
AIR MONITORING:
EPA conducted handheld air monitoring from March 23, 2019 (04:00 am) to March 23, 2019 (12:00 pm) at 17 locations. A result was reported above the detection limit at one location for total volatile organic compounds (VOCs) and at the same location for benzene. Benzene was detected above the short-term AMCVs for benzene (6.18 ppm). EPA will conduct additional air monitoring and deploy the Trace Atmospheric Gas Analyzer (TAGA) to determine if the short-term AMCV for benzene continues to be exceeded.

SURFACE WATER SAMPLES
EPA conducted surface water sampling on March 23, 2019. One sample was collected from Tucker Bayou (Location TB-1). The sample is being analyzed for VOCs, SVOCs, COD and Oil and Grease.
