---

I have reached out to Coast Guard Sector LIS and they have supplied me with anchorage location data. There is one site of interest to our project, Niantic-New London that we can plot.

Subject: RE: Anchorage Coordinates

Joe,

Anchorage grounds and Special Anchorages for Sector Long Island Sound's are outlined in 33 Code of Federal Regulation Parts 110.50 and 101.147. I've attached some documents that outline our anchorage information and coordinates. AIS data from 2005 is the most recent we have here. Our databases don't capture the information in an easy to manipulate manner. Our Navigation Center in Virginia tracks AIS data but what they can provide isn't really user friendly unfortunately. Let me know if you need anything more! Amy

Best Regards,
