FYI- I hope I emailed everyone who was part of the previous meeting on this issue. I will be out of the office on Monday. Mark Allen will be acting tribal team leader and please invite him if you meet next Monday.

Thank you and have a good weekend.

Randy

Good afternoon Ms. Lundelius.

Could you please provide me with an update to the request for an air emissions applicability determination for exemption from Monarch Waste Technologies.

Thank you.

Thank you, Steve! I will follow up with whomever is assigned to collaborate with me, including Monarch. I will be out of the office Dec 22 to Jan 6. However, I will be checking my email during this period, and will follow up when I return to my office on Jan 9 if I have not heard something back by then.

Ximopanotli,
Diana

**Subject:** RE: Monarch Waste Technologies-Applicability Determination For Exemption Request-HMIWI Pyrolysis Unit-Nambe Pueblo [WARNING: SPF validation failed]

Hi Diana:

I am indeed the Environmental Manager for Nambe Pueblo. However, this Pyrolysis project is being developed by the economic development corporation of the Pueblo, which acts independently of the Pueblo administration. I have not been involved in this project, and have no information that will help answer your questions. That said, I am

interested in knowing more about it myself, but must rely on my supervisors regarding my role, if any, in the project.

Therefore, I am forwarding this email to Governor Perez so he is aware of the situation, and can take whatever action he decides is appropriate—including forwarding it to Mr. Yates.

Thank you for the email, and I hope that the corporation will cooperate with EPA on this review.

Steve

**Subject:** Monarch Waste Technologies-Applicability Determination For Exemption Request-HMIWI Pyrolysis Unit-Nambe Pueblo

Shema e' tewa, Steve,
I understand from our tribal coordinators Yulonda Davis and Randy Gee that you are the Environmental Manager for Nambe O-Ween-Ge.

I introduce myself to ask for your assistance on the following project - I received the attached request for an air emissions applicability determination for exemption from Monarch Waste Technologies. Monarch indicates that they plan to construct and operate a pyrolysis type medical waste incinerator at Nambe O-Ween-Ge. I tried to contact Herbert Yates at the Pueblo (who is cc'd in the letter) via email on November 17, but the email address was rejected and the message did not go through. I respectfully request to please forward this message to someone who can respond about this project.

I will conduct the technical review and prepare a response in accordance with EPA Region 6's established protocols for such determinations. I may have additional questions, and will send such requests for additional information needed to complete our review. However, first I wanted to introduce myself as the technical lead for this determination, and I need to verify several items:

1. Is this a tribal project? If so, is Monarch Waste Technologies authorized to act and communicate on behalf of the Pueblo for this project?
2. Will Monarch Waste Technologies directly operate the pyrolysis incinerator unit after it is put in service? If Monarch will not directly operate the unit, then who will?
3. Will the Pueblo own the equipment, or will it be owned by Monarch Waste Technologies? If there is/will be a lease/purchase or other agreement, please briefly describe.
4. Has an application for an air permit or other air emission authorization (e.g. exemption or variance) been submitted to US EPA Region 6 and/or the State of New Mexico (NMED)?

5. What is the name and the address for the specific facility where the unit will be located?

Thank you in advance for taking the time to provide this initial information. I look forward to completing this review and determination for Nambe O-Ween-Ge.

Kind regards,

Diana L Lundelius, CHMM
