This is the case I was talking to you about Dave. They take all of Walmarts old stuff from all over the country. Big old mess - worse than Carmen.

Candace and I have a very nice discussion about Greenleaf!! She actually went to all 3 facilities. That was good b/c we didn't know much about the other 2 locations. MDR was out on Tue viewing the facility on Palm Rd & the Crowder facility. She mentioned that the Palm Rd facility receives 60 truckloads per month with only 6 employees. The Crowder facility is mainly empty. She also mentioned that it was an enclosed building, unlike the one on Palm Rd. She visited the Pineville sight on Wed. Its primarily a bagging facility with two machines that currently aren't working. There is a man working on the machines, but no one else. This site has about 35 semis worth of charcoal, pesticides, and topsoil and was formerly

a charcoal briquette manufacturing facility. This facility seems to be in a testing phase. Candace said Greenleaf is contacting other companies to market their product, but she doesn't know how they can supply product with no working machines. MDR is issuing a Notice of Violation for RCRA violations within the next 10 days. I asked her to copy you and me on that.
