> Hi Jon – here is the first rough draft I have developed for the Water QASP Addendum for Arkema. In addition, I have included the 8260 and 8270 list we will be submitting to the labs. This list was established using the CLP SOM List. Please approve the attached list of compounds to ensure we are requesting the analytes required. I will further modify this addendum once additional information is received concerning the Naphtha analyses methodology and collection requirements. Thank you - Michelle
