Thank you—for now I am inclined to hold on to these until we get more specifics. I spoke w Jackie a moment ago and she seemed comfortable with the conversation for now. We will definitely be getting follow up from Jackie/Jerry though.

Subject: FW: Deer Park Fire

Here are the two SDS sheets for foam .

RMP

The RMP Amendments rule became effective September 21, 2018. However, most of the major provisions of the rule have compliance dates in 2021 or 2022. RMP facilities are not required to submit updated risk management plans reflecting changes associated with the Amendments until March 14, 2022. ITC Deer Park is an RMP-regulated facility, which last updated its RMP in March, 2018.

Fire Foam
Emergency responders are using foam to control the fire and prevent the fire from spreading to the remaining tanks within the contained area. We have checked on the type of foam being deployed and attached are the Chemical Data Sheets.
