Subject: FW: review draft manuscript?
Attachments: ESTL_0726.docx; ESTL_SI_0726.docx; 363 Offenberg PFAS in Cape Fear .doc

Kevin,

Tim mentioned in an email this morning that you had comments on the manuscript attached above.

I'm trying to wrangle all of these reviews together so I can bring them to the lead author for her consideration.

I don't think I have anything from you yet so if you can please send me your review and I will be able to provide a consolidated request for these changes. I think Tim would like to do this by the end of the week so we can reach Bob K. before the Labor Day holiday. I'm not optimistic about this but I will try.

Thank you very much,

Andy

Subject: review draft manuscript?

John,

Would you be willing to review our draft manuscript entitled "Traditional and emerging perfluoroalkyl substances in the Cape Fear River Watershed, North Carolina: Occurrence and fate during conventional and advanced water treatment processes" by Mei Sun, Elisa Arevalo, Mark Strynar, Andrew Lindstrom, and Detlef Knappe?

Our coauthors are from the environmental engineering department at NCSU and this work is part of our long-time collaboration with them investigating local sources of PFAS and potential treatment technologies.

I have attached a copy of the draft manuscript and the supporting information along with the ORD363 from needed for your review. We appreciate your willingness to review this material prior to its submission.

If you have any questions please let us know.

Thank you very much,

Andy
