Yes, I assume Mike did something in the past and have asked Patrick to check the files and Mike's old email which he still has access to.

Is this the one that Mike Owens did the analysis for?

Subject: ND request for EPA position on common control for Coyote Station and Coyote Creek Mining Company

Raj,
We received the attached letter and enclosures today. North Dakota is requesting EPA's position on whether the Coyote Creek Mining Company (CCMC) and the Coyote Station coal fired power plant should be considered under "common control," siting the Meadowbrook letter. The state's historical source determination is that the two companies are separate sources. This issue has arisen in public comment on the state's fourth renewal of the Coyote Station title V permit.

We are in the process of researching Region 8's historical official position on this in case it needs to be addressed in our response and are just beginning our analysis. Please assign someone from your staff to work with us on this.

The state is requesting EPA's response by November 17, 2018 based on our 45-day title V review period.

Thanks,
Gail
