Issue 3 (WQ) con't:

Groundwater from reclaimed pit: Issue: potential impacts on GW flowing to river

Aq: heavily vetted by DEQ during 632 discussions
- DEQ water + mining people need to talk.

If this is an issue that DEQ/EPA feels is worth pursuing, - could be addressed via 404 permit condition. * DEQ + EPA will talk ASAP (+AQ??)

AQ: Frustrating - what is regulatory target?
This was already discussed in context of 632 permit
