>
> > This is the statement approved by the DHHR's BPH and the West Virginia Governor's Office communications teams:
>
> > The Bureau for Public Health has reviewed the information regarding PFOA and PFOS that the U.S. EPA released today in a lifetime drinking water health advisory and continues to closely monitor the situation. BPH is working with the town of Vienna to implement appropriate precautions, which will include a Do Not Drink advisory until additional testing and evaluation takes place. The Department of Health and Human Resources and the Department of Military Affairs and Public Safety will assist those affected by the EPA's advisory, and the state will assist in securing installation of new filters.
>
> > Two other public water systems in West Virginia, located in Parkersburg and Martinsburg, were also affected by the new EPA thresholds. They have taken immediate action by using an additional source to provide water.

Kelley J. Gillenwater
