Subject: Deschutes QAPP & data questions
Attachments: Deschutes TMDL QAPP_ECY_Dec 2009.pdf

Hi Ben,

I'm trying to help Amy King get set up to start working on the Deschutes replacement TMDLs, including developing a QAPP for the work. I'm wondering if you were involved at all in reviewing the original TMDL QAPP (attached), or if you know anything about it? Also, what is your take on using Ecology's QAPP and modifying it versus writing our own and following an EPA format? Does EPA have a standard format?

Another question I have is about using outside data. Does EPA have any guidance on acceptance criteria for using outside data? We will be using data found in Ecology's EIM database, but have also received data from Thurston County, and may receive from other entities as well.

Any advice is appreciated, and I'm also cc'ing Chris in case he wants to chime in. Feel free to call if that is easier.

Thanks!
