Subject:	Nov/Dec/Jan lead design value and Jan 28 monitoring data
Date:	Friday, February 08, 2013 1:44:23 PM
Attachments:	Exide data Jan 28-13.xlsx

Attached is the lead monitoring data for the Frisco area. The design value for the 3 month period of November 2012, December 2012, and January 2013 is 0.08 micrograms per cubic meter.

Also included in the revised table is the monitoring data for January 28th, the monitor with the highest reading was the Eubanks monitor with a reading of 0.25491 micrograms per cubic meter. The wind speed for the 28th was between 5.8 and 13.7 miles per hour, with a maximum wind gust of 27.2 mph. The wind direction was very consistent between 169 and 179 degrees, or just slightly east of south.
