Thanks Mark. I don't have Chemsketch. Is there another software that opens the image?

If not, I have the original Wang et al. image you found in there. Which would do for now.

Here is a Chemsketch of the Solvay n,m compounds. I drew 1,1; 1,0; 0,1; and 2,0 only.

I cannot use Chemsketch right now so I cannot put these into a PPT slide.
