RE: Passaic River Superfund Clean up

Dear Administrator Enck,

I urge you to strongly push for the immediate release of the Focused Feasibility Study (FFS) and the Proposed Plan for the lower Passaic River. The members of the Community Advisory Committee (including me) and other interested persons have been waiting for this document for years. For months, USEPA representatives have discussed the impending release of the FFS. At our January CAG meeting, we were told that January 30th was the planned release date and our committees met and worked hard to prepare for what we anticipated would be public hearings and outreach efforts related to the release of the FFS. We now have an indefinite delay in the release of the FFS and Proposed Plan. I hope you will push very strongly for its prompt release.

Sincerely,

Kirk R. Barrett

Dr. Kirk R. Barrett, PE
