Subject: Planning Call- Monroe

.....
,,,,,,,,
Hi Kendall-

Wondering if you want to have a follow up planning call on your pending Monroe inspection. I need to know if you want to use the R10 lab, and when to have supplies ready for you. And I think Suzanne would like to know more details about your plan before she calls the school principal.

We spoke to Ecology today and they intend to visit on the 11th with Snohomish Co Health and WA DOH, but their focus will be on Classroom D.

It sounded like at the end of our last call you were thinking of coming out next week, so I wanted to touch base and get all the ducks in a row for you on our end.

Feel free to schedule a call whenever my calendar has a space, it's already pretty blocked for next week, but I do seem to have time on Monday. I thought we were shooting for a Monday 9am PST call, and I can still do that ☺

Thanks!

Michelle Mullin
