Hi David,
I've been hearing from folks in Texas that there is white foam coming out of garden houses. We need to make sure to protect the residents from PFAS contaminated water.

Mr. Mike Lykes,

I have been talking with some colleagues of mine about the ongoing cleanup and reports from the community via face to face interaction and from social media. While its hard to confirm anything at the moment I thought it was prudent to bring them to your attention.

I have attached some documents that explain what PFAS are and why they are so concerning. I have also included appropriate measures to be taken as recommended by our own specialist in this area.

We have learned that some residents are experiencing white from and/or residue from their garden hoses and mothers are scared to use the water for bathing, drinking and cooking. To my knowledge, the City of Deer Park is not testing for PFAS. Nor is the City of Pasadena but I will reach out to see if they are.

Please feel free to forward this message to the appropriate people as needed and as always I am available for comment. I've carbon copied my colleagues in case you have any questions.

They may be better able to assist you with specifics about the PFAS.

respectfully,

bp

Bryan Parras
