Hi Kathy -

Based on a spatial export form our regulatory tracking database MiWaters, we found 143 site location points for permit applications and compliance sites we have handled along the Menominee River and nearby wetlands, downstream from the Aquila Back Forty site. Our records of these regulatory projects go back to the early 1980's.

Here are just a few examples of permit applications and complaints we have handled in this area. Please let me know if you need anything else on these projects.

Thanks, I know you are crunching on the permit.

Ann, This need not be a comprehensive list of all the permits. Thanks!

> I left you both a voice mail but thought I'd put this in an e-mail. Can you send me citations to 404 permits the state has issued for the Menominee River or its adjacent wetlands? They do not need to be permits EPA reviewed. I do need them to be 404 permits and preferably downstream of the Aquila Back 40 permit site, but I'll take ones upstream if that is all you have.
