NOTE:
[1]Organic compounds and Perfluorinated Compounds were reported in ug/kg and ng/g respectively; calculations were used to adjust these values to mg/kg when
[2] RSLs (May 2019) as presented at EPA website at https://www.epa.gov/risk/regional-screening-levels-rsls-generic-tables (target hazard quotient of 1.0).
[3] The exceed column is the maximum detected concentration divided by the comparison criteria. Only comparisons where the maximum detected concentration exceeds the comparison criteria are presented.
-- = Not applicable or not available.
ug/kg = Microgram(s) per kilogram.
mg/kg = Milligram(s) per kilogram.
ng/g = Nanogram(s) per gram.
