BioErase is an All-Natural Broad-Spectrum Antimicrobial Product that has shown to deactivate viruses, bacteria, protozoans, fungi, and inactivate pathogens on contact.

Historical data and testing results show that BioErase deactivates hard to kill viruses and Coronaviruses similar to leading brands on the market today.

> *Before I started using BioErase, my fingernails were constantly splitting, and I had to cut them down to nothing. I spray cleanser so much. Now that I, almost exclusively, use BioErase, my nails are healthy again. It really bothered me that I was hurting my body with excessive chemicals. I feel much more comfortable now and no one at the clinic has been sick.*
