Subject: Fwd: Request to use empty lots off of McCook Ave
Attachments: IMG_0387.JPG

Counsel:

Please see the email below from OSC Brad Benning. His question pertains to a staging area for certain activities related to the clean up of the properties with lead concentrations above 5000 ppm in the top six inches of soil. Currently, EPA is targeting a start date for those actions at the end of July.

Thank you for letting us know.

Annette

PS. This email gives me the opportunity to renew a request to the City/ECHA to appoint a person who is the City's point of contact for all field activities. EPA's field operations are going to become even more active. EPA needs someone on the ground from the City/ECHA who is able to interface on a regulate basis with EPA. It is not feasible for these issues to be routed through attorneys.

Please let us know your thoughts on this as soon as possible.

> Annette,
>
> Would like to ask the City if the vacant lots due east of our support zone off of McCook Ave are owned by the City and if we could use them for stockpiling clean fill material, parking equipment and vehicles. As the project expands we will have more personnel and equipment on site. The current area

will be used for the office trailers and car parking. There are three underground pipelines along the alley where we are at currently, and were advised not to drive over them with heavy equipment, which would impact our operations. We would restore the area when the project is completed.
