NOV 15 2012

RUBICON LLC GEISMAR LOUISIANA FACILITY
2012 EPA NO-MIGRATION PETITION REISSUANCE
MASTER TABLE OF CONTENTS

1.0 ADMINSTRATIVE INFORMATION 1-1
1.1 REGULATORY CLASSIFICATION 1-1
1.2 INJECTION SYSTEM 1-7
1.3 SITE DESCRIPTION 1-15
1.3.1 General Identification Data 1-15
1.3.2 Adjacent Surface Landowners 1-16
1.3.3 Nature and Status of Well Activity 1-17
1.4 WELL DATA – INJECTION WELL NO. 1 1-18
1.4.1 Well Location 1-18
1.4.2 Well Completion Data 1-18
1.5 WELL DATA - INJECTION WELL NO. 2 (PLUGGED AND ABANDONED JULY 2006) 1-20
1.5.1 Well Location 1-20
1.5.2 Well Completion Data 1-20
1.6 WELL DATA - INJECTION WELL NO. 3 1-21
1.6.1 Well Location 1-21
1.6.2 Well Completion Data 1-21
1.7 WELL DATA - INJECTION WELL NO. 4 1-23
1.7.1 Well Location 1-23
1.7.2 Well Completion Data 1-23
1.8 WELL DATA - NEW INJECTION WELL NO. 5 1-25
1.8.1 Well Location 1-25
1.8.2 Well Completion Data 1-25
1.9 WELL DATA - PROPOSED INJECTION WELL NO. 6 1-27
1.9.1 Well Location 1-27
1.9.2 Well Completion Data 1-29

1.11 IMPLEMENTATION AND COMPLIANCE 1-31
1.11.1 Process Description 1-31
1.11.2 Explanation of Specific Gravity Monitoring 1-32
1.11.3 Explanation of Volume Monitoring 1-33
1.11.4 Explanation of "D" Sand Volume Monitoring 1-33
1.11.5 Explanation of Waste Well No. 1 Monitoring 1-34
1.11.6 Annual Falloff Testing Requirements 1-34
1.12 QUALITY ASSURANCE/QUALITY CONTROL 1-35

2.0 SITE GEOLOGY 2-1
2.1 INTRODUCTION 2-1
2.2 REGIONAL GEOLOGY 2-2
2.2.1 Structure 2-3
2.2.1.1 Seismicity 2-4
2.2.1.2 Induced Seismicity 2-6
2.2.2 Stratigraphy 2-8
2.2.2.1 Miocene 2-8
2.2.2.2 Pliocene 2-9
2.2.2.3 Pleistocene and Holocene 2-9
2.3 LOCAL GEOLOGY 2-10
2.3.1 Structure 2-10
2.3.2 Stratigraphy of Injection and Confining Zones 2-12
2.3.3 Geochemistry 2-13
2.3.3.1 Petrographic Core Analyses 2-16
2.3.4 Hydrogeology 2-17
2.3.4.1 Freshwater Aquifers of the Baton Rouge Area 2-18
2.3.4.2 Baton Rouge Fault 2-19
3.3.4.3 Relationship of the Injection Interval to the Baton Rouge Freshwater Aquifers 2-21
2.3.5 Mineral Resources in the Geismar Area 2-23
2.4 SUMMARY 2-27

3.0 FLOW AND CONTAINMENT MODELING 3-1
3.1 SUMMARY 3-1
3.2 INTRODUCTION 3-4
3.3 DESCRIPTION OF THE MODELS 3-6
3.3.1 The DuPont Basic Plume Model 3-7
3.3.2 The DuPont Multilayer Pressure Model 3-8
3.3.3 The DuPont Vertical Permeation Model 3-9
3.3.4 The DuPont Molecular Diffusion Model 3-10
3.3.5 The DuPont 10,000-Year Waste Plume Model 3-11
3.4 MODEL INPUT DATA AND SOURCES 3-16
3.4.1 Location 3-16
3.4.2 Local and Regional Geology 3-16
3.4.3 Geologic Inputs to the Model 3-18
3.4.4 Layer Thickness 3-19
3.4.5 Transmissibility and Mobility 3-23
3.4.5.1 Sand Layer Transmissibility 3-23
3.4.5.2 Sand Layer Mobility 3-26
3.4.5.3 Aquiclude (Confining Shale) Layer Permeability 3-27
3.4.6 Porosity 3-29
3.4.6.1 Sand Layer Porosity 3-29
3.4.6.2 Aquiclude (Confining Shale) Layer Porosity 3-30
3.4.7 Original Formation Pressure 3-31
3.4.8 Layer Compressibility and Storativity 3-33
3.4.8.1 Sand Layer Compressibility 3-34
3.4.8.2 Aquiclude (Confining Shale) Layer Compressibility 3-38
3.4.9 Viscosity and Density 3-39
3.4.9.1 Formation Fluids 3-39
3.4.9.2 Waste Fluids 3-41
3.4.10 Concentration Reduction Factor 3-42
3.4.11 Free Water Diffusion Coefficients 3-43
3.4.12 Effective Diffusion Coefficients 3-45

3.4.13 Layer Dispersion Characteristics 3-46
3.4.13.1 Multiplying Factor 3-46
3.4.13.2 Field Scale Dispersivities in 10,000-Year Waste Plume Model 3-48
3.4.14 Operational Modeling Boundary Conditions 3-49
3.4.15 Waste Disposal History 3-52
3.4.15.1 Class I Injection Wells 3-52
3.4.15.2 Class II Saltwater Injection Wells 3-55
3.4.16 Formation Characteristics 3-56
3.4.16.1 Formation Dip Angle 3-56
3.4.16.2 Formation Salinities in the "B" Sand 3-59
3.5 MODELING STRATEGY 3-61
3.5.1 Operational Modeling Strategy 3-61
3.5.1.1 Multilayer Pressure Model 3-62
3.5.1.2 Operational Waste Plume Model 3-67
3.5.1.3 Vertical Permeation Model 3-68
3.5.2 10,000-Year Modeling Strategy - Waste Stream Density 3-69
3.5.2.1 10,000 Year Plume Model Computation Grid Area 3-71
3.6 OPERATIONAL PRESSURE MODEL CALIBRATION WITH HISTORICAL DATA 3-72
3.6.1 Formation Pressure Comparison 3-72
3.7 MODELING RESULTS 3-80
3.7.1 Near-Future Waste Distribution 3-80
3.7.1.1 Horizontal Extent 3-81
3.7.1.2 Vertical Extent 3-87
3.7.1.3 Pressure Distribution within the Area of Review 3-88
3.7.2 Post-Injection Waste Distribution 3-96
3.7.2.1 Pressure Recovery 3-96
3.7.2.2 Vertical Extent 3-96
3.7.2.3 Horizontal Extent 3-99
3.7.2.3.1 Long-term Plume Model Results 3-110
3.8 SENSITIVITY ANALYSIS 3-116
3.9 SUMMARY OF RESULTS 3-118

4.0 WELL CONSTRUCTION 4-1
4.1 INTRODUCTION 4-1
4.2 WASTE WELL NO. 1 (SERIAL NUMBER 970920) 4-2
Operational History 4-3
4.2.1 Mechanical Integrity Test 4-26
4.2.1.1 Annulus Pressure Test 4-26
4.2.1.2 Radioactive Tracer Survey 4-26
4.3 WASTE WELL NO. 2 (SERIAL NUMBER 970921) 4-29
Operational History 4-30
4.3.1 Plugging and Abandonment 4-35
4.4 WASTE WELL NO. 3 (SERIAL NUMBER 970922) 4-40
Operational History 4-41
4.4.1 Mechanical Integrity Testing 4-50
4.4.1.1 Annulus Pressure Test 4-51
4.4.1.2 Radioactive Tracer Surveys 4-51
4.5 WASTE WELL NO. 4 (SERIAL NUMBER 971889) 4-53
4.5.1 Mechanical Integrity Test 4-59
4.5.1.1 Annulus Pressure Test 4-60
4.5.1.2 Radioactive Tracer Survey 4-60
4.6 WASTE WELL NO. 5 (SERIAL NO. 973012) 4-62
Operational History 4-62
4.6.1 Mechanical Integrity Test 4-63
4.6.1.1 Annulus Pressure Test 4-65
4.6.1.2 Radioactive Tracer Survey 4-65
4.7 COMPATIBILITY DEMONSTRATION 4-68
4.7.1 Hydrogeologic Compatibility 4-68
4.7.2 Well Materials Compatibility 4-69

5.0 AREA OF REVIEW 5-1
5.1 SUMMARY 5-1
5.2 INTRODUCTION 5-3

5.3 DETERMINATION OF THE AREA OF REVIEW 5-5
5.4 ARTIFICIAL PENETRATIONS IN THE AREA OF REVIEW 5-10
5.4.1 Record Search 5-10
5.4.1.1 Record Search Protocol 5-10
5.4.2 Incomplete Records 5-13
5.4.3 Well Type 5-14
5.4.4 Rock Type 5-15
5.4.5 Drilling Methods and the Static Mud Column 5-15
5.4.6 Confining/Injection Zone Penetration 5-18
5.4.7 Evaluation of Wells 5-18
5.4.7.1 Evaluation of Wells for Non-endangerment 5-18
5.4.7.2 Evaluation of Wells for No Migration 5-19
5.5 NO-MIGRATION DEMONSTRATION - MOLECULAR DIFFUSION 5-21
