Objective

EPA is interested in determining if each well (or collection of wells at a single well facility) in the compliance reports is a low production well site. Low production well sites are defined by the proposed amended rule as the "average combined oil and natural gas production for the wells at the site less than 15 barrels of oil equivalent (boe) per day averaged over the first 30 days of production ." See: 83 FR 52056.

https://www.federalregister.gov/documents/2018/10/15/2018-20961/oil-and-natural-gas-sector-emission-standards-for-new-reconstructed-and-modified-sources

"""Biennial monitoring (once every other year would be required for well sites with average combined oil and natural gas production for the wells at the site less than 15 boe per day averaged over the first 30 days of production ("low production well sites")"""

"""boe equals cubic feet gas/5658.53"""

Worksheet Description

Results Overview Results - Summary statistics for low production wells and well sites.

Low Prod Sites "Results - List of ""low prod"" site name, region, # well IDs with valid DI production data, estimated average first 30 BOE/day"

Non-Low Prod Sites "Results - List of non-""low prod"" site name, region, # well IDs with valid DI production data, estimated average first 30 BOE/day"

Invalid Well IDs "Results - List of well IDs that were not matched to, or contained no data in, the DI production data set and therefore not included in analysis to develop results"

ERG_Pivot ERG-created. Pivot table pulling from the Well IDs worksheet analysis. Combines Well IDs for each site. Flags individual wells with reported zero production and with low prod as defined above.

ERG_Well IDs "ERG-created. Unique combinations of facility ID and well ID, and standardization of well IDs for use in querying DI database. All columns with ""Revised"" in the title were revised by hand - blank cells indicate that no revision to the preceding column's formula was needed. Columns G through AF standardize the Well ID so that it can be matched to the DI Desktop production data."

DI Desktop DI Desktop data for all matched Well IDs

DI Definitions Relevant field names and definitions from DI database.

All Regions "Combines the data from all three spreadsheets received by EPA - Region 8, Region 6, and the multi-region spreadsheet. Shows all unique well site/well ID combinations, and all unique well sites."

Region 8 "Copy of OOOOa Reports Evaluation_mbm_R8_r7.xlsx

[used the ""Avg Survey Time"" worksheet (NOT ""Production"")]"

Region 6 OOOOa Compliance Report Spreadsheet_2019_jc_mm.xlsx

Multi OOOOa Compliance Report Spreadsheet_2019_R3_4_5_9_10.xlsx

Constants For reference throughout workbook.

Key Notes

"ERG excluded two types of ""invalid"" well-level records from analysis: "

(Type 1) Records not matched to DI Desktop data set

(Type 2) Records matched to DI Desktop data set for which first 30 day production was estimated to be zero based on available data

"To flag site as ""low production"", ERG: "

"(Step 1) Calculated average initial BOE/day production for each well, using each well's first 30 days of reported production estimated from DI Desktop data"

"(Step 2) Calculated a site-level average of values from Step 1, using data from all ""valid"" well-level records; assigned flag if value <15 BOE/day"

Results

Well-Level Count Percent Notes

# of Site Name-Well ID records "2,800"

# of invalid Site Name-Well ID records (i.e. invalid Well IDs) 562 20% These site names had Well IDs that were not API numbers or were incomplete API numbers.

# of unmatched Well IDs 288 10%

# of matched Well IDs "1,950" 70% Matched Well ID with an API Number in the DI Desktop data set

"# of matched Well IDs with nonzero first 30 day production, i.e., ""valid"" records" "1,835" 66% Records used in the Site-Level analysis

Site-Level Count Percent Notes

# of unique Sites "2,173"

# of Sites with 1+ matched Well IDs and nonzero first 30 day production "1,437" 66%

# of Sites with low production over the first 30 days 194 14% Averaging each well's first 30 days BOE/day; excl. unmatched wells and zero production wells

Site-Level: Region 3 Count Percent Notes

# of unique Sites 1

# of Sites with 1+ matched Well IDs and nonzero first 30 day production 1 100%

# of Sites with low production over the first 30 days 0 0% Averaging each well's first 30 days BOE/day; excl. unmatched wells and zero production wells

Site-Level: Region 4 Count Percent Notes

# of unique Sites 2

# of Sites with 1+ matched Well IDs and nonzero first 30 day production 0 0%

# of Sites with low production over the first 30 days 0 n/a Averaging each well's first 30 days BOE/day; excl. unmatched wells and zero production wells

Site-Level: Region 5 Count Percent Notes

# of unique Sites 9

# of Sites with 1+ matched Well IDs and nonzero first 30 day production 7 78%

# of Sites with low production over the first 30 days 2 29% Averaging each well's first 30 days BOE/day; excl. unmatched wells and zero production wells

Site-Level: Region 6 Count Percent Notes

# of unique Sites 641

# of Sites with 1+ matched Well IDs and nonzero first 30 day production 322 50%

# of Sites with low production over the first 30 days 48 15% Averaging each well's first 30 days BOE/day; excl. unmatched wells and zero production wells

Site-Level: Region 8 Count Percent Notes

# of unique Sites "1,438"

# of Sites with 1+ matched Well IDs and nonzero first 30 day production 1091 76%

# of Sites with low production over the first 30 days 139 13% Averaging each well's first 30 days BOE/day; excl. unmatched wells and zero production wells

Site-Level: Region 9 Count Percent Notes

# of unique Sites 82

# of Sites with 1+ matched Well IDs and nonzero first 30 day production 16 20%

# of Sites with low production over the first 30 days 5 31% Averaging each well's first 30 days BOE/day; excl. unmatched wells and zero production wells

Yellow highlight indicates key fields used in this analysis

Field Name Definition (note: HPDI = DrillingInfo)

ENTITY_ID HPDI assigned ID unique to a given property.

COMMON or CMN Internal use. Ignore this field.

DISTRICT The district within a given state the property is assigned.

PDEN_TYPE "Property Type (LEASE/UNIT/WELL/Completion/OTHER/UNKNOWN, etc...)."

PROD_TYPE (aka Well/Lease Type)

STATE "The state the property is in:

· In Texas this is well completion level for gas wells and leases for oil wells.

· In Louisiana, this information is at the well completion level. The volumes are allocated from the reported unit and lease volumes based on factors such as test data and well counts.

· In Oklahoma, this information is reported on the lease level. It is derived from production reported to a given PUN.

· In Kansas, this information is on a lease level.

· In Colorado, production prior to 1999 is allocated to the well level from the lease level. After 1999, all wells were reported on the well level.

· Other areas are currently reported at the well/completion level."

COUNTRY The country the property is located in.

PDEN_NAME (aka Lease/Well Name) Operator assigned lease/well name of the property.

API_NO API assigned number of a well on the property.

COMP_DATE (aka Completion Date) Latest Completion Date of the property.

OFFSHORE Indicates if the property is in offshore waters.

FIELD Field name the property is reporting from.

RESERVOIR Reservoir/Formation/Zone/Pool that the property is reported as producing from.

LEASE_NO State number assigned to the property or lease or unit the property is part of.

COMMINGLE_NO (aka Commingle) The commingle number assigned to the property by the state.

COMMINGLE_DATE The date the property was commingled.

COUNTY_ID API State and County codes for the property.

COUNTY County the property is in.

WELL_NO Operator assigned well number of the property.

CURR_OPER_ID HPDI assigned operator ID number

CURR_OPER_NO State assigned number of the operator of the property.

CURR_OPER_NAME Current reported operator of a property.

LIQ_GATH_NAME_1 The current primary liquid gather for a property.

GAS_GATH_NAME_1 The current primary gas gather for a property.

STATUS "The current status of the well such as Active, Inactive, TA, Shut In, etc..."

DRILL_TYPE "Indicates whether a property was drilled Horizontally, Vertically, Directionally, or Unknown Orientation."

ELEVATION Elevation of the property.

ELEVATION_TYPE "Identifies where elevation was measured from (Ground, RKB, MSL, etc...)."

TOTAL_DEPTH (aka Depth) Total depth the property was drilled to.

UPPER_PERF Upper perforation of the producing property.

LOWER_PERF Lower perforation of the producing property.

LIQ_GRAV "Gravity of liquid produced from the property.

· In Texas this is the gravity of the discovery well in the field.

· When available in Texas, the gravity is determined from the latest filed reports with the State Comptroller. "

GAS_GRAV Gravity of gas produced from the property.

LIQ_DAILY The average daily liquid production over the past 12 months.

GAS_DAILY The average daily gas production over the past 12 months.

LIQ_CUM (aka Liq Sum) Cumulative liquid production for this property that HPDI has on record.

GAS_CUM (aka Gas Sum) Cumulative gas production for this property that HPDI has on record.

LATITUDE Latitude the property is located in (On multi-well properties a well is picked to designate the location of the property).

LONGITUDE Longitude the property is located in (On multi-well properties a well is picked to designate the location of the property).

LOC_REMARK "Free form description of property location (typically description of Survey/Abstract, or footage calls to go with LOCATION field)."

FIRST_PROD_DATE "First date HPDI has reported production for the property (Even though date may be represented as mm/dd/yyyy, it is for the month listed, not just the individual day)."

LAST_PROD_DATE "Last date HPDI has reported production for the property (Even though date may be represented as mm/dd/yyyy, it is for the month listed, not just the individual day)."

LATEST_LIQ Liquid production in Bbls on LAST_PROD_DATE.

LATEST_GAS Gas production in MCF on LAST_PROD_DATE.

LATEST_WTR Water production in Bbls on LAST_PROD_DATE.

LATEST_WNCT "Number of reported producing wells completions active during LAST_PROD_DATE. In cases where a number is not permitted, 1 is substituted if there was any production. In Kansas, one is always used even though the exact number of wells on the lease is not always used. In almost all other cases, either only one well completion is reported per production number, or a well count is given for the property. In Louisiana where the production is allocated to the well completion level, 1 is always used even though more than one well may have been producing on the original lease."

PRIOR12_LIQ Oil (or Condensate) production reported in Bbls in the twelve months prior to the months included in LIQ_YEAR.

PRIOR12_GAS Gas production reported in MCF in the twelve months prior to the months included in GAS_YEAR.

PRIOR12_WTR Water production reported in Bbls in the twelve months prior to the months included in WTR_YEAR.

FIRST_LIQ Oil (or Condensate) production reported in Bbls during FIRST_PROD_DATE.

FIRST_GAS Gas production reported in MCF during FIRST_PROD_DATE.

FIRST_WTR Water production reported in Bbls during FIRST_PROD_DATE.

FIRST12_LIQ Oil (or Condensate) production reported in Bbls in the year beginning with FIRST_PROD_DATE.

FIRST12_GAS Gas production reported in MCF in the year beginning with FIRST_PROD_DATE.

FIRST12_WTR Water production reported in Bbls in the year beginning with FIRST_PROD_DATE.

WTR_CUM (aka Wtr Sum) Cumulative water production for this property that HPDI has on record.

WTR_YEAR Water production reported in Bbls in the twelve months ending with LAST_PROD_DATE.

LIQ_YEAR Oil (or Condensate) production reported in Bbls in the twelve months ending with LAST_PROD_DATE.

GAS_YEAR Gas production reported in MCF in the twelve months leading ending with LAST_PROD_DATE.

LOCATION Township Range (or MMS Block) of Property.

SECTION Section property is located in.

QTR_QTR Quarter-Quarter the property is located in.

MERID Meridian legal description is referenced from.

OCS_AREA MMS Offshore area that well is in.

GOR Gas/Oil Ratio of property.

YEILD Oil to gas ratio

RKB_ELEV The RKB Elevation for Federal Offshore properties ** Obsolete Soon.

WATER_DEPTH Depth of water above well in offshore waters

RES_VERT_DEPTH Vertical Depth of reservoir in Federal Offshore properties ** Obsolete Soon

MAX_VERT_DEPTH Maximum vertical Depth of well in offshore waters ** Obsolete Soon.

SPUD_DATE Latest date drilling commenced on property.

LATITUDE_BOTM Bottom hole latitude of property.

LONGITUDE_BOTM Bottom hole longitude of property.

LATITUDE_EX1 Location of the well in NAD 83

LONGITUDE_EX1 Location of the well in NAD 83

PRIOR_LIQ_CUM LIQ_CUM Prior to production commencing on FIRST_PROD_DATE ** Not currently in use.

PRIOR_GAS_CUM GAS_CUM Prior to production commencing on FIRST_PROD_DATE ** Not currently in use.

PRIOR_WTR_CUM WTR_CUM Prior to production commencing on FIRST_PROD_DATE ** Not currently in use.

BASIN The basin a property is located in. Currently these basins are defined by a county cross-reference. HPDI is in the process of defining the basin lines more accurately along geologic boundaries.

COMMON_OPER_NAME Operator name that has been modified to be consistent across states ** Not currently in use.

LESSEE_AVAIL Indicates if any lessee information is available for a given property.

PGC_AREA Potential Gas Committee assigned province that the production is located in.

QUAD_NAME Name of the USGS Quad

FIELD_NO State assigned field identifier number

ABSTRACT Abstract number (TX Only)

SURVEY Survey name (TX Only)

TX_BLOCK Block (TX Only)

TX_SEC Section (TX Only)

SUBSURVEY Subsurvey Name (TX Only)

TX_SCRAP Scrap Number (TX Only)

MONTHS_PRODUCED "Number of months a property has reported production of liquid, gas or water"

REPORTED_OPER_NAME Name of operator as reported to the state

FORMATION Formation that the property is reported as producing from

PEAK_GAS Peak gas volume from a properties production history

PEAK_LIQ peak liquid volume from a properties production history

LATEST_TEST_DATE Date the latest well test was reported

LATEST_FLOW_RES Latest flow pressure reported

LATEST_WHSIP Latest well head shut-in pressure reported

TWP the township the property is located in

RNG the range the property is located in

WELL_ID Internal use unique identifier

LEASE_ID internal use unique identifier

ALLOC_PLUS This column identifies whether an Entity ID is part of the TX Allocated dataset.

FIRST6_LIQ "The sum of months 1-6 of oil production, not the first 6 production records. The first month is the first month of the production of any type of product."

FIRST6_GAS "The sum of months 1-6 of gas production, not the first 6 production records. The first month is the first month of the production of any type of product."

FIRST6_WTR "The sum of months 1-6 of water production, not the first 6 production records. The first month is the first month of the production of any type of product."

FIRST24_LIQ "The sum of months 1-24 of oil production, not the first 24 production records. The first month is the first month of the production of any type of product."

FIRST24_GAS "The sum of months 1-24 of gas production, not the first 24 production records. The first month is the first month of the production of any type of product."

FIRST24_WTR "The sum of months 1-24 of water production, not the first 24 production records. The first month is the first month of the production of any type of product."

FIRST60_LIQ "The sum of months 1-60 of oil production, not the first 60 production records. The first month is the first month of the production of any type of product."

FIRST60_GAS "The sum of months 1-60 of gas production, not the first 60 production records. The first month is the first month of the production of any type of product."

FIRST60_WTR "The sum of months 1-60 of water production, not the first 60 production records. The first month is the first month of the production of any type of product."

FIRST6_BOE "The sum for the first 6 months of barrels of oil equivalent (BOE), not the first 6 production records. BOE is defined as = oil + (gas / 6) for any given month."

FIRST12_BOE "The sum for the first 12 months of barrels of oil equivalent (BOE), not the first 12 production records. BOE is defined as = oil + (gas / 6) for any given month."

FIRST24_BOE "The sum for the first 24 months of barrels of oil equivalent (BOE), not the first 24 production records. BOE is defined as = oil + (gas / 6) for any given month."

FIRST60_BOE "The sum for the first 60 months of barrels of oil equivalent (BOE), not the first 60 production records. BOE is defined as = oil + (gas / 6) for any given month."

FIRST6_MMCFGE "The sum for the first 6 months of million cubic feet of gas equivalent (MMFCGE), not the first 6 production records. MMCFGE is defined as = ((oil * 6) + (gas) / 1000) for any given month."

FIRST12_MMCFGE "The sum for the first 12 months of million cubic feet of gas equivalent (MMFCGE), not the first 12 production records. MMCFGE is defined as = ((oil * 6) + (gas) / 1000) for any given month."

FIRST24_MMCFGE "The sum for the first 24 months of million cubic feet of gas equivalent (MMFCGE), not the first 12 production records. MMCFGE is defined as = ((oil * 6) + (gas) / 1000) for any given month."

FIRST60_MMCFGE "The sum for the first 60 months of million cubic feet of gas equivalent (MMFCGE), not the first 60 production records. MMCFGE is defined as = ((oil * 6) + (gas) / 1000) for any given month."

DECL_3MO_LIQ "The percent decline from the peak month of oil production to the Nth month as a percent of the peak month. Ex: if the decline is for the 3rd month and May was the peak month, August would be the 3rd month used. The formula is: PercentDecline = 100 * ((ProductionMax - ProductionNthMonth) / ProductionMax). If production is 0 in the Nth month, or if we do not have production records for that month yet, the decline percentage is 100%."

DECL_3MO_GAS "The percent decline from the peak month of gas production to the Nth month as a percent of the peak month. Ex: if the decline is for the 3rd month and May was the peak month, August would be the 3rd month used. The formula is: PercentDecline = 100 * ((ProductionMax - ProductionNthMonth) / ProductionMax). If production is 0 in the Nth month, or if we do not have production records for that month yet, the decline percentage is 100%."

DECL_3MO_WTR "The percent decline from the peak month of water production to the Nth month as a percent of the peak month. Ex: if the decline is for the 3rd month and May

was the peak month, August would be the 3rd month used. The formula is: PercentDecline = 100 * ((ProductionMax - ProductionNthMonth) / ProductionMax). If production is 0 in the Nth month, or if we do not have production records for that month yet, the decline percentage is 100%. "

DECL_12MO_LIQ "The percent decline from the peak month of oil production to the Nth month as a percent of the peak month. Ex: if the decline is for the 3rd month and May was the peak month, August would be the 3rd month used. The formula is: PercentDecline = 100 * ((ProductionMax - ProductionNthMonth) / ProductionMax). If production is 0 in the Nth month, or if we do not have production records for that month yet, the decline percentage is 100%."

DECL_12MO_GAS "The percent decline from the peak month of gas production to the Nth month as a percent of the peak month. Ex: if the decline is for the 3rd month and May was the peak month, August would be the 3rd month used. The formula is: PercentDecline = 100 * ((ProductionMax - ProductionNthMonth) / ProductionMax). If production is 0 in the Nth month, or if we do not have production records for that month yet, the decline percentage is 100%. "

DECL_12MO_WTR "The percent decline from the peak month of water production to the Nth month as a percent of the peak month. Ex: if the decline is for the 3rd month and May was the peak month, August would be the 3rd month used. The formula is: PercentDecline = 100 * ((ProductionMax - ProductionNthMonth) / ProductionMax). If production is 0 in the Nth month, or if we do not have production records for that month yet, the decline percentage is 100%."

DECL_24MO_LIQ "The percent decline from the peak month of oil production to the Nth month as a percent of the peak month. Ex: if the decline is for the 3rd month and May was the peak month, August would be the 3rd month used. The formula is: PercentDecline = 100 * ((ProductionMax - ProductionNthMonth) / ProductionMax). If production is 0 in the Nth month, or if we do not have production records for that month yet, the decline percentage is 100%."

DECL_24MO_GAS "The percent decline from the peak month of gas production to the Nth month as a percent of the peak month. Ex: if the decline is for the 3rd month and May was the peak month, August would be the 3rd month used. The formula is: PercentDecline = 100 * ((ProductionMax - ProductionNthMonth) / ProductionMax). If production is 0 in the Nth month, or if we do not have production records for that month yet, the decline percentage is 100%."

DECL_24MO_WTR "The percent decline from the peak month of water production to the Nth month as a percent of the peak month. Ex: if the decline is for the 3rd month and May was the peak month, August would be the 3rd month used. The formula is: PercentDecline = 100 * ((ProductionMax - ProductionNthMonth) / ProductionMax). If production is 0 in the Nth month, or if we do not have production records for that month yet, the decline percentage is 100%."

DECL_60MO_LIQ "The percent decline from the peak month of oil production to the Nth month as a percent of the peak month. Ex: if the decline is for the 3rd month and May was the peak month, August would be the 3rd month used. The formula is: PercentDecline = 100 * ((ProductionMax - ProductionNthMonth) / ProductionMax). If production is 0 in the Nth month, or if we do not have production records for that month yet, the decline percentage is 100%."

DECL_60MO_GAS "The percent decline from the peak month of gas production to the Nth month as a percent of the peak month. Ex: if the decline is for the 3rd month and May was the peak month, August would be the 3rd month used. The formula is: PercentDecline = 100 * ((ProductionMax - ProductionNthMonth) / ProductionMax). If production is 0 in the Nth month, or if we do not have production records for that month yet, the decline percentage is 100%."

DECL_60MO_WTR "The percent decline from the peak month of water production to the Nth month as a percent of the peak month. Ex: if the decline is for the 3rd month and May was the peak month, August would be the 3rd month used. The formula is: PercentDecline = 100 * ((ProductionMax - ProductionNthMonth) / ProductionMax). If production is 0 in the Nth month, or if we do not have production records for that month yet, the decline percentage is 100%."

GOR_2ND_MO The gas to oil ratio (GOR) for the second month of production. = (gas/oil) * 1000.

GOR_LATEST_MO The gas to oil ratio (GOR) for the latest month of production. = (gas/oil) * 1000.

CFGED_PRAC_IP "Cubic feet of gas equivalent per day, practical initial production (PRAC IP). (Prac IP is the based on the second month of production to represent the first ""full"" month producing). Cubic feet of gas equivalent per day of the second month of production = (gas + (oil * 6)) * 1000."

CFGED_CUR_RATE Cubic feet of gas equivalent per day of the latest month of production. = (gas + (oil * 6)) * 1000.

MMCFGE_CUM The sum of the millions of cubic feet of gas per day equivalent. One month's worth is = (gas + (oil * 6)) /1000.

BCFGE_CUM The sum of the billions of cubic feet of gas per day equivalent. One month's worth is = (gas + (oil * 6)) /1000 / 1000 (or actually = CUM_MMCFGE/1000).

GOR_CUM Cumulative gas to oil ratio (GOR) = sum(gas) / sum * 1000.

MAX_ACTV_WELLS "The max number of wells ever on the producing entity. A producing entity may be a well, a lease, a field, a block, etc"

PEAK_LIQ_DAILY "Peak oil per day. If the number of ""Days On"" is available then it is used to calculate the amount per day, otherwise the number of days in the month is used."

PEAK_GAS_DAILY "Peak gas per day. If the number of ""Days On"" is available then it is used to calculate the amount per day, otherwise the number of days in the month is used"

PEAK_BOE Peak barrel of oil equivalent (BOE). BOE = oil + (gas / 6).

PEAK_MMCFGE Peak million cubic feet of gas equivalent (MMCFGE). MMCFGE = ((oil * 6) + gas) / 1000.

YIELD_2ND_MO "2nd month's oil to gas ratio (Yield). = (oil / gas) * 1000. 2nd month is the first month after the first month of production, not the second production record."

YIELD_LATEST_MO Latest month's oil to gas ratio (Yield). = (oil / gas) * 1000.

LIQ_PRAC_IP_DAILY "Oil practical initial production (PRAC IP) per day. (Prac IP is the based on the second month of production to represent the first ""full"" month producing) . So if Jan was the first production record and the second was Sept, Sept would be considered the second month for Prac IP calculations."

GAS_PRAC_IP_DAILY "Gas practical initial production (PRAC IP) per day. (Prac IP is the based on the second month of production to represent the first ""full"" month producing). So if Jan was the first production record and the second was Sept, Sept would be considered the second month for Prac IP calculations."

LIQ_MAX_DAILY This column was a duplicate of PEAK_LIQ_DAILY and thus removed from the application with a version number >= 6.0.1.2. The column still exists in the database but is populated with all zeros.

GAS_MAX_DAILY This column was a duplicate of PEAK_GAS_DAILY and thus removed from the application with a version number >= 6.0.1.2. The column still exists in the database but is populated with all zeros.

WTR_DAILY "Average water per day. If ""Days On"" is available it is used for the calculations, otherwise the number of days in the month is used."

BOE_CUM Cumulative barrels of oil equivalent (BOE). One month's BOE = oil + (gas / 6).

MAX_WTR_DAILY "Max water per day. If ""Days On"" is available it is used for the calculations, otherwise the number of days in the month is used."

BOE_PRAC_IP "Barrel of oil equivalent (BOE) practical initial production (PRAC IP). (Prac IP is the based on the second month of production to represent the first ""full"" month producing). BOE = oil + (gas/6). If ""Days On"" is available it is used for the calculations, otherwise the number of days in the month is used. So if Jan was the first production record and the second was Sept, Sept would be considered the second

month for Prac IP calculations."

PEAK_GAS_MONTH Month in which the peak gas production occurred

PEAK_GAS_MONTH_NO "The month number of the peak volume. If it occurred in the first month of production then it is 1, in the second it is 2 and so on. It should be noted that the first month for this calculation is the month that it first began producing gas, not just any product."

PEAK_LIQ_MONTH Month in which the peak oil production occurred

PEAK_LIQ_MONTH_NO "The month number of the peak volume. If it occurred in the first month of production then it is 1, in the second it is 2 and so on. It should be noted that the first month for this calculation is the month that it first began producing oil not just any product."

PEAK_DAILY_GAS_MONTH "Month in which the peak daily gas production occurred. If ""Days On"" is available it is used for the calculations, otherwise the number of days in the month is used."

PEAK_DAILY_GAS_MONTH_NO "The month number of the peak daily volume. If it occurred in the first month of production then it is 1, in the second it is 2 and so on. It should be noted that the first month for this calculation is the month that it first began producing gas, not just any product."

PEAK_DAILY_LIQ_MONTH "Month in which the peak daily oil production occurred. If ""Days On"" is available it is used for the calculations, otherwise the number of days in the month is used."

PEAK_DAILY_LIQ_MONTH_NO "The month number of the peak daily volume. If it occurred in the first month of production then it is 1, in the second it is 2 and so on. It should be noted that the first month for this calculation is the month that it first began producing oil not just any product."

PEAK_BOE_MONTH Month in which the peak barrels of oil equivalent (BOE) production occurred. BOE= oil + (gas / 6).

PEAK_BOE_MONTH_NO "The month number of the peak BOE volume. If it occurred in the first month of production then it is 1, in the second it is 2 and so on. It should be noted that the first month for this calculation is the month that it first began producing oil or gas."

PEAK_MMCFGE_MONTH Month in which the peak MMCFGE production occurred. MMCFGE = (gas + oil * 6)) /1000.

PEAK_MMCFGE_MONTH_NO "The month number of the peak MMCFGE volume. If it occurred in the first month of production then it is 1, in the second it is 2 and so on. It should be noted that the first month for this calculation is the month that it first began producing oil or gas."

ExcelTemp7 Comments

Comment 1: ERG:

find+replace for " " , replace with blank

Comment 15: ERG:

Manually populated. 1 = invalid ID. 0 = valid ID.

Comment 11: ERG_Casey Pickering:

Min 10 chars for valid API number (2=state, 3= county, 5=unique well ID)

Comment 2: Casey Pickering:

If dates are invalid (1/1/1900), assigns 30 days as default

Comment 12: ERG_Casey Pickering:

Record eligible to evaluate against 15 boe/day site-level threshold if it has:

1) First 30 days nonzero prod is within "FIRST_" or

2) First 30 days nonzero prod is within combo of "FIRST_" and "PRAC_IP"

Comment 6: Cox, John:

These were the well IDs provided by the facility. The notation is unlike any other seen during my review.

Comment 14: Cox, John:
