Subject: Message Help Needed re: Legionella and chlorine residual

Hi Mark R.,

Darren Lytle suggested that I contact you in regards to developing talking points on the role of chlorine residual in combating *Legionella*. We'll need talking points for use at upcoming meetings in Flint, including the public event in Flint this Saturday. As such, we've been asked to have messaging available by tomorrow (so sorry about the short deadline).

Mark J/Jonathan - are there reference documents or summary statements on the chlorine residual study that could be use as a starting point for messaging? I was assigned as the point of contact for the R5-Water Division on *Legionella* only yesterday, and on a steep learning curve on where we are, what's available, and what's needed - so any help would be appreciated.

Thanks,
Kim

> Hi Jonathan and Kevin,

Kim Harris from R5 WD has been identified as our point of contact on Legionella. Who at ORD could best help Kim with message for the role of CL residual in combatting Legionella. Kim will need this by Friday.

(She may already be in communication with the right person; I'm just trying to make sure the right contact is made)
