Subject: Re: Public Health Support - chemical plant fire

Okay I will alert our team to be ready to provide remote support. I will also ask my team what resources they can provide to help the response and bolster the local health authority and state.

I believe right now that remote support would probably suffice, since we haven't seen any measurements above any action levels. But I'd also respect input from your team as if they believe a site visit would be beneficial.

Adam

Patrick,

This email is a request for assistance. I'm attaching the Initial POLREP with incident specific information. I've spoken with TCEQ, who is coordinating with DSHS to provide assistance. I'm not able to click on your link; appreciate if you have an alternate method to contact them, if needed.

EPA data is being posted on the EPA website www.epa.response.gov/south4groupfire.
There is a link to the TCEQ website with their data.
We have portal access to TPC's data via their portal.

Thanks
Adam

Subject: Public Health Support - chemical plant fire

OSC Adams,

ATSDR is prepared to provide public health support for Unified Command and the local health authority. We can assist in addressing risk exposure question, review environmental data, assist with messaging, and provide toxicology resources. We just need a request to support, if needed. Please open the link below. The Poison Control is advertising in social media the use of the Poison Control Center hot line.
