to confirm our phone conversation just now about your Freedom of Information Act (FOIA) request #EPA-R2-2014-006476.

We estimate that the cost of responding to this FOIA request will be approximately $1000. I will wait until you agree to pay costs up to this amount before responding to the request. You will receive bills for the actual amounts EPA spends in responding to the request after we have responded. If costs exceed those estimated, I will call you again with a new estimate and ask for your agreement to any new limits.

Also, I will be sending you responses to the requests in installments in the future. We estimate that it may take until the end of September 2014 to respond to this FOIA request. Should you with to modify the request so that it can be processed within a shorter time frame, please do so through FOIAOnline.

Finally, I asked for clarification on the following 2 items in the request:

#4) Please clarify what "any other person purporting to be a representative of the community" means.
#5) Please confirm whether you meant "Any petitions available for signature during the Hearing."

Re: Freedom of Information Act (FOIA) Request EPA-R2-2014-006476

Dear Mr. La Gravenis:

The U.S. Environmental Protection Agency (EPA) is uploading information responsive to your FOIA request EPA-R2-2014-006476 to FOIAonline, as an interim response. As described in my May 20, 2014 e-mail to you, I will be sending responses to this FOIA request in installments, and I estimate that it may take until the end of September 2014 to respond to this FOIA request. Should you wish to modify the request so that it can be processed within a shorter time frame, please do so through FOIAonline. You will receive a bill for collection through FOIAonline of all of EPA's costs for responding to this FOIA at the time of the final submission.

The information uploaded with this letter is responsive to #2, #3 and #5 of Amended Attachment A to your FOIA request. Information responsive to #7 in Amended Attachment A is already publicly available in Table 3-3 of Data Evaluation Report Number 2 in Appendix A of the Remedial Investigation and Focused Feasibility Study.

Please call me with any questions at 212-637-4427.

Re: Freedom of Information Act (FOIA) Request EPA-R2-2014-006476

Dear Mr. La Gravenis:

This will respond to your Freedom of Information Act ("FOIA") request EPA-R2-2014-006476 seeking information as set forth in Attachment A to your FOIA request. EPA released information responsive to your FOIA request through FOIAonline on June 17, 2014. The balance of the responsive information is enclosed herein on a DVD, and will be uploaded to FOIAonline in the coming days. This completes EPA's response.

EPA is withholding one responsive document: a submission to the National Remedy Review Board by the federal natural resource trustees, National Oceanic and Atmospheric Administration, and Fish and Wildlife Service of the Department of the Interior. That document is exempt from disclosure under FOIA Exemption 5, 5 U.S.C. § 552(b)(5), because it is predecisional and deliberative. Where it was possible to segregate nonexempt information from the privileged portions of a responsive document, we have done so. However, segregation was not possible as to this document. *See, e.g., Horowitz v. Peace Corps,* 428 F.3d 271, 277 (D.C. Cir. 2005)(protecting document where decision maker's thought processes are woven into document to such an extent that any attempt at segregating information would reveal agency deliberations). The document is a communication from EPA's partner federal agencies, the release of which would have a chilling effect on EPA's ability to conduct frank internal discussions as part of a decision-making process, as well as contribute to public confusion that might result from disclosure of reasons and rationales that were not in fact ultimately the grounds for an agency's action.

You may appeal this denial response to the National Freedom of Information Officer, U.S. EPA, FOIA and Privacy Branch, 1200 Pennsylvania Avenue, N.W. (2822T), Washington, D.C. 20460

EXHIBIT X

Key to Coded Vaughn Index and Substantive Descriptions – CPG First FOIA Request

Category 1: Communications and documents exchanged between Region 2, EPA Headquarters, and the NRRB, including technical documentation undergoing attorney review– 50 Docs

Documents Withheld in Full

- Deliberative Process; Attorney Client; Attorney Work Product – 31 Docs
- Deliberative Process Privilege Only – 18 Docs

Documents Released in Full after Review

- 1 Doc

Category 1 consists of documents responsive to sub-request #8 of the CPG's FOIA request. Sub-request #8 asked for any correspondence between EPA Region 2 and the National Remedy Review Board (NRRB) since the group's comments were submitted in Nov. 2012 and issuance of the NRRB/Contaminated Sediments Technical Advisory Group (CSTAG) final comments on April 11, 2014.

Documents within Category 1 consist of email communications and attached documents exchanged between EPA Region 2 staff and the NRRB, draft technical documents prepared by EPA Region 2 for NRRB review and comment, and draft technical documents prepared by NRRB for EPA Region 2 review and comment. This correspondence and the reviewed documents include comments from EPA Region 2 technical staff, EPA Region 2 attorneys, and members of the NRRB (including technical staff and attorneys) and the CSTAG discussing aspects of the preferred alternative for the lower 8.3 miles of the Lower Passaic River part of the Diamond Alkali Superfund Site. These documents include comments on and discussion of an NRRB-authored Memorandum which contains the evaluation of the NRRB of a draft, internal "Technical Memorandum," which was submitted by EPA Region 2 to the NRRB and CSTAG for their internal comment and review. The NRRB and CSTAG reviewed the technical memorandum to evaluate whether the preferred alternative to be included in the proposed plan would be consistent with law, EPA policies, and EPA guidance. Drafts of the NRRB/CSTAG Memorandum and comments on those drafts were generally exchanged and discussed between January and May 2013; drafts of the Regional response to the NRRB/CSTAG Memorandum and comments on those drafts were generally exchanged and discussed between January and March 2014.

The final NRRB/CSTAG Memorandum dated April 11, 2014 and EPA Region 2's final response to the memorandum dated April 11, 2014 are part of the administrative record for the lower 8.3 miles of the Lower Passaic River / Diamond Alkali Superfund site and are publicly available. The documents withheld in Category 1 consist of the internal exchanges and drafts, including drafts with comments, between EPA Region 2 and EPA NRRB / CSTAG to develop and review the NRRB/CSTAG Memorandum and Region 2 response.

Justification for Withholdings
The withheld documents and email communications are deliberative because they contain the candid views of EPA Regional staff, EPA attorneys and EPA NRRB/CSTAG staff on the Region's preferred alternative to be included in the Proposed Plan, the NRRB/CSTAG Memorandum and the Region's response to the NRRB before the finalization of these documents. This draft material and the accompanying comments were circulated to EPA staff for input and comment prior to the finalization of the Agency's Proposed Plan and Record of Decision. This information is predecisional because it contains EPA staff's analysis, opinions, and recommendations related to the development of the Agency's final selection of the remedy for the lower 8.3 miles of the Lower Passaic River part of the Diamond Alkali Superfund Site and the Memorandum supporting the selection. This material also includes communications between EPA Region 2 staff and the NRRB providing editorial comments on draft documents, suggesting edits to draft documents, planning and preparing discussion questions and agendas, and otherwise engaging in the internal review process of the Memorandum and Response documents. These email communications are predecisional because they contains EPA staff's editorial suggestions, memorialization of meeting agendas and issues discussed, EPA staff opinions on potential issues to highlight, and recommendations related to the development of the Agency's final documentation. The withheld information does not represent an official Agency decision or policy, and instead, the withheld information reflects comments, opinions, and views on options in development. The withheld documents were not circulated by the Agency outside the federal government. Release would have a chilling effect on the Agency's ability to have frank, internal discussions among its staff, including frank discussions with internal review bodies such as the NRRB, about proposed Agency actions in advance of the final decision on remedy. In addition, revealing these preliminary drafts and deliberations would create public confusion surrounding the reasons and rationales that were not in fact ultimately the grounds for the Agency's Proposed Plan for the lower 8.3 miles of the Lower Passaic River part of the Diamond Alkali Superfund Site. In addition, these documents were withheld because they contain legal advice and analysis protected under the Attorney-Client and Attorney Work Product Privileges. The 31 documents withheld in full under the Deliberative Process, Attorney Client, and Attorney Work Product Privileges include memoranda and other documents written by technical staff with comment and advice from Region 2 attorneys. These documents were prepared to support the issuance of the Proposed Plan and Record of Decision, and to finalize and incorporate Agency advice on the Technical Memorandum and response. They include Region 2's analysis of the hazardous substances in the sediment of the Passaic River, and the risk associated with those substances, as well as EPA Region 2's technical proposals for cleanup under its CERCLA (Superfund) authority. These documents incorporate legal advice from EPA attorneys to program staff and managers concerning the interpretation of CERCLA and its implementing regulations and guidance. The disclosure of such communications would deprive EPA staff, and the agency in general, of the benefit of confidential advice from EPA attorneys when developing remedies, including guidance on the legal and regulatory adequacy of proposed remedies.

Finally, these documents contain information protected by the attorney work product privilege. The attorney work product privilege extends to documents prepared by an attorney, by the attorney's client, or a representative of the attorney or the attorney's client, in anticipation of litigation. These documents were prepared with the knowledge that litigation had already transpired in New Jersey state court related to the contamination in the Passaic River, and that EPA reasonably anticipates litigation after EPA issued the Record of Decision for the lower 8.3 miles of the river. As such, legal counsel in Region 2 have all been deeply involved in commenting on and directing changes to EPA staff's technical analyses, to ensure that the materials would be legally sufficient to withstand any challenge. Many of these materials may be used to support Region 2's enforcement against responsible parties, including the decision of whether to issue a notice letter to a party advising it of its legal responsibility for the site, and the decision to issue an order to one or more parties, and/or prepare a referral to DOJ, to file a complaint against one or more parties. All of these analyses require the selection and assessment of specific facts and data and are based on the mental impressions of EPA attorneys and staff working at these attorneys' direction. These attorneys direct staff to consider various factors to assist in refining their analysis, given these attorneys' understanding of CERCLA, the NCP and current case law. These technical analyses will form part of the basis for negotiation of an enforcement document with PRPs for the site, as well as EPA and DOJ's decision to file a civil judicial complaint should that be necessary. Release of the confidential information contained in such documents would allow external scrutiny of EPA's sensitive litigation preparations and deprive EPA attorneys of the ability to keep their thoughts and mental impressions from being discovered by an opponent in litigation.

The EPA performed a line-by-line review of the withheld material. There is no reasonably segregable factual information to be released from this material. Factual information contained within these withheld documents was determined to be inextricably intertwined with the privileged information, and could not be reasonably segregated to be released under FOIA from the attorney-client information, attorney work product, predecisional and deliberative information. The final NRRB/CSTAG Memorandum and EPA Region 2's final response to the memorandum, which were the subject of the discussion, comments, and review described in Category 1 are part of the administrative record for the lower 8.3 miles of the Lower Passaic River part of the Diamond Alkali Superfund site and are publicly available.

Category 2 consists of documents responsive to sub-request #8 of the CPG's FOIA request. Sub-request #8 asked for any correspondence between EPA Region 2 and the National Remedy Review Board (NRRB) since the group's comments were submitted in Nov. 2012 and issuance of the NRRB/Contaminated Sediments Technical Advisory Group (CSTAG) final memorandum on April 11, 2014.

The EPA withheld 11 documents in full and two documents in part within Category 2. These documents consist of email communications and attached documents exchanged among EPA Region 2 technical and legal staff and EPA Headquarters technical and legal staff who are members of the NRRB and CSTAG, in some instances with copies to other members of the NRRB in EPA regional offices. The NRRB is an EPA-internal peer review group that reviews proposed Superfund cleanup decisions of significant size to make sure they are consistent with Superfund law, regulations and guidance. CSTAG is an EPA-internal advisory group that advises EPA regional project managers on how to appropriately manage sediment sites in accordance with EPA guidance. NRRB and CSTAG often meet jointly to review the preferred alternative to be included in the Proposed Plan before it is publicly issued.

The withheld documents in Category 2 consist of email communications and attached documents exchanged among EPA Region 2 technical staff, EPA Region 2 attorneys, EPA Headquarters technical staff and EPA Headquarters attorneys discussing the aspects of the preferred alternative for the lower 8.3 miles of the Lower Passaic River. These documents include comments on and discussion of an NRRB/CSTAG-authored Memorandum which contains the evaluation of the NRRB of a draft, internal "Technical Memorandum," which was submitted by EPA Region 2 to the NRRB and CSTAG for their internal comment and review. The NRRB and CSTAG reviewed the technical memorandum to evaluate whether the preferred alternative to be included in the proposed plan would be consistent with law, EPA policies, and EPA guidance. Drafts of the NRRB/ CSTAG -authored Memorandum and comments on those drafts were generally exchanged and discussed between January and May 2013; drafts of the Regional response to the NRRB/CSTAG Memorandum and comments on those drafts were generally exchanged and discussed between January and March 2014.

In particular, the withheld documents detail issues that were of concern to Region 2, the NRRB and CSTAG in the development of the NRRB/CSTAG Memorandum and Region 2 response. These concerns were frankly expressed and discussed. These documents include communications that contain attorney views on potential legal and litigation risks presented by the preferred alternative, the NRRB/CSTAG Memorandum and Region 2 response. The documents contain information that would reveal the Agency's process for development of proposed actions such as the Proposed Plan. Therefore, and as described in more detail below, these documents are protected under the deliberative process, attorney-client and attorney work product privileges.

In addition to the above, documents in this category include discussions between Region 2 attorneys and HQ technical staff regarding potential requests from parties outside EPA for deliberative information exchanged between NRRB and Region 2. The final NRRB/CSTAG Memorandum dated April 11, 2014 and EPA Region 2's final response to the memorandum dated April 11, 2014 are part of the administrative record for the lower 8.3 miles of the Lower Passaic River / Diamond Alkali Superfund site and are publicly available. The documents withheld in Category B consist of the internal exchanges and drafts, including drafts with comments, among EPA Region 2 technical staff/attorneys and EPA Headquarters technical staff/attorneys to develop and review the NRRB/CSTAG Memorandum and Region 2 response.
Justification for Withholdings
The documents and email communications within Category 2 are deliberative because they contain individual opinions and analyses of EPA staff, including attorneys and non-attorneys, which address the NRRB/CSTAG memo and Region 2 response. Each of the withheld documents and email communications remained inter- intra-agency. The withheld information has not been shared outside of the federal government. The documents and email communications are all predecisional because they were part of the process leading up to finalized documents. The documents and email communications are also deliberative because they contain back and forth discussions and exchanges of individual opinions that may or may not be incorporated into the final memo and response. Additionally, edits, comments, and feedback on draft documents are deliberative because multiple individuals provide input that are considered and coalesced. Release of this deliberative information may have a chilling effect on agency decision-making processes, and on the Agency's ability to have internal discussions and consultations concerning documents like the NRRB/CSTAG memorandum and Region 2 response. The Agency keeps these deliberative discussions and draft documents internal and does not release them to the public because such information could confuse the public. Some of the discussions, opinions, and analyses were applied to the final memo and others were not. In these withheld documents and email communications, employees' identify points of confusion and make recommendations. Employees need to be open and frank during such processes, and the employees should not have to fear that their candid thoughts, opinions, and points of confusion will be made public. Some emails provide instructions for providing edits, comments and feedback. Other emails contain draft proposed language with edits and suggestions such as strike through text to denote suggested deletions. Similarly, some of the emails contain back and forth discussions about upcoming meetings. This type of work is at its best when employees focus on the substance of their views and not on the likelihood of their sincere professional opinions being made publicly available. Some of the withheld email communications were exchanged between EPA attorneys and their EPA clients (i.e., privileged persons). The withheld information includes, for example, emails sent by EPA Office of Regional Counsel attorneys to other EPA employees to provide legal

advice and statutory and regulatory interpretations and explanations. Agency attorneys frequently counsel their Agency clients about administrative record questions. The communications took place in confidence for the purpose of obtaining and providing legal assistance. The withheld information addresses plans for future EPA communications with CPG attorneys. This information regarding legal issues and strategies remained confidential and internal to EPA. The information is withheld to protect open and frank communications between counsel concerning client-provided information as well as legal advice based on this information. The withheld information was only shared between EPA attorneys and clients with a need to know.

Some of the withholdings protect attorney work product, or material that is prepared by or at the direction of an attorney (i.e., by the attorney's client, or a representative of the attorney or the attorney's client) in anticipation of litigation. These email communications and documents were prepared by attorneys or at the direction of attorneys that knew litigation was underway in New Jersey state court on matters related to the contamination in the Passaic River. These attorneys knew that EPA anticipated additional litigation upon completion of ROD for the lower 8.3 miles of the river. Accordingly, EPA Region 2's Office of Regional Counsel were continuously participating in the preparation of the information and documents that comprise the administrative record to ensure that the materials would withstand forthcoming legal challenges.

The EPA performed a line-by-line review of the withheld material. Wherever possible, the Agency released all reasonably segregable information. In this category, approximately two documents were released with redactions. There is no remaining reasonably segregable factual information to be released. Factual information contained within these withheld and partially withheld documents was determined to be inextricably intertwined with the privileged information, and could not be reasonably segregated to be released under FOIA from the attorney-client information, attorney work product, predecisional and deliberative information.

Category 3 consists of documents responsive to sub-request #9 of the CPG's FOIA request. Sub-request #9 asked for any correspondence between Region 2 and Headquarters on draft versions of the Proposed Plan and Focused Feasibility Study documents. In late 2013 and early 2014, Region 2 submitted drafts of the Proposed Plan to EPA Headquarters for their internal comment and review. EPA Headquarters reviewed the draft Proposed Plan and provided comments on Region 2's basis and explanation for selection of the preferred alternative; to evaluate conformance with EPA policies and guidance; and, where the Region had determined that an aspect of EPA guidance would not apply, to understand the basis for the determination.

EPA withheld all or part of 142 documents under Category 3. These documents consist of email communications and attached documents exchanged between EPA Region 2 legal staff and EPA Headquarters legal staff, with some non-legal staff copied on the emails. These email communications and attached documents include comments from EPA Region 2 attorneys and EPA Headquarters attorneys discussing aspects of the Proposed Plan for the lower 8.3 miles of the Lower Passaic River. Non-attorney staff from Region 2 and EPA Headquarters were occasionally copied on the emails to participate in the discussions, receive advice, and to keep informed on the legal discussions. In particular, these documents detail issues that were of concern to Region 2 attorneys and EPA Headquarters attorneys in the development of the Proposed Plan. These concerns were frankly expressed and discussed. These documents include communications that contain attorney views on potential legal and litigation risks presented by the Proposed Plan, and contain information that would reveal the Agency's process for development of proposed actions such as the Proposed Plan. Therefore, and as described in more detail below, these documents are protected under the deliberative process, attorney-client and attorney work product privileges.

The final Proposed Plan for the lower 8.3 miles was released for public review and comment on April 11, 2014 and is part of the administrative record for the lower 8.3 miles of the Lower Passaic River / Diamond Alkali Superfund site. The documents withheld in Category C consist of the internal exchanges and drafts, including drafts with comments, between EPA Region 2 attorneys and EPA Headquarters attorneys to develop and review the Proposed Plan.

Justification for Withholdings

In this category, the documents and email correspondence remained internal to EPA. The preparation of the Proposed Plan and Focused Feasibility Study required extensive correspondence and draft document sharing between Region 2 and Headquarters. The records subject to the Deliberative Process Privilege consisted of deliberative discussions, which preceded any corresponding final agency action or decision. Many of the records in the category contain an attorney's legal advice to a client and/or were prepared by or at the direction of an attorney in anticipation of litigation and are therefore subject to Exemption 5's Attorney Client and/or Attorney Work Product Privileges.

The withholdings subject to the Deliberative Process Privilege (DPP) stem from Region 2's work on internal draft documents that it then sent to Headquarters for further internal comment and review. This draft, comment and review type of work is inherently deliberative in nature. Drafting documents requires continuous back and forth communications that contain individual employees' opinions, analyses, ideas, questions and even rebuttals. The natural deliberative process includes a process where employees question one another and then support their position or retract their position. The exchange of the withheld documents and emails was predecisional because it took place prior to the Agency issuing its Proposed Plan and/or Focused Feasibility Study.

Many of the records withheld pursuant to the DPP are also withheld pursuant to the Attorney Client Privilege (ACP) and/or Attorney Work Product Privilege (AWP). The process of drafting a Proposed Plan and Focused Feasibility Study frequently involves attorneys. The attorneys communicate with their internal Agency clients in confidence for the purpose of obtaining and providing legal assistance. Agency attorneys also prepare material or direct the preparation of materials in anticipation of litigation.

In this category of records, the attorney-client privilege applies because EPA technical employees seek legal counsel from Headquarters and Regional attorneys while, for example, evaluating EPA's conformance with Agency guidance and policies. When an EPA client reaches out to an EPA attorney an exchange of ideas, suggestions and legal advice ensues. Such correspondence accompanies most decision-making processes and reflect preliminary assessments by attorneys and other staff about issues in which they have been asked to make recommendations and give advice. Agency attorneys routinely e-mail each other and their clients to share proposed language, give suggestions, and respond to legal inquiries. Non-attorney clients from Region 2 and EPA Headquarters were occasionally copied on the emails to participate in the discussions, receive advice, and to keep informed on the legal discussions related to the Proposed Plan.

Records are subject to the attorney work product privilege when documents are prepared by an attorney, by the attorney's client, or a representative of the attorney or the attorney's client, in anticipation of litigation. Other attorney work product information is withheld where an Agency attorney explains to another Agency attorney the history of past and strategy for future confidential negotiations with opposing counsels. These documents were prepared with the knowledge that litigation had already transpired in New Jersey state court related to the contamination in the Passaic River, and that EPA reasonably anticipated litigation after EPA issued the Record of Decision for the lower 8.3 miles of the river.

The EPA performed a line-by-line review of the withheld material. Wherever possible, the Agency released all reasonably segregable information. In this category, the Agency released approximately eight documents with partial redactions. There is no remaining reasonably segregable factual information to be released from this material. Factual information contained within these withheld and partially withheld documents was determined to be inextricably intertwined with the privileged information, and could not be reasonably segregated to be released under FOIA.

Category 4 consists of documents responsive to sub-request #9 of the CPG's FOIA request. Sub-request #9 asked for any correspondence between Region 2 and Headquarters on draft versions of the Proposed Plan and Focused Feasibility Study documents. In late 2013 and early 2014, Region 2 submitted drafts of the Proposed Plan to EPA Headquarters for internal comment and review. EPA Headquarters staff reviewed the draft Proposed Plan and provided comments on Region 2's basis and explanation for selection of the preferred alternative; to evaluate conformance with EPA policies and guidance; and, where the Region had determined that an aspect of EPA guidance would not apply, to understand the basis for that determination.

EPA withheld all or part of 169 documents under Category 4. These documents consist of email communications exchanged between EPA Region 2 technical staff and EPA Headquarters technical staff, concerning attached documents that were subject to review by Region 2 attorneys and EPA Headquarters attorneys. These email communications and attached documents include comments and discussions of the aspects of the Proposed Plan for the lower 8.3 miles of the Lower Passaic River and the Focused Feasibility Study. .

In particular, these documents detail issues that were of concern to Region 2 technical staff, and EPA Headquarters technical staff, as well as attorneys in both Region 2 and EPA Headquarters, in the development of the Proposed Plan. These concerns were frankly expressed and discussed in the documents in this category. Since these documents were subject to review by Region 2 and EPA Headquarters attorneys, they include communications that contain attorney views and advice on potential legal issues and litigation risks presented by the Proposed Plan and Focused Feasibility Study, and contain information that would

reveal the Agency's process for development of proposed actions such as the Proposed Plan. Therefore, and as described in more detail below, these documents are protected under the deliberative process, attorney-client and attorney work product privileges.

The final Proposed Plan and Focused Feasibility Study for the lower 8.3 miles were released for public review and comment on April 11, 2014 and are part of the administrative record for the lower 8.3 miles of the Lower Passaic River / Diamond Alkali Superfund site. The documents withheld in Category D consist of the internal exchanges and drafts, including drafts with comments, between technical staff, seeking and responding to input or comments from EPA Region 2 attorneys and EPA Headquarters attorneys to develop and review the Proposed Plan.

Justification for Withholdings

The withheld email communications and attachments are deliberative because they contain the candid views of EPA Headquarters and Region 2 staff on the Proposed Plan, and Focused Feasibility Study. This draft material and the accompanying comments were circulated to EPA staff for input and comment prior to the finalization of the Agency's Proposed Plan and Focused Feasibility Study. This information is predecisional because it contains EPA staff's analysis, opinions, and recommendations related to the finalization of the Proposed Plan, and Focused Feasibility Study. This material includes communications between EPA Region 2 technical staff and Headquarters technical staff raising, for review by Agency attorneys, questions generated by drafts of the documents for discussion, providing editorial comments on the draft documents themselves, suggesting edits to draft documents for consideration by others, and otherwise engaging in the internal review process of the Proposed Plan, and Focused Feasibility Study documents. These email communications and related attachments are predecisional because they contain the opinions and questions of EPA technical staff which required legal review and input prior to the finalization of the documents.

The withheld information does not represent an official Agency decision or policy, and instead, the withheld information reflects comments, opinions, and views on options in development. The withheld documents were not circulated by the Agency outside the federal government. Release would have a chilling effect on the Agency's ability to have frank, internal discussions among its staff, including frank discussions with Agency attorneys in both the Office of Regional Counsel and Headquarters, about proposed Agency actions in advance of the final decision the Proposed Plan, and Focused Feasibility Study. In addition, revealing these preliminary drafts and deliberations regarding the development of the drafts would create public confusion surrounding the reasons and rationales that were not in fact ultimately the grounds for the Agency's Proposed Plan for the lower 8.3 miles of the Lower Passaic River part of the Diamond Alkali Superfund Site or the Focused Feasibility Study.

In addition, these documents were withheld because they contain legal advice and analysis protected under the Attorney-Client and Attorney Work Product Privileges. The 169 documents within Category 4 include emails and drafts of documents or sections of documents written by technical staff seeking and responding to comments and advice from Region 2 and Headquarters attorneys. These documents were prepared to support the issuance of the

Proposed Plan and Focused Feasibility Study. They include technical staff's analysis of the hazardous substances in the sediment of the Passaic River, and the risk associated with those substances, as well as EPA Region 2's technical proposals for cleanup under its CERCLA (Superfund) authority which required review and input from Agency attorneys as the information was developed into a final document. These documents incorporate legal advice from EPA attorneys to program staff and managers concerning the interpretation of CERCLA and its implementing regulations and guidance. The disclosure of such communications would deprive EPA staff, and the agency in general, of the benefit of confidential advice from EPA attorneys when developing a Proposed Plan, including guidance on the legal and regulatory adequacy of proposed remedies, as well as development of a Focused Feasibility Study and related Agency guidance.

Finally, many of these documents contain information protected by the attorney work product privilege. The attorney work product privilege extends to documents prepared by an attorney, by the attorney's client, or a representative of the attorney or the attorney's client, in anticipation of litigation. These documents were prepared with the knowledge that litigation had already transpired in New Jersey state court related to the contamination in the Passaic River, and that EPA reasonably anticipated litigation after EPA issued the Record of Decision for the lower 8.3 miles of the river. As such, legal counsel in Region 2 and Headquarters have all been deeply involved in commenting on and directing changes to EPA staff's technical analyses, to ensure that the materials would be legally sufficient to withstand any challenge. Many of these materials may be used to support Region 2's enforcement against responsible parties, including the decision of whether to issue a notice letter to a party advising it of its legal responsibility for the site, and the decision to issue an order to one or more parties, and/or prepare a referral to DOJ, to file a complaint against one or more parties. All of these analyses require the selection and assessment of specific facts and data and are based on the mental impressions of EPA attorneys and staff working at these attorneys' direction. These attorneys direct staff to consider various factors to assist in refining their analysis, given these attorneys' understanding of CERCLA, the NCP and current case law. These technical analyses will form part of the basis for negotiation of an enforcement document with PRPs for the site, as well as EPA and DOJ's decision to file a civil judicial complaint should that be necessary. Release of the confidential information contained in such documents would allow external scrutiny of EPA's sensitive litigation preparations and deprive EPA attorneys of the ability to keep thoughts and mental impressions from discovery by an opponent in litigation.

The EPA performed a line-by-line review of the withheld material. Wherever possible, the Agency released all reasonably segregable information. In this category, the Agency released approximately seven documents with partial redactions. There is no additional reasonably segregable factual information to be released from this material. Factual information contained within these withheld documents was determined to be inextricably intertwined with the privileged information, and could not be reasonably segregated to be released under FOIA from the attorney-client information, attorney work product, predecisional and deliberative information. The final Proposed Plan, and Focused Feasibility Study, which were the subject of the discussion, comments, and review described in Category 4 are part of the administrative record for the Lower 8.3 Miles of the Lower Passaic River part of the Diamond Alkali Superfund site and are publicly available.

Category 5: Communications and documents exchanged among EPA Region 2 Technical Staff, EPA Region 2 Legal Staff, EPA Headquarters Technical Staff and EPA Headquarters Legal Staff related to the Proposed Plan and Focused Feasibility Study– 163 Documents

Category 5 consists of documents responsive to sub-request #9 of the CPG's FOIA request. Sub-request #9 asked for any correspondence between Region 2 and Headquarters on draft versions of the Proposed Plan and Focused Feasibility Study documents. In late 2013 and early 2014, Region 2 submitted drafts of the Proposed Plan to EPA Headquarters for their internal comment and review. EPA Headquarters reviewed the draft Proposed Plan provided comments intended to strengthen Region 2's basis and explanation for selection of the preferred alternative; to evaluate conformance with EPA policies and guidance; and, where the Region had determined that an aspect of EPA guidance would not apply, to understand the basis for that determination.

EPA withheld all or part of 146 documents under Category 5. These documents consist of email communications exchanged among EPA Region 2 technical staff, Region 2 attorneys, EPA Headquarters technical staff and EPA Headquarters attorneys concerning attached documents that were subject to review by all. These email communications and attached documents include comments and discussions of aspects of the Proposed Plan for the lower 8.3 miles of the Lower Passaic River and the Focused Feasibility Study.

In particular, these documents detail issues that were of concern to Region 2 technical and legal staff and EPA Headquarters technical and legal staff in the development of the Proposed

Plan. These concerns were frankly expressed and discussed in the documents in this category. These documents include communications that contain attorney views and advice on potential legal issues and litigation risks presented by the Proposed Plan and Focused Feasibility Study, and contain information that would reveal the Agency's process for development of proposed actions such as the Proposed Plan. Therefore, and as described in more detail below, these documents are protected under the deliberative process, attorney-client and attorney work product privileges.

The final Proposed Plan and Focused Feasibility Study for the lower 8.3 miles were released for public review and comment on April 11, 2014 and are part of the administrative record for the lower 8.3 miles of the Lower Passaic River / Diamond Alkali Superfund site. The documents withheld in Category 5 consist of the internal exchanges and drafts, including drafts with comments, between EPA Region 2 technical staff and attorneys and EPA Headquarters technical staff and attorneys to develop and review the Proposed Plan.

Justification for Withholdings

The withheld email communications and attachments are deliberative because they contain the candid views of EPA Headquarters and Region 2 staff on the Proposed Plan, and Focused Feasibility Study. This draft material and the accompanying comments were circulated to EPA staff for input and comment prior to the finalization of the Agency's Proposed Plan and Focused Feasibility Study. This information is predecisional because it contains EPA staff's analysis, opinions, and recommendations related to the finalization of the Proposed Plan, and Focused Feasibility Study. This material includes communications among an interdivisional team of Region 2 and Headquarters legal and technical staff concerning questions generated by drafts of the documents, providing editorial comments on the draft documents themselves, suggesting edits to draft documents for consideration by others, and otherwise engaging in the internal review process of the Proposed Plan, and Focused Feasibility Study documents. These email communications and related attachments are predecisional because they contain the opinions and questions of EPA staff opinions and input prior to the finalization of the documents.

The withheld information does not represent an official Agency decision or policy, and instead, the withheld information reflects comments, opinions, and views on options in development. The withheld documents were not circulated by the Agency outside the federal government. Release would have a chilling effect on the Agency's ability to have frank, internal discussions among its staff, including frank discussions with Agency attorneys in both the Office of Regional Counsel and Headquarters, about proposed Agency actions in advance of the final decision the Proposed Plan, and Focused Feasibility Study. In addition, revealing these preliminary drafts and deliberations regarding the development of the drafts would create public confusion surrounding the reasons and rationales that were not in fact ultimately the grounds for the Agency's Proposed Plan for the lower 8.3 miles of the Lower Passaic River part of the Diamond Alkali Superfund Site or the Focused Feasibility Study.

In addition, these documents were withheld because they contain legal advice and analysis protected under the Attorney-Client and Attorney Work Product Privileges. The 146

documents withheld in full or in part within Category 5 include emails and drafts of documents or sections of documents written by technical staff with seeking comments and advice from Region 2 and Headquarters attorneys. These documents were prepared to support the issuance of the Proposed Plan and Focused Feasibility Study. They include technical staff's analysis of the hazardous substances in the sediment of the Passaic River, and the risk associated with those substances, as well as EPA Region 2's technical proposals for cleanup under its CERCLA (Superfund) authority which required review and input from Agency attorneys as the information was developed into a final document. These documents incorporate legal advice from EPA attorneys to program staff and managers concerning the interpretation of CERCLA and its implementing regulations and guidance. The disclosure of such communications would deprive EPA staff, and the agency in general, of the benefit of confidential advice from EPA attorneys when developing a Proposed Plan, including guidance on the legal and regulatory adequacy of proposed remedies, as well as development of a Focused Feasibility Study and related Agency guidance.

Finally, these documents contain information protected by the attorney work product privilege. The attorney work product privilege extends to documents prepared by an attorney, by the attorney's client, or a representative of the attorney or the attorney's client, in anticipation of litigation. These documents were prepared with the knowledge that litigation had already transpired in New Jersey state court related to the contamination in the Passaic River, and that EPA reasonably anticipates litigation after EPA issues the Record of Decision for the lower 8.3 miles of the river. As such, legal counsel in Region 2 and Headquarters have all been deeply involved in commenting on and directing changes to EPA staff's technical analyses, to ensure that the materials would be legally sufficient to withstand any challenge. Many of these materials may be used to support Region 2's enforcement against responsible parties, including the decision of whether to issue a notice letter to a party advising it of its legal responsibility for the site, and the decision to issue an order to one or more parties, and/or prepare a referral to DOJ, to file a complaint against one or more parties. All of these analyses require the selection and assessment of specific facts and data and are based on the mental impressions of EPA attorneys and staff working at these attorneys' direction. These attorneys directed staff to consider various factors to assist in refining their analysis, given these attorneys' understanding of CERCLA, the NCP and current case law. These technical analyses will form part of the basis for negotiation of an enforcement document with PRPs for the site, as well as EPA and DOJ's decision to file a civil judicial complaint should that be necessary. Release of the confidential information contained in such documents would allow external scrutiny of EPA's sensitive litigation preparations and deprive EPA attorneys of the ability to keep their thoughts and mental impressions from being discovered by an opponent in litigation.

In approximately 4 instances, EPA withheld records which included email exchanges encompassing, in part, personal information such as discussions of child-care, vacation, and other use of personal time or leave under FOIA Exemption 6. The withheld portions of emails relate to private information for individuals, the public disclosure of which would constitute a clearly unwarranted invasion of personal privacy. The withheld information is within the scope of the phrase "personal and medical files and similar files" because the information applies to and is identified with a particular individual and is medical or personal in nature.

There is no public interest in these individuals' personal or medical information. There is also no public interest in the employee's use of personal leave time. The withheld information does not shed light on employee's performance of official duties, and in each instance, the harm to the individual as a result of disclosure clearly outweighs the public interest in such disclosure.

The EPA performed a line-by-line review of the withheld material. Wherever possible, the Agency released all reasonably segregable information. In this category, the Agency released approximately eight documents with partial redactions. There is no additional reasonably segregable factual information to be released from this material. Factual information contained within these withheld documents was determined to be inextricably intertwined with the privileged information, and could not be reasonably segregated to be released under FOIA from the attorney-client information, attorney work product, predecisional and deliberative information. The final Proposed Plan, and Focused Feasibility Study, which were the subject of the discussion, comments, and review described in Category 5 are part of the administrative record for the lower 8.3 miles of the Lower Passaic River part of the Diamond Alkali Superfund site and are publicly available.

Category 6: Correspondence between Region 2 and NJDEP on NJDEP angler surveys that included sites on the Lower Passaic River, and any data and analysis from those surveys– 12 Docs

Documents Withheld in Full

- Deliberative Process; Attorney Client; Attorney Work Product – 1 Doc

Documents Released in Full after Review

- 1 Doc

Category 6 consists of documents responsive to sub-request #7 of the CPG's FOIA request. Sub-request #7 asked for any correspondence between Region 2 and NJDEP on NJDEP angler surveys that included sites on the Lower Passaic River, and any data and analysis from those surveys.

EPA withheld 11 documents within Category 6. These documents consist of email communications exchanged among EPA Region 2 technical staff and NJDEP technical staff and related attached documents, as well as draft documents and discussions internal to Region 2 staff, including those that were subject to review by Region 2 attorneys. These email communications and documents include comments and discussions of how fish and crab consumption rates on the Lower Passaic River were calculated from NJDEP angler surveys. Fish and crab consumption rates are key factors in calculating human health risk levels that ultimately determine whether an action needs to be taken at a Superfund Site. Region 2 discussed the technical analyses on fish and crab consumption rate calculations from the

Focused Feasibility Study with NJDEP, for two reasons: 1) because the consumption rates were calculated in part based on NJDEP angler survey data; and 2) because Section 121(f) of CERCLA provides for state involvement in the CERCLA process. EPA must provide the state with an opportunity to comment on an RI/FS and all technical data leading to its issuance.

Some of the documents in this category contain deliberations between EPA and NJDEP, a partner Agency, concerning fish and crab consumption rates. The Partner Agencies are a group of federal and state agencies studying the Lower Passaic River contemporaneously with EPA. The agencies include U.S. Army Corps of Engineers, New York District; New Jersey Department of Environmental Protection (NJDEP); National Oceanographic and Atmospheric Administration (NOAA); and U.S. Fish and Wildlife Service (USFWS). The New Jersey Department of Transportation (NJDOT) participated in the Partner Agencies until November 2007, when its responsibilities were transferred to NJDEP. Throughout development of the 17-Mile RI/FS and the Lower 8.3 Mile RI/FFS, EPA shared technical documents in draft form with the partner agencies (primarily NJDEP, but also the Corps-NY, NOAA, USFWS and NJDOT). In 2005, EPA Region 2 signed a Joint Prosecution and Confidentiality Agreement (JPCA) with the Partner Agencies with respect to the Lower Passaic, recognizing the common interests and legal responsibilities of the parties. This JPCA provided that the parties' common interests with respect to the Passaic River Matter (defined as the contamination of the Passaic River and environs in New Jersey) include the determination, implementation and supervision of appropriate and effective environmental and natural resource damages response actions, and the preparation for and prosecution of anticipated enforcement litigation against third parties with respect to the Passaic River Matter. Some documents in this category were also developed by contractors.

In particular, these 12 documents detail issues that were of concern to Region 2 technical staff and NJDEP technical staff in the calculation of the fish and crab consumption rates. These concerns were frankly expressed and discussed in these documents. Two of the draft documents were subject to review by Region 2 attorneys and include communications that contain attorney views on potential legal and litigation risks. Therefore, and as described in more detail below, these documents are protected under the deliberative process, attorney-client and attorney work product privileges.

Three of the 15 documents that appeared on Region 2's initial list of withheld documents, which was provided to CPG as part of the in response to this FOIA, were actually released by Region 2 and should not have appeared on the list: FOIA_05768_00009001, FOIA_05768_00009003, and FOIA_05768_00009016. These documents do not appear in the current index and are not included in the discussion below.

Justification for Withholdings

The withheld email communications and attachments are deliberative because they contain the candid views of Region 2 technical staff on the calculation of the fish and crab consumption rates using data provided by the NJDEP to EPA. This draft material and the accompanying comments were circulated to EPA staff for input and comment prior to the finalization of analysis of the data and publication of that analysis. This information is predecisional because

it contains EPA staff's analysis, opinions, and recommendations related to the finalization of the consumption data. This material includes communications among technical staff in Region 2 as well as Region 2 legal staff concerning questions generated by drafts of the analysis documents, providing editorial comments on the draft documents themselves, suggesting edits to draft documents for consideration by others, and otherwise engaging in the internal review process of the data. These email communications and related attachments are predecisional because they contain the opinions and questions of EPA staff opinions and input prior to the finalization of the documents. They also reflect internal EPA deliberations over the data and how to best prepare for discussions with NJDEP over the data and analysis of the data.

Documents in Category 6 were also developed by EPA's contractors, including federal contractors such as the Army Corps – KC under an interagency agreement, and private contractors and sub-contractors. EPA's technical contractors include the Army Corps of Engineers-Kansas City (Corps-KC), and subcontractors authorized to manage the work necessary to perform the sampling, analysis, and other technical work to develop the Feasibility Study and the Proposed Plan, including the Conceptual Site Model and Empirical Mass Balance Model, and to support EPA's preparation of the Proposed Plan and Record of Decision. Region 2 provided funds for this Interagency Agreement, and the Corps-KC subcontracted on EPA's behalf with various contractors to perform much of the sampling, analysis, and technical work, which was provided to the Corps-KC and Region 2 for further review and approval, and incorporation into the eventual RI/FFS, Proposed Plan and Record of Decision. Region 2 provided technical, legal and policy direction to the Corps-KC and, through the Corps-KC, its contractors. Region 2 set the schedule for the technical work. Region 2 reviewed, commented on, edited and approved all contractor work products. Certain documents in Category 6 were also shared with EPA's State Partner Agencies, including the NJDEP. Partner Agency NJDEP and EPA share a common legal interest in enforcing the cleanup of the Passaic River. The communications in this category were made in the course of a joint enforcement effort, the clients share a common legal interest in this effort, and the documents were developed by the contractors and subcontractors to further this effort. These documents were not, to EPA's knowledge, shared outside of these contractors and Partner Agencies.

The withheld information does not represent an official Agency decision or policy, and instead, the withheld information reflects comments, opinions, and views on analysis in development. The withheld documents were not circulated by the Agency outside the federal government, Partner Agencies, and contractors. Release would have a chilling effect on the Agency's ability to have frank, internal discussions among its staff, including frank discussions with Agency attorneys in both the Office of Regional Counsel and Headquarters, about proposed Agency actions in advance of the final data analysis. In addition, revealing these preliminary discussions regarding the development of the analysis would create public confusion surrounding the reasons and rationales that were not in fact ultimately the grounds for the Agency's consumption analysis.

In addition, two documents were withheld because they contain legal advice and analysis protected under the Attorney-Client and Attorney Work Product Privileges. Two documents within Category 6 include emails and drafts of a technical memorandum which were revised

and edited by attorneys in Region 2. The written analysis and information that appeared in the technical memorandum required review and input from Agency attorneys as the information was developed into a final document that helped form the basis of an administrative record. The disclosure of such communications would deprive EPA staff, and the agency in general, of the benefit of confidential advice from EPA attorneys when developing an administrative record, including guidance on the adequacy of the information provided in the record.

Finally, these two documents also contain information protected by the attorney work product privilege. The attorney work product privilege extends to documents prepared by an attorney, by the attorney's client, or a representative of the attorney or the attorney's client, in anticipation of litigation. These documents were prepared with the knowledge that litigation had already transpired in New Jersey state court related to the contamination in the Passaic River, and that EPA reasonably anticipated litigation after EPA issued the Record of Decision for the lower 8.3 miles of the river. As such, legal counsel in Region 2 have all been deeply involved in commenting on and directing changes to EPA staff's technical analyses, to ensure that the materials would be legally sufficient to withstand any challenge. Many of these materials may be used to support Region 2's enforcement against responsible parties, including the decision of whether to issue a notice letter to a party advising it of its legal responsibility for the site, and the decision to issue an order to one or more parties, and/or prepare a referral to DOJ, to file a complaint against one or more parties. All of these analyses require the selection and assessment of specific facts and data and are based on the mental impressions of EPA attorneys and staff working at these attorneys' direction. These attorneys directed staff to consider various factors to assist in refining their analysis, given these attorneys' understanding of CERCLA, the NCP and current case law. These technical analyses will form part of the basis for negotiation of an enforcement document with PRPs for the site, as well as EPA and DOJ's decision to file a civil judicial complaint should that be necessary. Release of the confidential information contained in such documents would allow external scrutiny of EPA's sensitive litigation preparations and deprive EPA attorneys of the ability to keep their thoughts and mental impressions from being discovered by an opponent in litigation.

The EPA performed a line-by-line review of the withheld material. There is no reasonably segregable factual information to be released from this material. Factual information contained within these withheld documents was determined to be inextricably intertwined with the privileged information, and could not be reasonably segregated to be released under FOIA from the attorney-client information, attorney work product, predecisional and deliberative information. The final Proposed Plan, and Focused Feasibility Study, which were the subject of the discussion, comments, and review described in Category 6 are part of the administrative record for the lower 8.3 miles of the Lower Passaic River part of the Diamond Alkali Superfund site and are publicly available.

Key to Coded Vaughn Index and Substantive Descriptions – CPG Second FOIA Request

Category 7: Email Communications between EPA Region 2 attorneys with attorney comments on draft technical documents – 13 Documents
Documents Withheld in Full • Deliberative Process; Attorney-Client; Attorney Work Product – 13 Docs
The 13 documents in Category 7 consist of email exchanges between EPA Region 2 attorneys Patricia Hick and Sarah Flanagan, discussing substantive comments and legal questions that arose as a result of these attorneys discussion of the Conceptual Site Model ("CSM") that was developed as part of the Focused Feasibility Study for the Lower 8.3 Miles of the Lower Passaic River part of the Diamond Alkali Superfund site. The CSM is an iterative, living representation of a Superfund site that summarizes and helps EPA visualize and understand available information. The CSM informs Agency action at sites, including the development of Proposed Plans and Records of Decision. In particular, these exchanges detail concerns and issues raised by potential changes to the CSM that were proposed as part of the development of the Region's preferred alternative and Proposed Plan. These attorney-to-attorney communications contain these attorneys' views on potential legal and litigation risks presented by proposed technical modifications or changes, and are therefore protected under the deliberative process, attorney-client, and attorney work product privileges.
Justification for Withholdings
The withheld documents and email communications are deliberative because they contain the opinions of EPA Region 2 staff attorneys on certain proposed changes to the CSM before the finalization of the Proposed Plan. These comments reflect the attorneys' opinions and thoughts about the potential changes to the CSM and the effects on the development of the preferred alternative and Proposed Plan. This information is predecisional because it contains EPA staff's analysis, opinions, and recommendations related to the development of the Agency's Proposed Plan and eventual final selection of remedies for both the Lower 8.3 Miles and the Lower 17 Miles parts of the Diamond Alkali Superfund site. The withheld information does not represent an official Agency decision or policy, and instead, the withheld information reflects comments, opinions, and views on options in development. The withheld documents were not circulated by the Agency outside the federal government. Release would have a chilling effect on the Agency's ability to have frank, internal discussions among staff attorneys about proposed Agency actions in advance of the final decision on a remedy. In addition, revealing these preliminary drafts and deliberations would create public confusion surrounding the reasons and rationales that were not in fact ultimately the grounds for the Agency's Proposed Plan for the Lower 8.3 Miles. In addition, these 13 documents were withheld because they contain legal advice and analysis protected under the Attorney-Client and Attorney Work Product Privileges. The 10 documents within Category 7 contain the advice and discussions of EPA Region 2 attorneys on a proposed Agency action, prepared in the course of legal review of draft documents. The

disclosure of such communications would deprive EPA staff, and the agency in general, of the benefit of confidential advice from EPA attorneys when developing remedies, including guidance on the legal and regulatory adequacy of proposed remedies.

Finally, these 10 documents contain information protected by the attorney work product privilege. The attorney work product privilege extends to documents prepared by an attorney, by the attorney's client, or a representative of the attorney or the attorney's client, in anticipation of litigation. The discussion and thoughts of the EPA attorneys within these email communications were prepared with an awareness and expectation of litigation relating to the Diamond Alkali site (both the Lower 8.3 Miles and the 17 Miles of the Lower Passaic River) and in the context of a current CERCLA enforcement action. Therefore, these comments and the attorneys' legal review of documents incorporate the attorneys' thoughts and evaluation of the legal risks of proposed courses of action at the site. Release of the confidential information contained in such documents would allow external scrutiny of EPA's sensitive litigation preparations and deprive EPA attorneys of the ability to keep their thoughts and mental impressions from being discovered by an opponent in litigation.

The EPA performed a line-by-line review of these documents for segregability, and determined that there is no reasonably segregable factual information to be released from this material. Factual information contained within these 10 withheld email documents was determined to be inextricably intertwined with the privileged information, and could not be reasonably segregated to be released under FOIA from the attorney-client information, attorney work product, predecisional and deliberative information. The final Conceptual Site Model and the final Proposed Plan, which were the subject of the discussion, comments, and review described in Category A, are part of the administrative record for the Lower 8.3 Miles of the Lower Passaic River / Diamond Alkali Superfund site and are publicly available.

Category 8: Communications and attachments circulated between EPA and Partner Agencies related to the development of the Lower Passaic River CSM, Empirical Mass Balance Model (EMBM) and Proposed Plan for the Lower 8.3 Miles of the Lower Passaic River, including documents and communications shared under a Joint Prosecution and Confidentiality Agreement– 58 Documents

Documents Withheld in Full

- 7(a); Deliberative Process; Attorney Client; Attorney Work Product – 1 Doc
- 7(a); Deliberative Process – 40 Docs
- Deliberative Process, Attorney Client; Attorney Work Product – 5 Docs
- Deliberative Process Only – 10 Doc

The EPA withheld 58 documents under Category 8. These 58 documents consist of email communications and attached documents transmitted between EPA staff and Partner Agencies. The Partner Agencies are a group of federal and state agencies studying the Lower Passaic River contemporaneously with EPA. The agencies include U.S. Army Corps of Engineers,

New York District; New Jersey Department of Environmental Protection (NJDEP); National Oceanographic and Atmospheric Administration (NOAA); and U.S. Fish and Wildlife Service (USFWS). The New Jersey Department of Transportation (NJDOT) participated in the Partner Agencies until November 2007, when its responsibilities were transferred to NJDEP. Throughout development of the 17 Miles RI/FS and the Lower 8.3 Miles RI/FFS, EPA shared technical documents in draft form with the Partner Agencies (primarily NJDEP, but also the Corps-NY, NOAA, USFWS and NJDOT). In 2005, EPA Region 2 signed a Joint Prosecution and Confidentiality Agreement (JPCA) with the Partner Agencies with respect to the Lower Passaic River, recognizing the common interests and legal responsibilities of the parties. This JPCA provided that the parties' common interests with respect to the Passaic River Matter (defined as the contamination of the Passaic River and environs in New Jersey) include the determination, implementation and supervision of appropriate and effective environmental and natural resource damages response actions, and the preparation for and prosecution of anticipated enforcement litigation against third parties with respect to the Passaic River Matter.

These 55 documents in Category 8 consist of email communications transmitting draft technical documents to Partner Agencies to review and containing the comments and feedback of Partner Agencies on these draft technical documents. Documents under review included appendices and portions of the CSM and EMBM, as well as technical papers and analyses prepared as part of the review of the CSM and EMBM. The models are living documents that are continually reviewed and revised, including review and revision by the Partner Agencies, as part of the development of the preferred alternative in the Proposed Plan and eventual Record of Decision for the Lower 8.3 Miles of the Lower Passaic River/Diamond Alkali Superfund site.

In particular, these 55 documents detail concerns and issues that were of concern to Partner Agencies in the development of the Proposed Plan, and which were frankly expressed and discussed in light of the JPCA. These 55 documents include communications that contain EPA Region 2 attorneys' views on potential legal and litigation risks presented by proposed technical modifications or changes, contain information that may harm the current enforcement action for the Lower 8.3 Miles, and contain information that would reveal the Agency's process for development and Partner review of proposed actions such as the preferred alternative described in the Proposed Plan and the remedy selected in the Record of Decision. Therefore, and as described in more detail below, these documents are protected under the deliberative process, attorney-client, and attorney work product privileges, and in some cases protected as law enforcement information as well.

Justification for Withholdings

The withheld material is deliberative because it contains the thoughts and opinions of EPA staff and Partner Agencies' staff on how to further develop the CSM and EMBM and the Proposed Plan for the underlying EPA action, including discussions of a potential enforcement action, as well as the opinions of EPA staff, EPA attorneys, and Partner Agencies' staff on the development of the CSM. This information is predecisional because it contains EPA staff's and the staff at other Federal and State agencies' analysis, opinions, and recommendations

related to the development of the technical documentation supporting the Agency's actions for the Lower 8.3 Miles of the Lower Passaic River. The withheld information does not represent an official Agency decision or policy, and instead, the withheld information reflects the Agencies' analysis, comments, and review of documentation prepared by EPA contractors and EPA staff to support the EPA's proposed actions for the Lower 8.3 Miles of the Lower Passaic River. The withheld information does not represent an official Agency decision or policy, and instead, the withheld information reflects the Agencies' thought processes in evaluating next steps for action for the Lower 8.3 Miles of the Lower Passaic River. The withheld email chains were not circulated by the Agency except to officials at EPA and other Agencies. Release would have a chilling effect on the Agency's ability to have frank, internal discussions with its Partners about proposed Agency actions in development.

In addition, these documents were withheld because they contain legal advice and analysis protected under the Attorney-Client and Attorney Work Product Privileges. These documents include the advice of Agency attorneys to Agency staff and to staff in their Partner Agencies regarding the legal impacts of various decisions and issues. The disclosure of such communications would deprive EPA staff, and the agency in general, of the benefit of confidential advice from EPA attorneys in discussing potential options for remedies with Partners, including Partners subject to a confidentiality agreement.

Finally, approximately six of these documents contain information protected by the attorney work product privilege. The attorney work product privilege extends to documents prepared by an attorney, by the attorney's client, or a representative of the attorney or the attorney's client, in anticipation of litigation. The discussion and thoughts of the EPA attorneys within these email communications were prepared with an awareness and expectation of litigation relating to the Diamond Alkali site (both the Lower 8.3 Miles and the Lower 17 Miles of the Lower Passaic River) and in the context of a current CERCLA enforcement action, and are also relevant to proposed future enforcement action. Therefore, these comments and the attorneys' legal review of documents incorporate the attorneys' thoughts and evaluation of the legal risks of proposed courses of action at the site. Release of the confidential information contained in such documents would allow external scrutiny of EPA's sensitive litigation preparations and deprive EPA attorneys of the ability to keep their thoughts and mental impressions from being discovered by an opponent in litigation.

In addition to Exemption 5, many documents within Category 8 were also withheld under FOIA Exemption 7(A), as described above and in the attached Index. Exemption 7(A), found at 5 U.S.C. Section 553(a)(7)(A), applies to records or information compiled for law enforcement purposes, the production of which could reasonably be expected to interfere with enforcement proceedings. The documents in Category 8 were developed by EPA in part for the purpose of enforcing a cleanup selected under CERCLA for the Lower 8.3 Miles of the Lower Passaic River part of the Diamond Alkali Site. Release of these documents would reasonably be expected to interfere with enforcement proceedings, because it would hinder the government's ability to control or shape enforcement action should this be necessary in order to enforce the cleanups selected for the Lower 8.3 Miles and eventually, the Lower 17 Miles, and would prematurely reveal the government's evidence or strategy in an ongoing enforcement action.

Documents in Category 8 were shared with EPA's federal and State Partner Agencies, including NOAA, USFWS, U.S. Army Corps of Engineers-New York District, and NJDEP. The federal Partner Agencies, like EPA, are represented by the Department of Justice as representatives of the United States in enforcement actions. Moreover, the federal trustees and EPA very clearly have common interests in this matter. The fact that EPA shares information with its federal partner agencies does not waive the privileges that otherwise attach to such information or documents. Similarly, EPA has shared information with its state partner, NJDEP, which is protected under both Exemptions 5 and Exemption 7(A). EPA and NJDEP share a common legal interest in enforcing the cleanup of the Lower Passaic River. The communications in this category were made in the course of a joint enforcement effort, the clients share a common legal interest in this effort, and the documents were made to further this effort. EPA and NJDEP, as well as the other Partner agencies, have long maintained a joint prosecution and confidentiality agreement to demonstrate their mutual understanding of the common interest and associated confidentiality. These documents were not, to EPA's knowledge, shared outside of these Partner Agencies.

The EPA performed a line-by-line review of these documents for segregability. There is no reasonably segregable factual information to be released from this material. Factual information contained within this document was determined to be inextricably intertwined with the privileged information, and could not be reasonably segregated to be released under FOIA from the attorney-client information, attorney work product, predecisional and deliberative information, and may interfere with law enforcement proceedings. The final Record of Decision and administrative record for the Lower 8.3 Miles of the Lower Passaic River/Diamond Alkali Superfund site are publicly available.

Category 9: Communications and attachments circulated between EPA, EPA's technical contractors, and Partner Agencies related to the development of the CSM, EMBM and Proposed Plan for the Lower 8.3 Miles of the Lower Passaic River – 282 Documents

EPA withheld 277 documents in full or in part under Category 9. The documents withheld in full or in part consist of email communications and attached documents transmitted between EPA staff, EPA's contractors responsible for technical documentation and material at the site, and Partner Agencies, including work products developed by EPA contractors and subcontractors.

EPA's technical contractors include the Army Corps of Engineers-Kansas City (Corps-KC), and subcontractors authorized to manage the work necessary to perform the sampling, analysis, and other technical work to develop the Focused Feasibility Study and the Proposed Plan, including the CSM and EMBM, and to support EPA's preparation of the Proposed Plan and Record of Decision. Region 2 provided funds for this Interagency Agreement, and the Corps-KC subcontracted on EPA's behalf with various contractors to perform much of the sampling, analysis, and technical work, which was provided to the Corps-KC and Region 2 for further review and approval, and incorporation into the eventual RI/FFS, Proposed Plan and Record of Decision. Region 2 provided technical, legal and policy direction to the Corps-KC and, through the Corps-KC, its contractors. Region 2 set the schedule for the technical work. Region 2 reviewed, commented on, edited and approved all contractor work products.

The Corps-KC hired contractors Malcolm Pirnie (later Louis Berger Group), HydroQual (later HDR/HydroQual) and Battelle to perform the technical work. At Region 2's and the Corps-KC's direction, Malcolm Pirnie/Louis Berger hired technical advisors as subcontractors to review draft analyses and interim products that were subsequently combined to form elements of the Lower 8.3 Miles RI/FFS, and in some instances, are also relevant to EPA's oversight of the 17 Miles RI/FS. The technical advisors ensured that the highly technical analyses were performed correctly. Region 2 reviewed, commented on, edited and approved all contractor work products incorporated into Region 2's oversight of the CPG 17 Miles RI/FS. Region 2 also shared these work product with Partner Agencies for the Partner Agencies' review and comment as part of the eventual development of the Proposed Plan and Record of Decision for the 17 Miles.

The Partner Agencies are a group of federal and state agencies studying the Lower Passaic River contemporaneously with EPA. The agencies include U.S. Army Corps of Engineers, New York District; New Jersey Department of Environmental Protection (NJDEP); National Oceanographic and Atmospheric Administration (NOAA); and U.S. Fish and Wildlife Service (USFWS). The New Jersey Department of Transportation (NJDOT) participated in the Partner Agencies until November 2007, when its responsibilities were transferred to NJDEP. Throughout development of the 17 Miles RI/FS and the Lower 8.3 Mile RI/FFS, EPA shared technical documents in draft form with the partner agencies (primarily NJDEP, but also the Corps-NY, NOAA, USFWS and NJDOT). In 2005, EPA Region 2 signed a Joint Prosecution and Confidentiality Agreement (JPCA) with the Partner Agencies with respect to the Lower Passaic River, recognizing the common interests and legal responsibilities of the parties. This

JPCA provided that the parties' common interests with respect to the Passaic River Matter (defined as the contamination of the Passaic River and environs in New Jersey) include the determination, implementation and supervision of appropriate and effective environmental and natural resource damages response actions, and the preparation for and prosecution of anticipated enforcement litigation against third parties with respect to the Passaic River Matter. The documents withheld in full and in part in Category 9 consist of email communications transmitting draft technical documents to Partner Agencies to review and containing the comments and feedback of Partner Agencies on these draft technical documents. This category also includes multiple drafts of documents and portions of documents developed by EPA contractors, which included appendices and portions of the CSM and EMBM, as well as technical papers and analyses prepared as part of the review of the CSM and EMBM. The CSM and EMBM are living documents that are continually reviewed and revised, including review and revision by the Partner Agencies, as part of the development of the preferred alternative, the Proposed Plan and Record of Decision for the Lower 8.3 Miles of the Lower Passaic River/Diamond Alkali Superfund site. Therefore, and as described in more detail below, these documents protected under the deliberative process, attorney-client, and attorney work product privileges, and in some cases protected as law enforcement information as well.
Justification for Withholdings
The withheld material is deliberative because it contains the thoughts and opinions of EPA staff and EPA contractors, including draft documents and draft technical analyses performed to further develop the CSM and EMBM and the Proposed Plan for the underlying EPA action, including discussions of potential enforcement action. This material was developed by EPA contractors and subcontractors with the understanding that the draft documents, evaluations, analyses and suggestions were to be subject to multiple levels of review, technical comment, and evaluation by EPA staff, the CSTAG, the NRRB, and Partner Agencies before completion. This information is predecisional because it contains the early initial work and multiple iterations of draft products prepared in the course of developing the Proposed Plan for the Lower 8.3 Miles of the Lower Passaic River/Diamond Alkali Superfund site, as well as technical and legal comments on the proposals and technical documents. The withheld information does not represent an official Agency decision or policy, and instead, the withheld information reflects the Agencies' analysis, comments, and review of documentation prepared by EPA contractors and EPA staff to support the EPA's proposed actions for the Lower 8.3 Miles. The withheld information does not represent an official Agency decision or policy and is instead representative of the development of the Agency's remedy decision in the form of the Proposed Plan and Record of Decision. The withheld material in Category 9 was not circulated by the Agency except to officials at EPA and Partner Agencies, and among contractor staff, including federal agency contractors, who were contracted to provide internal advice and technical support to the agency. These contractors do not represent or advocate for an outside interest at the Site. Release would have a chilling effect on the Agency's ability to have frank, internal discussions with its contractors about proposed Agency actions in development, and would harm the Agency's ability to contract to receive highly technical advice and support.

In addition, documents were withheld in full and in part because they contain legal advice and analysis protected under the Attorney-Client and Attorney Work Product Privileges. These documents include incorporation of comments made by EPA legal staff following legal review, regarding the legal impacts of various proposals and issues. This material also, in some cases, includes attorney advisory comments and questions on the technical material. The disclosure of such communications would deprive EPA staff, and the agency in general, of the benefit of confidential advice from EPA attorneys in discussing potential options for remedies with EPA contractors who are contracted in part to provide technical support for the EPA's legal enforcement activities under CERCLA, such as for the Lower 8.3 Miles of the Lower Passaic River/Diamond Alkali Superfund site.

Finally, certain documents that were withheld in full contain information protected by the attorney work product privilege. The attorney work product privilege extends to documents prepared by an attorney, by the attorney's client, or a representative of the attorney or the attorney's client, in anticipation of litigation, which can include contractor staff contracted to prepare documents and technical analyses in anticipation of litigation. The discussion and thoughts of the EPA attorneys within these email communications were prepared with an awareness and expectation of litigation relating to the Diamond Alkali site (both the Lower 8.3 Miles and the Lower 17 Miles of the Lower Passaic River) and in the context of a current CERCLA enforcement action, and are relevant to proposed enforcement action. Therefore, these comments and the attorneys' legal review of documents incorporate the attorneys' thoughts and evaluation of the legal risks of proposed courses of action at the site. Release of the confidential information contained in such documents would allow external scrutiny of EPA's sensitive litigation preparations and deprive EPA attorneys of the ability to keep their thoughts and mental impressions from being discovered by an opponent in litigation.

In addition to Exemption 5, documents within Category 9 were also withheld under FOIA Exemption 7(A). Exemption 7(A) applies to records or information compiled for law enforcement purposes, the production of which could reasonably be expected to interfere with enforcement proceedings. The documents in Category 9 were developed by EPA contractors at the behest of EPA in part for the purpose of enforcing a cleanup selected under CERCLA for the Lower 8.3 Miles of the Lower Passaic River. Release of these documents would reasonably be expected to interfere with enforcement proceedings, because it would hinder the government's ability to control or shape enforcement action should this be necessary in order to enforce the cleanup selected for the Lower 8.3 Miles of the Lower Passaic River, and would prematurely reveal the government's evidence or strategy in an ongoing enforcement action.

Documents in Category 9 were developed by EPA's contractors, including federal contractors such as the Army Corps – KC under an interagency agreement, and private contractors and sub-contractors. These documents were prepared subject to the associated contracts in support of EPA's activities at the Lower Passaic River/Diamond Alkali Superfund Site and at the direction of EPA staff and EPA attorneys. Documents in Category 9 were also shared with EPA's federal and State Partner Agencies, including NOAA, USFWS, Corps-NY, and NJDEP. The federal Partner Agencies, like EPA, are represented by the Department of Justice as representatives of the United States in enforcement actions. Moreover, the federal trustees and

EPA very clearly have common interests in this matter, and EPA and NJDEP share a common legal interest in enforcing the cleanup of the Lower Passaic River. The communications in this category were made in the course of a joint enforcement effort, the clients share a common legal interest in this effort, and the documents were developed by the contractors and subcontractors to further this effort. These documents were not, to EPA's knowledge, shared outside of these contractors and Partner Agencies.

Finally, EPA withheld a portion of one record, which was an email exchange encompassing, in part, personal information such as discussions of child-care, vacation, and other use of personal time or leave. The withheld portions of emails relate to private information for individuals, the public disclosure of which would constitute a clearly unwarranted invasion of personal privacy. The withheld information is within the scope of the phrase "personal and medical files and similar files" because the information applies to and is identified with a particular individual and is medical or personal in nature. There is no public interest in these individuals' personal or medical information. There is also no public interest in the employee's use of personal leave time. The withheld information does not shed light on employee's performance of official duties, and in each instance, the harm to the individual as a result of disclosure clearly outweighs the public interest in such disclosure.

The EPA performed a line-by-line review for segregability. Wherever possible, the Agency released all reasonably segregable information. In this category, approximately 12 documents were released with partial redactions. There is no remaining reasonably segregable factual information to be released from this material. Factual information contained within the withheld in full documents was determined to be inextricably intertwined with the privileged information, and could not be reasonably segregated to be released under FOIA from the attorney-client information, attorney work product, predecisional and deliberative information, and may interfere with law enforcement proceedings. The final Proposed Plan, Record of Decision, and administrative record for the Lower 8.3 Miles of the Lower Passaic River/Diamond Alkali Superfund site are publicly available.

Documents Released in Full after Review

- 5 Docs

EPA withheld 290 documents in full or in part under Category 10. Category 10 consists of draft technical documentation, such as draft tables, figures, and appendices and comments upon these draft materials which had been prepared by contractors but circulated internally within Region 2 (similar material exchanged with the contractors themselves is described in Category 11). This category also includes notes from meetings and meeting agendas to address issues within the draft material, such as meeting agenda documents for internal Region 2 meetings that discuss the subject of the meetings and the issues raised. This category also includes internal conversations within Region 2 discussing direction to EPA contractors and contractor management, and internal discussion regarding next steps for review of material and overall process, including next peer review steps and planning for EPA-internal and contractor-led reviews of the CSM and EMBM and the Proposed Plan.

Material within Category 10 was generally only circulated among Agency staff within Region 2. Similar documents that include contractor staff are described in Category 11. The material within Category 10 was kept internal to the Agency and has not been publicly released.

Justification for Withholdings

The withheld material is deliberative because it contains the thoughts and opinions of EPA staff, including draft documents and draft technical analyses performed to further develop the CSM and EMBM and the Proposed Plan for the underlying EPA action, including discussions of a potential enforcement action. Material within Category 10 also contains EPA's deliberations, suggestions, and discussions of the process for review and finalization of the CSM and EMBM, and the Proposed Plan. This includes suggestions for additional internal and contractor-led peer review, discussions of next steps for evaluation, discussions of contractor direction and contractor management, and agendas and meeting materials that demonstrate the issues under discussion and evaluation at Agency meetings.

This information is predecisional because it contains the internal discussions, suggestions, and evaluation of Agency staff for the purposes of developing the eventual decision documents (the Proposed Plan and later the Record of Decision) which are publicly available and indeed were developed in a process subject to extensive public comments. The withheld information does not represent an official Agency decision or policy, and instead, the withheld information reflects the Agencies' analysis, comments, and review of documentation prepared by EPA contractors and EPA staff to support the EPA's proposed actions at the Lower 8.3 Miles of the Lower Passaic River/Diamond Alkali Superfund site and the Agency's internal processes for developing a decision. The withheld information does not represent an official Agency decision or policy and is instead representative of the development of the Agency's remedy decision in the form of the Proposed Plan.

In addition, documents were withheld in full and in part because they contain legal advice and analysis protected under the Attorney-Client and Attorney Work Product Privileges. These documents include incorporation of comments made by EPA legal staff following legal review, regarding the legal impacts of various proposals and issues. This material also, in some cases, includes attorney advisory comments and questions on the technical material and attorney discussion of legal risk from various proposed courses of action. The disclosure of such communications would deprive EPA staff, and the agency in general, of the benefit of confidential advice from EPA attorneys in their discussions of the process for developing a remedy and evaluating options at a site.

Finally, certain documents that were withheld in full contain information protected by the attorney work product privilege. The attorney work product privilege extends to documents prepared by an attorney, by the attorney's client, or a representative of the attorney or the attorney's client, in anticipation of litigation, which can include contractor staff contracted to prepare documents and technical analyses in anticipation of litigation. The discussion and thoughts of the EPA attorneys within these email communications were prepared with an awareness and expectation of litigation relating to the Diamond Alkali site (both the Lower 8.3 Miles and the Lower 17 Miles of the Lower Passaic River) and in the context of a current CERCLA enforcement action, and are relevant to proposed enforcement action. Therefore, these comments and the attorneys' legal review of documents incorporate the attorneys' thoughts and evaluation of the legal risks of proposed courses of action at the site. Release of the confidential information contained in such documents would allow external scrutiny of EPA's sensitive litigation preparations and deprive EPA attorneys of the ability to keep their thoughts and mental impressions from being discovered by an opponent in litigation.

In addition to Exemption 5, documents within Category 10 were also withheld under FOIA Exemption 7(A). Exemption 7(A) applies to records or information compiled for law enforcement purposes, the production of which could reasonably be expected to interfere with enforcement proceedings. The documents in Category 10 were developed by EPA contractors at the behest of EPA in part for the purpose of enforcing a cleanup selected under CERCLA for the Lower Passaic River. Release of these documents would reasonably be expected to interfere with enforcement proceedings, because it would hinder the government's ability to control or shape enforcement action should this be necessary in order to implement the cleanup selected for the Lower Passaic River, and would prematurely reveal the government's evidence or strategy in an ongoing enforcement action.

Wherever possible, the Agency released all reasonably segregable information. In this category, approximately 6 documents were released with partial redactions. There is no remaining reasonably segregable factual information to be released from this material. Factual information contained within the withheld in full documents was determined to be inextricably intertwined with the privileged information, and could not be reasonably segregated to be released under FOIA from the attorney-client information, attorney work product, predecisional and deliberative information, and may interfere with law enforcement proceedings. The final Proposed Plan, Record of Decision, and administrative record for the Lower 8.3 Miles of the Lower Passaic River/Diamond Alkali Superfund site are publicly available.

Category 11: Communications and draft documents, particularly drafts of technical documents and related communications and comments, circulated between EPA Region 2 and its contractors and subcontractors as part of the development and peer review of the CSM and EMBM for the Lower 8.3 Miles of the Lower Passaic River and Proposed Plan – 735 Docs

Documents Released in Full after Review

- 31 Docs

The EPA withheld 704 documents in full or in part under Category 11. The information withheld within Category 11 is similar to the information withheld in Category 10, except that the information withheld within Category 11 includes ongoing communications that include contractor staff. Specifically, Category 11 consists of many iterations of draft technical documentation, such as draft tables, figures, and appendices and comments upon these draft materials which had been prepared by EPA's contractors for the Lower Passaic River . This category also includes notes from meetings and meeting agendas to address issues within the draft material when contractor staff were included in those meetings, such as meeting agenda documents for Region 2 / contractor meetings that discuss the subject of the meetings and the issues raised. This category also includes conversations with EPA Region 2 staff and EPA's main contractor, Corps-KC, discussing direction to EPA and Corps' sub-contractors and contractor management, and internal discussion regarding next steps for review of material and overall process, including next peer review steps and planning for EPA-internal and contractor-led reviews of the CSM, EMBM and the Proposed Plan.

EPA's technical contractors include the Army Corps of Engineers-Kansas City (Corps-KC), and subcontractors authorized to manage the work necessary to perform the sampling, analysis, and other technical work to develop the Focused Feasibility Study and the Proposed Plan, including the CSM and EMBM, and to support EPA's preparation of the Proposed Plan and Record of Decision. Region 2 provided funds for this Interagency Agreement, and the Corps-KC subcontracted on EPA's behalf with various contractors to perform much of the sampling, analysis, and technical work, which was provided to the Corps-KC and Region 2 for

further review and approval, and incorporation into the eventual RI/FFS, Proposed Plan and Record of Decision. Region 2 provided technical, legal and policy direction to the Corps-KC and, through the Corps-KC, its contractors. Region 2 set the schedule for the technical work. Region 2 reviewed, commented on, edited and approved all contractor work products.

The Corps-KC hired contractors Malcolm Pirnie (later Louis Berger Group), HydroQual (later HDR/HydroQual) and Battelle to perform the technical work. At Region 2's and the Corps-KC's direction, Malcolm Pirnie/Louis Berger hired technical advisors as subcontractors to review draft analyses and interim products that were subsequently combined to form elements of the Lower 8.3 Miles RI/FFS, and later, the 17 Miles RI/FS. The technical advisors ensured that the highly technical analyses were performed correctly. Region 2 reviewed, commented on, edited and approved all contractor work products incorporated into Region 2's oversight of the CPG 17 Miles RI/FS. Region 2 also shared these work product with Partner Agencies for the Partner Agencies' review and comment as part of the eventual development of the Proposed Plan and Record of Decision for the Lower 8.3 Miles of the Lower Passaic River.

Justification for Withholdings

The withheld material is deliberative because it contains the thoughts and opinions of EPA staff and EPA contractors, including draft documents and draft technical analyses performed to further develop the CSM and EMBM models and the Proposed Plan for the underlying EPA action, including discussions of a potential enforcement action. This material was developed by EPA contractors and subcontractors in order to effectuate the selection of a proposed remedy in the form of the Proposed Plan for the Lower 8.3 Miles of the Lower Passaic River/Diamond Alkali Superfund site. This information is predecisional because it contains the early initial work and multiple iterations of draft products prepared in the course of developing the Proposed Plan for the Lower 8.3 Miles of the Lower Passaic River/Diamond Alkali Superfund site. Category 11 also contains EPA's deliberations, suggestions, and discussions of the process for review and finalization of the CSM, EMBM and the Proposed Plan when those discussions included EPA's contractors. This includes suggestions for additional internal and contractor-led peer review, discussions of next steps for evaluation, discussions of contractor direction and contractor and sub-contractor management, and agendas and meeting materials that demonstrate the issues under discussion and evaluation at Agency meetings with its contractors.

The withheld information does not represent an official Agency decision or policy, and instead, the withheld information reflects the Agencies' analysis, comments, and review of documentation prepared by EPA contractors and EPA staff to support the EPA's proposed actions for the Lower 8.3 Miles of the Lower Passaic River/Diamond Alkali Superfund site. The withheld information does not represent an official Agency decision or policy and is instead representative of the development of the Agency's remedy decision in the form of the Proposed Plan. The withheld material in Category 11 were not circulated by the Agency except to officials at EPA and among contractor staff, including federal agency contractors, who were contracted to provide internal advice and technical support to the agency (although the products themselves may have been circulated to Partner Agencies as described in

Category 9). These contractors do not represent or advocate for an outside interest at the Site. Release would have a chilling effect on the Agency's ability to have frank, internal discussions with its contractors about proposed Agency actions in development, and would harm the Agency's ability to contract to receive highly technical advice and support.

In addition, documents were withheld in full and in part because they contain legal advice and analysis protected under the Attorney-Client and Attorney Work Product Privileges. These documents include incorporation of comments made by EPA legal staff following legal review, regarding the legal impacts of various proposals and issues. This material also, in some cases, includes attorney advisory comments and questions on the technical material and attorney discussion of legal risk from various proposed courses of action. The disclosure of such communications would deprive EPA staff, and the agency in general, of the benefit of confidential advice from EPA attorneys in discussing potential options for remedies with EPA contractors who are contracted to provide technical support for the EPA's legal enforcement activities under CERCLA, such as the Lower Passaic River/Diamond Alkali Superfund site.

Finally, certain documents that were withheld in full contain information protected by the attorney work product privilege. The attorney work product privilege extends to documents prepared by an attorney, by the attorney's client, or a representative of the attorney or the attorney's client, in anticipation of litigation, which can include contractor staff contracted to prepare documents and technical analyses in anticipation of litigation. The discussion and thoughts of the EPA attorneys within these email communications were prepared with an awareness and expectation of litigation relating to the Lower Passaic River/Diamond Alkali Superfund site and in the context of a current CERCLA enforcement action, and are related to the proposed enforcement action. Therefore, these comments and the attorneys' legal review of documents incorporate the attorneys' thoughts and evaluation of the legal risks of proposed courses of action at the site. Release of the confidential information contained in such documents would allow external scrutiny of EPA's sensitive litigation preparations and deprive EPA attorneys of the ability to keep their thoughts and mental impressions from being discovered by an opponent in litigation.

In addition to Exemption 5, documents within Category 11 were also withheld under FOIA Exemption 7(A). Exemption 7(A) applies to records or information compiled for law enforcement purposes, the production of which could reasonably be expected to interfere with enforcement proceedings. The documents in Category 11 were developed by EPA contractors at the behest of EPA, in part for the purpose of enforcing a cleanup selected under CERCLA for the Lower Passaic River. Release of these documents would reasonably be expected to interfere with enforcement proceedings, because it would hinder the government's ability to control or shape enforcement action should this be necessary in order to enforce the cleanup selected for the Lower Passaic River, and would prematurely reveal the government's evidence or strategy in an ongoing enforcement action.

Documents in Category 11 were developed by EPA's contractors, including federal contractors such as the Army Corps – KC under an interagency agreement, and private contractors and sub-contractors. These documents were prepared subject to the associated contracts in support of EPA's activities at the Lower Passaic River/Diamond Alkali Site and at

the direction of EPA staff and EPA attorneys. Documents in Category 11 were also shared with EPA's federal and State Partner Agencies, including NOAA, USFWS, Corps-NY, and NJDEP. The federal Partner Agencies, like EPA, are represented by the Department of Justice as representatives of the United States in enforcement actions. Moreover, the federal trustees and EPA very clearly have common interests in this matter, and EPA and NJDEP share a common legal interest in enforcing the cleanup of the Lower Passaic River. The communications in this category were made in the course of a joint enforcement effort, the clients share a common legal interest in this effort, and the documents were developed by the contractors and subcontractors to further this effort. These documents were not, to EPA's knowledge, shared outside of these contractors and Partner Agencies.

Finally, EPA withheld records which included email exchanges encompassing, in part, personal information such as discussions of child-care, vacation, and other use of personal time or leave under FOIA Exemption 6. The withheld portions of emails relate to private information for individuals, the public disclosure of which would constitute a clearly unwarranted invasion of personal privacy. The withheld information is within the scope of the phrase "personal and medical files and similar files" because the information applies to and is identified with a particular individual and is medical or personal in nature. There is no public interest in these individuals' personal or medical information. There is also no public interest in the employee's use of personal leave time. The withheld information does not shed light on employee's performance of official duties, and in each instance, the harm to the individual as a result of disclosure clearly outweighs the public interest in such disclosure.

The EPA performed a line-by-line review of the withheld material for segregability. Wherever possible, the Agency released all reasonably segregable information. In this category, approximately 34 documents were released with partial redactions. There is no remaining reasonably segregable factual information to be released from this material. Factual information contained within the withheld in full documents was determined to be inextricably intertwined with the privileged information, and could not be reasonably segregated to be released under FOIA from the attorney-client information, attorney work product, predecisional and deliberative information, and may interfere with law enforcement proceedings. The final Proposed Plan, Record of Decision, and administrative record for the Lower 8.3 Miles of the Lower Passaic River/Diamond Alkali Superfund site are publicly available.

Category 12: Communications and draft documents, particularly drafts of technical documents and related communications and comments, circulated between technical staff in EPA Region 2 and technical staff in EPA Headquarters – 112 Docs.

Documents Withheld in Full

- 7a; Deliberative Process – 2 Docs
- Deliberative Process – 99 Docs
- Deliberative Process; Withhold; Ex. 6 – 1 Doc

Documents Released with Redactions

- Deliberative Process; Redact – 3 Docs

Documents Released in Full after Review

- 7 Docs

The EPA withheld 105 documents in full or in part under Category 12. Category 12 consists of draft technical documentation, such as draft tables, figures, and appendices and comments upon these draft materials which had been prepared by contractors for internal EPA review by EPA Headquarters staff in the Office of Solid Waste and Emergency Management (OSWER, now known as the Office of Land and Emergency Management, OLEM). This category includes the draft material that was circulated via email to the EPA-OSWER reviewers as well as email communications containing reviewer comments, discussion, evaluation and analysis of this draft material. The documents within this category were circulated by EPA Region 2 staff to EPA-OSWER staff for technical review and technical evaluation. The comments, communications, and suggestions incorporated within these documents were intended for EPA Region 2's internal use to develop and evaluate the draft products and supporting documents for the CSM, EMBM and the Proposed Plan. Documents within Category 12 were not circulated outside of the Agency.

Justification for Withholdings

The withheld material is deliberative because it contains the thoughts and opinions of EPA staff within EPA Region 2 and EPA-OSRTI, including EPA-OSRTI's review of draft documents and draft technical analyses performed to further develop the CSM and EMBM and the Proposed Plan for the underlying EPA action, and in the case of two documents includes discussions of a potential enforcement action. The circulated material was developed by EPA contractors and subcontractors in order to effectuate the selection of a proposed remedy in the form of the Proposed Plan for the Lower 8.3 Miles of the Lower Passaic River/Diamond Alkali Superfund site, and the communications in this category were developed to provide analytical technical evaluation and review of this material. This information is predecisional because it contains the early initial work and multiple iterations of draft products prepared in the course of developing the Proposed Plan for the Lower 8.3 Miles of the Lower Passaic River/Diamond Alkali Superfund site, including the thoughts, opinions, and analysis of the EPA-OSRTI reviewers on these draft products and their candid suggestions for improvements to be made to the Regional products.

The withheld information does not represent an official Agency decision or policy, and instead, the withheld information reflects the Agency's internal analysis, comments, and review of documentation prepared by EPA contractors and EPA staff to support the EPA's proposed actions for the Lower 8.3 Miles of the Lower Passaic River/Diamond Alkali Superfund site as part of an internal review process developed to improve the EPA's eventual decision. The withheld information does not represent an official Agency decision or policy and instead represens the Agency's internal thoughts, evaluation, and discussion of potential issues and technical changes to be made to draft versions of the CSM and EMBM in support of the Proposed Plan. The withheld material in Category 12 was part of the Agency's internal

review process and was not circulated by the Agency. Release would have a chilling effect on the Agency's ability to have frank, internal discussions and candid review about proposed Agency actions in development, and would harm the Agency's ability to contract to receive highly technical advice and support from EPA staff. Release could also cause public confusion by disclosing reasoning and rationales that were not in fact the reasons for the Agency's eventual actions.

In addition to Exemption 5, two documents within Category 12 were also withheld under FOIA Exemption 7(A). Exemption 7(A) applies to records or information compiled for law enforcement purposes, the production of which could reasonably be expected to interfere with enforcement proceedings. The two emails withheld under Exemption 7(A) within Category 12 are part of the same email discussion, which contains sensitive discussions of the law enforcement history and potential effects of Agency action in part for the purpose of enforcing a cleanup selected under CERCLA for the Lower Passaic River. Release of these documents would reasonably be expected to interfere with enforcement proceedings, because it would hinder the government's ability to control or shape enforcement action should this be necessary in order to implement the cleanup selected for the Lower Passaic River, and would prematurely reveal the government's evidence or strategy in an ongoing enforcement action.

The EPA performed a line-by-line review of these documents for segregability. Wherever possible, the Agency released all reasonably segregable information. In this category, approximately three documents were released with partial redactions. There is no remaining reasonably segregable factual information to be released from this material. Factual information contained within the withheld in full documents was determined to be inextricably intertwined with the privileged information, and could not be reasonably segregated to be released under FOIA from the attorney-client information, attorney work product, predecisional and deliberative information, and may interfere with law enforcement proceedings. The final Proposed Plan, Record of Decision, and administrative record for the Lower 8.3 Miles of the Lower Passaic River/Diamond Alkali Superfund site are publicly available.

Category 13: Draft technical documents circulated for legal review, incorporating attorney comments – 62 Docs

Documents Withheld in Full

- Deliberative Process; Attorney Client; Attorney Work Product – 44 Docs
- Deliberative Process; Attorney Client – 18 Docs

The EPA withheld 62 documents under Category 13. Category 13 consists of draft technical documentation, such as draft tables, figures, and appendices and comments upon these draft materials which had been prepared by contractors and EPA staff for review by EPA Region 2 attorneys, and those attorneys' evaluation and comments on the draft technical materials. This category includes the draft material that was circulated via email to the EPA legal reviewers as

well as email communications containing attorney comments, discussion, evaluation and analysis of this draft material. The documents within this category were circulated by EPA Region 2 technical staff to EPA Region 2 attorneys for legal review and legal evaluation, and contain the comments and advice of EPA Region 2 attorneys on these technical products. The comments, communications, and suggestions incorporated within these documents was intended for EPA Region 2's internal use to develop and evaluate the draft products and supporting documents for legal issues and to develop the Agency's CSM, EMBM and Proposed Plan in accordance with governing law, regulation, and guidance. Documents within Category 13 were not circulated outside of the Agency.

Justification for Withholdings

The withheld material is deliberative because it contains the thoughts and opinions of EPA staff within EPA Region 2, in particular EPA's legal staff, incorporating the attorneys' review of draft documents and draft technical analyses performed to further develop the CSM and EMBM and the Proposed Plan for the underlying EPA action. The circulated material was developed by EPA contractors and subcontractors in order to effectuate the selection of a proposed remedy in the form of the Proposed Plan for the Lower 8.3 Miles of the Lower Passaic River/Diamond Alkali Superfund site, and the communications in this category were developed to incorporate legal staff's review of this material. This information is predecisional because it contains the thoughts, opinions, and analysis of the EPA Region 2 attorney reviewers on these draft products and their candid suggestions for improvements to be made to the Regional products, including the potential legal issues and legal effects of suggested comments and changes.

The withheld information does not represent an official Agency decision or policy, and instead, the withheld information reflects the Agency's internal analysis, comments, and review of documentation prepared by EPA contractors and EPA staff to support the EPA's proposed actions for the Lower 8.3 Miles of the Lower Passaic River/Diamond Alkali Superfund site as part of an internal legal review process. The withheld information does not represent an official Agency decision or policy and instead represents the Agency's internal thoughts, evaluation, and discussion of potential issues, including legal issues raised by draft versions of the CSM and EMBM in support of the Proposed Plan. The withheld material in Category 13 was part of the Agency's internal review process and was not circulated by the Agency. Release would have a chilling effect on the Agency's ability to have frank, internal discussions and candid review about proposed Agency actions in development, and would harm the Agency's ability to contract to receive highly technical advice and support from EPA staff. Release could also cause public confusion by disclosing reasoning and rationales that were not in fact the reasons for the Agency's eventual actions.

In addition, documents were withheld in full and in part because they contain legal advice and analysis protected under the Attorney-Client and Attorney Work Product Privileges. These documents include incorporation of comments made by EPA legal staff following legal review, regarding the legal impacts of various proposals and issues. This material also, in some cases, includes attorney advisory comments and questions on the technical material and attorney discussion of legal risk from various proposed courses of action. The disclosure of

such communications would deprive EPA staff, and the agency in general, of the benefit of confidential advice from EPA attorneys in discussing potential options for remedies with EPA contractors who are contracted to provide technical support for the EPA's legal enforcement activities under CERCLA, such as for the Lower Passaic River.

Finally, certain documents that were withheld in full contain information protected by the attorney work product privilege. The attorney work product privilege extends to documents prepared by an attorney, by the attorney's client, or a representative of the attorney or the attorney's client, in anticipation of litigation, which can include contractor staff contracted to prepare documents and technical analyses in anticipation of litigation. The discussion and thoughts of the EPA attorneys within these email communications were prepared with an awareness and expectation of litigation relating to the Lower Passaic River and in the context of a current CERCLA enforcement action, and are related to the proposed enforcement action. Therefore, these comments and the attorneys' legal review of documents incorporate the attorneys' thoughts and evaluation of the legal risks of proposed courses of action at the site. Release of the confidential information contained in such documents would allow external scrutiny of EPA's sensitive litigation preparations and deprive EPA attorneys of the ability to keep their thoughts and mental impressions from being discovered by an opponent in litigation.

The EPA performed a line-by-line review of these documents for segregability. There is no reasonably segregable factual information to be released from this material. Factual information contained within the withheld in full documents was determined to be inextricably intertwined with the privileged information, and could not be reasonably segregated to be released under FOIA from the attorney-client information, attorney work product, predecisional and deliberative information. The final Proposed Plan, Record of Decision, and administrative record for the Lower 8.3 Miles of the Lower Passaic River/Diamond Alkali Superfund site are publicly available.

Documents Withheld in Full

- Deliberative Process; Attorney Client; Attorney Work Product – 41 docs
- Deliberative Process; – 5 docs
- Deliberative Process, Attorney Client – 10 Docs

Documents Released with Redactions

- Deliberative Process; Attorney Client; Attorney Work Product – 4 Doc
- Deliberative Process - 1 Doc
- Deliberative Process; Attorney Client; Redact – 1 Doc

Documents Released in Full after Review

- 9 Docs

The EPA withheld 62 documents in full or in part under Category 14. The documents in this category consist of email chains containing discussions between Region 2 technical staff and Region 2 staff attorneys discussing the technical documentation prepared by EPA's contractors in support of the CSM, EMBM and Proposed Plan for the Lower 8.3 Miles of the Lower Passaic River/Diamond Alkali Superfund site. These communications do not generally include the contractors themselves but are rather internal legal and technical analyses of the work performed by contractors and staff. Attorneys were included in these discussions in order to provide legal review and analysis of the documentation prepared to support various proposed remedies at the site and to provide instruction to the Region 2 contractor staff and technical staff. The communications contain the thoughts and advice of attorneys on these draft products in development. These communications were internal to the Agency, and were not shared outside of the Agency.
Justification for Withholdings
The withheld material is deliberative because it contains the thoughts and opinions of EPA Region 2 technical staff and EPA attorneys, following the attorneys' and technical staffs' evaluation of the work of EPA contractors. These communications include attorney and staff questions and assessments of the technical work and options for next steps, follow-up, or clarification. This information is predecisional because it contains technical and legal comments on the proposals and technical documents which were in development, and does not represent a final decision. The withheld information does not represent an official Agency decision or policy, and instead, the withheld information reflects the Agency's analysis, comments, and review of documentation prepared by EPA contractors and EPA staff to support the EPA's proposed actions for the Lower 8.3 Miles of the Lower Passaic River/Diamond Alkali Superfund site. The withheld material in this category was not generally circulated outside of Region 2. Release of these communications would have a chilling effect on the Agency's ability to have frank, internal discussions between EPA legal and technical staff about proposed Agency actions in development, and may cause public confusion. In addition, documents were withheld in full and in part because they contain legal advice and analysis protected under the Attorney-Client and Attorney Work Product Privileges. These discussions include comments made by EPA legal staff following legal review, regarding the legal impacts of various proposals and issues. This material also, in some cases, includes attorney advisory comments and questions on the technical material. The disclosure of such communications would deprive EPA staff, and the agency in general, of the benefit of confidential advice from EPA attorneys in discussing potential options for remedies with EPA technical staff and would prevent attorneys from advising the Agency on the work of its staff and contractors for the EPA's legal enforcement activities under CERCLA, such as for the Lower Passaic River. Finally, certain documents that were withheld in full contain information protected by the attorney work product privilege. The attorney work product privilege extends to documents prepared by an attorney, by the attorney's client, or a representative of the attorney or the attorney's client, in anticipation of litigation, which can include contractor staff contracted to

prepare documents and technical analyses in anticipation of litigation. The discussion and thoughts of the EPA attorneys within these email communications were prepared with an awareness and expectation of litigation relating to the Lower Passaic River and in the context of a current CERCLA enforcement action, and are related to the proposed enforcement action. Therefore, these comments and the attorneys' legal review of documents incorporate the attorneys' thoughts and evaluation of the legal risks of proposed courses of action at the site. Release of the confidential information contained in such documents would allow external scrutiny of EPA's sensitive litigation preparations and deprive EPA attorneys of the ability to keep their thoughts and mental impressions from being discovered by an opponent in litigation.

The EPA performed a line-by-line review of these documents for segregability. Wherever possible, the Agency released all reasonably segregable information. In this category, approximately six documents were released with partial redactions. There is no remaining reasonably segregable factual information to be released from this material. Factual information contained within the withheld in full documents was determined to be inextricably intertwined with the privileged information, and could not be reasonably segregated to be released under FOIA from the attorney-client information, attorney work product, predecisional and deliberative information, and may interfere with law enforcement proceedings. The final Proposed Plan, Record of Decision, and administrative record for the Lower 8.3 Miles of the Lower Passaic River/Diamond Alkali Superfund site are publicly available.

Category 15: Hardcopy notes and documents related to the development of the CSM, EMBM and Proposed Plan for the Lower 8.3 Miles of the Lower Passaic River , including meeting notes and notes and comments on draft documents – 142 Documents

Documents Withheld in Full

- 7(a); Deliberative Process – 38 Docs
- Deliberative Process – 103 Docs

The documents in this category consist of documents that were collected from searches for non-emailed, hard copy documents. These documents include written comments on draft products and draft memoranda and handwritten notes from EPA staff members that contain the staff members' opinions, evaluations, and next steps for follow up from those meetings. These documents were created as part of the overall process of development of the CSM and EMBM for the Proposed Plan and represent the internal thoughts and considerations of EPA employees attending meetings, discussing various issues raised at meetings and at calls, and reviewing documentation. These documents were not circulated outside of Agency staff.

Justification for Withholdings
The withheld material is deliberative because it contains the thoughts and opinions of EPA staff, which was noted and created as part of the overall process of evaluating technical models, reviewing draft documents, and providing opinions and thoughts on options moving forward for development of the CSM and EMBM and the Proposed Plan, including discussions of a potential enforcement action. The withheld information does not represent an official Agency decision or policy, and instead, the withheld information reflects the Agencies' analysis, comments, and review of documentation and participation in calls and meetings related to the development of the Proposed Plan and the related enforcement case. The withheld information is representative of EPA staff internal thoughts and opinions on proposed actions and drafts, and does not represent an official Agency decision or policy. The material was generated by EPA staff in the development of the Agency's remedy decision in the form of the Proposed Plan. The withheld material was not circulated by the Agency staff. Release would have a chilling effect on the individual staff's ability to take candid and thoughtful notes during calls and on draft documents, and would undermine the development of Agency action that relies upon the thoughts and opinions of staff as they review documents, attend advisory calls and meetings, and develop Agency actions. Release could also create public confusion by disclosing reasons or rationales for Agency actions that were not in fact the final reason for the action. In addition to Exemption 5, documents within Category 15 were also withheld under FOIA Exemption 7(A). Exemption 7(A) applies to records or information compiled for law enforcement purposes, the production of which could reasonably be expected to interfere with enforcement proceedings. The documents in Category 15 were developed by EPA staff and contain information that was developed for law enforcement purposes, including notes of meeting that were held and documents that were reviewed for the purpose of enforcing a cleanup selected under CERCLA for the Lower 8.3 Miles of the Lower Passaic River. Release of these documents would reasonably be expected to interfere with enforcement proceedings, because it would hinder the government's ability to control or shape enforcement action should this be necessary in order to implement the cleanup selected for the Lower 8.3 Miles of the Lower Passaic River, and would prematurely reveal the government's evidence or strategy in an ongoing enforcement action. The EPA performed a line-by-line review of these documents for segregability. There is no reasonably segregable factual information to be released from this material. Factual information contained within the withheld in full documents was determined to be inextricably intertwined with the privileged information, and could not be reasonably segregated to be released under FOIA from the attorney-client information, attorney work product, predecisional and deliberative information, and may interfere with law enforcement proceedings. The final Proposed Plan, Record of Decision, and administrative record for the Lower 8.3 Miles of the Lower Passaic River/Diamond Alkali Superfund site are publicly available.

Category 16 – Handwritten Attorney Notes from Meetings and Calls – 36 documents.
Documents Withheld in Full • Attorney Work Product – 36 docs
The documents in this category consist of documents that were collected from searches for non-emailed, hard copy documents. The documents in Category 16 are copies of handwritten notes from EPA Region 2 attorneys that contain the attorneys' opinions, evaluations, and next steps for follow up from those meetings. These documents were created as part of the overall process of development of the CERCLA enforcement action for the Lower Passaic River, and represent the internal thoughts and considerations of EPA attorneys attending meetings, discussing various issues raised at meetings and at calls, and reviewing documentation. These documents were not circulated outside of Agency staff and were kept confidential by the attorneys.
Justification for Withholdings
The 36 documents that were withheld in full in Category 16 contain information protected by the attorney work product privilege. The attorney work product privilege extends to documents prepared by an attorney, by the attorney's client, or a representative of the attorney or the attorney's client, in anticipation of litigation. These documents represent the mental impressions, thoughts, and opinions of EPA attorneys during calls and meetings within the context of a current CERCLA enforcement action, including the thoughts and mental impressions of the attorney about the potential issues raised on these calls and the effects of those issues on the potential litigation case. The EPA attorneys who prepared these handwritten notes did so with an awareness and expectation of litigation relating to the Lower Passaic River and in the context of a current CERCLA enforcement action, and these notes are on topics related to the proposed enforcement action. Therefore, these comments and the attorneys' legal review of documents incorporate the attorneys' thoughts and evaluation of the legal risks of proposed courses of action for the site. Release of the confidential information contained in such documents would allow external scrutiny of EPA's sensitive litigation preparations and deprive EPA attorneys of the ability to keep their thoughts and mental impressions from being discovered by an opponent in litigation. The EPA performed a line-by-line review of these documents for segregability. There is no reasonably segregable factual information to be released from the material in this category, which is the mental work product of EPA attorneys. Any factual information within these notes is inextricably intertwined with the privileged attorney work product and cannot be reasonably segregated.

Categories of Documents Withheld and Substantive Description of Basis for Withholding – CPG Third FOIA Request*

Category 17 – Meeting Invitations and Discussion with Outside Parties – 122 documents.
Documents Released With Redactions • Ex. 6 Personal Privacy, Non-Responsive – 122 Documents
The documents in this category are responsive to Part 4 of CPG's Third FOIA Request. These documents consist of meeting invitations, meeting agendas, and emails discussing meetings with outside parties related to the Lower Passaic River Site. No documents within Category 17 were withheld in full; the 122 documents in this category were released with minor redactions. The redactions include redaction of internal information such as conference lines and call-in numbers for conference codes, personal contact information such as personal email address and personal cell phone information, and similar information.
Justification for Withholdings
As described above, EPA withheld portions of 122 documents under FOIA Exemption 6 to protect personal privacy. The withheld records consist of personal email addresses, cell phone numbers, home phone numbers, home addresses, conference call in lines and access codes, and similar contact information. In some instances this material was redacted as "non-responsive" to the FOIA request on the face of the document. The withheld portions of emails relate to personal contact information of EPA employees, other Federal employees, or members of the public, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy. The withheld information is within the scope of "personnel and medical files and similar files" because the information applies to and is identified with a particular individual. There is no public interest in these individuals' personal contact information, such as an email address, home phone number, or cell phone number. With respect to the personal contact information of Agency or other Federal employees, the withheld information does not shed light on the employee's performance of official duties. In each instance, the harm to the individual as a result of the disclosure clearly outweighs the public interest in such disclosure. EPA Region 2 and EPA OGC performed a line-by-line review of these documents for segregability, and segregated information wherever possible, including in these 122 documents that were released with redactions. All in all, 3,172 documents were released in response to CPG's Third FOIA request, most released in full. There is no additional reasonably segregable information to be released from this material.

* Only one document was withheld in full in response to CPG's Third FOIA Request, which is described in detail in Category 18. The remaining 122 documents described in Category 17 were released to CPG with the minor redactions as described. Because these documents were released to CPG, they have not been individually listed in a Coded Vaughn Index.

Category 18 – Single Document Withheld in Third Request

Document Withheld In Full

- 7(A); Deliberative Process – 1 Document

EPA withheld one document in full under Category 18. This one document consisted of comments from two Partner Agencies, U.S. Fish and Wildlife Service (USFWS) and National Oceanographic and Atmospheric Administration (NOAA) together, "the Federal Trustees" to the National Remedy Review Board on the Focused Feasibility Study (FFS) for the Lower Eight Miles of the Lower Passaic River.

The Partner Agencies are a group of federal and state agencies studying the Lower Passaic River contemporaneously with EPA. The agencies include U.S. Army Corps of Engineers, New York District; New Jersey Department of Environmental Protection (NJDEP); National Oceanographic and Atmospheric Administration (NOAA); and U.S. Fish and Wildlife Service (USFWS). The New Jersey Department of Transportation (NJDOT) participated in the Partner Agencies until November 2007, when its responsibilities were transferred to NJDEP. Throughout development of the 17-Mile RI/FS and the Lower 8.3 Mile RI/FFS, EPA shared technical documents in draft form with the partner agencies (primarily NJDEP, but also the Corps-NY, NOAA, USFWS and NJDOT). In 2005, EPA Region 2 signed a Joint Prosecution and Confidentiality Agreement (JPCA) with the Partner Agencies covering the work to be done with respect to the Lower Passaic River, recognizing the common interests and legal responsibilities of the parties. This JPCA provided that the parties' common interests with respect to the Passaic River Matter (defined as the contamination of the Passaic River and environs in New Jersey) include the determination, implementation and supervision of appropriate and effective environmental and natural resource damages response actions, and the preparation for and prosecution of anticipated enforcement litigation against third parties with respect to the Passaic River Matter.

This one document in Category 19 consists of comments from two Partner Agencies, USFWS and NOAA, to the NRRB on the FFS. NRRB solicited these comments to further its goals of improving national consistency and remedy cost-effectiveness, confirming that the selection and decision-making process is technically sound, and ensuring that the results are in accordance with current law, regulations, and guidance. Therefore, and as described in more detail below, this document is protected under the deliberative process and as law enforcement information.

Justification for Withholdings

The withheld material is deliberative because it contains the thoughts and opinions of EPA Partner Agencies solicited by NRRB to further its goals of improving national consistency and remedy cost-effectiveness, confirming that the selection and decision-making process is technically sound, and ensuring that the results are in accordance with current law, regulations, and guidance, including discussions of the potential enforcement action itself. This material

was developed by EPA Partner Agencies with the understanding that the comments, analyses, and suggestions were to be subject to multiple levels of review and evaluation by the NRRB, and other Partner Agencies. This information is predecisional because it contains the initial comments of EPA Partner Agencies prepared in the course of developing the FFS for the Lower 8.3 Miles of the Lower Passaic River/Diamond Alkali site. The withheld information does not represent an official Agency decision or policy, and instead, the withheld information reflects the Agency's solicitation of comments to support the EPA's proposed actions for the Lower 8.3 Miles of the Lower Passaic River. The withheld information does not represent an official Agency decision or policy and is instead representative of the development of the Agency's evaluation of the Lower 8.3 Miles of the Lower Passaic River/Diamond Alkali site in the form of the FFS. The withheld material in Category 18 was circulated by the Agency to other Partner Agencies. Release would have a chilling effect on the Agency's ability to have frank, internal discussions with its partners about proposed Agency actions in development, and would harm the Agency's ability to contract to receive technical advice and support.

In addition to Exemption 5, the withheld material in Category 18 was also withheld under FOIA Exemption 7(A). Exemption 7(A) applies to records or information compiled for law enforcement purposes, the production of which could reasonably be expected to interfere with enforcement proceedings. The document in Category 18 was developed by EPA Partner Agencies at the behest of EPA in part for the purpose of enforcing a cleanup selected under CERCLA for the Lower Passaic River. Release of this document would reasonably be expected to interfere with enforcement proceedings, because it would hinder the government's ability to control or shape enforcement action should this be necessary in order to implement the cleanup selected for the Lower Passaic River, and would prematurely reveal the government's evidence or strategy in an ongoing enforcement action.

Finally, the document in Category 18 was also shared with EPA's federal and State Partner Agencies. The federal Partner Agencies, like EPA, are represented by the Department of Justice as representatives of the United States in enforcement actions. Moreover, the Federal Trustees and EPA very clearly have common interests in this matter. The material in this category was made in the course of a joint enforcement effort, the clients share a common legal interest in this effort, and the document was developed by the Partner Agencies to further this effort. This document was not, to EPA's knowledge, shared outside of these Partner Agencies.

EPA Region 2 and EPA OGC performed a line-by-line review of this document for segregability. 122 documents were released in redacted form as a result of that review. There is no reasonably segregable factual information to be released from this material. Factual information contained within the withheld in full documents was determined to be inextricably intertwined with the privileged information, and could not be reasonably segregated to be released under FOIA from the predecisional and deliberative information, and may interfere with law enforcement proceedings. The final Proposed Plan, Record of Decision, and administrative record for the Lower 8.3 Miles of the Lower Passiac River/Diamond Alkali site are publicly available.

UNITED STATES DISTRICT COURT
DISTRICT OF NEW JERSEY

LOWER PASSAIC RIVER STUDY AREA COOPERATING PARTIES GROUP, *Plaintiff,* v. U.S. ENVIRONMENTAL PROTECTION AGENCY, *Defendant.*	HON. JOSE L. LINARES *Civil Action No.* 15-CV-7828 (JLL)(JAD)

LOCAL CIVIL RULE 56.1 STATEMENT OF MATERIAL FACTS NOT IN DISPUTE

Pursuant to Rule 56.1 of the Local Civil Rules of the United States District Court for the District of New Jersey, defendant the U.S. Environmental Protection Agency ("EPA"), by its attorney, Paul J. Fishman, the United States Attorney for the District of New Jersey, states that there is no genuine issue to be tried with respect to the following facts:

I. The Lower Passaic River / Diamond Alkali Site

1. The Passaic River is 80 miles long. With headwaters in southern Morris County, it passes through rural, suburban and urban areas, draining a watershed of 935 square miles, to empty into Newark Bay. The Lower Passaic River is the 17-mile tidal stretch of the river, from Dundee Dam to Newark Bay. Three major tributaries (Saddle River, Third River and Second

River) bring water into the Lower Passaic River's main stem, which is used for recreation and navigation, among other uses. See Declaration of Walter Mugdan, dated May 13, 2016 ("Mugdan Decl."), ¶ 4.

2. Starting in the 1800s, the Passaic River was one of the major centers of the American industrial revolution. By the beginning of the 20th Century, a number of industrial operations, such as manufactured gas plants, paper manufacturing facilities, petroleum refineries, shipping, tanneries, creosote wood preservers, metal recyclers and manufacturers of materials such as rubber, rope, textiles, paints and dyes, pharmaceuticals and chemicals, had located along the river's banks as cities like Newark grew. Industrial operations and municipalities used the river for wastewater disposal. This history of industrial development surrounding the Lower Passaic River resulted in the conditions that can be observed today, including contaminated sediments and surface water, and degraded habitat. *See* Lower Passaic River Restoration Project Fact Sheet at *http://passaic.sharepointspace.com/Public%20Documents/fact.pdf*. See Mugdan Decl. ¶ 5.

3. In 2002, EPA formed a partnership with the U.S. Army Corps of Engineers-New York District (the "Corps-NY"), the New Jersey Department of Transportation ("NJDOT"), the New Jersey Department of Environmental Protection ("NJDEP"), the National Oceanic and Atmospheric Administration ("NOAA") and U.S. Fish and Wildlife Service ("USFWS") to conduct a joint study that would bring each agency's authorities to bear on the complex environmental problems of the Lower Passaic River. The goal of the Lower Passaic River Restoration Project is to remediate contaminated sediments, improve water quality, restore degraded shorelines, restore and create new habitats and enhance human use along the Lower Passaic River and in several tributaries from Dundee Dam near Garfield, to Newark Bay. One

aspect of the Lower Passaic River Restoration Project is EPA's effort to address contaminated sediments under CERCLA. See Mugdan Decl. ¶ 6.

4. The Lower Passaic River is being investigated and addressed as by EPA part of the Diamond Alkali Superfund Site. In the early 1980s, investigations by EPA and NJDEP found soil contaminated with dioxin at the former Diamond Alkali manufacturing facility located at 80 Lister Avenue, in Newark, NJ, next to the Passaic River. Cleanup work was initiated and, in 1984, EPA added the Diamond Alkali site to the National Priorities List, identifying the site as one with the most significant risk to human health and the environment. EPA and NJDEP also identified contaminants, such as metals, persistent organic chemicals, pesticides and dioxin, in the sediments of a six mile stretch of the Lower Passaic River adjacent to the former manufacturing facility. In 1994, under EPA oversight, Occidental Chemical Corporation began a remedial investigation of this six mile stretch. The investigation found elevated concentrations of contaminants that originated from the former Diamond Alkali manufacturing facility, as well as other contaminants not clearly linked to the former facility's operations. See Mugdan Decl. ¶ 7.

5. As documented in the Record of Decision for the Lower 8.3 Miles, the six mile study, and studies by the Corps-NY and other agencies, showed that contaminated sediments and other sources of hazardous chemicals were potentially present along the 17 Miles. Therefore, EPA decided to expand the study of the Passaic River to include the entire 17 Miles, from Dundee Dam to Newark Bay. See Mugdan Decl. ¶ 8.

6. EPA started work on the remedial investigation/feasibility study ("RI/FS") for the 17 Miles using federal funds. In 2004, EPA signed an administrative settlement agreement under Section 122(h) of CERCLA with a number of potentially responsible parties ("PRPs"), which

provided funding for EPA to perform the 17 Miles RI/FS. The settlement agreement was amended in 2005 and 2007, adding more parties. In 2007, the settling parties entered into a new administrative settlement agreement and order on consent (the "2007 AOC") with EPA, taking over the performance of the 17 Miles RI/FS from EPA. See Mugdan Decl. ¶ 9.

7. While the 17 Miles RI/FS was underway, in 2006, the EPA concluded that, since the Lower 8.3 Miles contain the bulk of the contaminated sediment, addressing this portion of the river first would better support the overall protection of human health and the environment than would awaiting the outcome of the 17 Miles RI/FS to make a decision for the entire Lower Passaic River. Therefore, EPA undertook a targeted investigation, or Focused Feasibility Study ("FFS") of the Lower 8.3 Miles. As described in Paragraphs 21 to 28 below, EPA has now selected a cleanup for the sediments of the Lower 8.3 Miles and will pursue those parties responsible for the contamination to perform or pay for both the cleanup, and to recover EPA's unreimbursed past costs incurred in studying and selecting a remedy for the Lower 8.3 Miles. See Mugdan Decl. ¶ 10.

II. Superfund Background and Process

8. CERCLA, commonly known as the Superfund law, was enacted by Congress on December 11, 1980. Among other things, this law provides broad Federal authority to clean up uncontrolled or abandoned hazardous waste sites as well as accidents, spills, and other emergency releases of pollutants and contaminants into the environment. Under CERCLA, EPA is authorized to seek out those parties responsible for current or past releases and assure their cooperation in the cleanup. EPA may enter into settlement agreements and consent decrees with PRPs requiring them to perform work under CERCLA without compromising the agency's right

to recover for any work or costs not specifically addressed by the agreements, including future work needed to effectuate cleanup of the contaminated site. See Mugdan Decl. ¶ 11.

9. CERCLA investigations and cleanups follow, to the extent practicable, the National Oil and Hazardous Substances Pollution Contingency Plan (more commonly known as the National Contingency Plan or "NCP"), promulgated pursuant to Section 105 of CERCLA, 42 U.S.C. § 9605, codified at 40 C.F.R. Part 300, et seq., including all amendments thereto. The NCP provides the guidelines and procedures to respond to releases and threatened releases of hazardous substances, pollutants, or contaminants. See Mugdan Decl. ¶ 12.

10. In addition to EPA's authority to undertake response actions, under CERCLA Section 104, PRPs, which are people or entities potentially responsible for a release of hazardous substances into the environment, may conduct certain response actions in accordance with CERCLA Section 122, if EPA determines that the action will be done properly and promptly. See Mugdan Decl. ¶ 13.

11. CERCLA authorizes two kinds of response actions: 1) actions taken to address releases or threatened releases requiring prompt response (short-term removals), and 2) actions that permanently and significantly reduce the risks associated with releases or threatened releases of hazardous substances that are serious, but not so urgent as to require an immediate response (long-term remedial response actions). Long-term remedial response actions can be conducted only at sites listed on EPA's National Priorities List ("NPL"), which identifies the sites with the most significant risk to human health and the environment. The Diamond Alkali Site, which includes the Lower Passaic River and Newark Bay, is one such site and as noted above, is listed on the NPL. See Mugdan Decl. ¶ 14.

12. At the time a site is listed on the NPL, EPA (or the state, acting as lead agency) begins an RI/FS. An RI/FS can be performed for the site as a whole, or for a particular portion of the site called an operable unit. The investigation and cleanup of a site can be divided into a number of operable units, depending on the complexity of the problems associated with the site. See Mugdan Decl. ¶ 15.

13. During an RI/FS, the lead agency (federal or state) either gathers or oversees the gathering of information by another entity such as a PRP, to support an informed decision regarding which remedy (if any) is most appropriate for a given site or an operable unit within a site. In general, the objectives of the remedial investigation ("RI") portion of the RI/FS are to determine the nature and extent of the contamination at the site or operable unit and assess risks to human health and the environment from this contamination. The RI may also include tests to evaluate the potential performance and cost of the treatment technologies being considered for addressing the risks. See Mugdan Decl. ¶ 16.

14. In characterizing the site or operable unit, the lead agency or PRP identifies the source of contamination, potential routes of migration, and current and potential human and environmental receptors. A baseline risk assessment conducted during the RI estimates what risks the site or operable unit poses now and would pose in the future if no cleanup action were taken. Thus, the RI provides the scientific and legal basis for taking action under CERCLA and identifies contaminants and the exposure pathways that need to be addressed by the remedial action. See Mugdan Decl. ¶ 17.

15. The feasibility study ("FS") portion of the RI/FS involves the identification and detailed evaluation of potential remedial alternatives. The alternatives are evaluated against the NCP evaluation criteria, and compared with each other to gauge their relative performance. Each

alternative that makes it to this stage of the analysis, with the exception of the required "No Action" alternative, should be protective of human health and the environment and compliant with Applicable or Relevant and Appropriate Requirements (unless a waiver is justified), both threshold requirements under CERCLA. EPA guidance also provides for a focused FS (or FFS) for an interim action that is more limited in scope than a site-wide remedy and only addresses areas/media that also will be addressed by a final site/operable unit Record of Decision. See Mugdan Decl. ¶ 18.

16. When the FS stage is complete, the lead agency identifies the Preferred Alternative for a site or operable unit and presents it to the public in a Proposed Plan. The Proposed Plan briefly summarizes the alternatives studied in the detailed analysis phase of the RI/FS, highlighting the key factors that led to identifying the Preferred Alternative. The Proposed Plan, as well as the RI/FS and the other information that forms the basis for the lead agency's response selection, is made available for public comment in the Administrative Record file. The opportunity for a public meeting must also be provided at this stage. See Mugdan Decl. ¶ 19.

17. Following receipt of public comments and any final comments from the support agency, the lead agency selects and documents the remedy selection decision in a Record of Decision. The Record of Decision documents the remedial action plan for a site or operable unit and serves the following three basic functions: 1) it certifies that the remedy selection process was carried out in accordance with CERCLA and, to the extent practicable, with the NCP; 2) it describes the technical parameters of the remedy, specifying the methods selected to protect human health and the environment including treatment, engineering, and institutional control components, as well as cleanup levels; and 3) it provides the public with a consolidated summary

of information about the site and the chosen remedy, including the rationale behind the selection. See Mugdan Decl. ¶ 20.

18. As described above, while the RI/FS for 17 Miles was underway, beginning in 2006 EPA undertook a targeted investigation, or FFS, of the Lower 8.3 Miles. The RI and FFS Reports for the Lower 8.3 Miles, and EPA's Proposed Plan for remediation of this portion of the Diamond Alkali Superfund Site were released to the public for comment on April 11, 2014 via the web site www.ourPassaic.org, a website hosted by EPA for the Lower Passaic River. These documents were also made available to the public in the Administrative Record file maintained at the Newark Public Library, 5 Washington Street, Newark, New Jersey, the Elizabeth Public Library, 11 South Broad Street, Elizabeth, New Jersey, and in the EPA Region 2 Records Center at 290 Broadway, New York City. A notice of availability of the Administrative Record was published in the Star Ledger and Luso Americano on April 25, 2014. EPA also developed fact sheets summarizing the Proposed Plan in Spanish and Portuguese to support its outreach to those communities. In addition, select documents from the Administrative Record were made accessible online at:

http://www.ourPassaic.org

http://www.epa.gov/region02/superfund/npl/diamondalkali

See Mugdan Decl. ¶ 21.

19. The public comment period for the Lower 8.3 Miles Proposed Plan and supporting documents was originally scheduled by EPA to extend from April 21, 2014 through June 20, 2014. EPA received requests to extend the public comment period, including from the CPG, to allow additional time for consideration of and comment on the Proposed Plan. In

response to these requests, EPA extended the public comment period to July 21, 2014, then to August 20, 2014, at which time the comment period closed. See Mugdan Decl. ¶ 22.

20. By the close of the comment period, EPA had received hundreds of comments, including comments from individuals, organizations, and elected officials. The CPG submitted 91 pages of detailed comments, accompanied by: eight appendices and 15 attachments comprising technical, legal and policy reports and analyses prepared for the CPG; 298 technical references; 87 items of correspondence; 45 documents referenced in Attachment A; 33 quality assurance plans; and 41 reports. In addition, William Hyatt of K&L Gates, LLP, on behalf of the CPG, submitted letters to EPA on May 27, 2014, June 30, 2014 and August 7, 2014 commenting on various aspects of the RI/FFS and EPA's Proposed Plan, which were included as comments to the Proposed Plan. Finally, individual members of the CPG submitted their own comment letters. In all, the CPG's comments comprised thousands of pages of material. See Mugdan Decl. ¶ 23.

21. Also during the public comment period, EPA held three public meetings to present the findings of the RI, the FFS and EPA's Proposed Plan. At these meetings, all of which were attended by representatives and members of the CPG, EPA personnel answered questions concerning the remedial alternatives developed as part of the FFS. Although not part of the formal public comment process, EPA also participated in a number of public forums, and attended several community meetings, to present information and answer questions about the RI/FFS and Proposed Plan. Representatives of the CPG also attended several of these meetings. See Mugdan Decl. ¶ 24.

22. Throughout the public comment period, EPA sent numerous news advisories by e-mail, listserv and regional social media accounts announcing the release of the Proposed Plan, reminding the public about EPA's public meetings and the public forums organized by other

entities, announcing the extension of the comment period, and reminding the public about the end of the comment period. Representatives and members of the CPG are included in the Region's listserv and e-mail groups. See Mugdan Decl. ¶ 25.

23. Subsequent to the close of the comment period, as required by the NCP, EPA prepared a detailed response to comments, including those submitted by the CPG. The CPG submitted four late comment letters after the close of the comment period, dated April 17, July 14, September 29 and December 29, 2015. Consistent with the NCP and EPA guidance, Region 2 reviewed the late comments to evaluate whether they substantially supported the need to significantly alter EPA's selected remedy, and found they did not. Therefore, the letters were included in the administrative record file as "Late Comments," but were not addressed in the detailed response to comments. See Mugdan Decl. ¶ 26.

24. On March 3, 2016, EPA signed the Record of Decision selecting the remedy for the sediments of the Lower 8.3 Miles. Responses to comments received by EPA at public meetings and in writing during the public comment period are included in the Responsiveness Summary, which is an Appendix to the Record of Decision. The Administrative Record for the Record of Decision, which contains approximately 580 documents (in addition to the documents submitted as public comments), is publically available online at: https://semspub.epa.gov/src/collection/02/AR63167. See Mugdan Decl. ¶ 27.

25. On March 31, 2016, after the issuance of the Record of Decision for the Lower 8.3 Miles of the Lower Passaic River part of the Diamond Alkali Superfund Site, EPA issued a notice letter to PRPs for the Lower Passaic River, advising of the actions that EPA will take to implement the remedy for the Lower 8.3 Miles. As described in the notice letter, the first action is to request the voluntary performance of the remedial design by one particular PRP (though

other PRPs may contribute to the funding). After execution of an agreement to perform the remedial design, EPA plans to begin negotiating a remedial action consent decree, under which a number of PRPs will implement and/or pay for the remedy for the Lower 8.3 Miles, and reimburse EPA's costs incurred for the Lower Passaic River. If EPA is unable to reach agreement on either (or both) the remedial design, or the remedial action, EPA will evaluate its enforcement options, including issuance of one or more unilateral orders and/or litigation in federal court. Members of the CPG, which consists of parties that EPA has identified as potentially responsible for releases of hazardous substances to the Lower Passaic River, will be among the PRPs that EPA will approach to implement and/or pay for the remedy for the Lower 8.3 Miles. See Mugdan Decl. ¶ 28.

26. The CPG continues to perform the 17 Miles RI/FS. When that work has been completed according to EPA's requirements, with the participation of NJDEP as support agency, EPA will prepare and issue a Proposed Plan for the full 17 Miles. After a public comment period, EPA will select a remedy for that portion of the Diamond Alkali Superfund Site, as well. See Mugdan Decl. ¶ 29.

III. Relevant Parties and Actions Taken for Lower Passaic River

27. ***The Lower Passaic River Study Area Cooperating Parties Group ("CPG").*** The CPG is a group of PRPs identified for the Diamond Alkali Superfund Site (numbering over 70 in 2007, but currently at approximately 55). In 2004, EPA entered into an administrative settlement agreement pursuant to Section 122(h) of CERCLA with the companies that at the time, to EPA's knowledge, comprised the CPG. Pursuant to this agreement, the CPG was required to provide funds for EPA to perform an RI/FS for the 17 Miles. The agreement was amended twice to add

more parties to the CPG. EPA also understands that a number of former CPG members are no longer participating in the CPG. See Mugdan Decl. ¶ 30.

28. ***Partner Agencies***. The Partner Agencies are a group of federal and state agencies studying the Lower Passaic River contemporaneously with EPA. The agencies include U.S. Army Corps of Engineers, New York District; New Jersey Department of Environmental Protection ("NJDEP"); National Oceanographic and Atmospheric Administration ("NOAA"); and U.S. Fish and Wildlife Service ("USFWS"). The New Jersey Department of Transportation ("NJDOT") participated in the Partner Agencies until November 2007, when its responsibilities were transferred to NJDEP. See Mugdan Decl. ¶ 31.

29. Region 2 has a close relationship with NJDEP for the investigation and cleanup of the Diamond Alkali Superfund Site, including the Lower Passaic River, because under CERCLA, a state agency such as NJDEP is designated as EPA's support agency. Section 121(f) of CERCLA provides for state involvement in the CERCLA process. The EPA must provide the state with an opportunity to comment on an RI/FS and all technical data leading to its issuance and the preferred remedial alternative identified through the RI/FS, among other issues. The NCP, implementing regulations for CERCLA, further provides for the role of the state. Under 40 CFR 300.515(f), the state has the opportunity to comment on the proposed plan for a site (or operable unit), and the EPA seeks the state's concurrence on EPA's final cleanup decision memorialized in the Record of Decision. See Mugdan Decl. ¶ 32.

30. In 2005, Region 2 signed a Joint Prosecution and Confidentiality Agreement ("JPCA") with the Partner Agencies covering the work to be done at the Lower Passaic Site. This JPCA provided that the parties' common interests with respect to the Passaic River Matter (defined as the contamination of the Passaic River and environs in New Jersey) include the

determination, implementation and supervision of appropriate and effective environmental and natural resource damages response actions, and the preparation for and prosecution of anticipated enforcement litigation against third parties with respect to the Passaic River Matter. The JPCA further provides that for the parties to pursue and achieve their common interests concerning environmental and natural resource damages response actions and anticipated enforcement litigation with respect to the Passaic River Matter, it has been and remains imperative, and in some instances is mandated by federal law, that the State of New Jersey and federal parties exchange communications, information and documents as part of their deliberative and decision-making processes. Subsequently, and throughout development of the 17 Miles RI/FS and the Lower 8.3 Mile RI/FFS, EPA has shared technical documents in draft form with the partner agencies (primarily NJDEP, but also the Corps-NY, NOAA, USFWS and NJDOT). See Mugdan Decl. ¶ 33.

31. ***U.S. Army Corps of Engineers, Kansas City District (the "Corps-KC") and Contractors.*** When EPA begin the 17 Miles RI/FS, in or about 2002, EPA contracted with the Corps-KC to function as EPA's lead contractor for the 17 Miles RI/FS under Interagency Agreement #DW9694197501. In 2006, when EPA began preparing the FFS to evaluate remedial alternatives for the Lower 8.3 Miles, the Corps-KC continued to function as EPA's lead contractor for the RI/FFS under this contract. Under this contract, the Corps-KC was authorized to manage the work necessary to perform the sampling, analysis, and other technical work to develop the RI/FFS, and to support EPA's preparation of the Proposed Plan and Record of Decision. Region 2 provided funds for this Interagency Agreement, and the Corps-KC subcontracted on EPA's behalf with various contractors to perform much of the sampling, analysis, and technical work, which was provided to the Corps-KC and Region 2 for further

review and approval, and incorporation into the eventual RI/FFS, Proposed Plan and Record of Decision. Region 2 provided technical, legal and policy direction to the Corps-KC and, through the Corps-KC, its contractors. Region 2 set the schedule for the technical work. Region 2 reviewed, commented on, edited and approved all contractor work products. See Mugdan Decl. ¶ 34.

32. The Corps-KC hired contractors Malcolm Pirnie (later Louis Berger Group), HydroQual (later HDR/HydroQual) and Battelle to perform the technical work. See Mugdan Decl. ¶ 35.

33. At Region 2's and the Corps-KC's direction, Malcolm Pirnie/Louis Berger hired technical advisors as subcontractors to review draft analyses and interim products that were subsequently combined to form elements of the Lower 8.3 Miles RI/FFS. The technical advisors ensured that the highly technical analyses were performed correctly. See Mugdan Decl. ¶ 36.

34. Between 2007 and 2014, the CPG performed the sampling, modeling and analysis to complete the 17 Miles RI/FS that EPA had started, and that the CPG took over in 2007 pursuant to the 2007 AOC, as described above in Paragraph 9. To date, the CPG has submitted to EPA draft human health and ecological risk assessments, and draft RI and FS reports. See Mugdan Decl. ¶ 37.

35. From 2007 to 2009, the same team of contractors working with EPA Region 2/the Corps-KC to perform the FFS for the Lower 8.3 Miles also assisted EPA Region 2 in overseeing the CPG's work on the 17 Miles RI/FS, under a new Interagency Agreement, #DW9496212501. See Mugdan Decl. ¶ 38.

36. In 2009, for the 17 Miles RI/FS oversight, the Corps-KC, working with EPA Region 2, replaced Malcolm Pirnie/Louis Berger with CDM Federal Programs (CDM-Smith). See Mugdan Decl. ¶ 39.

37. Using funds provided by the CPG pursuant to the 2007 AOC, Region 2 funded the Interagency Agreement for the 17 Miles RI/FS oversight, which the Corps-KC used to hire the contractors. Region 2 also provided technical, legal and policy direction to the Corps-KC and, through the Corps-KC, its contractors. Region 2 set the schedule for the technical work. Region 2 reviewed, commented on, edited and approved all contractor work products incorporated into Region 2's oversight of the CPG 17 Miles RI/FS. See Mugdan Decl. ¶ 40.

38. ***EPA Contaminated Sediment Technical Advisory Group ("CSTAG")***. The CSTAG is an EPA-internal advisory group that advises EPA regional project managers on how to appropriately manage sediment sites in accordance with EPA guidance. The CSTAG's goals include encouraging national consistency in the management of sediment sites by providing a forum for exchange of technical and policy information, and providing a mechanism for monitoring and evaluating the progress at a number of the largest or most complex contaminated sediment sites. See Mugdan Decl. ¶ 41.

39. ***EPA National Remedy Review Board ("NRRB")***. EPA created the NRRB in January 1996 as part of a comprehensive package of reforms designed to make the Superfund program faster, fairer and more efficient. The NRRB is an EPA-internal peer review group that understands both the EPA regional and headquarters perspectives in the remedy selection process. It reviews proposed Superfund cleanup decisions for sites for which the proposed remedial actions cost more than $25 million to make sure they are consistent with Superfund law, regulations and guidance. NRRB members are EPA managers and senior technical and

policy experts with significant experience in Superfund remedy selection issues. See Mugdan Decl. ¶ 42.

40. Due to the size and complexity of the Lower 8.3 Miles, Region 2 presented the proposed Superfund cleanup decisions for the Lower 8.3 Miles to both the CSTAG and the NRRB. The recommendations and comments of the CSTAG and the NRRB were incorporated into the eventual selected remedy and Record of Decision. See Mugdan Decl. ¶ 43.

41. In 2008, Region 2 presented Region 2's technical approach to studying the Lower 8.3 Miles to the CSTAG. See Mugdan Decl. ¶ 44.

42. On April 1, 2008, the CSTAG provided advice to Region 2 on the technical approach in the form of a comment memo. Region 2 responded to the CSTAG's comment memo on May 6, 2008. Both the CSTAG April 1, 2008 comment memo and Region 2's May 6, 2008 response are available to the public via the CSTAG web site. Based on the CSTAG's advice, Region 2 made changes to the work that the Corps-KC and its contractors were performing for Region 2, as part of EPA's development of the Lower 8.3 Miles RI/FFS. See Mugdan Decl. ¶ 45.

43. Throughout the development of the Lower 8.3 Miles RI/FFS, Region 2 updated the CSTAG on how the technical work was progressing. By phone and e-mail, members of the CSTAG served in an ongoing advisory role that led to ongoing changes and adjustments to the work that the Corps-KC and its contractors were performing for Region 2. See Mugdan Decl. ¶ 46.

44. Before Region 2 completed the Proposed Plan for the Lower 8.3 Miles and released it for public review, Region 2 submitted a technical memo to the NRRB for internal review. In December 2012, Region 2 made a presentation to the NRRB describing the alternative

that Region 2 expected to identify as the preferred alternative, and the basis for the Region's approach. CSTAG members also attended the meeting. See Mugdan Decl. ¶ 47.

45. The NRRB reviewed Region 2's description and basis for the likely preferred alternative. The NRRB, together with CSTAG, prepared a memorandum to document its evaluation and advisory recommendations, which Region 2 then referred to during its preparation of the documentation of the basis for choosing the preferred alternative. Drafts of the NRRB/CSTAG memorandum were shared with Region 2 for review. The drafts were generally provided between January 2013 and May 2013. The NRRB/CSTAG memorandum in its final form was dated April 11, 2014, and was released to the public as part of the Administrative Record for the Lower 8.3 Miles Proposed Plan. See Mugdan Decl. ¶ 48.

46. As part of the NRRB review process, Region 2 responded to NRRB/CSTAG memorandum in a written response. Region 2's response was shared in draft form with members of NRRB in January through March 2014. Both the NRRB/CSTAG April 11, 2014 memorandum and Region 2's April 11, 2014 response, in final form, were released to the public as part of the Administrative Record for the selection of the remedy for the Lower 8.3 Miles. See Mugdan Decl. ¶ 49.

47. Based on the NRRB/CSTAG advice, provided in the various drafts of the memorandum, Region 2 made changes to the Lower 8.3 Miles Proposed Plan and directed the Corps-KC and its contractors to make changes to the Lower 8.3 Miles RI/FFS. See Mugdan Decl. ¶ 50.

48. In addition to NRRB review, in late 2013 and early 2014, Region 2 provided drafts of the Lower 8.3 Miles Proposed Plan to EPA Office of Solid Waste and Emergency Response, Office of Superfund Remediation and Technology Innovation ("OSWER-OSRTI") for

its review. The name of the Office of Solid Waste and Emergency Management ("OSWER") has now been changed to the Office of Land and Emergency Management ("OLEM"). See Mugdan Decl. ¶ 51 & n.1.

49. In late 2013 and early 2014, EPA OSWER-OSRTI provided comments intended to review Region 2's basis and explanation for selection of the preferred alternative; to evaluate conformance with EPA policies and guidance; and, where the Region had determined that an aspect of EPA guidance would not apply, to understand the basis for that determination. See Mugdan Decl. ¶ 52.

50. Based on EPA OSWER-OSRTI comments and review, Region 2 made changes to the Lower 8.3 Miles Proposed Plan. These changes were incorporated into the final version of the Lower 8.3 Mile Proposed Plan, which was released to the public in April 2014. However, unlike the NRRB review, there was no final memorandum documenting EPA OSWER-OSRTI comments. See Mugdan Decl. ¶ 53.

51. ***Proposed Plan Public Comment Period.*** As described above in Paragraph 21, EPA issued the Lower 8.3 Miles Proposed Plan as part of its public participation responsibilities under Section 117(a) of CERCLA and Section 300.430(f)(2) of the NCP. The nature and extent of the contamination in the Lower 8.3 Miles and the remedial alternatives summarized in the Lower 8.3 Miles Proposed Plan are described in detail in EPA's Lower 8.3 Miles RI/FFS, and numerous, detailed supporting appendices. A copy of the Lower 8.3 Miles Proposed Plan, Lower 8.3 Miles RI/FFS reports and other documents comprising the administrative record file were made available to the public in the information repositories located at the Newark and Elizabeth Public Libraries and the EPA Region 2 Superfund Records Center. Public notices

about the release of the Proposed Plan were published in two local newspapers. See Mugdan Decl. ¶ 54.

IV. CPG's FOIA Requests

52. Shortly after the issuance of the Proposed Plan, the CPG submitted four FOIA requests to Region 2, seeking substantial amounts of information (collectively, the "CPG FOIA Requests"). Specifically, on April 21, 2014, on behalf of the CPG, Robert La Gravenis of K&L Gates, LLP, submitted FOIA request EPA-R2-2014-005768 (the "CPG's First FOIA Request"). On April 28, 2014, on behalf of the CPG, Mr. La Gravenis submitted FOIA request EPA-R2-2014-006018 (the "CPG's Second FOIA Request"). On May 14, 2014, on behalf of the CPG, Mr. La Gravenis, submitted FOIA request EPA-R2-2014-006476 (the "CPG's Third FOIA Request"). Finally, on June 17, 2014, on behalf of the CPG, submitted FOIA request EPA-R2-2014-007546 (the "CPG's Fourth FOIA Request"). See Mugdan Decl. ¶ 55, Exs. A, B, C, D.

53. The CPG's first three FOIA Requests were interrelated, and therefore Region 2 responded to the requests in a consolidated and coordinated manner. The CPG's first three FOIA requests were also very broad and required Region 2 staff to collect and review over 66,000 documents as part of the coordinated response. Ultimately, Region 2 expended 298 hours on the CPG FOIA requests. Throughout the time that Region 2 staff worked on these requests, they remained in communication with the CPG to advise it of the schedule and progress, and ask questions as needed. When possible, Region 2 released information to the CPG on a rolling basis. See Mugdan Decl. ¶ 56.

54. All four CPG FOIA Requests were assigned to Alice Yeh, Remedial Project Manager for the Lower 8.3 Miles. Alice Yeh met with Assistant Region Counsels Sarah Flanagan and Patricia Hick to plan and manage the search, collection and review of responsive

information. Between April 30, 2014 and February 19, 2015, Alice Yeh, Sarah Flanagan and Patricia Hick met fourteen times to discuss the steps taken and progress made on the CPG FOIA requests. See Mugdan Decl. ¶ 57.

55. Alice Yeh called Mr. La Gravenis on May 9, 2014 to seek the CPG's agreement to pay the estimated costs of responding to the CPG's First FOIA Request (EPA-R2-2014-005768) and the CPG's Second FOIA Request (EPA-R2-2014-006018), and on May 20, 2014 to seek the CPG's agreement to pay the estimated cost of responding to the CPG's Third FOIA Request (EPA-R2-2014-006476). On May 9 and 20, Alice Yeh also wrote e-mails to Mr. La Gravenis to confirm their telephone discussions. Mr. La Gravenis advised by email dated May 14, 2014 that the CPG would reserve its rights with respect to payment of the FOIA costs. Sarah Flanagan emailed Karyllan Mack of K&L Gates on May 16, 2014 to seek clarification regarding the CPG's willingness to pay the costs of the FOIA responses, and to provide information about the status of Region 2's response to the CPG's First, Second and Third FOIA Requests. On May 16, 2014, Ms. Mack of K&L Gates responded to Sarah Flanagan's May 16, 2014 email, agreeing to pay the cost of responding to the request and withdrawing sub-request #13. Sarah Flanagan also wrote to William H. Hyatt of K&L Gates by letters dated June 19, 2014 and November 13, 2014 to inform him of the status of Region 2's response to the CPG FOIA Requests. See Mugdan Decl. ¶ 58, Exs. E, F, G.

V. CPG's First FOIA Request: EPA-R2-2014-005768

56. The CPG's First FOIA request contained 14 sub-requests for documents:

- Sub-request #1 asked for an Access or Excel file containing each normalized tissue and sediment concentration data pair (with units, basis and data qualifiers) used to generate a regression model, Biota-Sediment Accumulation Factor (BSAF) curve or Biota Accumulation Factor (BAF) curve presented in Final FFS Appendix A, Data Evaluation Report 6 (Biota Analysis). The sub-request indicated that the Access or Excel file should

identify, for each biota tissue sample location, all tissue and sediment sample IDs used to generate the normalized tissue and sediment concentration data pair for that location.

- Sub-request #2 asked for a flat file dataset in Access or CSV including at least the following fields for each sample that was used to generate the normalized tissue and sediment concentration data pairs that were used to generate a regression model, BSAF curve or BAF curve presented in Final FFS Appendix A, Data Evaluation Report 6 (Biota Analysis): source; study; location; coordinates; river mile (if appropriate); species and tissue type (for each tissue sample); sample depth (for each sediment sample); sample ID; sample type (e.g., field duplicate); analyte name, including all contaminants, lipid, TOC and iron; numeric concentration for each analyte, including numeric concentrations for each sum component (e.g., for Polycyclic Aromatic Hydrocarbon (PAH) mixtures) and calculated totals; data qualifiers; Units; and basis (e.g., dry weight).

- Sub-request # 3 asked for data files, including database query output (e.g., sample ID, analytical results, and qualifiers) and ProUCL input file, for tissue samples included in current baseline Human Health Risk Assessment (HHRA) fish and crab tissue Exposure Point Calculations (EPC).

- Sub-request #4 asked for technical bases (analyses, calculations, model files and results, and any other relevant materials) for EPA's sliding scale of annual averages based on receptor exposure duration (used to estimate future concentrations).

- Sub-request #5 asked for technical back-up/documentation for EPA's analysis of 2000 US Census data for Essex and Hudson counties (used to estimate residence time).

- Sub-request #6 asked for technical back-up/documentation for EPA's re-analysis of Joanna Burger's 1999 survey of Newark Bay anglers (used to estimate fish and crab consumption rates).

- Sub-request #7 asked for any correspondence between Region 2 and NJDEP on NJDEP angler surveys that included sites on the LPR, and any data and analysis from those surveys.

- Sub-request #8 asked for any correspondence between the Region and the National Remedy Review Board (NRRB) since the group's comments were submitted in Nov. 2012 and issuance of the NRRB/Contaminated Sediments Technical Advisory Group (CSTAG) final comments on April 11, 2014.

- Sub-request #9 asked for any correspondence between Region 2 and HQ on draft versions of the Proposed Remedial Action Plan (PRAP) and Focused Feasibility Study (FFS) documents.

- Sub-request #10 asked for technical bases (analyses, calculations, modelling files and results, mapping, and any other relevant materials) used to develop the capping area footprints for Alternative 4.

- Sub-request #11 asked for technical backup/documentation for all unit or rollup cost items greater than $5,000 that cite to an "Internal Database" cited in FFS Appendix H.
- Sub-request #12 asked for The Louis Berger Group, Inc., 2007. "Staging and Processing Areas, Treatment Technologies, and Transportation Logistics Review." Lower Passaic River Contract. Prepared for the NJDEP. April 2007.

- After further consultation and communication with Region 2 on the scope of sub-request #13, the requester withdrew sub-request #13.

- Sub-request #14 asked for the data set used to develop EPCs used in the Ecological Risk assessment and shown in Table 7-6 of the FFS RI. This would include EPCs for sediment, the tissue concentrations for the 'generic fish', biota tissue for mummichog, and crab EPCs.

See Mugdan Decl. ¶ 59.

EPA's Search and Response

57. *Initial Response.* On April 28, 2014, Region 2 assigned the First FOIA Request to Alice Yeh. On May 9, 2014, Alice Yeh called and sent an email to Mr. La Gravenis providing him with an estimate of the costs of responding to the request, seeking an assurance of payment for the costs of responding to the request, informing him that responding to the request would exceed the statutory deadline (because of the breadth of the request), and asking him to clarify sub-request #13. See Mugdan Decl. ¶ 60, Ex. E.

58. After receiving the CPG's First FOIA Request, on April 30, 2014, Region 2 staff met to discuss how to interpret the 14-part FOIA request, identify relevant individuals throughout Region 2 who might have potentially responsive documents, develop instructions for conducting the search, and discuss responsive documents that could be released in the first installment. Ten of the 14 meetings described above included discussion of the steps taken and progress made on this FOIA request. See Mugdan Decl. ¶¶ 58, 61.

59. *Clarifying and Narrowing the CPG's First FOIA Request.* On May 22, 2014, following the exchanges described above, Alice Yeh sent a letter to Mr. La Gravenis estimating that it would take until the end of July 2014 to respond to the CPG's First FOIA Request and giving him the opportunity to modify the request so that Region 2 could process the request within a shorter timeframe. The letter also provided the first installment of documents responsive to four sub-requests and directed Mr. La Gravenis to specific locations on the OurPassaic.org website and portions of the Lower 8.3 Miles RI/FFS with information responsive to another four sub-requests in the FOIA request. See Mugdan Decl. ¶¶ 58, 62, 74, Ex. H.

EPA's Search for Responsive Records

60. On May 9, 2014, Alice Yeh spoke to several employees of the Louis Berger Group and Battelle asking for assistance in locating materials submitted to EPA that might be responsive to the FOIA request. In particular, Ms. Yeh requested that the Louis Berger Group assist her in identifying documents or information in EPA's possession that the Louis Berger Group had submitted to EPA that might be responsive to the sub-requests for technical data and information (sub-requests #1, 2, 3, 4, 5, 6, 10, 11, 12, and 14). These documents were located and EPA either provided them to CPG, or directed the CPG to the locations that they had been made available to the public. See Mugdan Decl. ¶¶ 63, 76.

61. In addition to the documents that originated with the Louis Berger Group, Region 2 staff determined that responsive information to the CPG FOIA Requests would likely be located in EPA staff email accounts (both Lotus Notes and Outlook), or as electronic or paper documents in the possession of Region 2 staff. Therefore, on May 19, 2014, Region 2 staff met to discuss use of the agency's eDiscovery collection software to search the email accounts of specified document custodians using search terms and defined search parameters. Due to the size

and complexity of sub-requests #8 and #9, Region 2 determined that EPA's Encase eDiscovery tool should be used for collection of email documents, and that the collected documents should be reviewed using the Agency's Relativity review software. Alice Yeh, Sarah Flanagan and Patricia Hick determined that Region 2 employees (both current and retired) from ERRD, Office of Regional Counsel and Office of the Regional Administrator might be custodians of e-mails responsive to sub-requests #8 and #9, and identified a date range for the search of November 21, 2012 to April 11, 2014. The custodians and search queries were entered into an Excel spreadsheet formatted to allow the Region 2 Encase coordinator, Judy Rubin, to perform the search. The ERRD staff person identified by Alice Yeh as the potential custodian of records responsive to sub-requests #6 and #7 was contacted directly by Alice Yeh and searched her electronic and paper documents for responsive information. Information responsive to #12 was located in EPA's files by Alice Yeh. See Mugdan Decl. ¶ 64.

EPA's Collection of Responsive Records

62. From approximately 2001 to early 2013, EPA, including Region 2, used Lotus Notes for Agency email. From 2013 to the present, EPA has used Microsoft Outlook email housed in the Agency's O365 cloud service. In order to collect responsive email records, Region 2 used the Encase eDiscovery search tool to search both the archival Lotus Notes email accounts and current Outlook email accounts of ERRD, Office of Regional Counsel and Office of the Regional Administrator personnel (both current and retired), as discussed above. See Mugdan Decl. ¶ 65.

63. To respond to sub-request #8 of the First FOIA Request (for correspondence between Region 2 and the CSTAG/NRRB), Region 2 identified nine EPA custodians consisting of EPA Region 2 legal and technical staff, and 10 likely correspondents who were members of

the NRRB and the CSTAG. Region 2 then searched for any email correspondence in the accounts of the nine Region 2 custodians which was sent to or from a member of the CSTAG/NRRB in the time frame of November 12, 2012 to April 11, 2014. No additional search terms or filters were used. To respond to sub-request #9 of the First FOIA Request (for correspondence between Region 2 and EPA HQ on the Proposed Remedial Action Plan and Focused Feasibility Study), Region 2 identified 12 EPA custodians consisting of EPA Region 2 technical and legal staff, and 32 likely correspondents consisting of EPA HQ staff, including senior managers, technical staff, and legal staff in the Office of the Administrator, the Office of Solid Waste and Emergency Management (OSWER, now the Office of Land and Emergency Management), the Office of General Counsel, and the Office of Enforcement and Compliance Assurance. Region 2 then searched for any email correspondence in the accounts of the 12 identified custodians which was sent to or from any of the 32 identified HQ staff in the time frame of September 12, 2013 to April 11, 2014. No additional search terms or filters were used. See Mugdan Decl. ¶ 66.

64. On June 18, 2014, a collection of documents within Relativity named "ED_000018 – Diamond Alkali, Passaic River Focused" was created to facilitate the review and processing of potentially responsive information to all of the CPG FOIA requests. EPA Region 2 created a sub-folder within the Relativity collection to house documents responsive to the CPG's First FOIA Request. Email documents from the Encase automated search of Lotus Notes and Outlook were loaded into the folder on June 24, 2014. After the initial creation of the folder with materials from Lotus Notes and Outlook, additional materials from paper and electronic file searches were also loaded into Relativity. In that way, Region 2 staff determined that all locations reasonably likely to have responsive information had been searched. The final folder

contained 42,662 documents that were potentially responsive to the CPG's First FOIA Request. See Mugdan Decl. ¶ 67.

65. Between July 24 and September 26, 2014, as processing and review was ongoing, Alice Yeh sent Mr. La Gravenis several emails revising the estimated completion date for the FOIA request. Alice Yeh's final email on September 26, 2014 revised the completion date estimate to October 3, 2014. See Mugdan Decl. ¶ 68, Ex. I.

EPA's Processing of Responsive Records

66. Region 2 processed the documents responsive to the CPG's First FOIA Request electronically, using the Relativity software as a platform to perform a line-by-line review of each record and mark whether a record was to be released, partially redacted, or fully withheld. Staff also documented in the Relativity database the FOIA exemption(s) asserted for each withheld record. Relativity assigned each record a reference number and staff then prepared an index of the documents marked to be withheld in the database to provide the CPG with EPA Region 2's final production. See Mugdan Decl. ¶ 69.

67. The steps for retrieving and processing the records in this FOIA response were as follows. First, Region 2 staff reviewed potentially responsive records in the database and categorized the records as not responsive (either because the record was not responsive or duplicative), release in full, withhold in full under a FOIA exemption, or release with redaction under a FOIA exemption. This step allowed the database to: (1) track the number of records for each asserted FOIA exemption; (2) retrieve remaining unprocessed records; or (3) identify records requiring verification that exemptions were properly asserted. Second, Region 2 staff produced records to the CPG. Third, Region 2 staff generated an index of the documents marked to be withheld. See Mugdan Decl. ¶ 70.

68. *Segregating Non-Exempt Material*. Region 2 staff also conducted a line-by-line review of each record responsive to the CPG's First FOIA Request for segregability of non-exempt material. Region 2 staff determined that where a record was withheld in full, no meaningful portion could reasonably be released. Region 2 staff performed redactions where non-exempt material could be reasonably segregated and released non-exempt portions. See Mugdan Decl. ¶ 71.

69. In addition, after commencement of litigation, EPA's Office of General Counsel re-reviewed the withheld documents. On May 11, 2016, 51 documents that were previously withheld in full in response to CPG's First Request were released in full and 28 documents were released with redactions. See Mugdan Decl. ¶ 72, Ex. J.

EPA's Production of Responsive Records

70. *Initial Production of Records*. Region 2 staff uploaded the first installment of responsive records to the CPG on May 22, 2014. This installment consisted of documents responsive to sub-requests #5, #6, #7 and #12, and direction to specific locations in Lower 8.3 Miles RI/FFS files publicly available on EPA's website, ourPassaic.org, which contained information responsive to sub-requests #3, #4, #10 and #14. The first installment (10 files) was produced electronically via FOIAOnline on May 27, 2014. On June 17, 2014, and September 19, 2014, Mr. Hyatt of K& L Gates wrote to Sarah Flanagan regarding the initial production of records responsive to CPG's First FOIA Request, among other issues. See Mugdan Decl. ¶ 73, Exs. H, K, L.

71. *Second Production*. Region 2 staff uploaded a second installment of responsive records on October 2, 2014. This installment consisted of (460 files). The second installment was produced electronically via FOIAOnline on October 3, 2014. See Mugdan Decl. ¶ 74.

72. On October 29, 2014, EPA Region 2 uploaded a final letter to FOIAonline, withholding certain responsive records, and completing the response. Region 2 sent an invoice to the CPG through FOIAOnline. See Mugdan Decl. ¶ 75, Ex. M.

73. The CPG's First FOIA Request sought 13 categories of information (one of the original 14 having been withdrawn by the CPG), and Region 2 responded by releasing documents through FOIAOnline as follows:

- In response to sub-requests #1-2, seeking database files with numerous specific elements, Region 2 released one document, the file "BSAF Tissue Sediment Data." This is an Excel spreadsheet that includes some, though not all, of the elements identified in the CPG's First FOIA Request. The data elements that were not included simply were not part of the spreadsheet as maintained by EPA.

- In response to sub-request #3, seeking data files for tissue samples included in baseline Human Health Risk Assessment (HHRA) fish and crab tissue Exposure Point Calculations (EPC), Alice Yeh stated in her May 22, 2014 letter accompanying the first release of information that the data files requested were posted in the Digital Library on ourPassaic.org under "Passaic River/Newark Bay Datasets" and the sample identification numbers and associated information needed to recreate the ProUCL input files were provided in Attachment 1 of Appendix D of the RI/FFS (which was and is publicly available on the website hosted by EPA for the Lower Passaic River, ourpassaic.org).

- Similarly, for sub-request #4, seeking technical bases for EPA's sliding scale of annual averages based on receptor exposure duration (used to estimate future concentrations), Alice Yeh's May 22, 2014 letter stated that the technical basis was provided in Table 5-2 and associated text in Appendix D of the RI/FFS, and that EPA had already provided the model files and results to the CPG in March 2014.

- For sub-request #5, seeking technical back-up/documentation for EPA's analysis of 2000 US Census data for Essex and Hudson counties (used to estimate residence time); Region 2 released one document, "Revised Tech Memo 1 – HH exposure".

- For sub-request #6, seeking technical back-up/documentation for EPA's re-analysis of Joanna Burger's 1999 survey of Newark Bay anglers (used to estimate fish and crab consumption rates), Region 2 released 10 documents.

- In response to the sub-request #7, seeking correspondence between Region 2 and NJDEP on NJDEP angler surveys that included sites on the LPR, and data and analysis on those surveys, Region 2 released 37 documents, and withheld 12 documents. (Region 2 identified 15 documents on its withholding log that accompanied the final production but has determined that three of the documents were released.)

- In response to sub-requests #8 and #9, seeking correspondence between Region 2 and NRRB since the group's comments were submitted in November 2012 and until issuance of the NRRB/CSTAG final comments on April 11, 2014, and between Region 2 and HQ on draft versions of the Proposed Plan and FFS documents, Region 2 released over 400 documents through FOIAOnline. Region 2 withheld 571 documents, citing FOIA Exemption 5.

- In response to sub-request #10, seeking technical bases used to develop the capping area footprints for Alternative 4 in the Proposed Plan, Region 2 responded via Alice Yeh's May 22, 2014 letter informing the CPG that the technical basis was provided in Appendix B of the RI/FFS, and that EPA had already provided the modeling files and results to the CPG in March 2014.

- In response to sub-request #11, seeking technical backup/documentation for all unit or rollup cost items over $5,000 that cite to "Internal Database" in FFS Appendix H, Region 2 provided one document, "FFS Appendix H Cost Estimate References."

- In response to sub-request #12, seeking a document prepared by the Louis Berger Group, Inc. in 2007, "Staging and Processing Areas, Treatment Technologies, and Transportation Logistics Review" Region 2 provided the document.

- In response to sub-request #14, seeking the data set used to develop EPCs used in the Ecological Risk Assessment and shown in Table 7-6 of the FFS RI, Region 2 responded by informing the CPG in Alice Yeh's May 22, 2014 letter that the data files requested are posted in the Digital Library on ourPassaic.org, under "Passaic River/Newark Bay Datasets" and sample identification numbers and associated information needed to recreate the ProUCL input files are provided in Attachment 1 of Appendix D of the RI/FFS.

See Mugdan Decl. ¶ 76 & n.2, Exs. H, X.

74. *Production Numbers*. EPA Region 2 identified approximately 42,662 records as potentially responsive to the CPG's First FOIA Request, of which Region 2 released 443 documents in full, released 27 documents with redactions, and withheld 586 documents in full. The remaining documents were determined to be duplicative or otherwise non-responsive to the CPG's First FOIA Request. In addition, on May 11, 2016, 51 documents that were previously withheld in full in response to CPG's First Request were released in full and 28 documents were released with redactions following OGC review. The final number of responsive documents to

CPG's First FOIA Request was approximately 1,053 records, with approximately 494 released in full, approximately 55 released with redactions, and 504 withheld in full under one or more exemptions. The Coded Vaughn Index does not include the 27 documents released with redactions in the initial response. These documents were provided to CPG with the redaction on the face of the document. See Mugdan Decl. ¶ 77 & n.3, Ex. X.

VI. CPG's Second FOIA Request: EPA-R2-2014-006018

75. The CPG's Second FOIA Request did not have multiple sub-parts, but rather consisted of a very broad request for all emails, correspondence and other documents relating to: EPA's 2008 Conceptual Site Model ("CSM") and Empirical Mass Balance Model ("EMBM") developed as part of the Lower 8.3 Miles RI/FFS and any comments, revisions or changes to the CSM that were considered by EPA in the development and issuance of the Proposed Plan for the Lower 8 Miles; and EPA's June 2008 peer review of the CSM and EMBM. See Mugdan Decl. ¶ 78.

EPA's Search and Response

76. On April 29, 2014, Region 2 assigned the request to Alice Yeh. On May 9, 2014, Alice Yeh called and sent an email to Mr. La Gravenis providing him with an estimate of the costs of responding to the request, seeking an assurance of payment for the costs of responding to the request, and informing him that responding to the request would exceed the statutory deadline (because of the breadth of the request) and that until the requestor agreed to pay the costs of production, production would be on hold. See Mugdan Decl. ¶ 79, Ex. E.

77. After receiving the CPG's Second FOIA Request, Region 2 staff met on April 30 to discuss how to interpret the FOIA request, identify relevant individuals throughout Region 2 who might have potentially responsive documents, develop instructions for conducting the

search, and discuss responsive documents that could be sent in the first installment. The response to the Second FOIA Request was then incorporated into the effort to respond to the First FOIA Request, and included in the meetings discussed above. See Mugdan Decl. ¶¶ 58, 80.

78. On May 14, 2014, Mr. La Gravenis sent an email responding to Alice Yeh's May 9, 2014 email indicating that the CPG would agree to pay the costs for responding to the request, but would reserve its rights with respect to such costs. On May 16, 2014, Sarah Flanagan of Region 2 sent an email to Karyllan Dodson Mack of K&L Gates requesting that K&L Gates confirm the CPG agreement to pay costs of responding to the FOIA request. Sarah Flanagan's email also summarized the status of the request. On May 16, 2014, Ms. Mack of K&L Gates responded to Sarah Flanagan's May 16, 2014 email agreeing that the CPG would pay the cost of responding to the request. See Mugdan Decl. ¶ 81, Ex. E.

79. In her letter dated May 22, 2014 accompanying the first release of information, Alice Yeh estimated that it would take EPA until the end of September 2014 to complete its response to the CPG's Second FOIA Request and gave him the opportunity to modify the request so that EPA Region 2 could process the request within a shorter timeframe. In an email dated September 26, 2014, Alice Yeh extended her estimate of the time for response until the end of October 2014. See Mugdan Decl. ¶ 82, Exs. N, O.

80. By letter dated November 4, 2014, Mr. Hyatt of K&L Gates inquired whether the Region would be able to complete its response by the end of November 2014. By letter dated November 13, 2014, Sarah Flanagan replied, stating that it was Region 2's intention to complete its review by the end of November 2014, and informing the CPG that the request required the Region to review close to 10,000 documents. See Mugdan Decl. ¶ 83, Exs. G, P.

EPA's Search for Responsive Records

81. Region 2 staff determined that, due to the number of records likely to be responsive to this request, EPA's Encase eDiscovery tool should be used for collection of email documents, and that the collected documents should be reviewed using EPA's Relativity review software. See Mugdan Decl. ¶ 84.

82. Alice Yeh, Sarah Flanagan and Patricia Hick determined that seven EPA Region 2 employees from ERRD and the Office of Regional Counsel and an EPA Headquarters employee located in Region 2's Edison office might be custodians of e-mails responsive to this FOIA request. The date range for the search was March 31, 2006 to February 10, 2014. The search terms used for all identified custodians for the Second FOIA Request were CSM, EMBM, and DER (whole word), in addition to two complex index queries, "Conceptual AND Site AND Model" and "mass AND balance." Finally, Alice Yeh's email was searched for the index query "Appendix AND (A OR C)" in addition to the search terms described above due to her involvement in the development of these appendices, which describe the CSM and EMBM. The custodians and search terms were entered into an Excel spreadsheet formatted to allow the Region 2 Encase coordinator, Judy Rubin, to perform the search. In addition, the Region 2 staff identified by Alice Yeh as potential custodians of non-email records potentially responsive to this request were contacted directly by Alice Yeh and at her request, the potential custodians searched their working files and notes for responsive documents. See Mugdan Decl. ¶ 85.

EPA's Collection of Responsive Records

83. On June 18, 2014, Relativity Collection "ED_000018 – Diamond Alkali, Passaic River Focused" was created. EPA Region 2 created a folder with documents responsive to the CPG's Second FOIA Request on July 10, 2014.The final folder in Relativity contained 13,510 documents that were potentially responsive to the CPG's Second FOIA Request. An additional

220 files from Region 2 staff's search of paper and electronic files were saved to a designated drive on Region 2's computer network for review, but were not added to the Relativity workspace. In this way, Region 2 staff determined that all locations reasonably likely to have records responsive to the CPG's Second FOIA Request had been searched. See Mugdan Decl. ¶ 86.

EPA's Processing of Responsive Records

84. Region 2 processed the documents responsive to the CPG's Second FOIA Request electronically, which involved the use of Relativity to enter records into a database and determine whether a record was released, partially redacted, or fully withheld. Staff also documented in the database the FOIA exemption(s) asserted for each withheld record. Relativity assigned each record a reference number and staff then prepared an index of the documents marked to be withheld in the database to provide to the FOIA requester with EPA Region 2's final production. See Mugdan Decl. ¶ 87.

85. The steps for retrieving and processing the records in this FOIA response include review, categorization, and processing steps following the procedure as described in Paragraph 72 for the records collected in the Relativity workspace. In addition, the documents collected by Region 2 staff through review of their working files and notes were reviewed by Alice Yeh, Patricia Hick and Sarah Flanagan, who identified whether the documents should be released, withheld in full under a FOIA exemption, or withheld in part under a FOIA exemption. These documents were added manually to the index that was provided to the CPG. See Mugdan Decl. ¶ 88.

86. *Segregating Non-Exempt Material.* Region 2 staff also conducted a line-by-line review of each record responsive to the CPG's First FOIA Request for segregability of non-

exempt material. Region 2 staff determined that where a record was withheld in full, no meaningful portion could reasonably be released. Region 2 staff performed redactions where non-exempt material could be reasonably segregated and released non-exempt portions. See Mugdan Decl. ¶ 89.

87. In addition, after commencement of litigation, EPA's Office of General Counsel re-reviewed the withheld documents. On May 11, 2016, 51 documents that were previously withheld in full in response to CPG's Second Request were released in full and 63 documents were released with redactions. See Mugdan Decl. ¶ 90, Ex. J.

EPA's Production of Responsive Records

88. EPA Region 2 uploaded the first installment of records responsive to the CPG's Second FOIA Request on May 22, 2014. The first installment was produced electronically via FOIAOnline on May 27, 2014. See Mugdan Decl. ¶ 91, Ex. N.

89. Region 2 released interim responses through FOIAOnline on May 27, 2014 (37 files), October 20, 2014 (446 files), November 25, 2014 (205 files) and December 16, 2014 (3 files). See Mugdan Decl. ¶ 92.

90. On January 7, 2015, Region 2 uploaded a final letter to FOIAonline withholding certain responsive information and completing the response. Region 2 also uploaded an invoice to FOIAOnline. See Mugdan Decl. ¶ 93, Ex. Q.

91. *Production Numbers*. EPA Region 2 identified approximately 13,800 records as potentially responsive to the CPG's Second FOIA Request, of which Region 2 released 662 documents in full and 29 documents with redactions, and withheld 1,799 files in full. The remaining documents were determined to be duplicative or otherwise non-responsive to the CPG's Second FOIA Request. The Coded Vaughn Index does not include the 29 documents

released with redactions in the initial response. These documents were provided to CPG with the redaction on the face of the document. In addition, on May 11, 2016, 51 documents that were previously withheld in full in response to CPG's Second FOIA Request were released in full and 64 documents were released with redactions following OGC review. See Mugdan Decl. ¶ 94 & n. 4, Ex. X.

92. The final number of responsive documents to CPG's Second FOIA Request was approximately 2,492 records, with approximately 713 released in full, approximately 93 released with redactions, and approximately 1686 withheld in full under one or more exemptions. See Mugdan Decl. ¶ 95, Ex. X.

VII. CPG's Third FOIA Request: EPA-R2-2014-006476

93. The CPG's Third FOIA Request sought seven categories of information (the seventh category was added on May 16, 2014, as discussed below):

- Sub-request #1 sought an accounting of funds spent and/or committed to be spent in developing the April 11, 2014 Proposed Plan (PP) for the Lower 8 Miles of the Lower Passaic River Study Area (LPRSA) and the reports and appendices thereto, including but not limited to the Remedial Investigation (RI) and Focused Feasibility Study (FFS).

- Sub-request #2 sought any authorization for expenditure of funds for the PP and the reports and appendices thereto.

- Sub-request #3 sought all comments to the National Remedy Review Board (NRRB) from the partner agencies (NOAA, FWS, and State of NJ) sent to EPA for transmittal to the NRRB and any EPA responses to such comments.

- Sub-request #4 sought any and all communications regarding the LPRSA between: 1) Any U.S. EPA personnel and any member of the Community Advisory Group or any other person purporting to be a representative of the community; and 2) any member of the public and Judith Enck, including any alter egos or aliases of Administrator Enck. This information would include but not be limited to all letters, email (both official accounts and personal accounts used for official business), and any notes, records, reports, summaries or memoranda taken during or prepared after communications with members of the public relating to the LPRSA.

- Sub-request #5 sought the following items related to the public hearing on the Proposed Plan, held by EPA in Newark, NJ on May 7, 2014 (Hearing): 1) video and/or other recordings taken during the Hearing; 2) a transcript of the Hearing; 3) sign-in sheets for participants at the Hearing; 4) communications between Region 2 and members of the public regarding preparations for the Hearing (to the extent not covered by request 4); and 5) any petitions available for signature during the Hearing.

- Sub-request #6 sought any documents relating to the designation of any portion of the Diamond Alkali Superfund Site as an operable unit.

- Sub-request #7 sought the sample identification numbers and chemistry for the four core samples, four grab samples and two dam catchment samples that EPA used to define upriver (above the Dundee Dam) surface sediment background conditions.

See Mugdan Decl. ¶¶ 96, 100, Ex. C.

EPA's Search and Response

94. *Initial Response*. On May 19, 2014, EPA Region 2 assigned the CPG's Third FOIA Request to Alice Yeh. See Mugdan Decl. ¶ 97.

95. After receiving the CPG's Third FOIA Request, Region 2 staff met on May 20, 2014 to discuss how to interpret the 7-part FOIA request, identify relevant individuals throughout Region 2 who might have potentially responsive documents, develop instructions for conducting the search, and discuss responsive documents that could be released in first installment. The response to the Third FOIA Request was then incorporated into the effort to respond to the First and Second FOIA Requests, and included in 13 of the 14 the meetings discussed above. See Mugdan Decl. ¶¶ 58, 95.

96. On May 16, 2014, Sarah Flanagan of Region 2 sent an email to Karyllan Dodson Mack of K&L Gates noting that EPA was reviewing the level of effort that would be required for the response to the CPG's Third FOIA Request and would prepare an estimate and determine whether the fee limit included in the request would be sufficient. On May 16, 2014, Ms. Mack of

K&L Gates responded to Sarah Flanagan's May 16, 2014 e-mail advising that, on May 15, 2014, she had submitted an amendment to the CPG's Third FOIA Request that added a new sub-request #7. See Mugdan Decl. ¶ 99, Ex. E.

97. *Clarifying and Narrowing the Request*. On May 20, 2014, Alice Yeh spoke to Mr. La Gravenis about the request. Alice Yeh provided Mr. La Gravenis with an estimate of the cost of responding to the request and estimated that it would take until the end of September 2014 to respond to the CPG's Third FOIA Request. Alice Yeh gave Mr. La Gravenis the opportunity to modify the request so that Region 2 could process the request within a shorter timeframe. Alice Yeh also asked Mr. La Gravenis to clarify sub-requests #4 and #5. On May 20, 2014, Alice Yeh sent Mr. La Gravenis an email documenting their conversation and asking him to agree to pay the costs of responding to the CPG's Third FOIA Request beyond the limits imposed through FOIAOnline. See Mugdan Decl. ¶ 100.

98. On May 21, 2014, Mr. La Gravenis sent an email responding to Alice Yeh's May 20, 2014 email. In his email, Mr. La Gravenis confirmed that CPG would pay the cost of responding to the CPG's Third FOIA Request. He also provided information clarifying sub-request #4 and #5. On May 23, 2014, Alice Yeh asked a follow-up question regarding sub-request #5, and Mr. La Gravenis responded to this email on May 23, 2016. See Mugdan Decl. ¶ 101, Ex. R.

EPA's Search for Responsive Records

99. Region 2 staff determined that, due to the number of records likely to be responsive to sub-request #4 (part 1) of the CPG's Third FOIA Request, EPA's Encase eDiscovery tool should be used for collection of email documents, and that the collected

documents should be reviewed using EPA's Relativity review software. See Mugdan Decl. ¶ 102.

100. Alice Yeh, Sarah Flanagan and Patricia Hick determined that 14 Region 2 employees in the Regional Administrator's Office, the Public Affairs Division, ERRD, and Office of Regional Counsel, might be custodians of e-mails responsive sub-request #4 of this FOIA request. The search terms used for all identified custodians for the Third FOIA Request, sub-request #4, were "Passaic," "Diamond," "LPRSA," and "FFS," in addition to two complex index queries, "17 w/1 mile" and "(interim OR early) w/1 action." The search was then constrained to seek emails to or from the identified custodians and 45 identified domains, which included common email domains used by outside parties (such as gmail.com, yahoo.com, or hotmail.com) in addition to the domains of known academic, governmental, and non-governmental organizations with an interest in the Lower Passaic River and that were thought likely to have communicated with Region 2 regarding the Lower Passaic River part of the Diamond Alkali Superfund Site. Because of the broad nature of the request, the search was not constrained by dates. The custodians and search terms were entered into an Excel spreadsheet formatted to allow the Region 2 Encase coordinator, Judy Rubin, to perform the search. In addition, the Region 2 staff identified by Alice Yeh as potential custodians of non-email records responsive to this request were contacted directly by Alice Yeh and at her request, the potential custodians searched their working files and notes for responsive documents. See Mugdan Decl. ¶ 103.

101. On May 21, 2014, Alice Yeh sent an email to Regional Administrator Judith Enck informing her of the CPG's Third FOIA Request, specifically sub-request #4, which sought "Any and all communications regarding the Lower Passaic River Study Area between any

member of the public and Judith Enck, including any alter egos or aliases of Administrator Enck. This information would include but not be limited to all letters, email (both official accounts and personal accounts used for official business), and any notes, records, reports, summaries or memoranda taken during or prepared after communications with members of the public relating to the LPRSA." Alice Yeh informed Ms. Enck that Region 2 would use EPA's eDiscovery software to search her work e-mail account, so she would not have to do so herself. Alice Yeh specified that Ms. Enck would need to search through all of the other communication methods listed above (personal e-mails used for official business, letters, notes, memos, etc.) for information responsive to this FOIA request (up to 5/14/14). See Mugdan Decl. ¶ 104.

102. On June 10, 2014, Steve Carrea, Ms. Enck's Special Assistant, sent Alice Yeh an email stating that Ms. Enck's materials responsive to the request described above had been uploaded to FOIAOnline. This was confirmed via email by Ms. Enck herself and by Wanda Calderon, the Region 2 FOIA Specialist. See Mugdan Decl. ¶ 105.

103. As of May 2016, Ms. Enck has confirmed that her search included all locations reasonably likely to contain responsive information to CPG's Third Request. Ms. Enck has confirmed that she did not use her personal email account for communications regarding the Lower Passaic River Study Area with any members of the public. Ms. Enck has confirmed that she searched her paper files, including the paper files, notes, letters and memoranda referenced above, and her personal email account. See Mugdan Decl. ¶¶ 104, 105.

104. On June 4, 2014, Alice Yeh sent an email to custodians in the Public Affairs Division informing them of sub-request #5 (part 4) of the CPG's Third FOIA Request and asking for responsive materials. These individuals either provided responsive materials or informed Alice Yeh that they had no responsive materials. See Mugdan Decl. ¶ 106.

105. On June 17, 2014, EPA Region 2 uploaded information (78 files) responsive to the CPG's Third FOIA Request to FOIAOnline as an interim response. In her transmittal letter dated June 10, 2014 to Mr. La Gravenis, Alice Yeh estimated that it would take until the end of September 2014 to respond to the FOIA request and gave him the opportunity to modify the request through FOIAOnline so that it could be processed within a shorter period. In the letter, Alice Yeh also directed Mr. La Gravenis to a table in an appendix of the Lower 8.3-Mile RI/FFS with information responsive to the FOIA request. See Mugdan Decl. ¶ 107, Ex. S.

EPA's Collection of Responsive Records

106. On June 18, 2014, Relativity Collection "ED_000018 – Diamond Alkali, Passaic River Focused" was created. EPA Region 2 created the folder with documents responsive to the CPG's Third FOIA Request on August 6, 2014. The final folder contained 10,560 potentially responsive documents. An additional 100 files from Region 2 staff's search of paper and electronic files were saved to in a designated drive on Region 2's computer network for review. In this way, Region 2 staff determined that all locations reasonably likely to have responsive information had been searched. See Mugdan Decl. ¶ 109.

EPA's Processing of Responsive Records

107. The steps for retrieving and processing the records in this FOIA response included review, categorization, and processing steps following the procedure as described in Paragraph 72 for the records collected in the Relativity workspace. For the response to the Third FOIA Request, however, Region 2 staff did not identify any of the responsive records in Relativity as "withhold in full under a FOIA exemption." In addition, the documents collected by Region 2 staff through review of their working files and notes were reviewed by Alice Yeh, Patricia Hick

and Sarah Flanagan, and the documents were identified for release, or release with redactions. All these documents were released, two with redactions. See Mugdan Decl. ¶ 110.

108. *Segregating Non-Exempt Material.* Region 2 staff conducted a line-by-line review of each record responsive to the CPG's Third FOIA Request for segregability of non-exempt material. Region 2 staff determined that, for the single document withheld in full, no meaningful portion could reasonably be released. Region 2 staff performed redactions where non-exempt material could be reasonably segregated and released non-exempt portions. See Mugdan Decl. ¶ 111.

109. In addition, after commencement of litigation, EPA's Office of General Counsel re-reviewed the withheld documents. See Mugdan Decl. ¶ 112.

EPA's Production of Responsive Records

110. EPA Region 2 uploaded the first installment on June 17, 2014 (78 files). The first production was produced electronically via FOIAOnline on June 17, 2014. See Mugdan Decl. ¶ 113, Ex. S.

111. On November 4, 2014, Bill Hyatt of the CPG sent a letter to Sarah Flanagan to discuss the status of the CPG's four FOIA requests. Regarding the CPG's Third FOIA Request, the letter indicated that CPG had not received substantive emails between Judith Enck and members of the community, and asked for a completion date. See Mugdan Decl. ¶ 114, Ex. P.

112. On November 13, 2014, Sarah Flanagan responded to Mr. Hyatt's letter. Regarding the CPG's Third FOIA Request, Sarah Flanagan stated that Region 2 provided responsive information and informed Mr. Hyatt that whether information is substantive is beyond scope of FOIA review. Sarah Flanagan also indicated EPA's intention to complete

review by the end of December 2014 and noted that EPA collected over 10,000 documents, but over 7,000 remained to review. See Mugdan Decl. ¶ 115, Ex. G.

113. On January 26, 2015, Mr. La Gravenis sent an email to Alice Yeh asking about the status of the CPG's Third FOIA Request. On January 29, 2015, Alice Yeh sent an email to Mr. La Gravenis informing that EPA Region 2 encountered technical issues with the interim release of responsive information. Alice Yeh revised her estimated completion date to March 2015. See Mugdan Decl. ¶ 116, Ex. T.

114. On March 16, 2015, Alice Yeh emailed Mr. La Gravenis revising the costs of responding to the CPG's Third FOIA Request and asking him to confirm that he would pay those costs. On March 17, 2015, Mr. La Gravenis sent an email confirming that CPG would pay the additional cost. See Mugdan Decl. ¶ 117, Ex. U.

115. On April 13, 2015, EPA Region 2 released the balance of the responsive information (3073 files) and a final letter dated March 20, 2015 to FOIAOnline. The final letter noted that Region 2 was withholding one responsive document and explained the basis for withholding. EPA Region 2 also sent an invoice through FOIAOnline. See Mugdan Decl. ¶ 118, Ex. V.

116. The CPG's Third FOIA Request sought seven categories of information, and Region 2 responded by releasing documents through FOIAOnline as follows:

- For sub-request #1, seeking an accounting of funds spent and/or committed to be spent in developing the April 11, 2014 Proposed Plan for the Lower 8 Miles of the [Lower Passaic River Study Area ("LPRSA')] and the reports and appendices thereto, including but not limited to the RI/FFS, EPA concluded that it did not have a document or documents responsive to this request.

- In response to sub-request #2, seeking any authorization for expenditure of funds for the Proposed Plan and the reports and appendices thereto, EPA released 33 documents showing commitments of funds under Interagency Agreement IAG DW96941975-01, which EPA understood to be responsive to the CPG's request.

- In response to sub-request #3, seeking all comments to the NRRB from the partner agencies (NOAA, USFWS, NJDEP and USACE), sent to EPA for transmittal to the NRRB and any EPA responses to such comments, EPA released four documents and withheld one, citing FOIA exemptions 5 and 7(A).

- In response to sub-request #4, seeking any and all communications regarding the LPRSA between: 1) any U.S. EPA personnel and any member of the Community Advisory Group or any other person purporting to be a representative of the community; and 2) any member of the public and Judith Enck, including any alter egos or aliases of Administrator Enck, including letters, email (both official accounts and personal accounts used for official business), and any notes, records, reports, summaries or memoranda taken during or prepared after communications with members of the public relating to the LPRSA, EPA released 3075 documents. Of these, 120 documents were redacted to remove personal information, and two were redacted to remove non-responsive information.

- In response to sub-request #5, seeking items related to the public hearing on the PP, held by EPA in Newark, NJ on May 7, 2014 (Hearing): 1) video and/or other recordings taken during the Hearing; 2) a transcript of the Hearing; 3) sign-in sheets for participants at the Hearing; 4) communications between Region 2 and members of the public regarding preparations for the Hearing (to the extent not covered by request 4); and 5) any petitions available for signature during the Hearing, EPA released 39 documents.

- In response to sub-request #6, seeking any documents relating to the designation of any portion of the Diamond Alkali Superfund Site as an operable unit, EPA did not produce any responsive information. Operable unit numbers are used by EPA for managing investigation and remediation at complex sites in phases. Region 2 did not identify documents discussing the designation of operable unit numbers, other than in correspondence to the CPG which was already in the CPG's possession.

See Mugdan Decl. ¶ 119.

117. *Production Numbers.* EPA Region 2 identified approximately 10,560 records as potentially responsive to the CPG's Third FOIA Request, of which Region 2 released 3,050 documents in full in response to the CPG's Third FOIA Request, and 122 documents with redactions as described above, and withheld one document. The remaining documents were determined to be duplicative or otherwise non-responsive to the CPG's First FOIA Request. As part of the re-review of this FOIA response, the EPA determined that 21 files that had been

intended for release had not been produced due to a technical error. These documents were provided to Plaintiff on May 11, 2016. See Mugdan Decl. ¶ 120 & n.5, Ex. J.

VIII. CPG's Fourth FOIA Request: EPA-R2-2014-007546

118. The CPG's Fourth FOIA Request sought all documents, including but not limited to emails, memos, reports and correspondence, that formed the technical basis for the New Jersey Department of Environmental Protection (NJDEP) Fish Advisory Levels, including but not limited to exposure assumptions, toxicity values, and target risk levels used by the NJDEP to derive the Fish Advisory Levels. See Mugdan Decl. ¶ 121.

EPA's Search and Response

119. On June 24, 2014, Alice Yeh discussed the CPG's Fourth FOIA Request by phone with three Region 2 staff from the Clean Water Division, one Region 2 staff from the Office of Policy and Management who was formerly from the Clean Water Division and one Region 2 staff from ERRD. The purpose of this discussion was to determine who in Region 2, if anyone, would potentially have records responsive to the Fourth FOIA request. See Mugdan Decl. ¶ 122.

120. The Clean Water Division staff person who was the New York/New Jersey Harbor Estuary Program ("HEP") coordinator said that he did not have any files related to the technical basis for NJDEP's fish consumption advisories. He did remember an effort by the HEP related to the different bases that the States of New York and New Jersey had for issuing fish consumption advisories on shared water bodies, but the effort did not result in any technical analyses being done on how each state sets fish consumption advisories. See Mugdan Decl. ¶ 123.

121. The Clean Water Division staff person responsible for reviewing the technical bases for state water quality standards said that he had not done any work on fish consumption advisories. He said that the Office of Policy and Management staff who was formerly from the Clean Water Division had dealt with fish consumption advisories. See Mugdan Decl. ¶ 124.

122. The Office of Policy and Management staff formerly from the Clean Water Division said that she worked on New York & Mohawk Nation advisories, not New Jersey. See Mugdan Decl. ¶ 125.

123. The Clean Water Division, Water Management Branch Chief said that he did not have any information responsive to the CPG's Fourth FOIA Request. See Mugdan Decl. ¶ 126.

124. The ERRD risk assessor for the Diamond Alkali Superfund Site, who was the team member most knowledgeable about fish and crab consumption advisories, said that she did not do any work on NJ fish consumption advisories, but forwarded two emails from Gary Buchanan of NJDEP, one with an attachment, that were responsive and were released as described below. See Mugdan Decl. ¶ 127.

125. Based on the search process described in Paragraphs 127 to 132, Alice Yeh determined that all individuals reasonably likely to have responsive information had been contacted and searches completed. See Mugdan Decl. ¶¶ 127-32.

EPA's Production of Responsive Records

126. On July 14, 2014, EPA Region 2 uploaded three documents responsive to the CPG's Fourth FOIA Request, as well as Alice Yeh's final response letter to Robert La Gravenis dated July 1, 2014 to FOIAOnline. EPA Region 2 also sent an invoice through FOIAOnline. Region 2 did not withhold or redact any information that was responsive to the Fourth FOIA request. See Mugdan Decl. ¶ 129, Ex. W.

IX. Coded Vaughn Index and Exemptions Applied

127. As described above, between April 28, 2014 and March 20, 2015, Region 2 collected over 66,000 electronic files, and reviewed them for responsiveness and FOIA exemptions in response to the CPG's four FOIA requests. Region 2 personnel searched their files and provided responsive information. During this time, Alice Yeh contacted Mr. La Gravenis on a number of occasions to inform him of the progress of Region 2's search and review. See Mugdan Decl. ¶ 130.

128. As described above Region 2 staff conducted a line-by-line review of each record responsive to the CPG's four FOIA requests for releasability, applicable exemption, and segregability of non-exempt material. Region 2 staff determined that for documents withheld in full, no meaningful portion could reasonably be released. Region 2 staff performed redactions where non-exempt material could be reasonably segregated and released non-exempt portions. See Mugdan Decl. ¶ 131.

129. When information was identified containing attorney-client communications, attorney work-product, and/or predecisional and deliberative information, Region 2 identified this information for withholding under FOIA Exemption 5, which applies to inter-agency or intra-agency memoranda or letters which would not be available by law to a party other than an agency in litigation with the affected agency. Where thought processes are woven into document to such an extent that any attempt at segregating information would reveal agency deliberations that information is also exempt from release under FOIA Exemption 5. Region 2 also identified information for withholding under FOIA Exemption 7(A) if the information was compiled for law enforcement purposes, the production of which could reasonably be expected to interfere with enforcement proceedings. Finally, Region 2 identified information for redaction and

withholding under FOIA Exemption 6 if the release of said information would constitute an unwarranted invasion of personal privacy. Individual documents may be withheld under multiple FOIA Exemptions, as described in the Coded Vaughn Index. See Mugdan Decl. ¶ 132 & n.6, Ex. X.

130. The final number of responsive documents to all four FOIA requests was approximately 6,721 records, with approximately 4,257 released in full, approximately 270 released with redactions, and approximately 2,191 withheld in full under one or more exemptions. By agreement between the parties, the withheld documents are described by category and code in the attached Coded Vaughn Index and are individually listed, except as noted below. See Mugdan Decl. ¶ 133, Ex. X.

131. The documents withheld in Category 17, which are 122 documents released in response to the Third FOIA Request with minor redactions under Exemption 6, have not been individually listed. In addition, as noted above, the documents released with redactions in the initial responses to the First and Second FOIA Requests have not been included in the Coded Vaughn Index. See Mugdan Decl. ¶ 133 n.7, Ex. X.

132. As explained above, and set forth in more detail in the withholding log enclosed with final response letter for CPG's First FOIA Request, in response to sub-requests #8 and #9, seeking correspondence between Region 2 and NRRB between November 21, 2012 and April 11, 2014, and between Region 2 and HQ on draft versions of the Proposed Plan and FFS documents, Region 2 withheld approximately 504 documents under Exemption 5. This request sought internal communications among EPA offices in the time leading up to EPA's issuance of the Proposed Plan, and accordingly, responsive information includes numerous sensitive communications in which legal enforcement staff participated. In addition, a limited amount of

information was withheld under Exemption 6 for protection of personal privacy. This information includes discussions of health and medical plans, leave and use of leave, as well as conference lines and conference codes. See Mugdan Decl. ¶ 134, Ex. X.

133. As explained above, and set forth in the withholding log enclosed with final response letter for CPG's Second FOIA Request, which sought all emails, correspondence and other documents relating to EPA's 2008 CSM and EMBM, and any comments, revisions or changes to the CSM that were considered by EPA in the development and issuance of the Proposed Plan, and EPA's June 2008 peer review of the CSM and EMBM, Region 2 withheld approximately 1,686 documents under Exemption 5 and 7(A). This request sought internal communications among EPA offices and among EPA and partner agencies in the time leading up to EPA's issuance of the Proposed Plan, and accordingly, responsive information includes numerous sensitive communications in which legal enforcement staff participated, including discussion of potential law enforcement activities. See Mugdan Decl. ¶ 135, Ex. X.

134. As explained above, in response to CPG's Third FOIA Request, Region 2 redacted portions of 122 documents on the basis of FOIA Exemption 6, and withheld one document on the basis of Exemptions 5 and 7(A). See Mugdan Decl. ¶ 136, Ex. X.

135. As explained above, no information was withheld from CPG in response to the Fourth Request. Therefore, the Fourth Request is not included in the Coded Vaughn Index. See Mugdan Decl. ¶ 137, Ex. X.

UNITED STATES DISTRICT COURT
DISTRICT OF NEW JERSEY

LOWER PASSAIC RIVER STUDY AREA COOPERATING PARTIES GROUP, *Plaintiff,* v. U.S. ENVIRONMENTAL PROTECTION AGENCY, *Defendant.*	HON. JOSE L. LINARES *Civil Action No.* 15-CV-7828 (JLL) (JAD)

MEMORANDUM OF LAW IN SUPPORT OF DEFENDANT'S
MOTION FOR SUMMARY JUDGMENT

PAUL J. FISHMAN
United States Attorney
970 Broad Street, Suite 700
Newark, NJ 07102

On the Brief:
KRISTIN L. VASSALLO
Assistant United States Attorney

TABLE OF CONTENTS

PRELIMINARY STATEMENT 1

STATEMENT OF FACTS 2

STANDARD FOR SUMMARY JUDGMENT IN FOIA CASES 2

ARGUMENT – THE COURT SHOULD GRANT SUMMARY JUDGMENT TO THE EPA BECAUSE THE AGENCY CONDUCTED A THOROUGH SEARCH AND PROPERLY WITHHELD INFORMATION PURSUANT TO FOIA EXEMPTIONS 5

A. The EPA Conducted an Adequate Search for Responsive Records 5

B. The EPA Properly Withheld Documents and Information Under FOIA Exemption 5, Exemption 6, and Exemption 7(A) 9

1. The EPA Properly Withheld Documents Under Exemption 5 10

a. Documents Withheld Under Exemption 5 Qualify As Inter-Agency or Intra-Agency Communications 12

b. Documents Withheld Under Exemption 5 Fall Within Privileges Recognized in Civil Discovery 15

i. Deliberative Process Privilege 16

A. Draft materials 17

B. Emails containing deliberative communications 20

C. Other deliberative documents 21

ii. Attorney-Client Privilege 22

iii. Attorney Work Product Privilege 25

2. The EPA Properly Withheld Information Under Exemption 6 28

3. The EPA Properly Withheld Documents and Information Under Exemption 7(A) 32

C. The EPA Produced All Reasonably Segregable Information to CPG 38

PRELIMINARY STATEMENT

This case arises out of four Freedom of Information Act ("FOIA") requests submitted by the Lower Passaic River Study Area Cooperating Parties Group ("CPG") to the U.S. Environmental Protection Agency (the "EPA") between April 21, 2014, and June 17, 2014. CPG's four requests – which included more than twenty sub-requests – broadly sought documents and information concerning the remedy selection process for the lower 8.3 miles of the Lower Passaic River, a portion of the Diamond Alkali Superfund Site.[1] In response to these requests, the EPA has produced approximately 4,361 responsive documents, withholding approximately 270 documents in part, and withholding approximately 2,312 documents in full pursuant to one or more appropriate FOIA exemptions. See Declaration of Walter Mugdan ("Mugdan Decl.") ¶¶ 77, 95, 121, 133.

Dissatisfied with the EPA's response, CPG brought this action challenging the adequacy of the EPA's search for records and its decision to invoke several FOIA exemptions to withhold or redact certain documents. The Court should grant summary judgment to the EPA and dismiss CPG's complaint, for the following reasons.

First, to the extent CPG challenges the adequacy of the EPA's search, its claim must be rejected because the search was reasonably calculated to uncover all potentially responsive documents subject to FOIA.

Second, to the extent CPG challenges the EPA's decision to withhold certain responsive documents and information, this argument is likewise meritless because the agency's invocation of FOIA exemptions was entirely appropriate. The EPA correctly asserted 5 U.S.C. § 552(b)(5)

---

[1] For ease of reference, this brief may refer to the 17-mile stretch of the Passaic River as the "Lower Passaic River" or the "17 Miles," and the lower 8.3 mile of the Lower Passaic River as the "Lower 8.3 Miles."

("Exemption 5") to withhold records and information protected by the deliberative process, attorney client, and attorney work product privileges. The EPA also appropriately withheld documents under 5 U.S.C. § 552(b)(7)(A) ("Exemption 7(A)") because disclosure of those documents could reasonably be expected to interfere with a pending law enforcement proceeding. And the EPA properly invoked 5 U.S.C. §§ 552(b)(6) ("Exemption 6") to withhold information relating to EPA employees, other federal employees, and members of the public. Because the EPA properly concluded that responsive documents fell within specific FOIA exemptions, its decision to withhold or redact these documents should be upheld.

Finally, the EPA released all reasonably segregable information following a line-by-line review of the withheld documents. For all of these reasons, the Court should grant summary judgment to the Government and dismiss the complaint.

STATEMENT OF FACTS

The EPA hereby incorporates its Statement of Material Facts Not In Dispute, and the declaration and exhibits referenced therein, which have been filed contemporaneously with this Memorandum of Law.

STANDARD FOR SUMMARY JUDGMENT IN FOIA CASES

The Freedom of Information Act, 5 U.S.C. § 552, "represents a balance struck by Congress between the public's right to know and the government's legitimate interest in keeping certain information confidential." Ctr. for Nat'l Sec. Studies v. U.S. Dep't of Justice, 331 F.3d 918, 925 (D.C. Cir. 2003). Although the statute was enacted to facilitate public access to government documents, this access is not "all encompassing." Sheet Metal Workers Int'l Assoc., Local Union No. 19 v. U.S. Dep't of Veterans Affairs, 135 F.3d 891, 897 (3d Cir. 1998) (quotation omitted). FOIA does not require an agency "to create responsive records or answer

questions posed as FOIA requests." See Stuler v. I.R.S., 216 F. App'x 240, 242 (3d Cir. 2007); Students Against Genocide v. Dep't of State, 257 F.3d 828, 837 (D.C.Cir.2001). Likewise, an agency may withhold documents sought by a FOIA requester if they fall within one of the nine categories of information that Congress has exempted from FOIA's disclosure requirements. See U.S. Dep't of Justice v. Reporters Comm. for Freedom of the Press, 489 U.S. 749, 755 (1989). If the requester believes that an agency has improperly withheld documents or information, he may bring an action in federal district court seeking de novo review of the agency's decision. See 5 U.S.C. § 552(a)(4)(B); Davin v. U.S. Dep't of Justice, 60 F.3d 1043, 1049 (3d Cir. 1995).

Once filed in federal court, a FOIA case is typically resolved by a motion for summary judgment. See Manna v. U.S. Dep't of Justice, 832 F. Supp. 866, 870 (D.N.J. 1993), aff'd, 51 F.3d 1158 (3d Cir. 1995). To succeed on such a motion, an agency may submit affidavits (also known as a "Vaughn index") describing the information withheld and explaining why the information falls within one or more of FOIA's exemptions.[2] See id. at 1163; Leonard v. U.S.

---

[2] Documents may be grouped together as categories in a Vaughn Index, "particularly when the withholdings comprise multiple, duplicative records and when the government's supporting affidavits are 'sufficiently detailed to allow the district court fairly to evaluate' the application of a claimed exemption to distinct categories of documents." Citizens for Responsibility & Ethics in Wash. v. U.S. DOJ, 955 F. Supp. 2d 4, 14 (D.D.C. 2013) (citing Gallant v. NLRB, 26 F.3d 168, 173 (D.C. Cir. 1994)); see also Davin, 60 F.3d at 1051 (stating that an agency may appropriately produce a categorical Vaughn containing "specific factual information concerning the documents withheld and correlat[ing] the claimed exemptions to the withheld documents"). As the D.C. Circuit has explained, "[n]o rule of law precludes [an agency] from treating common documents commonly." Judicial Watch, Inc. v. FDA, 449 F.3d 141, 147 (D.C. Cir. 2006). Indeed, such categorical grouping may be an "efficient vehicle[] by which a court can review withholdings that implicate the same exemption for similar reasons." Id.; see CEI v. EPA, 12 F. Supp. 3d 100, 115 (D.D.C. 2014). In this case, because of the large volume of documents and in order to aid the Court with its review, the parties have agreed, in their joint discovery plan (ECF No. 11) that the EPA would provide "(1) an index that identifies each document withheld in full or in part over the four requests, along with codes for applicable FOIA exemptions; and (2)

Dep't of Treasury I.R.S., 590 F. App'x 141, 143 n.3 (3d Cir. 2014); McDonnell v. United States, 4 F.3d 1227, 1241 (3d Cir. 1993). Agency affidavits are generally "accorded a presumption of good faith which cannot be rebutted by purely speculative claims about the existence and discoverability of other documents." Venkataram v. Office of Information Policy, No. 09-6520 (JBS/AMD), 2013 WL 3871730, at *3 (D.N.J. Jul. 25, 2013) (quotation omitted), aff'd, 590 F. App'x 138 (3d Cir. 2014). "[A]n agency is entitled to summary judgment if its affidavits describe the withheld information and the justification for withholding with reasonable specificity, demonstrating a logical connection between the information and the claimed exemption[,] and are not controverted by either contrary evidence in the record nor by evidence of agency bad faith." Am. Friends Serv. Comm. v. Dep't of Defense, 831 F.2d 441, 444 (3d Cir. 1987) (internal quotation marks and citation omitted).

---

information describing the different categories of documents withheld in full or in part, and the reasons each category qualifies for withholding under the relevant FOIA exemption(s), either in a separate "index" or incorporated into the agency's declaration." Joint Discovery Plan, at 3. Accordingly, documents have been grouped into categories in the EPA's Vaughn index. See Mugdan Decl. ¶¶ 139-41; Exhibit X ("Vaughn Index"). For ease of reference, this brief will cite directly to the Vaughn Index.

ARGUMENT

THE COURT SHOULD GRANT SUMMARY JUDGMENT TO THE EPA BECAUSE THE AGENCY CONDUCTED A THOROUGH SEARCH AND PROPERLY WITHHELD INFORMATION PURSUANT TO FOIA EXEMPTIONS

In response to CPG's FOIA requests, the EPA has produced more than 4,500 documents in full or in part, only withholding documents and information that are exempt from disclosure under 5 U.S.C. §§ 552(b)(5), (b)(6), and (b)(7)(A). CPG's challenge to this response must be rejected. As set forth more fully below, the EPA conducted an appropriate search that was reasonably calculated to uncover all relevant documents. Moreover, the EPA properly asserted Exemption 5, Exemption 6, and Exemption 7(A) over responsive documents and information, and released all reasonably segregable information following a line-by-line review of the withheld documents. Because there is no dispute of fact regarding these issues, the Court should grant summary judgment to the EPA and dismiss the complaint.

A. The EPA Conducted an Adequate Search for Responsive Records

As an initial matter, to the extent CPG challenges the adequacy of the EPA's search for responsive records, this argument must be rejected because the search was reasonably calculated to uncover all relevant documents subject to FOIA.

FOIA requires agencies to conduct searches that are "reasonably calculated to uncover all relevant documents." Abdelfattah v. Dep't of Homeland Sec., 488 F.3d 178, 182 (3d Cir. 2007) (citation omitted). To determine whether an agency has conducted an appropriate search, a court does not ask "whether there might exist any other documents possibly responsive to the request, but rather whether the search for those documents was adequate." Id. at 182 (quotation and emphasis omitted). Thus, "the adequacy of a FOIA search is generally determined not by the fruits of the search, but by the appropriateness of the methods used to carry out the search."

Qatanani v. Dep't of Justice, Nos. 12-4042 (KSH) (CLW), 12-5379 (KSH)(CLW), 2015 WL 1472227, at *7 (D.N.J. Mar. 31, 2015) (quoting Iturralde v. Comptroller of Currency, 315 F.3d 311, 315 (D.C. Cir. 2003)). At summary judgment, an agency will prevail when it offers a "reasonably detailed affidavit, setting forth the search terms and the type of search performed, and averring that all files likely to contain responsive materials . . . were searched." Abdelfattah, 488 F.3d at 182 (citations omitted). Courts are reluctant to order an agency to conduct an expanded search "without a positive indication of overlooked materials." Qatanani, 2015 WL 1472227, at *7 (quoting Founding Church of Scientology v. Nat'l Sec. Agency, 610 F.2d 824, 837 (D.C. Cir. 1979)) (internal quotation marks omitted).

The EPA's search amply satisfies these requirements. The Declaration of Walter Mugdan, Director of the EPA's Emergency and Remedial Response Division ("ERRD") for Region 2, establishes that the EPA has made a good faith effort to conduct a search for the requested records using methods which can be reasonably expected to produce the information requested, and therefore has conducted a search of all locations that are likely to yield documents responsive to CPG's FOIA requests. As the declaration details, the EPA conducted multiple searches to ensure a complete response, while seeking to locate the specific materials requested in each of the four FOIA requests.

For CPG's first FOIA request, which sought thirteen categories of information,[3] EPA staff, with assistance from employees of the Louis Berger Group and Battelle,[4] located technical data and information in EPA's possession that were responsive to a number of sub-requests. See

[3] CPG's first FOIA request originally sought fourteen categories of documents, but sub-request #13 was withdrawn by CPG. See Mugdan Decl. ¶ 59.

[4] Louis Berger Group and Battelle were hired by the Army Corps of Engineers - Kansas City District to perform technical work on the Lower 8.3 Miles Remedial Investigation/ Focused Feasibility Study. See Mugdan Decl. ¶¶ 34-36.

Mugdan Decl. ¶¶ 63-64. In addition, EPA staff searched the email accounts of current and retired Region 2 employees (from ERRD, Office of Regional Counsel, and Office of the Regional Administrator) who were likely to have responsive emails, and searched electronic and paper records maintained by an ERRD employee. See id. ¶¶ 65-67 (describing specific parameters of the search).

For CPG's second FOIA request, which broadly sought all documents and correspondence relating to two models developed as part of the Lower 8.3 Miles Remedial Investigation/ Focused Feasibility Study ("RI/FFS"), EPA staff searched the email accounts of seven Region 2 employees from ERRD and the Office of Regional Counsel, as well as an EPA Headquarters employee located in Region 2's Edison office, who were likely to have responsive emails. See id. ¶ 85. In addition, EPA staff searched working files and notes maintained by Region 2 employees. See id. (describing specific parameters of search).

For CPG's third FOIA request, which sought seven categories of information, EPA staff searched the email accounts of fourteen Region 2 employees (from ERRD, the Public Affairs Division, Office of Regional Counsel, and the Regional Administrator's Office) who were likely to have responsive emails, and searched working files and notes maintained by Region 2 and Public Affairs Division employees. See id. ¶¶ 103, 107 (describing specific parameters of search). In addition, EPA staff informed Regional Administrator Judith Enck of sub-request #4 of CPG's third FOIA request, which sought:

> "Any and all communications regarding the Lower Passaic River Study Area between any member of the public and Judith Enck, including any alter egos or aliases of Administrator Enck. This information would include but not be limited to all letters, email (both official accounts and personal accounts used for official business), and any notes, records, reports, summaries or memoranda taken during or prepared after communications with members of the public relating to the LPRSA."

Id. ¶ 104. EPA staff explained to Ms. Enck that, while Region 2 would use EPA's eDiscovery software to search her work email account (so she would not have to do so herself), Ms. Enck would "need to search through all of the other communication methods listed above (personal emails used for official business, letters, notes, memos, etc.) for information responsive to this FOIA request (up to 5/14/14)." Id. Ms. Enck acknowledged the request to search, and all responsive materials were thereafter uploaded to FOIAonline and circulated to the staff members processing CPG's FOIA requests. See id. ¶¶ 105-06. As of May 2016, Ms. Enck has confirmed that her search included all locations reasonably likely to contain responsive information to CPG's Third Request. See id. ¶ 106. Ms. Enck has confirmed that she did not use her personal email account for communications regarding the Lower Passaic River Study Area with any members of the public. See id. Ms. Enck has confirmed that she searched her files, including paper files, notes, letters and memoranda, and her personal email account. See id.

For CPG's fourth FOIA request, which sought information relating to the New Jersey Department of Environmental Protection's ("NJDEP's") Fish Advisory Levels, EPA staff spoke with five Region 2 employees to determine who at EPA, if anyone, would potentially have responsive records. See id. ¶ 122. These individuals included a staff member from Region 2's Clean Water Division who served as the New York/New Jersey Harbor Estuary Program ("HEP") coordinator; a Clean Water Division employee responsible for reviewing the technical bases for state water quality standards; a former Clean Water Division employee who had worked on New York and Mohawk Nation (but not New Jersey) fish consumption advisories; the Clean Water Division, Water Management Branch Chief; and the ERRD risk assessor for the Diamond Alkali Superfund Site. See id. ¶¶ 122-27 (describing communications with

employees). Of these individuals, only the ERRD risk assessor located potentially responsive records – emails from NJDEP, which were released to CPG. See id. ¶ 127.

Based on the foregoing search efforts, EPA staff properly determined that all locations reasonably likely to have responsive information had been searched. See id. ¶¶ 69, 88, 110, 113, 128. In total, EPA personnel identified and reviewed more than 66,000 documents that were potentially responsive to CPG's four FOIA requests and produced more than 4,500 documents. See id. ¶¶ 56, 77, 95, 121, 133. Because the EPA "made a good faith effort to search for the records requested," and its "methods were reasonably expected to produce the information requested," Kidd v. Dep't of Justice, 362 F. Supp. 2d 291, 294 (D.D.C. 2005), the Court should reject any challenge to the agency's search, and enter summary judgment in favor of the EPA on this issue. See, e.g., N'Jai v. U.S. E.P.A., No. 13-1212, 2014 WL 2508289, at *12 (W.D. Pa. June 4, 2014) (finding EPA "declaration to be in good faith and sufficiently detailed so as to establish the EPA's compliance with its duty under FOIA to conduct an adequate search for, and to produce, records that are responsive to the Plaintiff's request").

B. The EPA Properly Withheld Documents and Information Under FOIA Exemption 5, Exemption 6, and Exemption 7(A)

In responding to CPG's FOIA requests, the EPA invoked three FOIA exemptions to withhold documents and information: Exemption 5 (in particular, the deliberative process privilege, the attorney-client privilege, and the attorney work product doctrine); Exemption 6, and Exemption 7(A). For the reasons that follow, the Court should uphold the EPA's assertion of these three exemptions in all respects.

1. The EPA Properly Withheld Documents Under Exemption 5

As the Mugdan Declaration describes, the EPA has withheld seventeen categories of information under Exemption 5:

- Category 1: Communications and documents exchanged between Region 2, EPA Headquarters, and the National Remedy Review Board ("NRRB"), including technical documentation undergoing attorney review.

- Category 2: Communications and documents exchanged among EPA Region 2 Technical Staff, EPA Region 2 Legal Staff, EPA Headquarters Technical Staff and EPA Headquarters Legal Staff related to the NRRB/CSTAG Memo and Region 2 response.

- Category 3: Communications and documents exchanged between Region 2 attorneys and EPA Headquarters attorneys, with some non-attorney staff copied, related to the Proposed Plan.

- Category 4: Communications and documents exchanged between Region 2 technical staff and EPA Headquarters technical staff that were subject to review by Region 2 attorneys and EPA Headquarters attorneys, related to the Proposed Plan and Focused Feasibility Study.

- Category 5: Communications and documents exchanged among EPA Region 2 Technical Staff, EPA Region 2 Legal Staff, EPA Headquarters Technical Staff and EPA Headquarters Legal Staff related to the Proposed Plan and Focused Feasibility Study.

- Category 6: Correspondence between Region 2 and NJDEP on NJDEP angler surveys that included sites on the Lower Passaic River, and any data and analysis from those surveys.

- Category 7: Email Communications between EPA Region 2 attorneys with attorney comments on draft technical documents.

- Category 8: Communications and attachments circulated between EPA and Partner Agencies related to the development of the Lower Passaic River CSM and EMBM and Proposed Plan for the Lower 8.3 Miles of the Lower Passaic River, including documents and communications shared under a Joint Prosecution and Confidentiality Agreement.

- Category 9: Communications and attachments circulated between EPA, EPA's technical contractors, and Partner Agencies related to the development of the CSM and EMBM for the Lower Passaic River and Proposed Plan.

- Category 10: Communications and documents circulated internally among EPA Region 2 staff as part of the development of the CSM and EMBM for the Lower Passaic River and Proposed Plan.

- Category 11: Communications and draft documents, particularly drafts of technical documents and related communications and comments, circulated between EPA Region 2 and its contractors and subcontractors as part of the development and peer review of the CSM and EMBM for the Lower Passaic River and Proposed Plan.

- Category 12: Communications and draft documents, particularly drafts of technical documents and related communications and comments, circulated between technical staff in EPA Region 2 and technical staff in EPA Headquarters.

- Category 13: Draft technical documents circulated for legal review, incorporating attorney comments.

- Category 14: Communications between Region 2 technical staff and Region 2 attorneys to discuss attorney comments and review of technical documents.

- Category 15: Hardcopy notes and documents related to the development of the CSM and EMBM for the Lower Passaic River and Proposed Plan, including meeting notes and notes and comments on draft documents.

- Category 16 – Handwritten Attorney Notes from Meetings and Calls.

- Category 18 – One document consisting of comments from two Partner Agencies, U.S. Fish and Wildlife Service ("USFWS") and National Oceanographic and Atmospheric Administration ("NOAA") to the NRBB on the Lower 8.3 Miles Focused Feasibility Study.

See Mugdan Decl. ¶¶ 138-40; Vaughn Index, Categories 1-16, 18.

Exemption 5 protects from disclosure "inter-agency or intra-agency memorandums or letters which would not be available by law to a party . . . in litigation with the agency." 5 U.S.C. § 552(b)(5). To qualify for protection under Exemption 5, a document must (1) originate with a government agency; and (2) fall within one of the privileges that would apply in civil litigation. See Dep't of Interior v. Klamath Water Users Protective Ass'n, 532 U.S. 1, 8 (2001). Exemption 5 thus "encompasses the traditional discovery privileges," including the deliberative

process privilege, the attorney client privilege, and the attorney work product privilege. Abdelfattah, 488 F.3d at 183; Qatanani, 2015 WL 1472227, at *7. As explained more fully below, the EPA has met each of these elements with respect to the withheld documents.

a. Documents Withheld Under Exemption 5 Qualify As Inter-agency or Intra-Agency Communications

As noted above, documents withheld under Exemption 5 must originate with a government agency. See Klamath, 532 U.S. at 8. For the purposes of FOIA, "agency" is defined as "each authority of the Government of the United States [and] includes any executive department, military department, Government corporation, Government controlled corporation, or other establishment in the executive branch of the Government . . . , or any independent regulatory agency[.]," Id. at 9 (citing 5 U.S.C. §§ 551(1), 552(f)(1)) (internal quotation marks omitted). Thus, documents authored by employees of the EPA and other federal agencies – like the Army Corps of Engineers, NOAA, and USFWS – easily satisfy Exemption 5's threshold requirement.

As for documents created by non-agency personnel, like consultants hired by the Army Corps of Engineers, and employees from state agencies like NJDEP and NJDOT, documents created by these entities likewise qualify as "inter-agency" or "intra-agency" communications. Under the "consultant corollary" to Exemption 5, courts have interpreted the phrase "intra-agency" to include "records authored by non-agency entities if those records were solicited by a U.S. agency in the course of its deliberative process." Pub. Employees for Envtl. Responsibility v. U.S. Section, Int'l Boundary & Water Comm'n, U.S.-Mexico, 740 F.3d 195, 201-02 (D.C. Cir. 2014). So long as a consultant does not represent an interest that is "'necessarily adverse' to the government," materials originating with that individual or organization will satisfy the "intra-

agency" element of Exemption 5. See Elec. Privacy Info. Ctr. v. U.S. Dep't of Homeland Sec., 892 F. Supp. 2d 28, 46 (D.D.C. 2012) (quoting Klamath, 532 U.S. at 14).

In this case, the EPA properly asserted Exemption 5 over documents created by non-agency personnel. See Vaughn Index, Categories 6, 8, 9, and 11. The EPA works closely with a group of federal and state agencies (known as the "Partner Agencies") to investigate and remediate the Lower Passaic River. See Mugdan Decl. ¶¶ 31-32. The Partner Agencies include the Army Corps of Engineers- New York District, NOAA, and USFWS, as well as NJDOT (which participated in these efforts until November 2007), and NJDEP (which assumed NJDOT's responsibilities). See id. ¶ 31. The EPA has a particularly close relationship with NJDEP for the investigation and cleanup of the Diamond Alkali Superfund Site, including the Lower Passaic River, because the Comprehensive Environmental Response, Compensation and Liability Act ("CERCLA") and its implementing regulations provide for state involvement in the CERCLA process. See id. ¶ 32 (citing 42 U.S.C. § 9621(f) and 40 CFR 300.515(f)).

In 2005, the EPA signed a Joint Prosecution and Confidentiality Agreement ("JPCA") with the Partner Agencies with respect to the Lower Passaic River. See id. ¶ 33. This JPCA provided that the parties' common interests with respect to the Passaic River Matter (defined as the contamination of the Passaic River and environs in New Jersey) include the determination, implementation, and supervision of appropriate and effective environmental and natural resource damages response actions, and the preparation for and prosecution of anticipated enforcement litigation against third parties with respect to the Passaic River Matter. See id. The JPCA further provides that for the parties to pursue and achieve their common interests concerning environmental and natural resource damages response actions and anticipated enforcement litigation with respect to the Passaic River Matter, it has been and remains imperative, and in

some instances is mandated by federal law, that the State of New Jersey and federal parties exchange communications, information and documents as part of their deliberative and decision-making processes. See id. Subsequently, and throughout development of the 17-Miles RI/FS and the Lower 8.3 Miles RI/FFS, EPA has shared technical documents in draft form with the Partner Agencies, including NJDEP and NJDOT. See id.

Given the close working relationship between the New Jersey agencies and the federal Partner Agencies, and in particular the agencies' shared interest in enforcing the cleanup of the Lower Passaic River, the EPA properly concluded that documents created by NJDEP and NJDOT personnel meet the threshold requirement for Exemption 5 protection. See Citizens for Pennsylvania's Future v. Department of the Interior, 218 F.R.D. 441, 446 (M.D. Pa. 2003) (withholding under Exemption 5 documents exchanged between the Department of the Interior and a Pennsylvania agency in an environmental proceeding because the agencies were "pursu[ing] common objectives" and "share[d] a unity of interest"); vacated on other grounds, 2004 WL 5462212 (M.D. Pa. Aug. 23, 2004); Gen. Elec. Co. v. U.S. E.P.A., 18 F. Supp. 2d 138, 142-43 (D. Mass. 1998) (considering documents between EPA and state agencies involved in CERCLA matter "intra-agency" records under Exemption 5); Chemcentral/Grand Rapids Corp. v. U.S. E.P.A., No. 91 C 4380, 1992 WL 724965, at *12-13 (N.D. Ill. Aug. 20, 1992), report and recommendation adopted, No. 91 C 4380, 1992 WL 281322 (N.D. Ill. Oct. 6, 1992) (considering documents between EPA and Michigan Department of Natural Resources exchanged during CERCLA matter "intra-agency" records under Exemption 5).

The same is true with respect to documents created by contractors retained by the federal government. As mentioned supra at note 4, pursuant to an Interagency Agreement, the Army Corps of Engineers – Kansas City District ("Corps-KC") hired contractors Malcolm Pirnie (later

Louis Berger Group), HydroQual (later HDR/HydroQual), and Battelle to perform sampling, analysis, and technical work, which was provided to the Corps-KC and the EPA for further review, approval, and incorporation into the eventual Lower 8.3 Miles RI/FFS, Proposed Plan (including the Conceptual Site Model and Empirical Mass Balance Model), and Record of Decision. See Mugdan Decl. ¶¶ 34-40. The Corps-KC also used these and other contractors to perform technical work that was incorporated into the EPA's oversight of CPG's 17 Miles RI/FFS. See id. ¶¶ 38-40. In performing this work, the government's contractors do not represent or advocate for any outside interests, but rather perform work and create documents "for the purpose of aiding the [EPA]'s deliberative process." Pub. Citizen, Inc. v. Dep't of Justice, 111 F.3d 168, 170 (D.C. Cir. 1997) (citation omitted). Under the well-recognized "consultant corollary" to Exemption 5, documents created by these contractors qualify as "intra-agency" communications under Exemption 5. See Elec. Privacy Info. Ctr., 892 F. Supp. 2d at 45 (communications between DHS and "outside consultants" who contracted with DHS qualified as "intra-agency"); Citizens for Responsibility & Ethics in Washington v. U.S. Dep't of Homeland Sec., 514 F. Supp. 2d 36, 44 (D.D.C. 2007) (documents drafted by FEMA contractors qualified as "intra-agency").

b. Documents Withheld Under Exemption 5 Fall Within Privileges Recognized in Civil Discovery

The EPA properly asserted Exemption 5 over seventeen categories of documents because each category is protected from disclosure under the deliberative process privilege, the attorney client privilege, and/or the attorney work product doctrine. Each of these privileges is discussed below.

i. Deliberative Process Privilege

Designed to protect the quality of agency decision-making, see NLRB v. Sears, Roebuck & Co., 421 U.S. 132, 149, 151 (1975), the deliberative process privilege "recognizes that[, if] agencies [were] forced to operate in a fishbowl, the frank exchange of ideas and opinions would cease and the quality of administrative decisions would consequently suffer." Redland Soccer Club, Inc. v. Dep't of Army of U.S., 55 F.3d 827, 854 (3d Cir. 1995) (quoting First Eastern Corp. v. Mainwaring, 21 F.3d 465, 468 (D.C. Cir. 1994) (quotation marks omitted)). As the Supreme Court has explained, "[t]he deliberative process privilege rests on the obvious realization that officials will not communicate candidly among themselves if each remark is a potential item of discovery and front page news, and its object is to enhance the quality of agency decisions by protecting open and frank discussion among those who make them within the Government." Klamath, 532 U.S. at 8-9 (citation omitted). In addition to promoting open communication, the privilege also serves to "prevent premature disclosure of policies before final adoption, and to avoid public confusion if grounds for policies that were not part of the final adopted agency policy happened to be exposed to the public." Ctr. For Medicare Advocacy, Inc. v. U.S. Dep't of Health & Human Servs., 577 F. Supp. 2d 221, 234 (D.D.C. 2008).

An agency may rely on the deliberative process to withhold information under Exemption 5 if the information is both "predecisional" and "deliberative." Abdelfattah, 488 F.3d at 183. "A document is predecisional if it was drafted to aid a decision maker in reaching his or her decision, and it is deliberative if it reflects the give[]-and-take of the consultative process." Qatanani, 2015 WL 1472227, at *8 (quoting Petroleum Info. Corp. v. U.S. Dep't of Interior, 976 F.2d 1429, 1434 (D.C. Cir. 1992)) (internal quotation marks omitted). The deliberative process privilege thus protects "recommendations, draft documents, proposals, suggestions, and other

subjective documents which reflect the personal opinions of the writer rather than the policy of the agency." Cleveland v. United States, 128 F. Supp. 3d 284, 299 (D.D.C. 2015) (quoting Coastal States Gas Corp. v. Dep't of Energy, 617 F.2d 854, 866 (D.C. Cir. 1980) (quotation marks omitted). Courts should accord "considerable deference to an agency's judgment as to what constitutes part of the agency give-and-take – of the deliberative process[.]" Gosen v. U.S. Citizenship & Immigration Servs., 118 F. Supp. 3d 232, 244 (D.D.C. 2015) (internal quotation marks and citation omitted); Chemical Mfrs. Ass'n v. Consumer Product Safety Comm'n, 600 F. Supp. 114, 118 (D.D.C. 1984) (noting that agency is "better situated" than FOIA requester or the Court "to know what confidentiality is needed" to protect agency's deliberative process).

The EPA has asserted Exemption 5 with respect to sixteen categories of documents containing information protected by the deliberative process privilege. See Vaughn Index, Categories 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 16, and 18. These categories generally fall into the following groups: (1) draft materials, including multiple drafts of technical materials developed to support the EPA's Proposed Plan, which are subject to extensive review; (2) emails containing deliberative communications, between EPA staff, EPA partners, and EPA contractors; and (3) other deliberative documents, such as hard-copy notes of meetings and comments from partner agencies. As more fully explained in the Mugdan Declaration and the Vaughn Index, these documents contain both pre-decisional and deliberative information. Accordingly, the EPA properly asserted Exemption 5 based on the deliberative process privilege.

A. Draft materials

"[D]raft documents, by their very nature, are typically predecisional and deliberative." Techserve All. v. Napolitano, 803 F. Supp. 2d 16, 27 (D.D.C. 2011) (quotation omitted). This is because drafts are "recommendatory in nature" and "reflect[] the give-and-take of the

consultative process." Coastal States Gas Corp., 617 F.2d at 866. Drafts are also pre-decisional if they "reflect the personal opinions of the writer rather than the policy of the agency." Id. Accordingly, courts routinely uphold the application of the deliberative process privilege to draft documents. See, e.g., Abdelfattah, 488 F.3d at 183; Competitive Enter. Inst. v. Office of Sci. & Tech. Policy, No. 14-CV-01806 (APM), _ F. Supp. 3d _, 2016 WL 544463, at *6 (D.D.C. Feb. 10, 2016) (citing cases).

Here, the EPA withheld draft documents in many of the sixteen categories, including (1) draft technical documents prepared by EPA Region 2 or the National Remedy Review Board for internal review and comment (Category 1); (2) drafts of the NRRB's Memorandum co-authored with the Contaminated Sediments Technical Advisory Group ("CSTAG"), and Region 2's Response to the NRRB/CSTAG Memorandum (Categories 1 and 2); (3) drafts of the Proposed Plan and FFS for the Lower 8.3 Miles (Categories 3, 4, and 5); (4) drafts of documents addressing technical analyses of fish and crab consumption rates (Category 6); (5) draft appendices, analyses, portions of, and other technical documents relating to, the Conceptual Site Model ("CSM") and Empirical Mass Balance Model ("EMBM"), which were developed as part of the Lower 8.3 Miles FFS (Categories 7, 8, and 9); (6) draft tables, figures, and other technical documentation generated as part of the development of the CSM and EMBM for the Lower Passaic River and Proposed Plan (Categories 10 and 11); and (7) draft tables, figures, appendices, and other technical documentation prepared for internal review by EPA Region 2 attorneys and EPA Headquarters staff in the Office of Solid Waste and Emergency Management (Categories 12 and 13).

The EPA properly withheld these draft materials because they were pre-decisional and deliberative. During the development of the Lower 8.3 Miles RI/FFS and the Proposed Plan, the

EPA exchanged drafts of technical materials and other documents with Partner Agencies, contractors, Region 2 technical staff and attorneys, EPA Headquarters technical staff and attorneys, and two EPA-internal advisory groups, the NRRB and the CSTAG. See Mugdan Decl. ¶¶ 33-54. These materials were circulated in order to obtain input and comment prior to the finalization of documents that were ultimately made public, including the NRBB/CSTAG Memorandum, the EPA's Response to the NRBB/CSTAG Memorandum, the Lower 8.3 Miles RI/FFS, the Proposed Plan, and the Record of Decision. See, e.g., id. ¶¶ 49-50. The drafts are pre-decisional because they both pre-dated, and aided in the development of, the final documents, which are publicly available and were part of the administrative record. Moreover, the drafts are deliberative because they contain edits and comments regarding their contents and because they reflect the thoughts of EPA staff, and partners (i.e., contractors and employees of partner agencies). Disclosure of these drafts would have a chilling effect on the EPA's ability to obtain candid feedback from employees and partners, receive highly technical advice and support, and engage in frank, internal discussions about proposed agency actions in development. It would also undermine the development of agency action that relies upon the thoughts and opinions of employees and partners as they review documents. Finally, release of this information could cause public confusion by disclosing reasons or rationales for agency actions that were not in fact the final reason for the actions.

For all of these reasons, as well as the reasons more fully set forth in the Mugdan Declaration and the Vaughn Index, the EPA has properly asserted Exemption 5 over draft documents. See, e.g., Odland v. Fed. Energy Regulatory Comm'n, 34 F. Supp. 3d 3, 19 (D.D.C. 2014 (drafts of environmental assessment and agency order protected by deliberative process

privilege under Exemption 5); Elec. Privacy Info. Ctr. v. U.S. Dep't of Homeland Sec., 928 F. Supp. 2d 139, 153 (D.D.C. 2013) (draft memoranda and technical documents).

B. Emails containing deliberative communications

The EPA has asserted Exemption 5 to protect emails containing deliberative communications relating to a number of matters. These matters are more fully described in the Vaughn Index, but include discussions of the following: (1) the draft documents discussed above; (2) Region 2's basis for and selection of the preferred alternative that would be included in the Proposed Plan and the Lower 8.3 Miles Focused Feasibility Study (Categories 1-5, 18); (3) calculation of fish and crab consumption rates for the Lower Passaic River based on NJDEP angler surveys (Category 6); (4) proposed changes to the CSM and the effects on the Proposed Plan (Category 7); (5) development of the CSM, the EMBM, and the Proposed Plan (Categories 8-15); and (6) the process for reviewing and finalizing the CSM, EMBM, and Proposed Plan with contractors (Category 11).

The EPA properly withheld these communications because they were pre-decisional and deliberative. As noted above and in the supporting declaration and Vaughn Index, the EPA has engaged in extensive internal deliberations regarding the Lower 8.3 Miles RI/FFS, the CSM and EMBM, and the Proposed Plan, actively soliciting advice and input from employees, attorneys, contractors, and partner agencies as these documents and the underlying technical materials were developed. The withheld communications qualify as pre-decisional because they were prepared for the purpose of assisting EPA decision-making before the final documents were issued. They include analysis, opinions, and recommendations from both attorneys and non-attorneys related to the development of these final documents and underlying data. The communications qualify as deliberative because they contain the candid views of individual employees and partners on

the matters in development, reflected in the edits and comments to draft documents and in the back-and-forth discussions of these issues. The deliberative communications do not represent an official agency decision or policy but instead reflect comments, opinions, and views of options in development and documentation prepared to support the EPA's proposed actions. Release of these communications would impair the EPA's ability to have frank discussions among partners, contractors and staff (including frank discussions with agency attorneys and internal review bodies like the NRBB) about proposed agency actions and documents in development. It would also impair the EPA's ability to receive highly technical advice and support. Finally, disclosure of these communications could create public confusion by revealing reasons or rationales for agency actions that were not in fact the final reason for the actions.

For all of these reasons, as well as the reasons more fully set forth in the Mugdan Declaration and the Vaughn Index, the EPA has properly asserted Exemption 5 over deliberative communications. See, e.g., Envtl. Integrity Project v. Small Bus. Admin., 125 F. Supp. 3d 173, 177 (D.D.C. 2015) (upholding asserting of deliberative process privilege over deliberative communications containing comments, requests for clarification, draft calculations, analysis, and suggestions for improving the draft regulations); Shurtleff v. U.S. Envtl. Prot. Agency, 991 F. Supp. 2d 1, 13 (D.D.C. 2013) (email deliberations and draft comments to reports); Am. Petroleum Inst. v. U.S. E.P.A., 846 F. Supp. 83, 89 (D.D.C. 1994) (documents containing recommendations and opinions on policy or legal matters implicated by study).

C. Other deliberative documents

The EPA has also withheld other internal documents containing deliberative communications, including notes of meetings and written comments on draft documents

(Category 15). These documents qualify as deliberative because they contain the thoughts and opinions of EPA staff, which were noted as part of the overall process of evaluating technical models, reviewing draft documents, and providing opinions and thoughts on options in development. The documents qualify as pre-decisional because they precede issuance of the final documents, including the Proposed Plan, and were created to aid in the development of those final documents. Further, they do not represent an official agency decision or policy. Release of these materials would have a chilling effect on staff members' ability to take candid and thoughtful notes during meetings and on draft documents, undermine the development of agency action that relies upon the thoughts and opinions of staff members, and create public confusion by disclosing reasons or rationales for agency actions that were not in fact the final reason for the action.

For all of these reasons, as well as the reasons more fully set forth in the Mugdan Declaration and the Vaughn Index, the EPA has properly asserted Exemption 5 over these documents.

ii. Attorney-Client Privilege

The attorney-client privilege "protects communications between attorneys and clients." In re Teleglobe Comm'ns Corp., 493 F.3d 345, 359 (3d Cir. 2007). The privilege applies to any "(1) communications (2) between privileged persons (3) made in confidence (4) for the purpose of obtaining or providing legal counsel." See id. "'Privileged persons' include the client, the attorney(s), and any of their agents that help facilitate attorney-client communications or the legal representation." Id. The privilege does not merely protect facts divulged by a client to the attorney; it also "encompasses any opinions given by an attorney to his client based on, and thus reflecting, those facts as well as communications between attorneys that reflect client-supplied

information." Elec. Privacy Info. Ctr. v. Dep't of Homeland Sec., 384 F. Supp. 2d 100, 114 (D.D.C. 2005). The purpose of the attorney-client privilege is "'to assure that a client's confidences to his or her attorney will be protected, and therefore encourage clients to be as open and honest as possible with attorneys.'" Judicial Watch, Inc. v. U.S. Dep't of Homeland Sec., 736 F. Supp. 2d 202, 209 (D.D.C. 2010) (quoting Coastal States Gas Corp., 617 F.2d at 862). Thus, unlike the work-product doctrine (discussed below), the attorney client privilege applies outside the context of litigation. See Elec. Privacy Info. Ctr., 384 F. Supp. 2d at 114.

A government agency, like a private party, "needs . . . assurance of confidentiality so it will not be deterred from full and frank communications with its counselors." In re Lindsey, 148 F.3d 1100, 1105 (D.C. Cir. 1998). Accordingly, "[u]nless applicable law provides otherwise, the Government may invoke the attorney-client privilege . . . to protect confidential communications between Government officials and Government attorneys." United States v. Jicarilla Apache Nation, 564 U.S. 162, 170 (2011). Id. at 70. Within the agency context, the attorney-client privilege shields "counseling[] intended to assist the agency in protecting its interests," as well as "legal advice and recommendations regarding agency action." Am. Immigration Council v. Dep't of Homeland Sec., 21 F. Supp. 3d 60, 79, 80 (D.D.C. 2014) (quotation marks and citation omitted). Likewise, the privilege "applies to confidential communications made to an attorney by both high-level agency personnel and lower-echelon employees." Judicial Watch v. Dep't of the Army, 466 F. Supp. 2d 112, 121 (D.D.C. 2006); see also Judicial Watch, Inc. v. U.S. Dep't of Treasury, 802 F. Supp. 2d 185, 203-04 (D.D.C. 2011).

The EPA asserted the attorney-client privilege over documents in thirteen categories. These documents are more fully described in the Vaughn Index, but include the following: (1) documents incorporating advice from EPA attorneys to program staff and managers concerning

the interpretation of CERCLA and its implementing regulations and guidance (Category 1); (2) emails between EPA attorneys and non-attorney staff regarding legal advice and statutory and regulatory interpretations/explanations, including plans for future EPA communications with CPG attorneys (Category 2); (3) communications containing attorney views on potential legal and litigation risks presented by the Proposed Plan (Category 3); (4) emails and drafts of technical documents seeking comments and advice from EPA attorneys (Categories 4, 5, and 6); (5) advice and discussions of EPA attorneys on a proposed agency action, prepared in the course of legal review of draft documents (Category 7); (6) advice of EPA attorneys to EPA staff and employees of Partner Agencies regarding the legal impact of various decisions and issues (Category 8); (8) incorporation of comments made by EPA legal staff following legal review, regarding the legal impact of various proposals and issues (Categories 9, 10, 11, 13, and 14); and (9) attorney advisory comments and questions on technical material (Categories 9, 10, 11, 13, and 14).

. The documents withheld under the attorney-client privilege contained confidential communications exchanged among EPA staff and legal counsel, as well as documents reflecting legal advice. EPA staff work very closely with EPA attorneys as they develop the documents that will form the basis for remedy selection under CERCLA. See Mugdan Decl. ¶ 142. EPA attorneys provide legal advice to program staff and managers concerning the interpretation of CERCLA and its implementing regulations and guidance. See id. They also advise EPA staff on recent changes to the law and the preparation of internal deliberative materials, such as draft documents and communications regarding those draft documents. See id. EPA attorneys also frequently review and comment on draft documents to ensure that all appropriate legal issues have been considered in the staff's analyses. See id. All of these analyses require the selection

and assessment of specific facts and data and are based on the mental impressions of EPA attorneys and EPA staff working at these attorneys' direction. See id. These attorneys direct program staff to consider various factors to assist in refining their analysis, given these attorneys' understanding of CERCLA, the National Contingency Plan (CERCLA's implementing regulations), and current case law. See id. Disclosure of these communications would deprive EPA staff, and the agency in general, of the benefit of confidential advice from EPA attorneys when developing a Proposed Plan, including guidance on the legal and regulatory adequacy of proposed remedies, as well as the development of a Feasibility Study and related agency guidance. Disclosure would also prevent EPA attorneys from advising non-legal EPA staff and contractors on technical work that is relevant to the EPA's legal enforcement activities under CERCLA.

For all of these reasons, as well as the reasons more fully set forth in the Mugdan Declaration and the Vaughn Index, the EPA has properly asserted Exemption 5 over attorney-client privileged documents. See Odland, 34 F. Supp. 3d at 19 (emails containing legal advice from agency attorneys and facts divulged by staff seeking advice protected properly withheld under attorney-client privilege); Rollins v. U.S. Dep't of State, 70 F. Supp. 3d 546, 552 (D.D.C. 2014) (emails providing legal advice from agency attorneys about agency's authority).

iii. Attorney Work Product Privilege

The attorney work-product privilege protects "the confidentiality of papers prepared by or on behalf of attorneys in anticipation of litigation." Qatanani, 2015 WL 1472227, at *10 (quoting Westinghouse Elec. Corp. v. Republic of Philippines, 951 F.2d 1414, 1428 (3d Cir. 1991)); Judicial Watch, Inc. v. Dep't of Justice, 432 F.3d 366, 369 (D.C. Cir. 2005) (doctrine shields materials "prepared in anticipation of litigation or for trial by or for another party or by or

for that other party's representative (including the other party's attorney, consultant, surety, indemnitor, insurer, or agent") (citation omitted). The purpose of the work product doctrine is to "shelter[] the mental processes of the attorney, providing a privileged area within which he can analyze and prepare his client's case." In re Grand Jury (Impounded), 138 F.3d 978, 981 (3d Cir. 1998) (quotation marks and citation omitted). "The privilege thus promotes the adversarial system by protecting the confidential nature of materials prepared by attorneys in anticipation of litigation and enables attorneys to prepare cases without fear that their work product will be used against their clients." Id. (quotation marks, brackets, and citation omitted).

The work product doctrine "should be interpreted broadly," Judicial Watch, Inc., 432 F.3d at 369, and "encompass[es] documents prepared for litigation that is 'foreseeable,' if not necessarily imminent." Am. Immigration Council, 21 F. Supp. 3d at 78; see also Media Research Ctr. v. DOJ, 818 F. Supp. 2d 131, 141 (D.D.C. 2011) (concluding that "when government attorneys act as 'legal advisors' to an agency considering litigation that may arise from challenge to a government program, a specific claim is not required to justify the assertion of [the attorney work-product] privilege"). Courts have recognized that the work product privilege protects all parts of a document prepared in anticipation of litigation, not just the portions containing opinions and legal theories. See Tax Analysts v. I.R.S., 117 F.3d 607, 620 (D.C. Cir. 1997), Berger v. I.R.S., 487 F. Supp. 2d 482, 500 (D.N.J. 2007) (citing cases), aff'd, 288 F. App'x 829 (3d Cir. 2008). Thus, agencies do not have an obligation to segregate and release factual material when withholding information under Exemption 5 based on the attorney work product privilege. See Judicial Watch, Inc., 432 F.3d at 366; Qatanani, 2015 WL 1472227, at *10.

The EPA asserted the attorney work product doctrine over documents in thirteen categories. These documents are more fully described in the Vaughn Index, but include many of the same emails, drafts, and other records withheld under the attorney client privilege (Categories 1, 2, 4, 5, 6, 7, 8, 9, 10, 11, 13, and 14), as well as handwritten notes from EPA attorneys containing the attorneys' opinions, evaluations, and next steps for follow up from those meeting (Category 16). Documents withheld under the attorney work product doctrine were created by EPA attorneys or at the direction of EPA attorneys in reasonable anticipation of litigation. In particular, given the significant costs associated with the anticipated clean-up of the Lower Passaic River, EPA has anticipated that some or all of the responsible parties would seek to challenge the remedy in federal court after the EPA issued its Record of Decision for the Lower 8.3 Miles. See Mugdan Decl. ¶ 143. In fact, NJDEP commenced litigation with responsible parties in 2005 related to the contamination of the Lower Passaic River and Newark Bay. See id. Thus, EPA has carefully prepared its reports and record with an eye toward potential litigation, under the direction and supervision of EPA attorneys. See id. For instance, EPA attorneys have been deeply involved in commenting on and recommending changes to EPA staff's technical analyses, to ensure that the materials would be legally sufficient to withstand any challenge. Many of the withheld materials may be used to support the EPA's enforcement against responsible parties, including the decision of whether to issue a notice letter to a party advising it of its legal responsibility for the site, and the decision to issue an order to one or more parties and/or to prepare a referral to the Department of Justice to file a complaint. Release of the confidential information contained in such documents would allow external scrutiny of EPA's sensitive litigation preparations and deprive EPA attorneys of the ability to keep their thoughts and mental impressions from being discovered by an opponent in litigation.

For all of these reasons, as well as the reasons more fully set forth in the Mugdan Declaration and the Vaughn Index, the EPA has properly asserted Exemption 5 over these documents protected by the attorney work product doctrine. See, e.g., Shurtleff, 991 F. Supp. 2d at 18 (upholding EPA's invocation of work product doctrine; attorney's edits to agency response was "the type of document that clearly anticipates legal challenges to the Agency's finding and seeks to pre-emptively defend against them by crafting the strongest possible counter arguments").

2. The EPA Properly Withheld Information Under Exemption 6

In responding to CPG's FOIA requests, the EPA relied upon Exemption 6 to redact personally-identifying information of EPA employees, other federal employees, and members of the public, as well as emails containing medical information and other personal details. See Mugdan Decl. ¶¶ 146-47. The agency's invocation of Exemption 6 should be upheld in all respects.

FOIA Exemption 6 allows federal agencies to withhold "personnel and medical files and similar files the disclosure of which would constitute a clearly unwarranted invasion of personal privacy." 5 U.S.C. § 552(b)(6). As courts have recognized, the purpose of Exemption 6 is "to protect individuals from the injury and embarrassment that can result from the unnecessary disclosure of personal information." U.S. Dep't of State v. Wash. Post Co., 456 U.S. 595, 599 (1982). To determine whether information falls within this exception, a court must weigh "the individual's right of privacy against the basic policy of opening agency action to the light of public scrutiny." U.S. Dep't of State v. Ray, 502 U.S. 164, 175 (1991) (citation and quotation marks omitted). Courts interpreting Exemption 6 have construed the provision broadly, holding that its protections extend to "all records that can be identified as applying to [a particular]

individual" – not merely "those files that contain intimate details or highly personal information." Berger, 288 F. App'x at 832.

Courts have taken a similarly expansive view of the interests protected by Exemption 6, recognizing that individuals have a substantial interest in keeping their personal information protected from public disclosure. See, e.g., U.S. Dep't of Defense v. Federal Labor Relations Auth., 510 U.S. 487, 500-501 (1994); Sheet Metal Workers, 135 F.3d at 899-901. This interest extends to federal employees, see Smith v. Dep't of Labor, 798 F. Supp. 2d 274, 284-85 (D.D.C. 2011); people employed by federal contractors, see Sheet Metal Workers, 135 F.3d at 899-901; and individuals who are simply mentioned in federal records, see Cozen O'Connor v. U.S. Dep't of Treasury, 570 F. Supp. 2d 749, 782 (E.D. Pa. 2008). The fact that a FOIA requestor might be able to figure out the identity of an individual whose name has been redacted under Exemption 6 "does not diminish [the individual's] privacy interests in not having the documents disclosed." Taylor v. Dep't of Justice, 268 F. Supp. 2d 34, 38 (D.D.C. 2003) (citation omitted).

With respect to federal employees, "[c]ourts generally recognize the sensitivity of information contained in personnel-related files and have accorded protection to the personal details of a federal employee's service." Smith, 798 F. Supp. 2d at 284-85. Accordingly, courts have consistently approved the withholding of employee names and personally identifiable information like home addresses and telephone numbers. See Lewis v. U.S. EPA, 2006 WL 3227787, at *5-6 (E.D. Pa. Nov. 3, 2006) (citing cases).

In contrast to the expansive privacy interests protected by Exemption 6, the public interest implicated by the provision is much more limited. The Supreme Court has held that there is only one public interest that may be considered in this analysis – "the extent to which disclosure would serve the core purpose of the FOIA, which is contributing significantly to

public understanding of the operations or activities of the government." U.S. Dep't of Defense, 510 U.S. at 495 (internal quotation marks, citation, and brackets omitted). Other reasons for seeking the information – such as obtaining information that would aid a private lawsuit – simply do not qualify as a public interest that can prohibit withholding information under the exemption. See Horowitz v. Peace Corps, 428 F.3d 271, 278-79 (D.C. Cir. 2005); Lakin Law Firm, P.C. v. Fed. Trade Comm'n, 352 F.3d 1122, 1122-23 (7th Cir. 2003); Roberts v. U.S. Dep't of Health and Human Services, No. Civ. A. 88-2041, 1988 WL 94289, at *1 (E.D. Pa. Sept. 9, 1988). In weighing these competing principles, courts must remember that disclosure under FOIA is not limited to the specific requester who has a particular interest in the information. Because all members of the public have the same access to information under FOIA, information released to one requester will be available to all members of the public who request it, irrespective of their intentions. See Sheet Metal Workers, 135 F.3d at 905 (citing cases).

Applying these principles here, the documents and information withheld by the EPA pursuant to 5 U.S.C. § 552(b)(6) plainly fall within this exemption. The EPA invoked Exemption 6 to withhold home addresses, personal email addresses, home and cell phone numbers, and similar contact information for EPA employees, other federal employees, and members of the public. See Mugdan Decl. ¶ 146. The EPA also invoked the exemption to redact emails containing medical and other personal information, such as discussions of doctor's appointments, child care, vacations, and other uses of personal time or leave. See id. ¶ 147.

The information withheld by the EPA under Exemption 6 qualifies as "personnel . . . or similar files" within the meaning of the statute, because personal contact information and discussions of medical or personal issues can clearly "be identified as applying to [particular] individual[s]." Berger, 288 F. App'x at 832 (quoting U.S. Dep't of State, 456 U.S. at 600.

Further, release of this information would impact a very strong privacy interest. Home addresses, home cell phone numbers, personal email addresses, and other identifying data are precisely the type of information that is protected by Exemption 6. See, e.g., Sheet Metal Workers, 135 F.3d at 904-905; Lewis, 2006 WL 3227787, at *4. Likewise, details of an individual's medical or personal appointment certainly involve a privacy interest, as do codes for participating in conference calls that employees believe will be restricted only to the participants. See, e.g., PacifiCorp v. U.S. Environmental Protection Agency, No. 13-cv-02187-RM-CBS, 2014 WL 87509, at *5 (D. Colo. Jan. 8, 2014) (conference call codes); Judicial Watch, Inc. v. U.S. Dep't of Commerce, 337 F. Supp. 2d 146, 177 (D.D.C. 2004) (personal appointments). In short, each of the types of information withheld under § 552(b)(6) implicates a substantial privacy interest.

By contrast, disclosure of the information withheld under Exemption 6 would not serve the only public interest relevant for purposes of Exemption 6: gaining an understanding of agency operations. See U.S. Dep't of Defense, 510 U.S. at 495. The personal contact information of federal employees, contractors, and members of the public does not shed any light on how the EPA conducts its enforcement practices or otherwise provide an understanding of the agency's operations. Nor do email discussions of medical appointments or similar personal matters.

Although there is no public interest in releasing the redacted information, disclosure would pose substantial risks to the affected individuals. Public release of an individual's address, email, telephone number, or other contact information presents a risk of unwanted contact and identity theft. Further, release of information relating to medical appointments and other personal matters would expose very private details to the public, which may cause

embarrassment to the individuals whose information has been exposed. Finally, release of the conference call codes would violate the privacy rights of EPA employees, who have a legitimate expectation that their code will not be released to the public and that members of the public will not listen to their conference calls.

In the end, the balancing contest is not a close one. Disclosure of the information withheld under Exemption 6 would violate the expectations and privacy interests of EPA employees and other individuals. Disclosure would not, however, do anything to serve the only public interest that matters for Exemption 6: improving public understanding of agency operations. Given all of these circumstances, the EPA properly concluded that disclosure of the redacted information would constitute a clearly unwarranted invasion of personal privacy. See Berger, 288 F. App'x at 832 (time records of IRS employee properly withheld under Exemption 6 because disclosure served no general public interest, "only . . . appellants' narrow interest in knowing how she investigated their particular case"); PacifiCorp, 2014 WL 87509, at *5; Cozen O'Connor, 570 F. Supp. 2d at 782 (names and identifying information of "persons incidentally mentioned" in agency records, including employees, properly withheld under Exemption 6); Lewis, 2006 WL 3227787, at *4 (addresses, telephone numbers, and other information about employees properly withheld under Exemption 6). The Court should therefore uphold the EPA's determinations and dismiss the complaint.

3. The EPA Properly Withheld Documents and Information Under Exemption 7(A)

In responding to CPG's FOIA requests, the EPA concluded that a number of documents withheld under Exemption 5 also qualified as law enforcement records that must be withheld in full under Exemption 7(A) because their disclosure "could reasonably be expected to interfere

with enforcement proceedings." 5 U.S.C. § 552(b)(7)(A). See Vaughn Index, Categories 8, 9, 10, 11, 12, 15, and 18. The Court should also uphold this determination.

Exemption 7 protects from disclosure "records or information compiled for law enforcement purposes" where disclosure would result in one of six enumerated harms. See 5 U.S.C. § 552(b)(7)(A)-(F). To qualify for withholding under any subsection of Exemption 7, records must first satisfy a threshold requirement: that they are "compiled for law enforcement purposes." 5 U.S.C. § 552(b)(7). An agency seeking to apply Exemption 7 "does not have to identify a particular individual or incident as the object of an investigation into a potential violation of law or security risk." Abdelfattah, 488 F.3d at 185. Rather, the agency must only show "that the relationship between its authority to enforce a statute or regulation and the activity giving rise to the requested documents is based upon information sufficient to support at least a colorable claim of the relationship's rationality." Id. at 186. "'[L]aw enforcement purposes' under Exemption 7 includes both civil and criminal matters within its scope. . . . FOIA makes no distinction between agencies whose principal function is criminal law enforcement and agencies with both law enforcement and administrative functions." Tax Analysts v. IRS, 294 F.3d 71, 77 (D.C. Cir. 2002); see also Kleinert v. Bureau of Land Mgmt., 132 F. Supp. 3d 79, 91 (D.D.C. 2015) (noting that "files relating to civil or administrative enforcement proceedings" can qualify for Exemption 7 protection).

Here, the records withheld by the EPA were compiled pursuant to the EPA's statutory authority under CERCLA, as part of the agency's efforts to enforce that statute with respect to the 17 Miles and the Lower 8.3 Miles. See Mugdan Decl. ¶ 144. Thus, these records were compiled "for law enforcement purposes." See Ameren Missouri v. U.S. E.P.A., 897 F. Supp. 2d 802, 813 (E.D. Mo. 2012) (records compiled by EPA as part of its "permitting, enforcement,

and compliance activities under the Clean Air Act," were compiled for law enforcement purposes under Exemption 7); Envtl. Prot. Servs., Inc. v. U.S. E.P.A., 364 F. Supp. 2d 575, 588 (N.D.W. Va. 2005) (records compiled by EPA to enforce Toxic Substances Control Act were compiled for law enforcement purposes under Exemption 7); Finkel v. U.S. Dep't of Labor, No. 05-5525 (MLC), 2007 WL 1963163, at *10 (D.N.J. June 29, 2007) (records compiled by OSHA acting pursuant to its statutory authority were compiled for law enforcement purposes under Exemption 7). Accordingly, the EPA properly concluded that the records meet the Exemption 7 threshold.

Once an agency satisfies this threshold, it must then show that the records at issue qualify for protection under one of six subsections. Exemption 7(A) – the subsection relevant to this case – exempts from disclosure documents that "could reasonably be expected to interfere with enforcement proceedings." 5 U.S.C. § 552(b)(7)(A). "The principal purpose of Exemption 7(A) is to prevent disclosures which might prematurely reveal the government's cases in court, its evidence and strategies, or the nature, scope, direction, and focus of its investigations, and thereby enable suspects to establish defenses or fraudulent alibis or to destroy or alter evidence." Maydak v. U.S. Dep't of Justice, 218 F.3d 760, 762 (D.C. Cir. 2000) (citations omitted). Congress enacted Exemption 7(A) because it "recognized that law enforcement agencies had legitimate needs to keep certain records confidential, lest the agencies be hindered in their investigations or placed at a disadvantage when it came time to present their cases" in court. NLRB v. Robbins Tire & Rubber Corp., 437 U.S. 214, 224 (1978). The exemption must therefore be construed pragmatically, so as to ensure that the statutory protection of law enforcement records is given "meaningful reach and application." John Doe Agency v. John Doe Corp., 493 U.S. 146, 152 (1989).

To qualify for Exemption 7(A), the agency must show that "(1) a law enforcement proceeding is pending or prospective and (2) release of the information could reasonably be expected to cause some articulable harm." Manna, 51 F.3d at 1164. Exemption 7(A) broadly applies to pending or prospective proceedings, including ongoing criminal, civil, and administrative investigations. Id. at 1165. Similarly, the phrase "articulable harm" covers a wide array of interference, from the possibility of witness intimidation and evidence tampering, Am. Civil Liberties Union of New Jersey v. Dep't of Justice, No. 11-2553 (ES), 2012 WL 4660515, at *8 (D.N.J. Oct. 2, 2012), aff'd, 733 F.3d 526 (3d Cir. 2013), to giving a requester "advance access to the government's case," or allowing a "suspected violator" to "construct defenses which would permit violations to go unremedied." Robbins Tire & Rubber Company, 437 U.S. at 236-37, 240-241; see also Barney v. I.R.S., 618 F.2d 1268, 1273 (8th Cir. 1980); Cotten, Day & Doyle v. Dep't of Energy, No. 80-2707, 1981 WL 1279, at *3 (D.D.C. July 16, 1981). An agency may consider the requester's identity when determining whether the release of the information could reasonably be expected to interfere with enforcement proceedings. See Manna, 51 F.3d at 1164-1165.

In this case, the EPA has determined that disclosing certain documents responsive to CPG's requests could reasonably be expected to harm prospective enforcement proceedings relating to the Lower Passaic River, including potential litigation that the EPA may need to take to bring about the cleanup of the 17 Miles and/or the Lower 8.3 Miles. See Mugdan Decl. ¶ 144. Civil and administrative proceedings under environmental statutes qualify as "enforcement proceedings" under Exemption 7(A). See Ameren Missouri, 897 F. Supp. 2d at 810-11 (E.D. Mo. 2012) ("Pending administrative and civil actions under the CAA for penalties and injunctive relief such as those at issue here are deemed "enforcement proceedings" within the ambit of

Exemption 7(A)"); Envtl. Prot. Servs., 364 F. Supp. 2d at 588 (EPA enforcement action qualified as enforcement proceeding under Exemption 7(A)); Gen. Elec. Co., 18 F. Supp. 2d at 143 (enforcement proceedings under CERCLA qualified as "enforcement proceedings" under Exemption 7(A)). Moreover, the fact that enforcement proceedings have not yet commenced does not alter this conclusion; given the long history of litigation involving the Lower Passaic River the EPA has properly concluded that enforcement proceedings are reasonably anticipated. See Sussman v. U.S. Marshals Serv., 494 F.3d 1106, 1114 (D.C. Cir. 2007) (clarifying that "[t]he enforcement proceedings need not be currently ongoing; it suffices for them to be 'reasonably anticipated'"); Goodrich Corp. v. U.S. E.P.A., 593 F. Supp. 2d 184, 193 (D.D.C. 2009) (likelihood of CERCLA enforcement proceedings was "sufficiently great" to meet Exemption 7(A) requirements); Gen. Elec. Co., 18 F. Supp. 2d at 144 (Exemption 7 properly applied where EPA had "reasonable expectation that [CERCLA] enforcement actions . . . will ultimately ensue").

In addition, the EPA has provided a detailed explanation of the harms that would result from disclosure of the documents in question. The EPA has explained that release of these documents would hinder the government's ability to control or shape enforcement action should such an action become necessary to bring about the cleanup selected for the Lower 8.3 Miles or and/or 17 Miles of the Lower Passaic River, and would prematurely reveal the government's evidence or strategy in an enforcement case. See Mugdan Decl. ¶ 145. These harms are especially significant given the identity of the party requesting these documents: a group that includes some of the parties that EPA has identified as potentially responsible for the Lower Passaic River part of the Diamond Alkali site. See id. In particular, the EPA has identified three specific ways in which release of the information could interfere with prospective enforcement

actions: (1) it would allow CPG, other potentially responsible parties ("PRPs"), and/or other members of the public to pry into the agency's thoughts and mental impressions about the enforcement case; (2) it would give these parties insight into the facts EPA thought were significant (or insignificant) and the judgments EPA staff applied to reach their conclusions, allowing CPG (and potentially other PRPs) to gain valuable internal and privileged information for use in their defense should EPA pursue an enforcement action; and (3) it would give CPG and other PRPs the ability to peer into EPA's assessment of the strengths and weaknesses of its preliminary determinations with respect to the remedy selection process, and thus its internal assessment of its litigation risk, knowledge that could allow CPG or other PRPs to attempt to evade or interfere with EPA's law enforcement function by providing undue insight into non-public information about how the agency's staff and attorneys interpret and enforce the law. See id. In sum, the premature release of this information through FOIA would provide CPG and other interested parties with undue insight into EPA's investigation of the Lower 8.3 Miles and the development of the enforcement case, which in turn could enable CPG and other PRPs to devise litigation and/or enforcement avoidance strategies to counter EPA's enforcement effort and impair EPA's ability to ultimately present its case. See id.

Given the harms articulated above, the EPA properly asserted Exemption 7(A) over these documents. See Robbins Tire & Rubber Company, 437 U.S. at 236-37, 240-241 (recognizing that giving requester "advance access to the government's case," or allowing a "suspected violator" to "construct defenses which would permit violations to go unremedied" as harms under Exemption 7(A)); Barney, 618 F.2d at 1273 (holding that "prematurely revealing the Government's case" and disclosing the scope or direction of government investigation would interfere with enforcement proceedings); Envtl. Prot. Servs., 364 F. Supp. 2d at 588 (upholding

assertion of Exemption 7(A) where disclosure "would prematurely reveal the EPA's case against the plaintiff in the administrative proceeding that is currently pending"); Int'l Collision Specialists, Inc. v. I.R.S., No. 93-2500 (DRD), 1994 WL 395310, at *5 (D.N.J. Mar. 4, 1994) (Exemption 7(A) properly invoked over documents containing IRS agent's analysis and opinions concerning investigation because "[r]eleasing such information would likely suggest to plaintiff the direction of potential investigation to be followed"); Cotten, Day & Doyle, No. 80-2707, 1981 WL 1279, at *3 (D.D.C. July 16, 1981) ("Release of the disputed documents in this case would necessarily allow plaintiffs earlier and greater access to agency investigatory records than they would otherwise have, and, as discussed above, would interfere with such proceedings by prematurely revealing the government's case.").

C. The EPA Produced All Reasonably Segregable Information to CPG

The EPA released all reasonably segregable, non-exempt information that was responsive to CPG's FOIA requests. FOIA requires that, if a record contains information that is exempt from disclosure, any "reasonably segregable" information must be disclosed after deletion of the exempt information unless the non-exempt portions are "inextricably intertwined with exempt portions." 5 U.S.C. § 552(b); Mead Data Ctr. v. U.S. Dep't of Air Force, 566 F.2d 242, 260 (D.C. Cir. 1977); Cozen O'Connor, 570 F. Supp. 2d at 772; Kurdyukov v. U.S. Coast Guard, 578 F. Supp. 2d 114, 128 (D.D.C. 2008). However, this provision does not require disclosure of records in which the non-exempt information that remains is meaningless. See Nat'l Sec. Archive Fund, Inc. v. CIA, 402 F. Supp. 2d 211, 220-21 (D.D.C. 2005) (concluding that no reasonably segregable information exists because "the non-exempt information would produce only incomplete, fragmented, unintelligible sentences composed of isolated, meaningless words").

Consistent with this obligation, EPA Region 2 staff conducted a line-by-line review of responsive documents for segregability of non-exempt material, determining that where a record was withheld in full, no meaningful portion could reasonably be released; performing redactions where non-exempt material could be reasonably segregated; and releasing non-exempt portions of those records. See Mugdan Decl. ¶¶ 73, 91, 112, 136. In addition, once this suit was commenced, the EPA's Office of General Counsel re-reviewed the withheld documents for segregability and to ensure that all non-exempt information had been released. See id. ¶¶ 72, 90, 112. As a result of this review, on May 11, 2016, 102 documents that were previously withheld in full in response to CPG's FOIA requests were released in full and 91 documents were released with redactions. See id. ¶¶ 72, 90.

EPA has thus produced all non-exempt, "reasonably segregable portion[s]" of the responsive records. 5 U.S.C. § 552(b).

CONCLUSION

For all of the foregoing reasons, the Court should grant summary judgment to the EPA and dismiss the complaint in all respects.
