RE: Federal EPA Multi-Sector General Permit (MSGP)

Dear Sirs,

The City is updating its database of industries that require compliance with the Federal EPA MSGP requirements under the National Pollution Discharge Elimination System. Our preliminary records indicate that your business would need to be covered under this permit. The MSGP requires that you prepare a Storm Water Pollution Prevention Program for your site and then file a Notice of Intent with the EPA. Complete details about this program can be found at:

http://cfpub.epa.gov/npdes/stormwater/msgp.cfm

Should you require assistance in compliance with this Federal requirement, there are local firms capable of assisting you in this process. We have attached a list of possible firms to this letter. Also, my stormwater engineer, Kathy Verhage, can assist you in answering questions about this process. Her number is 768-3654 and her email address is kverhage@cabq.gov.

We appreciate your cooperation in complying with this permit to ensure the stormwater runoff from the Albuquerque area does not pollute the Rio Grande.

Sincerely,

Roland Penttila

RE: Federal EPA Multi-Sector General Permit (MSGP)

Dear Sirs,

The City is updating its database of industries that require compliance with the Federal EPA MSGP requirements under the National Pollution Discharge Elimination System. Our preliminary records indicate that your business would need to be covered under this permit. The MSGP requires that you prepare a Storm Water Pollution Prevention Program for your site and then file a Notice of Intent with the EPA. Complete details about this program can be found at:

http://cfpub.epa.gov/npdes/stormwater/msgp.cfm

Should you require assistance in compliance with this Federal requirement, there are local firms capable of assisting you in this process. We have attached a list of possible firms to this letter. Also, my stormwater engineer, Kathy Verhage, can assist you in answering questions about this process. Her number is 768-3654 and her email address is kverhage@cabq.gov.

We appreciate your cooperation in complying with this permit to ensure the stormwater runoff from the Albuquerque area does not pollute the Rio Grande.

Sincerely,

Roland Penttila
