She can't just ask me for things out of the blue a week before a meeting.

Rob,

We will be shipping the 4 TB hard drive tomorrow -we stripped the routines from the code and prepared separate scripts-.

Can you provide prior to the March 6 meeting:

- Bed mapping at subsurface layers for dioxin
- Bed maps for PCBs (all layers)

And prior to the next modeling meeting can you also send us:

- Updated ST, CFT code, inputs and a sample output
- Any updates to the carbon simplification

If your modelers have any questions, please have them contact James. Thanks,

eugenia

So next week?

>>> "Naranjo, Eugenia" <Naranjo.Eugenia@epa.gov> 2/27/2014 9:54 AM >>>

We have a 4 TB disk with the hydrodynamics/sediment transport, collapsed hydrodynamics/sediment transport and contaminants. We are transferring the carbon model to a second 2 TB disk.

What's the status of the modeling files that EPA agreed to provide?

Robert Law, Ph.D.

Yes, we need a meeting on sediment transport since you have made substantial updates to the model and incorporated our comments and another one on contaminant fate because we need to get into the details of the planned modifications to the model. I will send you some proposed dates when our modelers are available.

Thanks,

eugenia

Should we try to get 1 or 2 modeling meetings this month?
