Codes in CERCLA RQ column:

PMN This EHS chemical was identified from a Premanufacture Review Notice (PMN) submitted to EPA. The submitter has claimed certain information on the submission to be confidential, including specific chemical identity.

& Indicates that no RQ is assigned to this generic or broad class, although the class is a CERCLA hazardous substance. See 50 Federal Register 13456 (April 4, 1985).

@ Releases in amounts less than 1,000 pounds per 24 hours of nitrogen oxide or nitrogen dioxide to the air that are the result of combustion and combustion related activities are exempt from the notification requirements of EPCRA section 304 and CERCLA. A1806

§ The adjusted RQs for radionuclides may be found in worksheet “Radionuclides” this Excel file.

Codes in Name column:

1 Sulfur monochloride (formula S2Cl2) is listed with an incorrect CAS number of 12771-08-3, which is found on the CERCLA Hazardous Substances list. The correct CAS number should be 10025-67-9 according to the Chemical Abstract Services. However, the List of Lists has sulfur monochloride with both CAS numbers because CAS number 12771-08-3 has not been changed on the CERCLA list.

†† No reporting of releases of this CERCLA hazardous substance is required under CERCLA if the diameter of the pieces of the solid metal released is larger than 100 micrometers (0.004 inches).
††† The RQ for asbestos is limited to friable forms only.

a Benzene was already a CERCLA hazardous substance prior to the CAA Amendments of 1990 and received an adjusted 10-pound RQ based on potential carcinogenicity in an August 14, 1989, final rule (54 FR 33418). The CAA Amendments specify that "benzene (including benzene from gasoline)" is a hazardous air pollutant and, thus, a CERCLA hazardous substance.

b The CAA Amendments of 1990 list DDE (3547-04-4) as a CAA hazardous air pollutant. The CAS number, 3547-04-4, is for the chemical, p,p′dichlorodiphenylethane. DDE or p,p′-dichlorodiphenyldichloroethylene, CAS number 72-55-9, is already listed in Table 302.4 with a final RQ of 1 pound. The substance identified by the CAS number 3547-04-4 has been evaluated and listed as DDE to be consistent with the CAA section 112 listing, as amended.

c Includes mineral fiber emissions from facilities manufacturing or processing glass, rock, or slag fibers (or other mineral derived fibers) of average diameter 1 micrometer or less.

d For CERCLA hazardous substances, includes mono- and di-ethers of ethylene glycol, diethylene glycol, and triethylene glycol R-(OCH2CH2)n-OR′ where: n = 1, 2, or 3; R = alkyl C7 or less; or R = phenyl or alkyl substituted phenyl; R′= H or alkyl C7 or less; or OR′ consisting of carboxylic acid ester, sulfate, phosphate, nitrate, or sulfonate. Note: the phrase "mono- and di-ethers of ethylene glycol, diethylene glycol, and triethylene glycol" is not included the TRI definition, but the defined formula is the same for the CERCLA and TRI listing and by formula definition would cover ""mono- and di-ethers of ethylene glycol, diethylene glycol, and triethylene glycol."
e Includes organic compounds with more than one benzene ring, and which have a boiling point greater than or equal to 100 °C.

Codes in Section 313 column
+ Member of EPCRA Section 313 PAC category.
# Member of EPCRA Section 313 Diisocyanate category.

c Although not listed by name and CAS number, this chemical is reportable under one or more of the EPCRA section 313 chemical categories.

s Indicates that this chemical is currently under an administrative stay of the EPCRA section 313 reporting requirements, therefore, no TRI reports are required until the stay is removed.

! Member of the EPCRA section 313 Dioxin and dioxin-like compounds category.

X Indicates that this is a second name for an EPCRA section 313 chemical already included on this consolidated list. May also indicate that the same chemical with the same CAS number appears on another list with a different chemical name.
$ Member of the EPCRA section 313 Nonylphenol category.

^ Member of the EPCRA section 313 Hexabromocyclododecane category.

% Member of the EPCRA section 313 Nonylphenol Ethoxylates category.
