EPA Collaboration with Brazil

Brazil's size (the 5th largest country in the world and the largest in Latin America), large population, and high levels of economic growth and urbanization make Brazil a priority country for U.S. environmental cooperation. EPA and Brazil began formal cooperation in 1987, with an agreement between EPA and the Sao Paulo State environmental agency, the Sao Paulo Sanitation Technology Company (CETESB). EPA works with national and local environmental agencies in Brazil to exchange information on environmental management and risk reduction in areas of mutual interest.
