Scott: Per my March 20, 2012, email, EPA has prepared and EPA lawyers are now reviewing a Request for Information to determine whether case factors merit a formal enforcement response. I will huddle w/ my mgmt. to see if that would mean taking the case now prior to COE expending resources on a public notice review. My gut tells me we shouldn't be going ATF if we don't think they'd get a permit going through the front door.

Greg,

Good morning. I was wondering if you were still looking at the Blue Lake Campground violation on if you are going to take it? We have received additional information about fill along with an after-the-fact permit and the signed tolling agreement. I have not seen it yet as it was mailed to the district office and sent through legal council. I think before they sign the tolling agreement, they were waiting to see if the EPA still had interest.

Thank you
Scott
