September 9, 2016

John Mannix
Assistant Superintendent for Operations
Monroe School District
200 E. Fremont Street
Monroe, WA 98272

Subject: Corrective Action Plan – Sky Valley Education Center

Dear Mr. Mannix,

The Snohomish Health District has reviewed your letter and the associated documents of 9/9/2016 and agrees that based on the information provided, conformance with the Corrective Action Plan has been achieved. Consequently, SHD has no objection to use of the facility next week for the purposes you describe (orientation, planning, etc.).

In response to your report, EPA has raised seven issues you will need to adequately address:

1. Final QA/QC data for the wipe samples of small gym floor and exterior of Annex Building.
2. Area (in square feet) of small gym floor and area exterior of Annex building that were re-cleaned.
3. Rational for collecting one sample of the floor in the small gym.
4. Please report all air sample quantitation limits/reporting limits as ng/m^3.
5. Were the wipe samples collected after caulk removal collected before or after epoxy encapsulation?
6. Explain the filter analysis procedure used for air samples run under Method TO-10A.
7. Report whether the air samples were collected under normal building HVAC operating conditions?

SHD expects that you will address these issues no later than 9/12/16. In the unexpected event your responses cause EPA to question the results or determine that a health risk may exist, Snohomish Health District may alter our determination that the school can operate.

Additionally, as there are expectations of ongoing monitoring and associated action plans that need to be addressed, the Snohomish Health District will be preparing a letter summarizing these conditions and issues. This letter will be sent to you no later than Thursday 9/16/16.

I thank you for your cooperation through this situation and appreciate the School District's continued commitment to student safety.

Should you have any questions, please contact me at 425.339.8769.

Sincerely,

Kevin Plemel
Environmental Health Operations Manager
