Subject STAR Grant RD830758

Hi Philippe,

I hope you're doing well and that you had a nice holiday.

I wanted to touch base with you to let you know that I am back at EPA, and I am returning to the grant responsibilities that I had before leaving the office for the past year. So, as of today, I will resume as project officer for your STAR grant.

I'm working on updating my files, and I'm also in the process of getting information from Montira about the grants that she managed for me over the past year.

In the meantime, if you have any grant-related questions or concerns please feel free to contact me. I look forward to working with you again.

Thanks,

Kacee

Dear Dr. Mustra,

Please find attached copies of the two reports requested for year 2005 for EPA STAR Grant R-830758.
Also included are copies of the recent IRB approvals from HSPH and the Faroe Islands.
Hard copies of these materials have been sent to you via regular mail.

Please let me know if you have any questions, comments, or concerns.

Thank you,

Subject RE: Annual Report for STAR Grant R-830758

Dear David - Thank you for getting in touch. Yes, we are in the process of collating a report to you. Given the nature of this study, all we can report at this time will be descriptive. All serum samples have now been collected, but the chemcial and antibody analyses will take some time, and only then, of course, comes the data evaluation. My assistant, Jennifer Pintabone, and I look forward to talking with you soon. Best regards - Philippe

Subject New Project Officer

Hi Philippe,

I hope you're doing well and that you had a nice holiday.

Just wanted to touch base with you to let you know that the interim project officer for your STAR grant will be David Mustra. David is a new project officer here in NCER and will be taking over management of your grant while I'm participating in the fellowship program on Capital Hill. I've copied him on this email so you'll have his email contact information, and I'll ask him to send you an introductory email so you'll have his telephone information.

I also wanted to remind you that the annual reports for your grant (both annual performance report and annual web summary report) will be due between 05/05/2005 and 08/05/2005. When you send these reports in, please also send copies of any grant related publications, published abstracts, student theses, etc.

I also noticed that the most recent IRB renewal I have on file for your STAR grant project expired a few months ago. Please send David a copy of the most recent IRB renewal as soon as possible.

My last day in the office will be tomorrow, Dec. 30, so starting then, please contact David about any grant related issues.

Thanks, and best wishes for the new year!

- Kacee

Subject RE: ISEA and SRA Meetings

Hi Philippe,

Please keep David up to date about the meeting you mentioned you would be having in the spring related to the STAR grant. It might be a good idea for David to attend at that time and conduct a site visit.

Thanks,
Kacee

Subject: RE: FWD: STAR Human Health Symposium

Hi Kacee,
The last week of October must be the busiest time of the year! I had committed myself as co-organmizer of the Italy conference a year ago, the Faroese are doing clinical exams at the same time (and wanted me to be there), and there is an NIH meeting as well. I can't change the clinical schedule, and I don't have any colleagues that I can send - I'm only in the process of hiring a postdoc. Still, because we are conducting a prospective cohort study, there is not much new that we can say at this early point, where we are only collecting information. So my absence may not be a serious loss. However, I myself am distressed, because I'm missing a chance to see you and the other grantees. The situation has not changed since we talked last, so I have to send my regrets. Next year should be better, although my calendar is already filling up (last week of October at Collegium Ramazzini, second week of November at EFSA, and the following week at IPCS). So as soon as you have the dates, pls let me know. We shall produce a summary with an update of the current status of the work. It will be ready next week. With my apologies and best regards - Philippe

Subject: RE: EMD: STAR Human Health Symposium

Hi Karen,

The first week of October would be the busiest time of the year. I had committed to co-organizer of the Italy conference a year ago, the lecture was quite clustered around the same time (and wasted me to be frank), and there was NIH meeting as well. I can't change the attitude adjustment and I don't have much time left - I'm early in the process of getting a speaker.

Unfortunately, because we are counting a broadcastive report early, there is no chance of seeing Jon and the other directors. So we speaker may not be a serious loss. However, I would be interested, because I'm trying a chance to see Jon and the other directors. I have to send us information. So we speaker may not be a serious loss. However, I would be interested, because I'm trying a chance to see Jon and the other directors. I have to send us the attention has not changed since we talked last. So I have to send us redtape. Next year should be better, although we anticipate to attend little up first week of October at conference Kamaxzuri, second week of November at ESRA, and the following week at ISCS. So as soon as Jon gets the dates, let me know, we shall produce a summary with an update of the current status of the work. It will be ready next week. Mind us apologies and best regards -

Subject: Fw: STAR Human Health Symposium

Hi Philippe -

I just spoke with Jennifer Pintabone about the upcoming STAR Human Health Symposium. She had contacted me because she noticed that your name still appeared on the draft agenda. I kept your name on the agenda because I was waiting to hear from you about whether or not a co-investigator or a post-doc working with you could come to present the poster in your place (please see email chain below). I remembered that you would not be able to attend because of a conflict, but if possible it would be nice to represent your work through a staffed poster. If no one is available to staff the poster at this Symposium, I will remove your grant from the agenda. Please let me know ASAP if there is no one you can send in your place.

I anticipate having another STAR Symposium next year, so please plan to attend (it will most likely be in October or November 2005, though this is not yet definite). Participation in these types of meeting is a requirement per the terms and conditions of your STAR grant, and more importantly, it's important to communicate the results of your publically-funded research to EPA - and other - scientists.

Please let me know ASAP whether or not you are able to send a co-investigator to staff a poster. Once I hear from you I will make changes to the agenda as necessary.

Thanks,

Kacee

Thanks!

Hi Philippe -

I just spoke with Jennifer Pritchard about the upcoming STAR Human Health Symposium. She had contacted me because she noticed that your name fell sideways on the draft agenda. I told your name on the agenda because I was willing to meet from you about whether or not a co-investigator or post-doc would help you could come to present the poster in your place (please see email chain below). I remembered that you would not be able to attend because of a conflict. But I possible it would be nice to represent your work through a student poster. It no one is available to staff the poster at this Symposium I will remove your guest from the agenda. Please let me know ASAP if there is no one you can send in your place.

I anticipate having another STAR Symposium next year, so please plan to attend (it will most likely be in October or November 2005, though this is not yet definite). Participation in these types of meetings is a requirement for the issues and conditions of your STAR Grant, and more importantly, it's important to communicate the results of your participatory-funded research to EPA - and other - scientists.

Please let me know ASAP whether or not you are able to send a co-investigator to staff a poster. Once I hear from you I will make changes to the agenda as necessary.

Thanks!

Washington, DC 20460

Dear Kacee:

EPA STAR Grant R830758-01-0

As agreed by email, I am now sending you the remaining information that you have requested. The delay in providing this material is due to the fact that I am changing my academic appointment to Harvard School of Public Health from 1 January 2003, and the information submitted therefore needed to reflect this change so that the grant can be awarded to my new institution.

Because of the change in appointment, and because part of the laboratory work carried out at Boston University will now require a subcontract, form 424 has been revised, and the budget and the budget justification have been updated. Although the subcontract triggers additional indirect costs, you will see that the budget is only minimally larger than the one first submitted, and the total remains below the ceiling of $750,000 for the three years.

As previously discussed, the very supportive peer review does not necessitate any changes in the project protocol. However, we have again discussed the time schedule in detail within the project group. Given that the project should preferably be completed in three years, and that the children were born during a two-year period, a small change seems indicated in regard to the scheduling of the second clinical examination, i.e., the one following the vaccinations at age 5 years (see top of page 16 of the project description). We prefer to examine the children again 4-8 weeks after the immunization and not wait until the children are 6-6.5 years old. The rationale behind this change is that the antibody response will be complete by four weeks, and the titer will certainly remain unchanged during the following several weeks. Thus, by taking the second serum sample 4-8 weeks after the vaccination, the project is more likely to be completed within the 3-year duration of the grant, and we will also avoid any potential problems in having to adjust for the time interval between vaccination and blood sampling. I hope that you will agree that this change is appropriate and may improve the quality of the project.

Tel: 617 432-1260 Fax: 617 432-3441

You have already received my abstract and quality plan by email. The protocol is being considered by the Human Subjects Committee at Harvard School of Public Health, and I shall let you know when I have heard the outcome. I therefore hope that you are now in possession of the materials that you need to proceed with the grant award. I would be grateful if the grant could start in the very near future, preferably by 1 March 2002.

Yours sincerely,
