Dear Erik,

Thanks for taking the time today to discuss the status of the Tower Standard/Haskkell lake site (Site). I was able to follow up with Kristen Hanson today and inquire about the planned USGS work at the Site and learned that the Tribe has no objection to including EPA in a discussion with USGS about the planned work to take place next week. To the contrary, the Tribe is interested in facilitating a discussion among EPA, the Tribe and USGS tomorrow—when EPA representatives will be visiting the Tribe to discuss technical matters associated with the Site. It is my understanding that the Tribe also plans to invite Region 5 Tribal Program Manager, Anthony Greenwater, to participate in the proposed call, as he is one of the EPA representatives who will be meeting tomorrow with Tribal environmental program staff.

Please note that some of the information we discussed earlier today—about positions purportedly taken by the Tribe—is not accurate. Therefore, I suggest that we take the time to clarify our client's respective positions before any positions are asserted that may prove to be divisive and counterproductive.

Take care,

Richard
