Title: The call notes for Dec. 2016, are as follows:

Body:
The call notes for the Ozone Implementation Workgroup call held on Dec. 21, 2016, are as follows:

1. Update on 2015 Ozone NAAQS Implementation Rule and Recap of Webinar – Bob Lingard

- NPRM public webinar – held Wed 12/07; slides and recording available here; attendance peaked at 350 (log-in list attached).
- NPRM public hearing and comment period extension: we received separate requests for public hearing (from API) and comment period extension (AAPCA); public hearing in DC on Thu 1/12 (notice attached); comment period extended to 2/13/17.
- Ozone web page navigation: we're working on improved navigation from the ozone home page to ozone implementation regulatory actions (stay tuned).

2. Update on 2015 Ozone Designations – Denise Scott

- Making final changes to TSD template now
- Expect Regions and HQ staff will be briefing managers in January regarding state recommendations
- HQ is aware of the timing issues that remain but we are moving forward with CAA schedule- 120 day letters in early June and final designations in October.

3. Update on lawsuit regarding SIPS for 2008 ozone and FFS Notice – Lynn Dail

- The Federal Register Notice with the Findings of Failure to Submit (FFS) and the Findings of Failure to Act (FFA), for certain SIP requirements for the 2008 ozone NAAQS is scheduled to move up to Janet McCabe by 12/23/16.
- The Notice is scheduled for signature on January 10, 2017.

4. 2008 ozone Marginal areas-Status of those meeting the NAAQS – Lynn D. (See Spreadsheet.... Status of remaining Marginal 2008 ozone areas).

- The status of 2008 ozone marginal areas, who attained the ozone NAAQS was discussed. Here is a partial list of area that have finished with redesignation, or who's states are in the process of redesignation:
- Region 1 and 2: None
- Region 3: DC is preparing a request
- Region 4: NPR for Atlanta and N. Kentucky (Cincy area)
- Region 5: Columbus is final; Cleveland is being finalized; NPR for Indiana portion of Cincy; Region is waiting on a submittal from Ill. For the St. Louis area
- Region 6: Baton Rouge is final.
- Region 7: not on the call; Region 8 and 9: None. Region 10 has no areas.

5. RACM and RACT Issues in Region 8 – Chris Dresser

1. Colorado has asked R8 for clarification on the RACM requirement in the proposed 2015 ozone implementation rule. The language indicates that RACM should be applied to sources outside of the non-attainment area, within the state boundary. We are looking for clarification on how this should be implemented for a relatively small NAA within large western states.

2. A second request from Colorado asked for help defining RACT controls for brewery operations. Has RACT been done for these sources in other regions? Is there any guidance on what controls would satisfy RACT for these sources?
