Subject: Re: Press request - Juneau County gw investigation

I'm checking with Pat Kuefler but I don't think there is anything new and we are not attending the meeting.

Thanks,

Linda

> Hi Linda - WSAW News in Wasau, WI requested to speak with someone about our sampling results for a story running tomorrow evening. The reporter doesn't have specific questions about the results and just asked for a general interpretation. My thought is to send her the language from our website and direct her to the sampling report posted there. That update is from August - is there anything to add?

> *EPA has finalized its Sampling Inspection Report related to the results of May 2018 groundwater testing conducted in Juneau County. EPA's tests – and others conducted by the county health department – found elevated levels of nitrates. The Sampling Inspection Report summarizes EPA's groundwater screening investigation with descriptions of sampling preparation and methods and discussions of sampling results including maps. Region 5 continues to work with Wisconsin Department of Natural Resources to determine appropriate next steps.*

> I've been meaning to follow up with you about what you found from testing the groundwater in Juneau and Wood Counties. Would you or someone have availability today or tomorrow to go over your findings with us either by skype or phone? I know there's a meeting tomorrow evening in Wisconsin Rapids for residents and the law firms that are now representing them. Will you have anyone attending that meeting?
