Ken Miller below needs to be emailed or called back to inform him whether temp and exit gas velocity parameters are available on CAMD's website. He cannot find them and was told by someone they are available somewhere… CC me on email back to him.

Subject: DNR SO2 Boundary Recommendation

Becky and Mike,

It was nice seeing you at the CPP stakeholder meeting this morning. Attached is DNR's final SO_2 boundary recommendation for the July 2016 designations, which is up for adoption at tomorrow's MACC meeting in St. Louis. As I mentioned, DNR decided to go with an unclassifiable recommendation for Labadie.

We'll be in touch soon about a possible meeting to discuss this and other issues related to SO_2.

Regards,
Ken
