---

https://www.epa.gov/sites/production/files/2014-12/documents/holsum_dairy_elm_agstar_site_profile_508_022614.pdf - describes an operation that combines food waste and manure to be digested.
http://www.stateenergyoffice.wi.gov/docview.asp?docid=26381&locid=160 describes the same operation as the one above, but explains that the liquid portion of the combined effluent from the digester is land applied. The solids are used for bedding, mulch, etc.
