LEGEND

- Slurry Wall (Underground)
- Further groundwater investigation is ongoing (2013-2014) to delineate the 5 ppb TCE plume boundary. Upon completion the figure will be updated.
- Vapor Intrusion Study Area – estimated TCE in groundwater > 5 parts per billion (ppb) (updated based on 2013 groundwater results)
- Residential Indoor Air Sampling Area
- Classics homes built with vapor intrusion control system.
- Wescoat Village Residential Area (New homes built in 2006 with vapor intrusion control system.)
- TCE Groundwater Hot Spot Areas

Note:
1. Bold building outlines indicate non-residential buildings that are occupied or to be occupied inside the vapor intrusion study area.
2. * Storage Buildings - Not Suitable For Occupancy

0 500 1,000 Feet
