Chris:

Weekly phone calls would be great. Can you get those set up? It would be Lydia and me from our end (Dustin accepted a promotion to HQ to work on the South Puget Sound Dissolved Oxygen Study). Looking at our schedules, the best time over the next few weeks would be Tuesdays at 8:30. Thursdays at 1:30 would be second best. Otherwise, we'll need a variable time.

For things that fall under buckets (1) or (5) [i.e. things that Ecology doesn't need to address], I'm fine with keeping it verbal. For anything in buckets 2-4, we'll need to write them down eventually in order to address them. I can't remember more than two things after two days. For us, the benefits of written notes (being able to keep track of them and getting them addressed) outweighs the downsides. But EPA can work verbally and we can have internal Ecology notes if that's the best approach.

Andrew:

I agree that solutions fall into one or more of those buckets – great metaphor!

As an alternative to written descriptions, what do you think of the idea of having regular phone calls (weekly?) as needed before we meet on the 26th? We see some benefit in conveying the findings of our review team verbally. Thoughts?

Chris

Thanks for setting this up Chris. A written description of the areas of the TMDL that you see are problems, with possible solutions, would be great. Seems like the solutions fall into five buckets: (1) solve through EPA clarifying the TMDL in your approval, (2) solve through Ecology sending a clarification memo, (3) solve through an informal addendum to the TMDL, (4) solve through resubmitting a new TMDL with new public notice, or (5) solve through not approving certain listings.
