Agreed. Add to that the prospect of working with the City to excavate the sewer line and soils. We'll need to understand the agency's expectations and requirements as we put this program together.

Hi –
We will be asking that the system be re-evaluated for optimization. Also, we will ask that the on-site conditions be re-evaluated for source removal opportunities, for example, the soil beneath the old sewer line which was left in place. These actions have the goal of shortening the time that the GW recovery system will be operating.
It's probably time for a meeting to cover a variety of topics.
Let's talk next week to discuss a telecon or in-person meeting.
Carolyn

Carolyn - one of the reports quotes Joe Cisneros as saying that the agency will be asking Amphenol to upgrade the on-site treatment system. Something we should know about this?
